Notes

Creatures in the “Any” column only appear in another column if listed that way. For example, the Demon Lords were listed as “Any (Abyss)” and appear in the “Any” column as well as the “Abyss” column. The Aerial Servant, listed as “Any” only appears in the “Any” column.

Creatures that were listed with multiple climes within the same terrain (such as “Forest (any)”) appear in a column of that type (“Forest, (any)”) as well as all of the columns associated with the terrain. For example, Baccae are listed as “Forest (any)” and appear in the “Forest, Cold”; “Forest, Temperate”; and “Forest, Warm” columns as well.

Creatures listed in many terrains (such as “Any Land”) appear in that column (“Land, any”) as well as every terrain and clime column that matches the description (Deserts, Forests, Hills, Mountains, Plains, and Swamps).

Creatures listed in many climates (such as “Cold, Any”) are listed in all similar climes in each terrain as well.

Hazards that were otherwise unclassifyable have been put in the last column (“Other”) that list their respective terrains.
