MONSTERS A-Z

They lurk in the shadows. They beat down the doors. They wrap their slimy tentacles around you and drag you down into a hole. They come with fire, axes, spells, and teeth. They are the creatures of DUNGEONS & DRAGONS®, and they are yours to command.

Monster Vault is a reference for Dungeon Masters that contains the essential monsters of the DUNGEONS & DRAGONS game. Inside the pages of this book, you’ll find a codex of monsters and villains to throw at the heroes as they delve into dungeons or stage attacks on planar fortresses. You can use this book as a reference when running published adventures or as a tool when designing your own encounters.

Most monster entries in this book begin with a two-page spread consisting of an illustration of a monster and some lore about its origin, habits, allies, and ecology. You’ll also find information on how to run the monster in both combat and noncombat encounters, as well as details about adventure and campaign hooks related to a monster.

Following the illustration and lore is a series of monster statistics blocks representing different varieties of a type of monster. You can use these statistics blocks together or with other monsters described in a creature’s lore. You might also mix and match monsters as appropriate for your campaign or adventure. The monsters have a variety of roles and levels, allowing you to utilize the creatures throughout the heroes’ adventuring careers.

MONSTER STATISTICS BLOCKS

Monster statistics are presented in a format designed to be easy to use and reference. This section describes the typical components of a statistics block.

Name

Each statistics block begins with the creature’s name. Most names include the general name of the monster type plus an additional descriptor, such as “gith-yanki warrior” or “deathpledged gnoll.” In some cases, these descriptive names reflect titles adopted by the monsters themselves, perhaps reflecting a particular status in the monster’s society. Many others are descriptions applied to the monster, often by its victims.
Level and Role

A monster’s level and role are tools for you to use when building an encounter. The Dungeon Master’s Kit explains how to use these tools.

Level: A monster’s level summarizes how tough it is in an encounter. Level determines most of the monster’s statistics as well as the experience point (XP) award the PCs earn for defeating it.

Role: A monster’s role describes its preferred combat tactics, much as a character class’s role suggests tactics for characters of that class. Monster roles are artillery, brute, controller, lurker, skirmisher, and soldier.

A monster might have a second role: elite, solo, or minion. Elite monsters and solo monsters are tougher than standard monsters, and minions are weaker. For the purpose of encounter building, an elite monster counts as two standard monsters of its level, a solo monster counts as five, and four to six minions count as one—four at heroic tier (levels 1–10), five at paragon tier (levels 11–20), and six at epic tier (levels 21–30).

In addition, a monster might have the leader subrole, indicating that it grants some sort of boon to its allies, such as a beneficial aura.

Size

A creature’s size determines its space as well as its reach. A creature might have a greater reach depending on the characteristics of its body.

<table>
<thead>
<tr>
<th>Monster Size</th>
<th>Space</th>
<th>Typical Reach</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tiny</td>
<td>1/2 × 1/2</td>
<td>0</td>
</tr>
<tr>
<td>Small</td>
<td>1 × 1</td>
<td>1</td>

<tr>
<td>Medium</td>
<td>1 × 1</td>
<td>1</td>
</tr>
<tr>
<td>Large</td>
<td>2 × 2</td>
<td>1 or 2</td>
</tr>
<tr>
<td>Huge</td>
<td>3 × 3</td>
<td>2 or 3</td>
</tr>
<tr>
<td>Gargantuan</td>
<td>4 × 4 or larger</td>
<td>3 or 4</td>
</tr>
</tbody>
</table>

Space: This is the area (measured in squares) that a creature occupies on the battle grid.

Reach: Typically, the reach of a creature using a melee attack power is the same as the range entry of that power. If you need to determine a creature’s reach for some other purpose, such as for a grab attack or an attempt to pick up an object, refer to the table above.

Even if a creature’s reach or melee range is greater than 1, the creature can’t make opportunity attacks against targets that aren’t adjacent to it.

A creature that has a melee attack with a range of 0 must occupy at least 1 square of the space of its target to make the attack.
Origin
A monster’s origin—aberrant, elemental, fey, immortal, natural, or shadow—describes its place in the DUNGEONS & DRAGONS cosmology. See the glossary for information about each origin.

Type
A creature’s type—animate, beast, humanoid, or magical beast—summarizes some basic facts about its appearance and behavior. See the glossary for information about each type.

Keywords/Race
Some monsters have keywords that further define them. These keywords represent groups of monsters, such as demon, devil, dragon, and undead. See the glossary for information about monster keywords. This part of the entry might also include a monster’s race if its race is not included in the monster’s name.

XP Value
The experience point award for defeating this creature is given beneath its level and role.

HP/Initiative
The monster’s maximum hit points, bloodied value, and modifier to initiative checks are on the top line of its statistics.

Defenses/Perception
All four defense scores are on the next line, along with the monster’s Perception modifier (often used at the start of an encounter).

Senses
Some monsters have special senses, such as darkvision or tremorsense. Any such senses are noted below a monster’s Perception modifier, and these terms are defined in the glossary.

Speed
A monster’s speed represents the number of squares it can move when taking a move action to walk. If a monster has alternative movement modes, such as fly, climb, or swim, that fact is noted in its “Speed” entry. Special modes of movement are defined in the glossary.
Immune
If a monster is immune to a damage type (such as cold or fire), it doesn’t take that type of damage. If a monster is immune to a condition or another effect (such as the dazed condition or forced movement), it is unaffected by that condition or effect. If a monster is immune to charm, fear, illusion, poison, or sleep, it is unaffected by the nondamaging effects of a power that has that keyword.

Immunity to one part of a power does not make a monster immune to other parts of the power. For example, a thunder power deals no thunder damage to a creature that is immune to thunder, but the power could still push the creature.

Resist
Resistance means a creature takes less damage from a specific damage type. For example, if a creature has resist 5 fire, the creature takes 5 less fire damage whenever it takes that type of damage.

Against Combined Damage Types: A creature’s resistance is ineffective against combined damage types unless the creature has resistance to each of the damage types, and then only the weakest of the resistances applies.

For example, if a creature has resist 10 lightning and resist 5 thunder and an attack deals 15 lightning and thunder damage to it, the creature takes 10 damage, for the resistance to the combined damage types is limited by the lesser of the two resistances.

Not Cumulative: Resistances against the same damage type are not cumulative. Only the highest resistance applies. For example, if a creature has resist 5 cold and gains resist 10 cold, the creature has resist 10 cold, not resist 15 cold.

Vulnerable
Being vulnerable to a damage type means a creature takes extra damage from that damage type. For example, if a creature has vulnerable 5 fire, the creature takes 5 extra fire damage whenever it takes that type of damage.

Against Combined Damage Types: Vulnerability to a specific damage type applies even when that damage type is combined with another. For example, if a creature has vulnerable 5 fire, the creature takes 5 extra damage when it takes ongoing fire and radiant damage.

Not Cumulative: Vulnerabilities to the same damage type are not cumulative. Only the highest vulnerability applies. For example, if a creature has vulnerable 5 psychic and then gains vulnerable 10 psychic, the creature has vulnerable 10 psychic, not vulnerable 15 psychic.

Saving Throws
Some monsters have bonuses to saving throws. A monster adds its bonuses to its saving throw result to see if an effect ends.
**Action Points**

Elite and solo monsters typically have action points they can spend to take extra actions, just as player characters do. Unlike characters, a monster can spend more than 1 action point in an encounter, but only 1 per round.

**Traits**

The Traits section includes characteristics of the creature that are not powers. Many traits are always in effect, such as regeneration or the ability to deal extra damage on certain attacks. Others can be turned on or off, such as an aura or a benefit for a creature’s mount or rider.

**Aura**

An aura power creates an aura, which is a continuous effect that emanates from a creature. It’s denoted by a special icon (∇), and the aura’s size is noted to the right of its name. Unless noted otherwise, an aura uses the following rules.

**Fills an Area:** The aura fills each square that is both within a specified range of the creature and within line of effect of it. An aura 1 affects each square adjacent to the creature, for example. A creature is normally unaffected by its own aura.

**Unaffected by the Environment:** The aura is unaffected by environmental phenomena and terrain, although blocking terrain blocks an aura. For instance, an aura of fire is unaffected by an area of extreme cold.

**Overlapping Auras:** If auras overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping auras is subjected to the worst penalty; the penalties are not cumulative. For instance, if a creature is affected by three overlapping auras that each impose a –2 penalty to attack rolls, the creature takes a –2 penalty, not a –6 penalty.

**Deactivating an Aura:** A creature can take a minor action to deactivate or reactivate one of its auras.

**Death or Unconsciousness Ends:** A creature’s auras end immediately when it falls unconscious or dies.

**Action Type**

A monster’s standard, move, minor, and nontriggered free actions are organized by action type.

**Powers**

A monster’s powers are presented under their respective action type in order of frequency of usage, from at-will to recharge to encounter powers.

**Icon/Type**

The name line of an attack power includes an icon (if applicable) that represents the power’s type: melee (†), ranged (∇), close (←), or area (‡).
A basic attack has a circle around its icon, denoting a melee basic attack ① or ranged basic attack ②.

**Usage** A monster power is usable at will, once per encounter (or rarely once per day), or it recharges in certain circumstances.

**Recharge** ③: The power has a random chance of recharging during each round of combat. At the start of each of the monster’s turns, roll a d6. If the roll is one of the die results shown in the power description, the monster regains the use of that power. The power also recharges after a short rest.

**Recharge if/when . . . .**: The power recharges in a specific circumstance, such as when the monster is first bloodied during an encounter. The power also recharges after a short rest.

**Requirement** Some powers have a precondition that must be met for a monster to use the power.

**Attack** A monster power that has an attack roll is usually an attack power. Sometimes an “Attack” entry includes special information about a component of that entry.

**Type and Range** A power’s type and range are given first on the power’s “Attack” entry. The types are melee, ranged, area, and close. Each type has rules for range and targeting, detailed in the *Rules Compendium*.

**Targets** In parentheses after the attack type and range is information that describes which or how many creatures a power targets.

**Attack Bonus/Defense** Usually, the last element in a power’s “Attack” entry is the monster’s attack bonus and the defense the power targets.

**Hit** This entry describes what happens to each target that a monster hits with a power’s attack.

**Miss** This entry describes what happens to each target that a monster misses with a power’s attack.

“Half damage” in this entry refers to rolled damage. Roll the damage specified in the “Hit” entry and deal half of that damage to each target the monster misses. “Half damage” does not apply to ongoing damage or any other damaging effects in the “Hit” entry.

**Effect** Anything that appears in an “Effect” entry occurs when the monster uses the power, whether or not it hits with it. Some “Effect” entries include range, type, and target information.
Secondary Attack  Some powers allow a monster to make secondary attack. A “Hit,” a “Miss,” or an “Effect” entry tells you if a monster makes a secondary attack. Unless otherwise noted, the attack type and the range of a secondary attack are the same as the power’s, and the secondary attack doesn’t require a separate action. As with normal attacks, the target of a secondary attack is identified after the attack’s type and range.

Sustain  If a power has a “Sustain” entry, the monster can keep part of that power active by taking a specific type of action before the end of each of its turns. A monster can’t take the sustaining action until the turn after it uses the power. The entry’s name specifies the action type that must be taken—most often minor, move, or standard. See the Rules Compendium for more about sustaining powers.

Aftereffect  An aftereffect automatically occurs after another effect ends. In a power description, an “Aftereffect” entry follows the effect it applies to.

Failed Saving Throw  Sometimes an effect changes as a target fails saving throws against it. The new effect, specified in a “First Failed Saving Throw” or a “Second Failed Saving Throw” entry, takes effect after the target fails a saving throw against the previous effect at the end of the target’s turn. A few effects also specify something that happens on “Each Failed Saving Throw.” This is a new effect that is repeated whenever a target fails a saving throw against the effect during the end of its turn.

An effect doesn’t change if the creature fails a saving throw against it at a time other than the end of its turn.

Special  Any unusual information about the use of a power appears in this entry. For example, some powers can be used as basic attacks, which is noted in a “Special” entry.

Triggered Actions
This section contains powers that have triggers. These powers have a few entries that other powers don’t.

Trigger  A trigger defines when a monster is able to use a power. A monster must still be able to take the power’s required action and meet any requirements.

(Action)  A triggered power’s action type is given in parentheses at the start of its “Attack” entry or its “Effect” entry. The type might be an immediate reaction, an immediate interrupt, an opportunity action, or a free action. Some powers require no action to use; they simply occur in response to a trigger.
Skills
The skills section of a monster’s statistics block includes only trained skills or skills for which the monster has an unusual modifier. A monster’s Perception modifier isn’t repeated here, even if Perception is trained.

Ability Scores
A monster’s six ability scores are included toward the bottom of its statistics block. Following each score in parentheses is the adjusted ability score modifier, including one-half the monster’s level, which is useful whenever the monster needs to make an untrained skill check or an ability check.

Alignment
A monster’s most typical alignment is noted in its statistics block. The Rules Compendium contains information on the various alignments.

Languages
This entry gives the languages that a monster can speak and understand. An individual monster might know additional languages, such as Common or the languages of its companions. See the Rules Compendium for more information about the languages of the Dungeons & Dragons world.

Equipment
A monster’s “Equipment” entry notes important items a monster is carrying. A monster might carry equipment that is not noted here. Equipment that is unimportant to a monster is left for the Dungeon Master to decide.

If a character gains a monster’s equipment, he or she can use it as normal gear. A character does not gain the powers that a monster uses through a piece of equipment.

A piece of equipment that player characters use does not necessarily have the same properties for monsters. For example, a greataxe has the high crit property, but a monster using the item does not benefit from the property unless otherwise noted in its statistics.

Healing Surges
Monsters have healing surges. However, few monsters have powers that let them spend healing surges. The number of healing surges a monster has is based on its level: 1–10, one healing surge; 11–20, two healing surges; 21 or higher, three healing surges.

Because they rarely come into play, healing surges are not included in a monster’s statistics block.
ANGEL

Beautiful and terrible, the bright sight of an angel strikes awe into the soul and drives onlookers to their knees in obeisance to the divine order. Yet angels can do more than deliver the miracles of the gods. They are destroyers, too, and the appearance of an angel is a harbinger of woe as often as it is a sign of hope.

As manifestations of divine will, angels involve themselves in mortal concerns far more often than do deities or exarchs. Angels act both openly and secretly, serving as emissaries, generals, or assassins. Although one ordinary mortal in ten thousand might count himself lucky to have his life touched by an angel, those who intrude into the affairs of the gods can expect to meet dozens of angels—most likely on the field of battle.

Offspring of the Astral Eternity: Angels serve the gods, leading some people to believe that they were created by the gods. In reality, angels are powerful astral beings that appeared during the first moments of the formation of the Astral Sea. Angels are made of the same spirit as the gods, created as part of the original compact of heaven. They exist as expressions of the Astral Sea, sentient energy in humanoid form. Perhaps the needs of the gods caused the astral stuff to spew angels forth, but it was not a conscious act of creation. Different types of angels have different callings; they are manifestations of celestial vocations, such as protection, battle, and vengeance. Although their appearances can vary, all angels are vaguely humanoid in form, with masculine or feminine features and lower bodies that trail off into flowing energy.

Servants to the Divine Masters: During the Dawn War between the gods and the primordials, angels fought for the deities that best exemplified their callings. Today they serve as mercenaries for anyone willing to meet their price, be it wealth, power, or a cause worthy of their attention. In this way, the gods share angels with mortals. Most angels are nameless servitors that take pride in having scant personalities, which allows them to flow smoothly into the service of any god that calls them. The angels’ mission is to perform the will of the deities, not to cling to one god and promote its cause above those of all others.

Not all angels adhere to these standard behaviors. Some feel suited for service to a single god, adapting elements of that deity’s ornamentation and symbolism into neutral angelic dress. Other angels develop strong personalities and choose names. These forceful angels might become exarchs of the gods they serve or carve bizarre paths through the Astral Sea before they disappear, are destroyed, or fade from existence.
**Constrained by Divine Laws:** The gods and their servants often have conflicting goals. As a result, angels sometimes battle one another. Even so, they cannot be persuaded to lend their energy to rituals or sacrifices that would imperil a deity or eliminate a large number of rival angels. They will fight each other in single combat or in groups of a dozen at a time, if that is the wish of a god or other wielder of divine power, but they will not willingly destroy planar gates, shatter astral dominions, or slay deities. No angel can make a direct assault upon a god—at least, not without dire consequences for the angel and perhaps the compact of heaven.

An angel follows other rules and codes of conduct derived from the deity it serves. An angel of Kord must be forthright and valorous, whereas Vecna demands that his angels be circumspect and conniving. An angel might be bound by ancient oaths to one god while it serves another, and much can hinge on the angel’s delicate balancing of conflicting obligations.

---

**Angel of Protection**
Medium immortal humanoid (angel) XP 1,000

- **HP:** 141; **Bloodied:** 70
- **AC:** 30, **Fortitude:** 26, **Reflex:** 24, **Will:** 25
- **Speed:** 6, fly 8 (hover)
- **Immune:** fear; **Resist:** 10 radiant

**Traits**

- ✦ Angelic Shield ✦ Aura 5
  
  While the angel is not bloodied and within 5 squares of its ward, squares in the aura are difficult terrain for enemies.

- Angelic Presence
  
  While the angel is not bloodied, attack rolls against it take a –2 penalty.

**Standard Actions**

- ✦ Greatsword (radiant, weapon) ✦ At-Will
  
  **Attack:** Melee 1 (one creature); +19 vs. AC
  
  **Hit:** 2d10 + 11 radiant damage.

- Ward ✦ At-Will
  
  **Effect:** Ranged 5 (one creature). The angel designates the target as its ward. While the angel is within 5 squares of the target, the target takes half damage from melee attacks and ranged attacks against it, and the angel takes an equal amount of damage. While the angel is adjacent to the target, the target gains a +2 bonus to AC. A creature can be the ward of only one angel at a time. If multiple angels designate the same creature as their wards, it becomes the ward of the last angel to designate it as such.

HP 426; Bloodied 213 Initiative +13
AC 31, Fortitude 33, Reflex 29, Will 33 Perception +16
Speed 8, fly 12 (hover) Immune fear; Resist 15 cold, 15 fire, 15 radiant

TRAITS

Cloak of Vengeance (cold, fire)
While the angel is not bloodied, attack rolls against it take a –2 penalty, and any creature that hits the angel with a melee attack takes 10 cold and fire damage.

STANDARD ACTIONS

Longsword (cold, fire, weapon) ✦ At-Will
Attack: Melee 2 (one creature); +24 vs. AC
Hit: 4d10 + 12 cold and fire damage.

Double Attack ✦ At-Will
Effect: The angel uses longsword twice.

MINOR ACTIONS

Sign of Vengeance ✦ Encounter
Effect: Ranged sight (one creature). Until the end of the encounter, the angel can teleport adjacent to the target as a move action.

TRIGGERED ACTIONS

Coldfire Pillar Transformation (cold, fire, polymorph) ✦ Encounter
Trigger: The angel is first bloodied.
Effect (Free Action): The angel becomes a 6-square-high pillar until the start of its next turn. While in this form, it is immune to all damage. When the effect ends, the angel makes the following attack.
Attack: Close burst 2 (enemies in the burst); +22 vs. Reflex
Hit: 2d8 + 18 cold and fire damage.

Archon

Opposing the gods is the sole purpose of the archons. Highly intelligent elemental creatures, archons serve as soldiers and leaders in the armies of the primordials. They also act as mercenaries for those in need of elemental might.

When the gods brought their armies of angels, exarchs, and exalted beings to fight the primordials in the Dawn War, the primordials responded by creating their own soldiers from the elemental foundations of their home plane. The primordials already had great beasts and chaotic elementals that were being used as pure weapons, but they needed more reliable and inventive creatures to populate and lead their armies. Archons were gifted with a degree of cunning not found in other primordial creations. Each archon is a dangerous opponent, drawing on unrestrained combat prowess, the keen mind of a veteran soldier, and an elemental weapon that vanishes when its wielder falls.

“Finding a fire archon forge is a bit like finding a termite nest in your home. You feel a sense of dread that slowly dawns into gut-wrenching terror and then decays into despair.”

—Baredd, Champion of Argent

Soldiers in an Elemental Army: Archons fight for the primordials, mainly as soldiers and officers in their armies but also as special agents and shock troops. In addition, archons turn up in the service of lesser elemental princes and powerful beings that roam the Elemental Chaos, including high-ranking demons of the Abyss. More than just mighty warriors, archons engage in unorthodox tactics to take down their enemies. For example, a squad of archon assassins might burst through a planar portal to ambush a target’s carriage as it travels between towns, or a team of archons sent to intimidate the locals might appear during a violent earthquake or ride in on rushing floodwaters for greater effect. Although archons were created for battle, they also excel in leadership roles; would-be heroes might be surprised to find that the head of a band of elemental cultists is an archon put in place by a higher power. Regardless of whether archons are dispatched to fight or lead, they take full advantage of their elemental connections to get the job done.

Fighting for the Highest Bidder: Many primordials were slain or imprisoned after the Dawn War, leaving untold numbers of archons with no masters to serve. Some were quickly snatched up by formidable rulers of the Elemental Chaos; those that remained free drifted into a life of mercenary service on the roiling plane. Efreet, demon lords, giants, and other influential denizens of the Chaos employ archons as soldiers and bodyguards. Archons have their own needs and desires, as do other sentient creatures, but where mortals vie for riches
and power, archons seek opportunities for destruction. The chance to commit violence and mayhem is a strong lure for archons—after all, the creatures were literally born to fight. It is difficult to bribe an archon with wealth, but presenting an intriguing destructive challenge (for example, bringing down fortress walls that have been reinforced with powerful arcane runes) is a sure way to get an archon’s interest, if not its servitude.

**Cunning Enemies and Tacticians:** Unlike their lesser cousins, the elementals, archons work well together, and each kind brings its own strengths into play. Whereas earth archons are patient, inexorable defenders, fire archons are aggressive and highly effective when attacking enemy positions or laying siege. Water archons travel as easily through rivers and lakes as others do on land; they make excellent naval forces and can sneak into occupied territory before launching a surprise attack from behind enemy lines. Ice archons are brilliant, ruthless tacticians whose calculated plans are devoid of emotion. When united, archons of different kinds are more destructive than when they act separately, and the strongest groups are those that have diverse elemental affinities. For example, water archons might infiltrate a castle by means of an underground river, opening the gates so that fire archons can spill into the structure and attack. Earth archons fortify that position and hold the gates open, while ice archons ensure that no one escapes from the castle to warn nearby villages or seek reinforcements.

*(Top, left to right) earth archon, ice archon, water archon, fire archon*
Earth Archon
Medium elemental humanoid (earth)  Level 12 Brute
XP 700

**Hit Points:** 149; Bloodied 74  
**Armor Class:** 25, Fortitude 26, Reflex 23, Will 21  
**Speed:** 6 (earth walk)  
**Immune:** disease, petrification, poison  
**Initiative:** +5  
**Perception:** +9

### Traits

**Earth Walk**
- The archon ignores difficult terrain that is rubble, uneven stone, or an earthen construction.

**Shattering Tremors**
- Whenever the archon takes thunder damage, it is slowed until the end of its next turn.

### Standard Actions

1. **Stony Warhammer** ✦ At-Will
   - **Attack:** Melee 1 (one creature); +17 vs. AC
   - **Hit:** 4d8 + 7 damage.

2. **Avalanche Charge** ✦ Recharge when first bloodied
   - **Effect:** Before the attack, the archon moves up to its speed.
   - **Attack:** Melee 1 (one creature); +15 vs. Fortitude
   - **Hit:** 4d12 + 9 damage, and the archon pushes the target up to 2 squares and knocks it prone.
   - **Miss:** Half damage, and the target falls prone.

### Str
23 (+12)  
**Dex:** 9 (+5)  
**Wis:** 16 (+9)

### Fire Archon
Medium elemental humanoid (fire)  Level 13 Skirmisher
XP 800

**Hit Points:** 130; Bloodied 65  
**Armor Class:** 27, Fortitude 25, Reflex 26, Will 23  
**Speed:** 8  
**Immune:** disease, poison; **Resist** 20 fire  
**Initiative:** +14  
**Perception:** +9

### Traits

**Guttering Flames**
- Whenever the archon takes cold damage, it cannot shift until the end of its next turn.

### Standard Actions

1. **Fiery Scimitar** (fire) ✦ At-Will
   - **Attack:** Melee 1 (one creature); +18 vs. AC
   - **Hit:** 3d8 + 8 fire damage.

### Move Actions

1. **Flickering Step** ✦ At-Will
   - **Effect:** The archon shifts up to half its speed.

2. **Blaze Step** (fire) ✦ Encounter
   - **Effect:** The archon shifts up to its speed. Each square it shifts through fills with elemental flames that last until the end of the encounter. Each time a nonfire creature enters or starts its turn in a square filled with these flames, it takes 10 fire damage.

### Str
15 (+8)  
**Dex:** 22 (+12)  
**Wis:** 17 (+9)

### Dexterity
18
Ice Archon
Medium elemental humanoid (cold)

HP 135; Bloodied 67
AC 29, Fortitude 27, Reflex 25, Will 22
Speed 6
Immune disease, poison; Resist 20 cold

Initiative +8
Perception +9

TRAITS

❄ Chilling Aura ✦ Aura 2
Enemies cannot shift while in the aura.

Melting Ice
Whenever the archon takes fire damage, it takes a -2 penalty to all defenses until the end of its next turn.

STANDARD ACTIONS

✦ Frigid Mace (cold) ✦ At-Will
Attack: Melee 1 (one creature); +18 vs. AC
Hit: 4d6 + 7 cold damage.
Effect: The archon marks each enemy within 2 squares of it until the end of the archon’s next turn.

Triggered Actions

✦ Frozen Rebuke ✦ At-Will
Trigger: An enemy marked by the archon makes an attack that doesn’t include it as a target.
Attack (Opportunity Action): Melee 1 (triggering enemy); +18 vs. AC
Hit: 2d8 + 5 damage, and the target is weakened until the end of its next turn.

Water Archon
Medium elemental humanoid (aquatic, water)

HP 140; Bloodied 70
AC 28, Fortitude 26, Reflex 24, Will 28
Speed 6, swim 6
Immune disease, poison; Resist 20 acid

Initiative +11
Perception +8

TRAITS

Aquatic
The archon can breathe underwater. In aquatic combat, it gains a +2 bonus to attack rolls against nonaquatic creatures.

Frozen Waves
Whenever the archon takes cold damage, it is slowed until the end of its next turn.

STANDARD ACTIONS

✦ Cresting Staff ✦ At-Will
Attack: Melee 1 (one creature); +19 vs. AC
Hit: 2d10 + 10 damage, and the target is slowed until the end of the archon’s next turn.

✦ Whirlpool ✦ At-Will
Attack: Close burst 3 (enemies in the burst); +17 vs. Fortitude
Hit: 4d6 + 7 damage, and the archon slides the target up to 3 squares.
Miss: The archon can slide the target 1 square.

Languages Primordial
BASILISK

The eyes of the basilisk glow with potent magic. Just a glance, and a victim is weakened, envenomed, or, worst of all, turned to stone. Averting your gaze will not save you, because a basilisk has teeth as well as eyes.

Rumors and legends shroud the enigmatic basilisk. Unlike many rampaging beasts, basilisks keep themselves concealed and are not spotted stomping through fields or tearing up towns. What’s more, because the creature’s gaze is so dangerous, few ordinary people have seen a basilisk and survived. The fates of basilisks’ victims can seem mysterious. If a villager disappears and a stone sculpture that resembles the missing person is later found, people do not necessarily jump to the conclusion that a basilisk is nearby. They might consider the situation a sign of magic run rampant, a portent of imminent danger, or a trick of mischievous fey that kidnapped the victim and left a crude reproduction as a joke. Similarly, those slain by a venom-eye basilisk might look as though they fell to a strange plague or were struck down by the god Zehir.

Although wild basilisks live hidden in solitude, the creatures can be domesticated. A wise master takes no risks with a trained basilisk, recognizing that a simple slip-up could be deadly. Owners set basilisks as sentries in places where no allies are present or where servants are expendable. Some basilisk masters use the remains of victims who have been petrified as morbid decorations.

Statuaries of the Fallen: Surrounding the lair of a typical stone-eye basilisk, statues of humanoids and other creatures stand in awkward, fearful poses, frozen in the horror of their transformation into rock. These lifeless figures are the basilisk’s victims, and the creature is capable of eating its petrified foes. A statue that displays large bite marks is a sure sign that a basilisk dwells nearby. (Other signs include patches of blackened grass and dead shrubs, since the
monster’s noxious presence kills plant life near its lair.) The petrified victims are not dead and can be turned from stone to flesh once again. A rescue mission to free a petrified person might involve investigating methods of reversing the transformation, followed by a dangerous journey to the beast’s lair.

**Pack Predators of the Feywild:** In the natural world, most basilisks dwell alone, living within isolated lairs and leaving only occasionally to hunt. The basilisks that inhabit the Feywild, however, hunt in packs that leave trails of desiccated foliage and dead animals in their wake. Reptilian eyes glowing from between the massive tree trunks of a dark Feywild forest are often the last sight an explorer sees. Like many creatures of the Feywild, basilisks wander where they wish. Strong-willed fey magicians can command the creatures, and the evil giants of the Feywild known as fomorians use basilisks to guard hidden tunnels that lead to their underground kingdoms.

**Demonic Pets:** Some greater demons feel a kinship with basilisks and keep the deadly creatures as pets; lesser demons that venture into the world use basilisks as guards or guides. A basilisk might stride fearlessly into a city as the precursor to a brutal demonic massacre. Although ordinary basilisks lead solitary lives—some can even be called timid—those that serve demons fight with the same ferocity and cruelty as the spawn of the Abyss. Long ago, a group of basilisks was taken to different layers of the Abyss, where they grew more deadly in the chaos of that evil place. Today, these transformed creatures, or perhaps their descendants, guard gates that the demons never want opened. No one knows what lies beyond such doors—perhaps the darkest secrets of the Abyss, or perhaps unimaginable horrors that even the demons fear.

**Alignment**: Chaotic evil

**Languages**: –
Creatures of abhorrent shape and alien mind, beholders seek dominance over all they survey. The floating horrors enforce their will by firing rays of magic from their eyestalks.

When the unwholesome plane known as the Far Realm comes into tenuous contact with reality, terrible things boil across the boundary. Nightmares form the thunderhead of psychic storms that presage the arrival of warped beings and forces undreamt of by the maddest demon or the vilest devil. Many aberrant creatures stumble upon the world by accident, pushed in like chill wind through a door suddenly opened. Others crash into reality because it is as loathsome to them as their surreal homeland is to all sane natives of the rational planes. Beholders, however, come as conquerors. Each one seeks to claim all in its sight, and beholders see much indeed.

Beholders do not belong in the world or in any of the planes inhabited by immortal or elemental, primordial or god. Their home, the Far Realm, is so antithetical to rational thought that most who glimpse the plane go mad. Like other unsettling inhabitants of that place, beholders have forms unlike those of natural creatures.

Diverse and Horrible Powers: Beholders come in a bewildering variety, and many that escape the Far Realm emerge into the world altered by the passage. Each beholder projects a number of supernatural powers through its eyes, but the specific details and arrangement of those powers vary by beholder variety. Worse, the powers can change and improve over time, so that as a beholder grows older, it becomes more fearsome.
**Ruled by Few:** The only certainty when dealing with beholders is that they possess malignant intent and a desire for dominance. Indeed, beholders rarely tolerate subservience to other beings, and they shun the company of their own kind. When beholders work together or do the bidding of a more powerful master, the world is in peril.

Beholders serve only those creatures that they fear and from which they cannot escape. Formidable titans, mighty dragons, and legendary spellcasters can sometimes command a beholder’s allegiance, but these would-be lords must be cautious of betrayal. As deceitful as it is malign, a beholder will submit to the authority of a strong leader if it believes it can one day claim that creature’s power.

**Masters of Many:** Beholders believe that they deserve to rule all they see. Lesser beings that show obedience to these hungry and unpredictable horrors can find a place—albeit not a safe one—in their service. Beholders accept all manner of creatures as their attendants, lackeys, and minions. Such slaves must frequently prove themselves valuable, lest their masters decide that they would make better meals than they do servants.

BULETTE

An approaching furrow of rock and soil signals the arrival of a bulette. These massive, plated beasts spring from the ground and devour any fleshy creature they find.

Bulettes can appear anywhere and are always unwelcome. They move through earth the way a shark moves through water and pop up from the ground to attack. This behavior has earned them the nickname “land shark.” Many people talk about land sharks as if they were mythical, but wiser heads realize that the creatures are real—and extremely dangerous. When signs of a bulette appear near a community, its leaders order the population to pull up stakes and relocate.

A bulette’s thick armor plates let it shrug off attacks until it eats the attacker. This vaunted toughness gives land sharks a reputation as monsters that cannot be slain. Villagers who encounter one of these creatures without realizing its true nature might spread tales of an indestructible beast, a deadly creature made of stone, or a calamitous machine.

Bulettes live in burrows and underground caverns, and explorers of such areas might encounter the creatures there. Travelers might also run afoul of a bulette while it moves to new territory after exhausting all the resources of its former home. Land sharks rarely travel in groups, though sometimes a mated pair shares the same territory. These pairs eat for two, so they move from place to place more quickly than a single bulette would.

Stupid, Mean, and Fearless: It’s easy to trick a bulette, and intelligent beings find clever ways to guide the monsters into areas they want to have destroyed. One of the few constants in the world is that a land shark will always want more food and will take the most direct route to get it. Although a bulette hunts when it’s hungry, it might happen upon prey just after eating. This situation can bring out the beast’s mean streak as it plays with its food by physically mauling or stalking and terrorizing the victim. To a land shark, any creature smaller than itself is prey (and anything the same size or larger is probably an enemy). As far as a bulette knows, smaller creatures can’t harm it, so it doesn’t hesitate to jump into battle and go straight after whatever it wants to eat.
**Ground Eruption**
The squares of ground the bulette burrows into or emerges from become difficult terrain until the end of the encounter.

**Eat First and Think Later:** A bulette doesn’t have much of a brain and is led around by its stomach. Once the creature finds a hunting ground, it devours any animal life living there. Ranch lands, fertile forest glades, and small communities become wastelands after land sharks move in. Only after an area has been devastated does a bulette move on to find a new territory. Since the beasts devour their victims entirely, leaving no bones behind, the most telling signs of a bulette’s presence are uprooted trees, recent landslides, and wide furrows in the earth. An old wives’ tale says that land sharks refuse to eat elves. Although this claim isn’t true, a bulette might pass by an elf if a human or halfling can be obtained just as easily.

**Wild Cards in Battle:** The activity and noise of combat might draw a bulette from its subterranean burrow. When a land shark enters a battle, it usually joins as an independent combatant rather than taking one side or the other. Thus, all factions in a conflict might be devastated by a bulette moving through their ranks, gobbling up members of both sides. One group might be able to outsmart the hungry beast by maneuvering so that members of the other group become easier targets. However, there’s no guarantee that a bulette won’t continue eating the remaining warriors after one side has been eliminated.
Notoriously difficult to tame, bulettes rarely serve as subordinates to other creatures. Sometimes, those that have powerful mental abilities (such as mind flayers) can control land sharks, and brutal creatures (especially yuan-ti and hobgoblins) can condition bulettes into obedience with years of torture. The lives of many handlers are sacrificed in the process.

“It’s called a land shark for a reason, and it’s not just about the fin on its back.”

—Kathra, wizard of Haven
CARRION CRAWLER

Wriggling like giant, loathsome caterpillars, these aggressive beasts attack anything that invades their territory or disturbs their feasting on the dead. The crawlers paralyze victims with their tentacles before dragging the prey off to expire and rot.

Foul things feed on filth, and so it is that carrion crawlers squirm through all manner of death, rot, and offal. These bizarre creatures lurk in moist and dark places, seeking to scour putrid flesh from carcasses and gobble the slimy bones that remain.

Carrion Eaters: Like vultures, carrion crawlers follow the scent of death to their food. However, if they must travel great distances, it’s likely that their intended meal will have been claimed by other scavengers by the time they arrive. Thus, carrion crawlers hunker down in territories where food is plentiful and other carrion-eaters have limited mobility. Caves, sewers, dungeons, and heavily forested marshes work best, but carrion crawlers are also drawn to battlefields and cemeteries. Woe to the city that has these monsters in its sewers in a time of siege or plague. In such places, a carrion crawler roams on the hunt, its tentacles feeling the air for the smell of blood or decay. Within structures, the repulsive creatures often scurry across the ceiling as they move toward food. In this way, they avoid contact with other dangerous inhabitants of the darkness, such as oozes and otyughs, and they can surprise trespassers who don’t think to look up.

**Standard Actions**

† Bite † At-Will

**Effect:**

**Attack:** Melee 1 (one creature); +10 vs. AC

**Hit:** 2d8 + 4 damage, or 3d8 + 4 against a stunned target.

† Tentacles † At-Will

**Effect:**

**Attack:** Melee 2 (one creature); +8 vs. Fortitude, or +10 vs. Fortitude against a prone target

**Hit:** The target is stunned (save ends). The carrion crawler shifts up to its speed, pulling the target with it.

**Move Actions**

† Unsettling Scuttle † At-Will

**Effect:** The carrion crawler shifts up to its speed. It can move through enemy spaces and climb during the shift. Each time the carrion crawler enters an enemy space for the first time during this movement, it makes the following attack against that enemy.

**Attack:** Melee 0; +8 vs. Reflex

**Hit:** The target falls prone.

| Str 18 (+6) | Dex 13 (+3) | Wis 12 (+3) |
| Con 15 (+4) | Int 2 (-2)  | Cha 14 (+4) |
Patient Predators: Carrion crawlers eat rotting flesh, but they don’t always wait for a creature to die on its own. Despite their great size and poor instinct for stealth, crawlers can ambush victims by waiting around blind corners for prey to come to them. Since crawlers tend to live in subterranean darkness or hunt at night on the surface, light signals a potential meal, and a carrion crawler might follow a light source from a distance for hours, hoping to pick up the scent of blood.

TRAITS
◇ Nauseous Stench (poison) ♦ Aura 3
Any enemy that starts its turn in the aura takes 5 poison damage and is slowed (save ends both).

STANDARD ACTIONS
✦ Rotting Tentacles (necrotic) ♦ At-Will
Attack: Melee 3 (one creature); +18 vs. Fortitude
Hit: 2d10 + 6 necrotic damage, the carrion crawler can pull the target 1 square, and the target is immobilized (save ends). If the target was already immobilized, it is instead stunned and takes ongoing 10 necrotic damage (save ends both).

✦ Bite ♦ At-Will
Attack: Melee 1 (one creature); +20 vs. AC
Hit: 2d12 + 10 damage.

Alignment: unaligned

Languages –
When facing potential prey or intruders, a carrion crawler prefers to let its poison do the work. The beast strikes as many enemies as it can with its tentacles and saves its bite for poisoned foes who get too close for comfort. Once a victim becomes rigid with paralysis, the carrion crawler wraps it in tentacles and drags it away to a secure eating area, such as a high ledge or a hole in a wall. The crawler then looms over its meal and watches for signs of life, striking with a tentacle if it sees any. When the crawler believes the prey to be dead, it coats the victim's flesh with toxic saliva to disguise the stench as the corpse decays, and then it resumes patrolling its territory while waiting for the meal to ripen.

**Horrors from Beyond:** It has been suggested that a wizard’s mad experiment gave birth to the first carrion crawlers. A wizard did introduce the revolting beasts to the world, but they were not created in a laboratory. A spellcaster whose
name is lost to history opened a connection to the Far Realm in the hope of learning that plane’s secrets. Her irresponsible act resulted in the slaughter of everyone in her city. Carrion crawlers were not the worst horrors to cross the bridge between dimensions that day—they came to devour those that other fell beings had already slain or driven mad. Since that ancient time, carrion crawlers have spread throughout the world, and they continue to cross over from the Far Realm whenever fools gain the power to breach that disturbing plane.

**Foul Pets:** Although they are wild and territorial, carrion crawlers can sometimes be manipulated or brought to heel. Kobolds, for example, leave offerings of rotten meat in particular tunnels, encouraging the crawlers to stake out a territory that acts as a buffer to the kobolds’ lair. Goblins and similar creatures attempt to raise carrion crawlers and coach them for battle. The venom of young crawlers is too weak to paralyze prey, so they can be domesticated (after a fashion) and used as guard beasts. Some creatures train carrion crawlers as mounts, although riders must employ tentacle harnesses to keep from being paralyzed.

Cyclops

A towering giant with a single, evil eye, a cyclops is a creature of the Feywild—and a dangerous enemy. Cyclopses serve fomorians as soldiers and artisans, and they possess many of the same supernatural powers as their dark masters, combining physical might with magical ability.

Similar to the giants of the world, cyclopses act as bodyguards, enforcers, and foot soldiers for the tyrannical subterranean giants known as fomorians. Primarily found in the Feywild, cyclopses are thought to have originated as an echo of the world’s ogres. Soon after the birth of their race, they came under the influence of the fomorians, who not only molded the cyclopses to suit their needs but also gifted them with the ability to master the evil eye. Since those ancient times, a nigh-unbreakable pact has existed between the fomorians and the cyclopses, creating a mighty force of giant creatures that terrorize denizens of the Feywild and the world alike. Despite this alliance, cyclopses are not as evil and depraved as their masters. They unfailingly honor their covenant as a matter of ritual and tradition, not out of any real pleasure in the acts they are ordered to undertake.

**Loyal Servants**: The cyclopses are the only allies that the fomorians trust completely. All others are considered prone to deception and betrayal. For a cyclops, honoring alliances and pacts is one of the most important requirements.

of life. Once cyclopses have declared allegiance to a particular group, their dedication to maintaining that bond never falters in the face of adversity. Only outright betrayal could spur a cyclops to alter its allegiances. The race has remained steadfast allies of the fomorians since the dawn of time, even though the latter are reckless with the lives of their cyclops servants. The fomorians view this loyalty as a great strength, but it could be exploited and turned into a weakness by their enemies. If anyone managed to charm cyclopses or turn them against their dark masters, the Feywild might be thrown into chaos. Fomorians would look upon their trusted warriors with suspicion, and any cyclopses close to their masters could wreak terrible damage before being stopped.

**Impressive Artisans:** Cyclopses have a natural affinity for crafting, in particular the creation of magic items. Their reputation as highly skilled artisans extends well beyond the Feywild, and many sages and artificers in the world know that some of the most impressive magic devices, weapons, and armor come from cyclops forges. Meticulous workers toil endlessly to create interesting, beautiful, and powerful magic objects as tributes to their fomorian masters. In fact, their labor takes on a competitive element when cyclops tribes compete to see which one can produce the most lavish and impressive tributes. A cyclops artisan values quality above all else, and rather than crank out a large quantity of objects, he or she prefers to create one item at a time—something that is both remarkable and useful, such as a shield that can turn away a dragon’s breath or a crown that can read the thoughts of others.

Masters of the Evil Eye: The single, central eye of a cyclops—known as the evil eye—is just as dangerous as the creature’s weapons. The eye serves as a focus of magical power that can hinder enemies and open them up to attack. The cyclopes owe their mastery of the evil eye to their fomorian allies, who have similar abilities, and some cyclopes develop different uses for this distinctive power. Many humanoid cultures have superstitions about the concept of the evil eye. Some invoke their version of an “evil eye” to place a curse on those who have wronged them, and others scrawl the image of an eye on the doors of their enemies’ homes, hoping to draw misfortune down upon them. This tradition is based on a tale told by eladrin elders that, in ancient times, drow that had made a pact with a cyclops tribe would inscribe an arcane rune on the walls of certain dwellings to indicate where the cyclopes were supposed to attack. According to the tale, the cyclopes could attune their evil eyes to this rune, allowing them to see their targets (and put them under the effect of those evil eyes) before launching their assault.

“Trust me, there’s nothing wrong with its vision for only having one eye. And you don’t want to meet its gaze.”

—Adrin of Tiri Kitor

Cyclops Hewer

AC 32, Fortitude 31, Reflex 27, Will 29
Speed 8

Initiative +13
Perception +17

Traits

Truesight
The cyclops can see invisible creatures and objects.

Standard Actions

Battleaxe (weapon) + At-Will
Attack: Melee 2 (one creature); +21 vs. AC
Hit: 2d12 + 11 damage.

Triggered Actions

Evil Eye + At-Will
Trigger: An enemy the cyclops can see misses one of the cyclops’s allies with a melee attack.
Effect (Immediate Reaction): The cyclops uses battleaxe against the triggering enemy. In addition, until the end of the encounter or until the cyclops uses this power again, whenever the triggering enemy moves more than 2 squares away from the cyclops, the cyclops can shift 1 square closer to the target as an immediate reaction.
Death Knight

Among the most powerful of undead humanoids, death knights are warriors who chose to embrace undeath rather than pass on to the afterlife. They bind their souls into their weapons, fueling their necrotic powers as they marshal armies of undead.

A death knight wields fear like a weapon. It charges forward at the head of vast undead armies, shattering the courage of defenders. Gifted with undeath as a result of a ritual, a death knight is like the martial equivalent of a lich. In death, it retains its sentience and skill and gains the ability to shrug off wounds that would slay most mortals. A humanoid becomes a death knight through a profane ritual that strips away the emotional bonds of one’s life, replacing them with cruelty and a perverse sense of honor. This ritual is often bestowed as a gift from high-ranking followers of Orcus, the Demon Prince of the Undead. When a warrior reaches a certain state of notoriety, Orcus’s adherents approach the individual and try to tempt him or her with the promise of immortality. A warrior who accepts the offer turns into a dark reflection in the shattered mirror of undeath. Its armor becomes blackened and scarred, and its flesh becomes as withered and twisted as the person’s corrupted soul.

Martial Champions: In life, most death knights were soldiers or warriors of great martial prowess, typically commanders or leaders who guided their people to many victories. In death, these warriors gain the strength and speed to match any living champion. A death knight can fight long after a mortal would have died. This characteristic allows a death knight to take on suicidal
tasks, such as kidnapping a nobleman from a fortress. A death knight succeeds because it can ignore the arrows jutting from its body and can swat aside the swords of defenders. A death knight retains some of its personality from its former life, but its sense of honor becomes twisted in death. The creature might challenge an enemy commander to a duel rather than engaging in a pitched battle. The result of such a duel is almost always the death of the challenged foe. Alternatively, a death knight might give civilians time to clear out of a battle zone before marching its undead legions across the land, slaughtering any who stand against it.

**Leaders of the Undead:** A death knight often leads at the head of a column of undead, acting as an officer or a general for undisciplined undead, such as zombies and skeletons. Under a death knight’s leadership, undead fight more efficiently and with greater skill. A death knight has magical talents of command as well as natural leadership. Strong-willed undead, such as vampires and liches, can resist a death knight’s authority. These undead sometimes choose to work with a death knight, though. Slaying a death knight reduces the effectiveness of nearby undead, so an army facing a legion of skeletons or zombies might hire a group of mercenaries or assassins to take out a death knight before a large-scale assault begins.

> “How does it feel, my dear, to know that you have brought pleasure to the damned? You have made my dreary realm of death interesting. Would that I had known you as a living man! But, my time is eternal. Perhaps I will wait for one who can share my throne.”

—Lord Soth

**Soul Weapons:** The ritual that transforms a warrior into a death knight binds part of the subject’s soul to one of his or her weapons. This weapon is not only a symbol of an individual’s transformation, it is also the source of a death knight’s power. A death knight jealously guards its soul weapon; humanoids sometimes try to steal this weapon, holding it for ransom or using it as leverage to bend a knight to their will. A death knight always keeps its soul weapon close, and such weapons are rarely left unattended. When a death knight is destroyed, its soul weapon crumbles to dust. A particularly powerful death knight could leave behind a mighty weapon that remains infused with part of the knight’s soul. In such a case, the weapon might take on sentience of its own, even speaking to its wielder. A hero who slays a death knight and claims its weapon must be cautious, because many have been driven mad by the whispers of these weapons. Tales even recount how some people have become possessed by the souls of destroyed death knights.
Death Knight

Medium natural humanoid (undead) XP 3,200

TRAITS

_marshall Undead ♦ Aura 10
Undead allies of level 17 or lower gain a +2 power bonus to attack rolls while in the aura.

STANDARD ACTIONS

Soulsword (necrotic, weapon) ♦ At-Will
Attack: Melee 1 (one creature); +22 vs. AC
Hit: 3d8 + 12 necrotic damage.
Effect: The death knight marks the target until the end of the death knight’s next turn.

Containing Strike (necrotic, weapon) ♦ At-Will
Requirement: The death knight must be wielding a soulsword.
Attack: Melee 1 (one or two creatures); +22 vs. AC
Hit: 3d8 +12 necrotic damage, and the target is slowed until the end of the death knight’s next turn.
Effect: The death knight marks the target until the end of the death knight’s next turn.

Unholy Flames (fire, necrotic) ♦ Recharge ♦ 1
Attack: Close burst 2 (living creatures in the burst); +20 vs. Reflex
Hit: 6d8 + 12 fire and necrotic damage.
Effect: Each undead ally in the burst deals 2d6 extra fire damage with melee attacks until the end of the death knight’s next turn.

Warrior’s Challenge (necrotic, weapon) ♦ Encounter
Requirement: The death knight must be wielding a soulsword.
Attack: Melee 1 (one or two creatures); +22 vs. AC
Hit: 4d8 + 19 necrotic damage, and the death knight pushes the target up to 2 squares. The death knight marks each enemy within 2 squares of the target until the end of the death knight’s next turn.

TRIGGERED ACTIONS

Combat Challenge ♦ At-Will
Trigger: An enemy adjacent to and marked by the death knight shifts or makes an attack that doesn’t include it as a target.
Effect (Opportunity Action): The death knight uses soulsword against the triggering enemy.

Implacable ♦ At-Will
Trigger: The death knight becomes marked, slowed, immobilized, dazed, or stunned by an effect.
Effect (Opportunity Action): The death knight makes a saving throw to end the triggering effect, even if the effect would not normally end on a save.

“I have had centuries to reflect on my sins. They are all that sustain me.”

—Kalaban, death knight of Nerath
DEMON

The monstrous demons spill out from the Abyss, spreading violence and destruction with every step they take. They tear down the strong, devour the weak, and despoil anything they touch with absolute evil.

The hateful agents of chaos known as demons come in a multitude of forms, each perverse and horrific. Their abilities and renown range from the stench of the weak, pitiful dretches to the crashing lightning and consuming flames of the immense, formidable balors. The only constant is the all-consuming wickedness that drives demons to slay and destroy until they meet their inevitable violent deaths. These fiendish creatures will never rest until they reduce the world to a blackened, flaming husk.

Demons’ cruel impulses lead them to go wherever they can to cause the most pain and wreak the greatest destruction. Some days, they might join the raiding parties of vicious creatures such as gnolls or minotaurs. In truly dire times, entire war bands of demons might strike out from the Abyss, spreading like a wasting plague. Their armies (if these disorganized forces can truly be called such) roam from settlement to settlement, leaving no one alive except a small number of victims that they capture and then torture during the trip to their next destination.

Nearly everyone opposes demons, especially the fervent followers of gods and primal spirits. The desire of these faithful stalwarts to protect the world runs counter to the demons’ need to rend it asunder. But even with so many forces...

“Summoning a demon to help you in battle can be very effective, but never believe that the battle is over when your enemies are slain.”
—Nimozaran, Septarch of Fallcrest

- Cha 7 (+4)

**Alignment** chaotic evil

**Languages** Abyssal
aligned against them, the demons could still win. They have nothing to lose, and their numbers could be endless—no one knows how many demons exist.

**Blood and Violence:** Demons live only to destroy, and whatever they can’t destroy, they hate. A demon unleashed from the Abyss tears at the edifices of the world and rips apart anything it can, relishing bloodshed and brutality. The creatures have no concept of honor, mercy, or pity. The aftermath of a demon attack displays their cruelty. They leave behind villages burned to cinders, bodies torn limb from limb, and land forever corrupted by fiendish influence.

**Abyssal Influences:** The serpentine, six-armed marilith; the misshapen, wretched dretch; the blazing, winged balor; and the gaunt, vulturelike vrock are all evidence of how demons are warped and corrupted by their environment. An immeasurable number of horrific layers make up the swirling black vortex called the Abyss. Travelers there face not only the dangers of demons but also acidic pools of slime, storms of blood, and forests of razor-sharp foliage. The spreading
darkness spews corruption into the Elemental Chaos, and its malicious influence creeps into the mortal world, bringing the demons with it.

**Rule of Tooth and Claw:** Enemies of all and allies of none, demons submit to opponents only when the alternative is immediate death. The creatures have no organized hierarchy, but the most powerful types order motley hordes of lesser demons around. Since their greatest desire is to sow destruction, all demons are quick to follow any orders that allow them to slaughter or raze. The mightiest leaders are the demon lords. These immensely powerful beings—including Demogorgon, Orcus, Baphomet, Graz’zt, Lolth, and Yeenoghu—rule layers of the Abyss and eternally contest one another’s authority. Usually, these turf wars involve conquering places of power on other planes rather than out-and-out conflict within the Abyss. The demon lords, unlike lesser demons, do have goals. Many of them share a thirst for deicide, eager to murder the gods that created the world the demons so fervently hate.

**Summoning:** Demons have such fearsome power that ambitious and evil mortals desire to use it for their own ends. They summon and bind demons with dark rituals, using the captive creatures as slaves or stripping away their elemental essence to fuel other magical endeavors. Few summoners truly understand the nature of the diabolical forces they seek to conquer, and demons frequently escape these would-be masters or use the magical conduit to bring more abyssal spawn into the world.

“Sages once believed that only six balors existed in the whole of the Abyss. If only that were true.”

—Rhogar, paladin of Bahamut
**Devil**

Malevolent creatures from the Nine Hells, devils were once servants of the gods that rebelled and were cast out of their domains. Devils claim mortal souls to increase their power through temptation, betrayal, and manipulation.

Devils are infernal creatures whose once-luminous humanoid forms have been twisted and corrupted by their exile from the domains of the gods they once attended. They inhabit the burned-out husk of an astral dominion, now called the Nine Hells, as punishment for the slaying of a god by their dark master, Asmodeus. Cruel rulers and soldiers of a smoldering pit of anguish, devils delight in tormenting mortals and claiming their souls.

*Fallen Servants of the Gods:* The creatures that would become devils were once servants of the gods. Rallying behind their leader, Asmodeus, the devils helped to slay one of their divine masters. As a result, they were cursed and cast out into the devastated remains of that god’s domain, which became the Nine Hells. The devils that now inhabit the Nine Hells are the same creatures that marched across astral battlefields, and though they have spent eons in their new home, the memories of their mutiny and subsequent exile remain fresh. These recollections fill devils with loathing and rage, and they burn with hatred for the gods—a hatred they have turned on the mortal races as well. Devils (particularly the ascended Asmodeus and his exarchs, the Lords of the Nine) seek to
corrupt the creation of the gods by seizing the souls of mortals and bending them to their will. Each soul captured strengthens the armies of the Nine Hells. One day, the infernal legions say, the world will be so weakened and the devils will be so strong that they will march on the domains of the gods and seize control for themselves.

**Languages** Common, Supernal

**Tempters of Mortals:** The followers of Asmodeus are, like their master, nothing if not cunning. Many devils prefer to capture the souls of mortals through nonviolent means, even convincing mortals to give up their souls of their own free will. For example, imps (small, red-skinned devils with leathery wings and stinger-tipped tails) whisper promises of power in mortals’ ears, corrupting them with unholy contracts that divulge the secrets of arcane and divine magic. Succubi (bat-winged humanoids that appear as males and females of unparalleled beauty) use lust and greed as their tools, offering pleasure, wealth, or power in exchange for a mortal’s eternal soul. Both of these types of devils are capable of fulfilling their promises, but everything comes with a price. A wizard who agrees to a contract with an imp might learn spells beyond imagination, but he is likely to sink slowly into madness as the dark magic erodes his sanity.

**Soldiers of Hell:** Not all devils are content to gain mortal souls through manipulation or seduction. Some vividly recall their struggles against the gods and have made themselves the champions of battle in the Nine Hells. In the old days, pit fiends (red-scaled, winged monsters that tower over humans) were commanders of the armies of the gods, viziers at the side of divine exarchs, or barons ruling over distant settlements in the astral domains. Now, they command dominions in the Nine Hells and all but explode with fury toward the gods and their mortal creations. Ice devils, from the frozen wastelands of the layer of the Nine Hells known as Cania, were once military commanders that have been
twisted and corrupted. In a dark mockery of their former tactical prowess, they throw legions of lesser devils at their enemies with no care for the lives of their kin. Chain devils are jailers and torturers, using pain and suffering to extract information from the enemies of Asmodeus. The armies of the Nine Hells are largely made up of legion devils—cruel, pitiless warriors that gather in countless numbers from the scorched plains of Avernus to the deepest chasms of Nessus. All these kinds of devils are shadowy reflections of their former selves, made evil and vicious by their fall from grace.

### Monstrous Cutoff

“Not all the hells are places of fire.”

—Valthrun the Prescient
Pit Fiend  
Level 26 Elite Soldier (Leader)

Large immortal humanoid (devil)  
XP 18,000

HP 486; Bloodied 243
AC 42, Fortitude 40, Reflex 36, Will 38
Speed 12, fly 12 (clumsy), teleport 10
Resist 30 fire, 15 poison
Saving Throws +2; Action Points 1

**Traits**

 Aura of Fear (fear) ✦ Aura 5
Any enemy in the aura at the start of the pit fiend’s turn is marked by the pit fiend until the end of the pit fiend’s next turn.

 Aura of Fire (fire) ✦ Aura 5
Any enemy that enters the aura or starts its turn there takes 15 fire damage.

**Standard Actions**

 Flame-Touched Mace (fire, weapon) ✦ At-Will
- **Attack:** Melee 2 (one creature); +31 vs. AC
  - **Hit:** 2d10 + 11 fire damage, and the target takes ongoing 10 fire damage (save ends).

 Tail Sting (poison) ✦ At-Will
- **Attack:** Melee 2 (one creature); +29 vs. Fortitude
  - **Hit:** The target takes ongoing 25 poison damage and is weakened (save ends both).

 Pit Fiend Frenzy ✦ At-Will
  - **Effect:** The pit fiend uses flame-touched mace and tail sting.

**Move Actions**

 Tactical Teleport (teleportation) ✦ Recharge
- **Effect:** Close burst 10 (one or two allies in the burst). The pit fiend teleports each target to a square in the burst.

**Minor Actions**

 Point of Terror (fear) ✦ At-Will
- **Attack:** Ranged 5 (one creature); +29 vs. Will
  - **Hit:** The target takes a –5 penalty to all defenses until the end of the pit fiend’s next turn.

 Irresistible Command (charm, fire) ✦ At-Will (1/round)
- **Effect:** Ranged 10 (one devil ally that is lower in level than the pit fiend). The pit fiend slides the target up to 5 squares, and the target drops to 0 hit points and is destroyed. Each creature within 2 squares of the target then takes 3d10 + 9 fire damage.

**Triggered Actions**

 Nightmarish Punishment (fear, fire) ✦ At-Will
- **Trigger:** An enemy marked by and within 2 squares of the pit fiend shifts or makes an attack that doesn’t include it as a target.
  - **Attack (Opportunity Action):** Melee 2 (triggering enemy); +33 vs. AC
  - **Hit:** 2d10 + 11 fire damage, and the pit fiend slides the target up to 2 squares to a square adjacent to it.
  - **Miss:** Half damage.

Displacer Beast

Seldom where they seem, displacer beasts mislead enemies by concealing their true location, which helps them evade the dangers of the Feywild where they live and hunt. They also prowl the forests and caverns of the natural world, where their glowing emerald eyes appear to change position constantly as they stare out from the darkness.

Displacer beasts look like enormous feline predators, but their barbed tentacles and powers of misdirection make them far deadlier. They quietly stalk their prey before bringing it down as quickly as possible in an ambush.

The displacer beast’s cunning, stealth, and ferocity have earned it a reputation as one of the most well-known predators of the Feywild. The creature’s image is used in heraldry and literature to indicate a character or an organization that is elusive, tricky, or mysterious.

Some displacer beasts make their lairs behind dense foliage, in small caves, or within the boughs of massive trees. Others prowl from place to place, attacking prey where they can find it. Savvy explorers know to avoid locations where displacer beasts might dwell, but they also know that the creatures can spring out from anywhere. For any ordinary person or animal, a surprise attack by a displacer beast means a quick death. The beast’s speed is so great, and its attacks so fierce, that it can swiftly drop anyone who is not prepared and trained for battle.
Displacer Beast
Large fey magical beast

Level 9 Skirmisher
XP 400

HP 97; Bloodied 48  
AC 23, Fortitude 21, Reflex 22, Will 20  
Speed 12

Initiative +11
Perception +12

Traits

Displacement (illusion)
When a melee or a ranged attack hits the displacer beast, if the player rolled an odd number on the attack roll, the attack misses. If the player rolled an even number on the attack roll, the attack hits as normal, and the beast loses this trait until the start of its next turn.

Threatening Reach
The displacer beast can make opportunity attacks against enemies within 2 squares of it.

Standard Actions

+ Tentacle + At-Will
  Attack: Melee 2 (one creature); +14 vs. AC
  Hit: 2d6 + 7 damage.

+ Bite + At-Will
  Attack: Melee 1 (one creature); +14 vs. AC
  Hit: 2d10 + 6 damage.

+ Cunning Blitz + At-Will
  Effect: The displacer beast shifts up to half its speed. At any point during that movement, it uses tentacle once, or two times against different creatures.

Triggered Actions

Shifting Tactics + At-Will
  Trigger: An attack misses the displacer beast.
  Effect (Free Action): The displacer beast shifts 1 square.

Difficult to Pin Down: With their displacement ability and deft movement, displacer beasts can avoid most enemies, which means the creatures usually enter battle as the aggressors. They attack the weakest targets first, using their maneuverability to slip past tougher defenders. When hunted, displacer beasts spring ambushes in thick forests or other places where they can quickly escape from enemies that prove too strong. If they’re outmatched or gravely wounded, the beasts nearly always try to retreat, unless starvation drives them to fight on in hopes of claiming a meal.

Intelligent Predators: Displacer beasts hold a comfortable spot near the top of the food chain. Their predatory skill is unmatched, and they possess strong instincts and far greater intelligence than most ordinary animals. Displacer beasts set ambushes, track their prey by following clues (not just scents), and lure

“I can’t tell where it is! My sword keeps cutting empty air!”
—Douven Staul

Displacer Beast
enemies into traps and hazards when fighting in a dangerous area. They’re also capable of making relatively intricate plans. For example, they might remember which trade routes have seasonal traffic and return in the spring to plague travelers. It’s rare to encounter more than two displacer beasts (usually a mated pair) at one time, but a beast might lead a pack of other wild predators. Because of their natural instinct to seek dominance within a pack, displacer beasts prefer to attack animals rather than humanoids.

**Tough and Smart Pack Lords:** Displacer beasts are rare as a species, and their pack lords number even fewer. These massive mutants have the same intelligence as ordinary people and sometimes lead groups of normal displacer beasts. Whereas standard beasts patrol large hunting grounds, pack lords terrorize entire regions. They maintain lairs that can handle their bulk, such as wide, moss-laden Feywild caverns or halls within crumbled ruins.

**Prized as Guards and Pets:** Displacer beasts will follow more intelligent creatures, but only if they gain some benefit from the arrangement. Most often, displacer beasts guard secluded rooms in a palace or accompany wealthy or influential humanoids. Occasionally, they are captured and paraded about as status symbols, especially by callow young eladrin nobles. A displacer beast might serve a master in exchange for regular meals of fresh meat or out of loyalty to a creature that saved its life or kept it from harm. Despite their willingness to be trained in these circumstances, displacer beasts are smart enough to realize when a situation changes, and they might turn against their masters if necessary to protect their own lives.
DOPPELGANGER

Infiltrators, spies, and impersonators, doppelgangers are humanoid shapeshifters that take on the appearances of other humanoids. They are cunning opponents that lure in their victims or throw off pursuit with misdirection and disguise.

Few creatures spread fear, suspicion, and deceit better than doppelgangers do. Found in every land, with no true homeland of their own, doppelgangers transform their bodies to blend in with other races. They are much like humans in that they display a wide variety of personalities and dispositions. Doppelgangers as a whole are few in number, but when living among other races, they congregate in small groups. Three disguised doppelgangers might live together in a dwarven stronghold city, outwardly appearing to be stalwart dwarves while secretly plotting to bring down the city’s defenses. Their knowledge of many cultures and their ability to manipulate others allow doppelgangers to walk about freely with little fear of detection.

Sowers of Paranoia:
Unscrupulous people know that hiring a doppelganger (if they could afford to do so) is the surest way to slip an agent into the ranks of their enemies. With the ability to look like anyone, a doppelganger can launch an attack in one guise, duck around the corner and assume another appearance, and evade pursuit by looking like a dumbfounded bystander. With the right disguise, a doppelganger can stroll past sentries, coax secret information out of confidants, or walk out of a noble’s manor carrying looted treasure in plain sight. Doppelgangers can get closer to an enemy than any other type of assassin can, taking on the visage of a trusted ally before planting a knife in
an unsuspecting back. Capturing a doppelganger can prove calamitous to a community, immediately casting suspicion on everyone—after all, if there could be one doppelganger, there might be more. As a result, some doppelgangers spend months or years infiltrating a town for the express purpose of revealing their deception when the time is right, then throwing suspicion onto others and letting the community destroy itself.

“I’ve been so many people I can hardly remember my own name. I was a male dwarf, stocky and strong, when I traveled to Vor Rukoth in search of the Rod of Kings. I was a female eladrin for a trip through the Feywild, lithe and full of laughter. I’ve been an orc, a minotaur, and a bugbear for different missions. Sometimes I wake up and have to touch my face to remember who I am that day. And sometimes I can’t remember whether I’m supposed to woo you or kill you without glancing in the mirror first.”

—Aunn, doppelganger spy
Doppelganger Infiltrator
Medium natural humanoid (shapechanger)

HP 90; Bloodied 45
AC 25, Fortitude 21, Reflex 25, Will 23
Speed 6

STANDARD ACTIONS

① Dagger (weapon) ✦ At-Will
Attack: Melee 1 (one creature); +16 vs. AC
Hit: 2d4 + 6 damage.

Perfect Replica (illusion, polymorph) ✦ At-Will
Effect: Melee 1 (one Medium creature). The doppelganger takes on the form of the target and alters its clothing and gear to match those of the target. Until the end of the doppelganger’s next turn, the target is immobilized and takes 6d8 extra damage from the doppelganger’s dagger power. See also replica switch.

MINOR ACTIONS

Change Shape (polymorph) ✦ At-Will
Effect: The doppelganger alters its physical form to appear as a Medium humanoid until it uses change shape again or until it drops to 0 hit points. To assume a specific individual’s form, the doppelganger must have seen that individual. Other creatures can make a DC 32 Insight check to discern that the form is a disguise.

TRIGGERED ACTIONS

Replica Switch ✦ At-Will
Requirement: The doppelganger must be adjacent to an enemy affected by its perfect replica.
Trigger: A melee or ranged attack from an enemy unaffected by the doppelganger’s perfect replica targets the doppelganger.
Effect (Opportunity Action): The doppelganger and the enemy affected by its perfect replica swap places, and the triggering attack instead targets the enemy affected by the doppelganger’s perfect replica.

Languages Common
Equipment dagger

Dedicated Impersonators: When a doppelganger assumes another form, it can stay in that shape for prolonged periods of time. A doppelganger might spend weeks, months, or years in the guise of an eladrin wizard or a human soldier, maintaining the deception around the clock to keep from being discovered. Some doppelgangers find this effort stressful and revert to their natural forms when they believe that no one is looking. Still, their ability to hold a form over time allows doppelgangers to live among other races, developing relationships with neighbors and becoming a part of the community without raising suspicion. The farmer from down the road, the baker’s wife, or a distant relative come to visit could be a doppelganger despite having been familiar to a person for years. A few particularly savvy doppelgangers have risen to great power by infiltrating other races, with ruinous results for those creatures.
Wielders of Many Powers: Doppelgangers use magic and other supernatural powers just as members of other races do, though often with more guile and finesse. Doppelgangers prefer magic that complements their natural shapeshifting ability and helps them infiltrate other groups; for example, they favor illusion magic, since it allows them to create distractions that can redirect suspicion. A few doppelgangers turn to the darker powers granted by shadow magic, augmenting their skill at blending in by adding the ability to vanish from sight. Some doppelgangers master psionic magic and can detect the surface thoughts of others, allowing them to assuage suspicions by providing the right answers to any questions put to them.

If any creature can claim to be an enlightened sage, a powerful tyrant, and a terrible monster, it is a dragon. Majestic and deadly, these creatures strike fear into the hearts of any who fall under the shadows of their enormous winged forms.

The size and majesty of dragons have shrouded them in myth. As ancient as the world, dragons are a living embodiment of legend. The oldest among them possess knowledge exceeding what most mortals can ever hope to attain. They hold the deepest secrets of the cosmos within their grasp. Dragons are no mere beasts ready to fall victim to a knight-errant or a treasure hunter. They are sages, oracles, and prophets; they are forces of nature capable of destruction and mayhem.

**Fledgling White Dragon**

**Alignment:** evil **Languages:** Common, Draconic
The Colors of Evil: The most famous and most feared dragons are part of the chromatic bloodline, including black, blue, green, red, and white dragons. Chromatic dragons have a penchant for evil and cruelty. They live to exert their dominance over other creatures through terror and violence.

Even among chromatic dragons, few share the cruelty of blacks. A black dragon does not hunt out of a need to survive or to protect its territory. Instead, a black dragon chases and tortures prey for the pleasure it gains from inspiring fear and causing pain. Black dragons are also among the most cowardly and cautious chromatic dragons. A black dragon waits in ambush or attacks from concealment. When a black dragon retreats, victims of its attack sometimes mistake its departure for a genuine withdrawal, not realizing until too late that the black is merely preparing for another assault.

Blue dragons are the most vain, proud, and arrogant of the chromatic dragons. A blue dragon delights in asserting its power over lesser creatures. A blue dragon will battle foes or preside over humanoids simply to exhibit its strength. When creatures venerate a blue dragon and respect its territorial claims, it can be the most reasonable of the chromatic dragons. Most blue dragons lair in areas where storms are fierce and frequent. As a result, many blues live along the coast, where they extort food and wealth from those who lack the strength to stand against them.

Few dragons are as reviled by humanoids as the sly, forest-dwelling green dragons. Although green dragons are weaker and less destructive than their chromatic kin, they are more cunning and deceptive. A green dragon tells lies as easily as other creatures breathe. A green relishes intrigue, preferring to achieve its goals through guile and betrayal rather than combat.
The savage white dragons lair in the coldest climes of the world, where they think of little more than their next meal and the contents of their treasure hoards. The oldest and most intelligent among them might seek to dominate other creatures, if only to feel assured of their power and superiority.

When a legend or a fable tells of a dragon that laid kingdoms to waste, devoured virtuous maidens, or incinerated valiant heroes, then odds are the subject of the tale is a red dragon. The most voracious of the chromatic dragons, a red dragon consumes far more than it requires. All dragons are avaricious, but a red dragon possesses greed that far surpasses that of its kin. It is also a vindictive creature, dwelling on the smallest slights and delivering revenge tenfold for territorial intrusions, thefts, and insults. Reds are not mindless brutes, however. They are accomplished strategists that spend their idle time developing tactics and contingency plans for virtually any scenario.

Driven by Greed and Ego: The secret to understanding chromatic dragons is comprehending their worldview. One trait unites and informs their psychology: the belief that they are superior beings. Dragons consider themselves more powerful, intelligent, important, and worthy of being dominators than any other mortal creature. Chromatic dragons are born with this sense of superiority, and it is a cornerstone of their personalities and worldviews. Trying to humble any dragon is like trying to convince the wind to stop blowing. To chromatic dragons, humanoids are animals, fit to serve as prey or beasts of burden, unworthy of respect or acknowledgment.

If one characteristic other than arrogance defines chromatic dragons, it’s greed. Dragon hoards are the stuff of legend—enormous piles of gold, gleaming gems, and magic items, enough wealth to buy a kingdom. And yet dragons have no interest in commerce, despite the value of their hoards. They amass wealth for no other reason than to have it. A chromatic dragon’s desire to create a hoard is a psychological need, or, arguably, a biological imperative. The source of this desire is a mystery, but it probably lies somewhere in a dragon’s enjoyment of possessing what others lack.

Dangerous Lairs: One thing dragons and humanoids share is the desire to find permanent shelter. Humanoids want a place that offers comfort and a little security. A dragon, with its innate toughness, poor tactile senses, and tolerance for severe conditions, instead chooses a home that is defensible, has multiple ways to enter and leave, and that provides the utmost security for its hoard.

“Rapacious, cunning, and destructive, red dragons are Tiamat’s favored children, embodying the worst that dragonkind has to offer. . . .”

“. . . But stripped of life, of hunger, of the needs of the flesh, an undead dragon is simply evil incarnate.”

—Jothan Ironspell
Chromatic dragons rarely construct lairs and instead find naturally occurring locations that can accommodate them. A blue dragon might lair within a sea cave that is occupied by subservient pirates. A red dragon could claim the caldera of an active volcano. After provoking a war, a green dragon might inhabit a city brought to ruin through the dragon’s machinations.

**Young White Dragon**
Large natural magical beast (dragon) XP 750

- **HP**: 200; **Bloodied**: 100
- **AC**: 17; **Fortitude**: 17, **Reflex**: 13, **Will**: 15
- **Speed**: 6 (ice walk), fly 6
- **Resist**: 10 cold
- **Saving Throws**: +5; **Action Points**: 2

**Initiative**: +1  **Perception**: +8  **Darkvision**

**TRAITS**

**Action Recovery**
Whenever the dragon ends its turn, any dazing, stunning, or dominating effect on it ends.

**Instinctive Rampage**
On an initiative of 10 + the dragon’s initiative check, the dragon can move up to its speed as a free action. The dragon can move through enemies’ spaces and gains resist 5 to all damage during the move. Each time the dragon enters an enemy’s space for the first time during the move, it can use *claw* against that enemy. If the attack hits, the target also falls prone. If the dragon cannot use a free action to take this move due to a dominating or stunning effect, then that effect ends instead of the dragon making this move.

**Savage Blood**
While bloodied, the dragon can score a critical hit on a roll of 17–20.

**STANDARD ACTIONS**

- ✦ **Bite** (cold) **At-Will**
  
  - **Attack**: Melee 2 (one creature); +8 vs. AC

Young Green Dragon

Large natural magical beast (dragon) XP 1,000

HP 252; Bloodied 126
AC 19, Fortitude 17, Reflex 19, Will 17
Speed 8 (forest walk), fly 10
Resist 10 poison
Saving Throws +5; Action Points 2

<table>
<thead>
<tr>
<th>Traits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poisonous Wounds (poison)</td>
</tr>
<tr>
<td>Aura 1</td>
</tr>
</tbody>
</table>

While the dragon is bloodied, any enemy that ends its turn in the aura takes ongoing 5 poison damage (save ends), or ongoing 10 poison damage (save ends) if that enemy is bloodied.

Action Recovery

Whenever the dragon ends its turn, any dazing, stunning, or dominating effect on it ends.

Instinctive Flyby

On an initiative of 10 + its initiative check, the dragon can use a free action to use flyby attack.

During the movement from flyby attack, the dragon gains a +4 bonus to all defenses against opportunity attacks. If the dragon cannot use a free action to make this attack due to a dominating or stunning effect, then that effect ends instead of the dragon making the attack.

Standard Actions

1. Bite (poison) ✦ At-Will
   - Attack: Melee 2 (one creature); +10 vs. AC
   - Hit: 2d10 + 4 damage, and ongoing 5 poison damage (save ends).
   - Miss: 5 poison damage.

2. Claw ✦ At-Will
   - Attack: Melee 2 (one or two creatures); +10 vs. AC. If the dragon targets only one creature, it can make this attack twice against that creature.
   - Hit: 2d8 + 4 damage, and the dragon shifts up to 2 squares.

3. Breath Weapon (poison) ✦ Recharge ⚪ ⚪
   - Attack: Close blast 5 (enemies in the blast); +8 vs. Fortitude
   - Hit: 2d10 + 3 poison damage, and the target is slowed and takes ongoing 5 poison damage (save ends both).
   - Aftereffect: The target is slowed (save ends).

4. Flyby Attack ✦ Recharge ⚪ ⚪
   - Effect: The dragon flies up to its speed, ignoring slowing effects during the movement. The dragon can use bite or breath weapon (if the power is recharged) at any point during the move.

Minor Actions

1. Luring Glare (charm) ✦ At-Will
   - Attack: Close blast 10 (one creature in the blast); +8 vs. Will
   - Hit: The dragon slides the target up to 3 squares.

Triggered Actions

1. Bloodied Breath ✦ Encounter
   - Trigger: The dragon is first bloodied.
   - Effect (Free Action): Breath weapon recharges, and the dragon uses it.

Traits

✦ Uncontained Lightning (lightning)  
While the dragon is bloodied, any enemy that ends its turn in the aura takes 5 lightning damage.

Action Recovery

Whenever the dragon ends its turn, any dazing, stunning, or dominating effect on it ends.

Instinctive Lightning

On an initiative of 10 + its initiative check, the dragon can use a free action to fly up to its speed and use lightning burst. This movement does not provoke opportunity attacks. If the dragon cannot use a free action to make this attack due to a dominating or stunning effect, then that effect ends instead of the dragon making the attack.

Standard Actions

✦ Gore (lightning)  
At-Will  
Attack: Melee 2 (one creature); +11 vs. AC
Hit: 4d6 + 5 lightning damage.

✦ Claw  
At-Will  
Attack: Melee 2 (one or two creatures); +11 vs. AC. If the dragon targets only one creature, it can make this attack twice against that creature.
Hit: 2d6 + 5 damage.

✦ Lightning Burst (lightning)  
At-Will  
Attack: Area burst 2 within 20 (creatures in the burst); +11 vs. Reflex
Hit: 2d10 + 5 lightning damage.
Miss: Half damage.

Breath Weapon (lightning)  
Recharge  
Attack: Close blast 10 (up to three creatures in the blast); +11 vs. Reflex.
Hit: 3d8 + 8 lightning damage.
Miss: Half damage.

Triggered Actions

✦ Wing Backblast  
At-Will  
Trigger: An enemy hits the dragon with a melee attack.
Attack (Immediate Reaction): Close burst 2 (enemies in the burst); +9 vs. Reflex
Hit: The target falls prone.
Effect: The dragon flies up to half its speed. This movement does not provoke opportunity attacks.

✦ Bloodied Breath  
Encounter  
Trigger: The dragon is first bloodied.
Effect (Free Action): Breath weapon recharges, and the dragon uses it.

Languages Common, Draconic
A chromatic dragon doesn’t rely only on the natural defenses of its lair. A dragon employs magical guardians, traps, and subservient humanoids to protect its treasures. A dragon that lacks such resources instead makes sure to place its lair in such a dangerous and remote location that none but the most audacious mortals could ever reach it. A white dragon might lair in a cave within a massive icicle on a frozen mountainside. A black dragon could hide its wealth deep underwater in the hull of a sunken ship.

**Traits**

**Action Recovery**

Whenever the dragon ends its turn, any dazing, stunning, or dominating effect on it ends.

**Instinctive Assault**

On an initiative of 10 + its initiative check, the dragon can use a free action to use **bite** or **claw**. If the dragon cannot use a free action to make this attack due to a dominating or stunning effect, then that effect ends instead of the dragon making the attack.

**Standard Actions**

**Bite (fire)**

- **At-Will**
  - **Attack:** Melee 2 (one creature); +12 vs. AC.
  - **Hit:** 2d10 + 6 damage. The target is grabbed and takes ongoing 5 fire damage, or ongoing 10 fire damage if the dragon is bloodied, until the grab ends (escape DC 19).

**Claw**

- **At-Will**
  - **Attack:** Melee 2 (one or two creatures); +12 vs. AC. If the dragon targets only one creature, it can make this attack twice against that creature.
  - **Hit:** 2d8 + 5 damage, and the dragon grabs the target (escape DC 16) if it has fewer than two creatures grabbed.

**Breath Weapon (fire)**

- **At-Will**
  - **Attack:** Close blast 5 (creatures in the blast); +10 vs. Reflex
  - **Hit:** 2d12 + 7 fire damage, or 2d12 + 17 fire damage while the dragon is bloodied.
  - **Miss:** Half damage.

**Triggered Actions**

**Tail Strike**

- **At-Will**
  - **Trigger:** An enemy leaves a square within 2 squares of the dragon.
  - **Attack (Immediate Reaction):** Melee 3 (triggering enemy); +10 vs. Reflex
  - **Hit:** 1d6 + 5 damage, and the target falls prone.

**Bloodied Breath**

</tbody>
</table>

### Traits

**Action Recovery**

Whenever the dragon ends its turn, any dazing, stunning, dominating effect on it ends.

**Instinctive Rampage**

On an initiative of 10 + the dragon’s initiative check, the dragon can move up to its speed as a free action. The dragon can move through enemies’ spaces and gains resist 5 to all damage during the move. Each time the dragon enters an enemy’s space for the first time during the move, it can use *claw* against that enemy. If the attack hits, the target also falls prone. If the dragon cannot use a free action to take this move due to a dominating or stunning effect, then that effect ends instead of the dragon making this move.

**Savage Blood**

While the dragon is bloodied, it can score a critical hit on a roll of 17–20.

Elder Blue Dragon  Level 20 Solo Artillery
Huge natural magical beast (dragon)  XP 14,000

HP 756; Bloodied 378
AC 34, Fortitude 33, Reflex 30, Will 30
Speed 10, fly 12
Resist 15 lightning
Saving Throws +5; Action Points 2

TRAITS

Uncontained Lightning (lightning) ✦ Aura 5
While the dragon is bloodied, any enemy that ends its turn in the aura takes 10 lightning damage.

Action Recovery
Whenever the dragon ends its turn, any dazing, stunning, or dominating effect on it ends.

Instinctive Lightning
On an initiative of 10 + its initiative check, the dragon can use a free action to fly up to its speed and use lightning burst. This movement does not provoke opportunity attacks. If the dragon cannot use a free action to make this attack due to a dominating or stunning effect, then that effect ends instead of the dragon making the attack.

STANDARD ACTIONS

Gore (lightning) ✦ At-Will
Attack: Melee 3 (one creature); +25 vs. AC.
Hit: 4d12 + 16 lightning damage.

Claw ✦ At-Will
Attack: Melee 3 (one or two creatures); +25 vs. AC. If the dragon targets only one creature, it can make this attack twice against that creature.
Hit: 4d8 + 13 damage.

Lightning Burst (lightning) ✦ At-Will
Attack: Area burst 2 within 20 (creatures in the burst); +25 vs. Reflex
Hit: 3d12 + 13 lightning damage.
Miss: Half damage.

Breath Weapon (lightning) ✦ Recharge [ ] [ ]
Attack: Close blast 20 (up to three creatures in the blast); +25 vs. Reflex.
Hit: 4d12 + 16 lightning damage, and the target is dazed (save ends).
Miss: Half damage.

Thunderclap (thunder) ✦ Recharge [ ] [ ]
Attack: Area burst 3 within 20 (creatures in the burst); +25 vs. Fortitude
Hit: 4d6 + 12 thunder damage, and the target is stunned until the end of the dragon’s next turn.
Miss: Half damage, and the target is dazed until the end of the dragon’s next turn.

TRIGGERED ACTIONS

Wing Backblast ✦ At-Will
Trigger: An enemy hits the dragon with a melee attack.
Attack (Immediate Reaction): Close burst 3 (enemies in the burst); +23 vs. Reflex
Hit: The target falls prone.
Effect: The dragon flies up to half its speed. This movement does not provoke opportunity attacks.

Bloodied Breath ✦ Encounter
Trigger: The dragon is first bloodied.
Effect (Free Action): Breath weapon recharges, and the dragon uses it.

**Traits**

**Action Recovery**
Whenever the dragon ends its turn, any dazing, stunning, or dominating effect on it ends.

**Instinctive Assault**
On an initiative of 10 + its initiative check, the dragon can use a free action to use bite or claw. If the dragon cannot use a free action to make this attack due to a dominating or stunning effect, then that effect ends instead of the dragon making the attack.

**Standard Actions**

+Bite (fire) At-Will+
*Attack:* Melee 3 (one creature); +27 vs. AC.
*Hit:* 2d10 + 6 damage. The target is grabbed and takes ongoing 15 fire damage, or ongoing 25 fire damage if the dragon is bloodied, until the grab ends (escape DC 30).

+Claw At-Will+
*Attack:* Melee 3 (one or two creatures); +27 vs. AC. If the dragon targets only one creature, it can make this attack twice against that creature.
*Hit:* 3d10 + 14 damage, and the dragon grabs the target (escape DC 27) if it has fewer than two creatures grabbed.

†Immolate Foe (fire) Recharge
*Attack:* Ranged 20 (one creature); +25 vs. Reflex
*Hit:* 4d10 + 7 fire damage, and ongoing 20 fire damage (save ends).
*Miss:* Half damage, and ongoing 10 fire damage (save ends).

Breath Weapon (fire) Recharge
*Attack:* Close blast 5 (creatures in the blast); +25 vs. Reflex
*Hit:* 4d12 + 17 fire damage.
*Miss:* Half damage.

**Triggered Actions**

†Tail Strike At-Will
*Trigger:* An enemy leaves a square within 3 squares of the dragon.
*Attack (Immediate Reaction):* Melee 4 (triggering enemy); +25 vs. Reflex
*Hit:* 2d8 + 4 damage, and the target falls prone.

†Bloodied Breath Encounter
*Trigger:* The dragon is first bloodied.
*Effect (Free Action):* Breath weapon recharges, and the dragon uses it.

Dracoliches: Long-lived though they are, dragons can die. Yet even when their heartbeats falter, some dragons remain in the world, active and malicious, fueled by necrotic energy instead of blood. Through a powerful ritual, a few dragons become dracoliches. Some dragons choose this fate rather than death, while others are subjected to the ritual by worshipers of Tiamat or Vecna who seek a powerful thrall that can champion their cause.

“The older they get, the more like their terrible god they become.”

—Jothan Ironspell

A chromatic dragon that becomes a dracolich tends to pursue the same goals it possessed in life: destruction, dominance, and treasure. The process of becoming a dracolich can drive a dragon toward new evil, though. Not only is a dracolich an unholy terror, it is a fiendishly intelligent tyrant that lays complex webs of foul schemes. A dracolich employs loyal intermediaries motivated by greed and a lust for power. It is especially difficult to overcome, because aside from the normal challenges associated with killing a dragon or a lich, it often acts from the shadows and keeps an array of backup plans.

Traits

Aura of Doom ✦ Aura 3
Enemies cannot regain hit points or gain temporary hit points while in the aura.

Action Recovery
Whenever the dragon ends its turn, any dazing, stunning, or dominating effect on it ends.

Instinctive Domination
On an initiative of 10 + its initiative check, the dragon can use a free action to use mesmerizing glance. This attack does not provoke opportunity attacks. If the dragon cannot use a free action to make this attack due to a dominating or stunning effect, then that effect ends instead of the dragon making the attack.

Standard Actions

✦ Bite (necrotic) ✦ At-Will
Attack: Melee 2 (one creature); +27 vs. AC
Hit: 2d8 + 8 damage, and ongoing 10 necrotic damage (save ends).

✦ Claws ✦ At-Will
Attack: Melee 2 (one or two creatures); +27 vs. AC. If the dracolich targets only one creature, it can make this attack twice against that creature.
Hit: 3d8 + 16 damage.
Effect: The dracolich slides the target up to 2 squares.

✦ Breath Weapon (necrotic) ✦ Recharge X
Attack: Close blast 5 (enemies in the blast); +25 vs. Reflex
Hit: 5d12 + 14 necrotic damage, and the target is weakened (save ends).
Miss: Half damage, and the target is weakened until the end of its next turn.
Effect: Each target loses any necrotic resistance (save ends).

Minor Actions

✦ Mesmerizing Glance (charm) ✦ At-Will (1/round)
Attack: Ranged 5 (one creature); +25 vs. Will
Hit: The the target is dominated (save ends).
Effect: The dracolich slides the target up to 2 squares.

Triggered Actions

✦ Bloodied Breath ✦ Encounter
Trigger: The dragon is first bloodied.
Effect (Free Action): Breath weapon recharges, and the dragon uses it.

Dragonborn

Dragonborn are humanoids that share physical features with dragons. The race once ruled over the Empire of Arkhosia, but its numbers have now dwindled. The dragonborn that live today are scattered throughout the towns and villages of other races.

Most dragonborn are honorable warriors or powerful spellcasters who share ties to dragons. Despite having no communities of their own, dragonborn retain strong cultural traditions.

**Honor Bound:** A dragonborn lives by a code of honor that influences all aspects of his or her life. This code promotes loyalty to one’s family and clan, so a dragonborn is very protective of allies and clan members. The code doesn’t demand virtue, but it does encourage respect for one’s enemies and victory through honorable combat.

**Draconic Affinity:** Dragonborn share a connection to dragons beyond just their physical appearance. Most dragonborn consider their draconic heritage a fundamental part of what makes their race unique. As a result, a dragonborn often has a personality that reflects the characteristics of dragons, such as being strong-willed, confident, independent, proud, or fearless.

**Drake**

Whether wild or domesticated, drakes are fierce and clever foes. They come in many shapes and sizes, and they sometimes serve as guards for those who have the patience and resilience to train them.

Drakes are reptilian beasts that have claws, fangs, and tails. They’re similar to domesticated mammals but have a reputation for toughness and ferocity that few tame animals share. Although a guard drake might seem as threatening as a wolf, its disposition is more alien and unpredictable. People fear drakes because their appearance is reminiscent of dragons. A drake lunges at anything that threatens it or its master, and a drake never backs down from a fight.

*Part of Civilization:* Trappers collect drakes to sell or train, bringing the creatures into settlements. Drakes are more expensive than other domesticated beasts, but most buyers believe the drakes’ ferocity and power merits the extra cost. Drakes usually appear in communities that border wilderness or in the camps of tribal humanoids such as goblins, orcs, lizardfolk, elves, and shifters. Only physically weak drakes, such as pseudodragons, serve as pets. Other drakes require more discipline and are best treated as pack animals or guardians.

Guard drakes, pseudodragons, and bloodseeker drakes are the most common types of drakes in humanoid communities. A guard drake lives up to its name by serving as a sentinel or an attack animal. A pseudodragon might be pampered as the pet of a wealthy noble or as the familiar of a spellcaster. One might also

encounter a pseudodragon on the outskirts of a town, scavenging for scraps of food. A bloodseeker drake performs the task of a bloodhound. They are prized by trackers and lawbringers who use them to hunt down quarry.

**Wild at Heart:** The most powerful drakes are difficult to tame and rarely show up in captivity. These drakes live in dens and hunt in the surrounding regions. One example is the rage drake, which is violent and hostile to most creatures. A rage drake attacks any creature that intrudes in its lair or stumbles into its hunting grounds. Although a rage drake can be domesticated when raised from an early age, even then the creature is unstable and dangerous. Ambush drakes roam the plains, setting upon caravans, travelers, and sometimes small settlements. They lust for the taste of humanoid flesh and will gnaw on victims while the creatures are still conscious.

Social Creatures: Drakes are social creatures that prefer the company of other drakes. Drakes form packs with their kin or submit to the dominance of a master they regard as the pack leader. Although a drake can’t speak, it might attempt to communicate by growling, chirping, roaring, purring, or hissing. A more intelligent drake, such as a pseudodragon, can convey complex messages through sounds and movement. A lone drake might seek friendship from anyone who happens upon it. Although drakes desire companionship, none are truly loyal. If a drake grows too hungry, it might devour a packmate or its master.

Driders have the torso and upper body of a drow, and many retain their drow traits, such as the power to create clouds of darkness and to outline their foes in fire. A drider’s lower body is that of a massive spider, giving the creature the ability to climb walls and spin webs. A drow warrior considers the presence of a drider to be a good omen. Most warriors believe that becoming a drider is the pinnacle of one’s life. The transformation into a drider infuses a warrior with a bloodthirsty and savage nature, leading it to be even more violent and pitiless than drow already are.

**Champions of the Drow:** Among the drow, driders are highly honored and have their own social caste outside drow society. They are both respected and feared; drow view them as manifestations of Lolth’s will that function as champions, spies, and assassins. Before its transformation, a drider is already a powerful warrior who has proved fearless and deadly in battle. A renowned drow warrior might disappear one day, to emerge the next as a drider. Despite the driders’ near-mythical status within drow society, all these creatures remain beholden to...
priestesses of Lolth. Many driders chafe at the control the priestesses exert, but none yet have had the power and the following to defy them.

**Spider Affinity:** Driders have an affinity for spiders, as evidenced by their half-spider bodies. This affinity goes beyond physical similarity, though. Some driders can communicate with spiders through a kind of telepathy, and they might use spiders as spies, scouts, or combat troops. Many driders feel at home more among spiders than among drow. A drider might become a recluse that lives in the caves outside a drow city, emerging only at the command of Lolth’s priestesses. A drider’s lair consists of narrow tunnels, each barely wide enough for the drider to squeeze through. The webs of thousands of spiders fill these tunnels. A drider relies on the spiders to incapacitate prey or to alert it of intruders. Although most spiders lack the intelligence to perform complex tasks, driders who have mastered arcane magic can summon intelligent spiders from other planes, such as the Demonweb Pits, the layer of the Abyss where Lolth dwells.

“Cursed? I’m afraid not. In this form, I wield more power than I could have imagined before the Test. As you shall soon see, Lolth has blessed me richly.”

—Azarax, drider of Erelhei-Cinclu
The Test of Lolth: After a drow warrior has proven himself or herself to possess exemplary prowess and bravery, a priestess of Lolth allows the warrior to undertake the Test of Lolth—a grueling and painful magical ritual that transforms the drow into a drider. Many drow don’t survive this process, succumbing to the mental or physical torment. The details of the Test of Lolth are carefully guarded by the priestesses. Although a renegade drow might, on occasion, attempt to steal or record the secrets of the ritual, no one has yet managed to survive the wrath of the priestesses. Many factions within drow society covet the knowledge of this test. They hope to unlock its secrets and, in doing so, gain the ability to create legions of drider warriors that could upset the balance of power and break the priestesses’ control. For their part, driders have little to say about the test, preferring to keep its secret so that they continue to be rare and honored within drow culture.
Dryad

Normally shy and reclusive, dryads live in out-of-the-way, untouched forests, appearing only when intruders from civilization threaten their homes. When that happens, these temperamental creatures lash out with primal magic and the strength of oaks.

As unpredictable and inscrutable as the weather, dryads live only in the wild and refuse to make homes in cities or other settlements. Even an eladrin city, which is entwined within trees, frightens or angers a dryad. Dryads prefer to live in dark, thickly forested areas. They can merge with great trees, and each dryad has one tree that it calls home. It’s not always easy to identify a dryad’s tree or grove, though. Some people say dryads’ groves are darker than other nearby areas of the forest; others claim that the sky turns green when you near one of them.

“As beautiful and welcoming as a sunlit glade in high summer, as terrifying and deadly as a winter gale sweeping through a barren forest—that’s a dryad. In the space of moments.”

—Galados of Celduilon

A dryad is deeply protective of its home. A dryad will die fighting to protect the forest, though sometimes it is driven away by forces it cannot vanquish. Other times, a dryad awakens after a long, deep slumber to discover that its forest is being ravaged by lumbering.
dryad that undergoes such trauma can become a heartless creature intent only on inflicting pain on any who trespass in its demesne.

Fey Magic: Dryads wield the ancient and unfathomable magic of the Feywild, which gives them power over plants and mortals alike. A dryad has the ability to influence the mind of its foe, luring the prey into a dangerous patch of flora or off a deadly precipice. Most dryads have some talent for illusion. Using its deceptive veil, a dryad can appear as an elf or an eladrin maiden who has hair like orange autumn leaves or green spring blossoms. Anyone who draws close to the veiled creature soon discovers that the dryad’s disguised thorny claws are very real.

Fear and Allure: The dichotomy of nature—its capacity for both sublime beauty and violent destruction—echoes in the form of dryads. When calm and serene, or when masked by its deceptive veil, a dryad is a creature of beauty and grace. When angered, though, a dryad can be a deadly deceiver or a storm of claws. When one townsperson recounts seeing a beautiful maiden in the forest and another describes being chased from the woods by a shrieking tree-creature, it is possible that the two describe the same dryad. A dryad’s ability to both captivate and frighten has gained the creature a reputation throughout the land as being both a blessing and a curse.
Quick to Anger: Fey are often characterized as fickle creatures. A dryad, however, is better characterized as rash or impulsive. The smallest threat or slight can anger a dryad. When intruders approach a dryad’s glade or grove, the creature uses any means to drive off or kill the trespassers. A dryad might provide misleading directions, lead the interlopers into traps, or misdirect them to the den of nearby monsters. Other dryads simply charge forward and attack, nourishing the tree roots with the blood of their victims. Once a dryad decides an intruder must die, nothing can dissuade it. Nonetheless, it’s possible to reason with a dryad and prevent combat. Anyone who wants to speak with a dryad must approach a grove slowly and avoid harming the forest. Once they are confronted, those wishing to speak to the dryad must make their intentions clear. A dryad might accept offerings as a sign of good faith, including nature rituals or the saplings or seeds of rare trees.

Friends of the Wild: Dryads fight alongside other plant creatures and forest denizens. They share an innate bond with natural flora and fauna. A dryad can quickly learn about a disturbance in the forest, even one that occurred many miles away. A dryad sometimes fights alongside eladrin or other civilized races, but only when it believes a danger to the forest merits such an allegiance. Although most dryads are solitary creatures, they exhibit great unity in times of war. If a group of dryads is aiding in a battle, it might leave if even one of the group finds the actions of its civilized allies to be offensive.

✦ Claw ✦ At-Will

Attack: Melee 1 (one creature); +12 vs. AC
Hit: 2d8 + 6 damage, or 3d8 + 8 if no other enemy is adjacent to the dryad.

✦ Luring Feint ✦ At-Will

Effect: The dryad uses claw. If the attack hits, the dryad shifts up to 4 squares, pulling the target with it. If the attack misses, the dryad shifts up to its speed.

MOVE ACTIONS

Treestride (teleportation) ✦ At-Will

Requirement: The dryad must be adjacent to a tree or a Large plant.
Effect: The dryad teleports up to 8 squares to a square adjacent to a tree or a Large plant.

MINOR ACTIONS

Deceptive Veil (illusion) ✦ At-Will

Effect: The dryad disguises itself to appear as a Medium humanoid (usually a beautiful elf or eladrin) until it uses deceptive veil again or until it drops to 0 hit points. Other creatures can make a DC 28 Insight check to discern that the form is an illusion.

**Duergar**

The duergar are slavers that dwell in volcanic regions of the Underdark. They were once the thralls of mind flayers, but they turned to devils to help escape from bondage. Now, they acquire their own slaves by making raids into the surface world.

The dwarves that suffered generations of servitude under the brutal mind flayers became duergar after they turned to the devils to help them gain their freedom. Believing that Moradin had abandoned them, the dwarves swore dark oaths to the powers of the Nine Hells, who were only too happy to offer aid in exchange for loyalty.

**Built on the Backs of Slaves:** Duergar have a well-earned reputation as slavers. They rarely perform exhausting or risky tasks, relying instead on the work of slaves. A duergar recognizes the value of slaves, though, rarely tasking them with jobs that are dead or unlikely to yield a high reward. Most duergar slavers capture only those who exhibit physical prowess or exceptional skill. A duergar has no interest in enslaving the young, the sick, or the elderly; such individuals are often left dead as a result of duergar raids.

Equipment chainmail, warhammer, crossbow
A duergar retains a vestige of its dwarven heritage. Other Underdark denizens often call upon duergar to build keeps, castles, and other structures of stone. A duergar also employs its slaves to mine valuable substances, such as gold, platinum, and gems. Usually, a large number of slaves are overseen by a small number of duergar taskmasters. When the slaves are not working, they are treated like prisoners. A duergar keeps its slaves in defensible structures, discouraging outsiders from attempting to rescue them.

**Consorting with Devils:** The duergar embrace their mutually beneficial agreement with the infernal forces. Many of the fortresslike cities that duergar inhabit have places that serve as embassies for devils. Throughout these cities, devils travel openly in the streets. Humanoid devils, particularly succubi, are the most common visitors. Sometimes a powerful devil ascends to power in a duergar settlement, taking an active hand in the compact with its residents and granting boons in exchange for service.
A duergar outpost near the surface might host a significant tiefling population. A tiefling who embraces his or her infernal heritage often allies with duergar, who use the tiefling as an agent on the surface. A tiefling might become a member of a surface settlement, identifying choice victims for duergar slavers.

**Surface Raiders:** A duergar that lives in an outpost near the surface tends to actively raid settlements. Duergar are commonly sighted in borderland regions, where few patrols or militias can stand up to their attacks. A duergar living near the surface usually sells its slaves to markets in the Underdark or trades the slaves to duergar living deeper underground, where the slaves are more useful. A duergar slaver often learns the traditions and routines of surface-dwellers, putting those lessons to practice in its raiding techniques. A duergar raider might wait until fall harvest to attack, taking advantage of the large number of isolated, able-bodied workers in the fields.

**Fortresses of the Deep:** Deep-dwelling duergar make their homes in highly defensible areas of the Underdark, such as on islands in the middle of underground seas, in caverns surrounded by moats of lava, or on the edges of deep chasms. Duergar are typically slow to trust outsiders; an endorsement from a powerful devil is one of the few ways to gain the trust of a duergar. Duergar are always wary of attacks from mind flayers, aboleths, and other creatures that threaten to enslave them once again. Squads of a half-dozen or more soldiers patrol duergar strongholds, sometimes accompanied by devils or by duergar that have the psychic talent to detect mind flayers or aboleths. Duergar might seem defensive or cautious, but they quickly take advantage of their enemies’ weaknesses, whether in combat or in social encounters.

“Don’t call them dwarves. They’re not, not any more than a succubus is a human. They’re fiends through and through, and don’t ever forget it.”

—Boldrik of Hammerfast
DWARF

The industrious and honorable dwarves carve kingdoms from the mountains, creating glimmering points of light in the darkness of the world. Their realms are strong and vast, though not all are welcoming of outsiders.

A dwarf lives for the ring of the smith’s hammer and the chink of a chisel on stone. A dwarf exults in the gush of ale and the clink of coins. A dwarf speaks solemn oaths and bellows great battle cries. To the din of these sounds, dwarves live and work.

Masters of Mountains: Long ago, with the aid of their god Moradin, dwarves freed themselves from the dominion of the giants. Today, dwarven citadels guard mountain passes against giants and other denizens of the wilderness. These outposts are important waypoints for trade and travel; they allow dwarves to import simple products and export fine goods, such as weapons, armor, sculptures, and ales.

Sworn to the Clan: A dwarf tends to practice his or her clan’s traditions wherever he or she might dwell. A dwarf living in a human city might forge armor, operate a tavern or brewery, or become a soldier. A dwarf warrior might shed blood alongside members of another humanoid race, so long as those people never make enemies of that dwarf’s clan.

EFREET

These burning elemental lords enslave weaker humanoids, which they put to use in an effort to expand their dominion. Despite their tyrannical tendencies, efreets adhere to strict laws and customs, making their settlements rare havens of order within the Elemental Chaos.

Every efreet has a title—Glorious Sultan of the Eternal Fires, Caliph of the Burning Thunder, Pasha of the Gilded Flame, Maharaja of the Ruby Palace—and each has dozens of slaves. Efreets consider themselves the nobility of the Elemental Chaos. Their intellect and ambition have helped them to amass great wealth and to create great demesnes, where they can lord over mortals.

**Fiery Potentates:** Efreets are the self-proclaimed princes of the Elemental Chaos, and they are the strongest force of order in the tumultuous plane. Efreets believe they are the firstborn of the primordials and thus inheritors of the Elemental Chaos and creation. Despite this claim, an efreet exhibits scant loyalty to its progenitors. An efreet rarely worships a higher being, and it owes fealty only to the Lord of the Efreets, who accepts no master and honors only himself. Although few in number, efreets rule over vast numbers of slaves and soldiers, many of whom are loyal unto death. Many creatures of the Elemental Chaos see service to an efreet as a great honor, even when such bondage includes punishment.

There are no “efreet commoners.” Every efreet belongs to a noble house. These houses ruthlessly plot and scheme against each other, and from time to time they muster enormous armies to battle one another. A house might contain only
a small number of efreets, but through power and intimidation, those house members preside over many other elementals. Their control is not limited to fire creatures; the most cunning and powerful efreets keep creatures of many kinds. On rare occasions, an efreet might bind a demon to servitude. An efreet is shrewd enough not to rely too much on such bound servants, though.

**Masters Who Hate Slavery:** As creatures of nobility and self-importance, efreets fear and loathe servitude to others. Sometimes when two efreet houses clash, the losing side must surrender a junior member of its house to the victor for a certain amount of time. This loss is far more humiliating and punishing than lost goods or slain soldiers. An efreet considers being bound to serve a mortal the worst form of punishment. It burns with resentment against its erstwhile master, hoping for an opportunity to exact vengeance.

**Citadels of Fire and Gold:** Efreets use enslaved creatures and spellcasters to craft stunning citadels of metal and flames. These citadels become beacons of stability and trade in the wild and ever-changing furor of the plane. The greatest jewel among these fortresses is the glittering City of Brass, the seat of the efreets’ power. Unchanging and eternal, the City of Brass occupies a permanent place in the roiling chaos, and it is there that the Lord of the Efreets rules with absolute authority.

“At the point where an efreet offers to grant your wish, you’re in real trouble. You can refuse, but you’ll offend the efreet’s strange sense of hospitality and maybe make a powerful enemy. Or you can accept, and watch everything you’ve ever dreamed of come within your grasp . . . and then crumble into ash.”

—Obanar, guardian of Argent
Evil Excursions and Dire Diversions: An efreet house sometimes sponsors an excursion in which a few nobles of the house venture out of the Elemental Chaos into the world or another plane. They might hunt mortals or a dangerous creature for sport, bringing home any trophies to place in their house’s mansion. Members of these hunting parties challenge each other to see who can take the most slaves or who can foist the best deception upon a mortal. An efreet might take advantage of the common misconception among mortals that it can grant wishes. Efreetes in fact have no power to grant wishes, but they are not averse to bargaining with weaker mortals. An efreet released from servitude might grant its liberator a “wish,” but sometimes the wish can have unforeseen consequences.

Efreetes engage in battle or start wars of conquest for entertainment. An efreet might have a goal in mind and be infuriated by even the smallest failures, but ultimately its long life and its desire for pleasure give it reason to care little about the consequences of its actions. Disappointment is temporary, and an efreet feels assured it will get what it wants in the end.

**EFREET**
Elemental
Chaotic creatures formed from the fundamental building blocks of creation, elementals have brief, capricious lives. They embody the untamed nature of the Elemental Chaos and act without logic.

A fragment of creation given form and sapience, an elemental is a being of air, earth, fire, or water. Like the plane that birthed them, elementals are untamed and unpredictable; they wreak havoc wherever they go. An elemental has only a vague physical form. It appears as a shard of raw elemental energy that threatens to break apart at any moment.

“They might be small and fairly weak, but make no mistake: They’re the front line of an army that would tear the world apart given half a chance.”
—Shemeshka the Marauder

(Left to right) water elemental, earth elemental, air elemental, fire elemental
The Elemental Chaos constantly creates more elementals. When such creatures collide, the results are predictable. Water elementals quench their fiery kin; fire elementals fuse with creatures of air to produce columns of spinning, roiling flame; earth elementals stand firm as their watery counterparts smash against their stony forms. Of course, all these interactions do not preclude elementals from unconsciously working together to tear apart a settlement or a trespasser.

**Creatures of Destruction:** With nothing to govern their actions, elementals act randomly, burning, tearing, or smashing whatever they come across. Some sages speculate that the Elemental Chaos spits out elemental creatures to serve as agents of entropy that revert creation back to its most basic form. The energy and destructive power of elementals is coveted by spellcasters who hope to harness it for their own purposes. Elementals are sometimes captured and bound into service, allowing a spellcaster to funnel their elemental energy into spells or devices. Attempts to control elementals often end in disaster when the binder loses control, allowing the elementals to run amok.

**Invaders from the Elemental Chaos:** An elemental that is not summoned might enter the world through a planar event in which the Elemental Chaos intrudes on the natural world. These events are often unpredictable and can result in catastrophic destruction. If a settlement is near the location of such an event, an elemental incursion could cost many lives and undo years of work. Fire elementals might burn the fields of farmers; water elementals could cause flooding along riverbanks; earth elementals might smash through walls and buildings; air elementals could tear off roofs or bring rockslides crashing down. If a region isn't equipped to put down a group of rogue elementals, it might destroy numerous villages until someone comes along to stop it.

**Weapons of Primordial Power:** Some scholars believe that elementals, belying their chaotic nature, act under the guidance of higher powers. These sages assert that the primordials, the undisputed masters of elemental power, use elementals as tools in the world because they are unable to act from their prisons. An elemental attack on a distant outpost might seem like an isolated occurrence until someone realizes that each outpost along the border has suffered a similar attack. Perhaps the realm contains an ancient secret to help free one of the primordials, or perhaps it is a beacon of light and order in an otherwise dark and chaotic world. Alternatively, a spellcaster might find the summoning and binding of many powerful elementals to be a simple task, only to later discover that the elementals allowed themselves to be bound in order to later escape and sabotage a planar ritual, throwing open a portal to the Elemental Chaos. Regardless of whether the speculation of scholars holds true, elementals seem built to be weapons and tools. They lack intelligence and ambition, making them the perfect servants of those who want to act in secrecy and without fear of betrayal.
### Lesser Air Elemental
Small elemental magical beast (air)

- **HP**: 23; **Bloodied**: 11
- **AC**: 15, Fortitude 12, Reflex 14, Will 13
- **Speed**: 0, fly 6 (hover)
- **Vulnerable**: 5 fire

**Initiative +7**

**Perception +0**

#### Traits

**Phantom on the Wind**

The lesser air elemental becomes invisible whenever it starts its turn without an enemy adjacent to it. The invisibility lasts until the end of its next turn or until it hits or misses with an attack.

#### Standard Actions

1. **Slam✦ At-Will**
   - **Attack**: Melee 1 (one creature); +6 vs. AC
   - **Hit**: 1d6 + 3 damage.

2. **Grasp of Storms✦ At-Will**
   - **Attack**: Melee 1 (one creature that can’t see the elemental); +4 vs. Reflex
   - **Hit**: 2d6 + 4 damage, and the elemental grabs the target (escape DC 12) if it does not have a creature grabbed. Until the grab ends, the target takes ongoing 5 damage, and any ranged or melee attacks that hit the elemental deal half damage to the target.

#### Skills

- **Stealth +8**
- **Dex 17 (+3)**
- **Wis 11 (+0)**
- **Con 11 (+0)**
- **Int 5 (-3)**
- **Cha 8 (-1)**

#### Alignment

---

### Lesser Earth Elemental
Small elemental magical beast (earth)

- **HP**: 42; **Bloodied**: 21
- **AC**: 17, Fortitude 15, Reflex 12, Will 13
- **Speed**: 5, burrow 5
- **Tremorsense**: 5

**Initiative +1**

**Perception +1**

#### Traits

**Earth Glide**

The elemental can pass through earth and rock as if it were phasing.

**Brittle Skin**

Whenever the elemental takes thunder damage, it takes a -2 penalty to all defenses until the end of its next turn.

#### Standard Actions

1. **Slam✦ At-Will**
   - **Attack**: Melee 1 (one creature); +7 vs. AC
   - **Hit**: 1d8 + 5 damage, and the target cannot shift until the end of the elemental’s next turn.

#### Triggered Actions

**Overwhelming Stone✦ Recharge when first bloodied**

- **Trigger**: An enemy hits one of the elemental’s allies with a melee attack.
- **Effect (Immediate Reaction)**: Melee 1 (triggering enemy). The target falls prone.
**Lesser Fire Elemental**
Small elemental magical beast (fire)  
XP 100

ELF

Members of a lithe and agile race as old as the world, elves are fey humanoids who can be friend or foe to the other humanoid races. Three types of these creatures exist: elves, eladrin, and drow.

Like humans, elves come in many varieties, but they share a few characteristics. Although great gulfs exist between the three types of elves, they share their slim builds, pointed ears, long life spans, and smooth facial features. Most elves are skilled in many disciplines as a result of centuries of practice and training.

**Elf Archer**
Medium fey humanoid

| HP 32; Bloodied 16 | Initiative +5 |
| AC 16, Fortitude 12, Reflex 16, Will 14 | Perception +9 |
| Speed 7 | Low-light vision |

**TRAITs**

**Archer’s Mobility**
If the elf moves at least 4 squares from the square where it started its move, it gains a +2 bonus to ranged attack rolls until the start of its next turn.

**Wild Step**
The elf ignores difficult terrain whenever it shifts.

**STANDARD ACTIONS**

- **Short Sword (weapon)** At-Will
  
  *Attack:* Melee 1 (one creature); +7 vs. AC
  *Hit:* 1d6 + 4 damage.

- **Longbow (weapon)** At-Will
  
  *Attack:* Ranged 30 (one creature); +9 vs. AC
  *Hit:* 1d10 + 4 damage.

**TRIGGERED ACTIONS**

- **Elven Accuracy** Encounter
  
  *Trigger:* The elf makes an attack roll.
  *Effect (Free Action):* The elf rerolls the triggering attack roll and uses the second result.

- **Not So Close** Encounter
  
  *Trigger:* An enemy makes a melee attack against the elf.
  *Effect (Immediate Reaction):* The elf can shift 1 square and then use longbow against the triggering enemy.

**LANGUAGES** Common, Elven

**Equipment** leather armor, short sword, longbow, 20 arrows

**High Elves:** Eladrin, also known as high elves, are residents of the Feywild and are the longest-living of the elf subraces. They are graceful warriors and potent wizards, commonly mixing swordplay with spells during battle. Eladrin share many of the traits, ambitions, and vices of other civilized races, and they tend to consider themselves above others’ problems. This aloofness leads many
eladrin to regard shorter-lived humanoids as tools or fodder, easily discarded when they outlive their usefulness.

Most eladrin live in shining cities created with the aid of arcane magic. Eladrin build cities within nature, fusing civilization with primal beauty to create magnificent structures that rise high into the treetops. Many eladrin cities have fallen into ruin, though, reclaimed by the land as a result of the collapse of their once-great empire. Some ancient eladrin fortresses remain untouched, protected for centuries by arcane wards. A few factions among the eladrin want to reclaim these abandoned lands and restore the power of the eladrin. Other factions believe that the time of the eladrin has passed. The two philosophies rarely clash in the world, but in the Feywild this conflict simmers.

**Wood Elves:** In the distant past, the race of elves broke away from the eladrin and settled into the forests of the world. These elves, commonly referred to as wood elves, live in areas of verdant forests. Since they make their homes on the surface of the world and not in the Feywild or the Underdark, wood elves frequently live among other humanoids. Unlike an eladrin, a wood elf is likely to

“Your empire no longer claims these woods, human, and you are no longer welcome under its branches.”
—Janic of the Harkenwood

(Left to right) eladrin battle dancer, elf archer, drow arachnomancer
become involved in the affairs of other races, usually in defense of its home or as an ally against a great threat. A wood elf can also be an enemy to other humanoids, though. A militant elf clan might use violence to drive back those who encroach on its forest. Elves have a reputation as unparalleled archers. A few elf tribes even hire out as artillery for humans and other races.

**Dark Elves:** An ancient rebellion against their kin drove the drow into the depths of the Underdark where they now make their homes. Also called dark elves, drow serve the dark goddess Lolth, who bestows venomous blessings upon the priestesses who rule drow society.

Drow are consummate assassins and raiders. Their attacks on surface settlements leave few alive. Deep within the Underdark, drow cities boil over with manipulation and betrayal. The drow would be a potentially overwhelming force to surface-dwellers if they could stop fighting each other long enough to unify. Although some charismatic drow have attempted to overcome their race’s tendencies, in the end, drow alliances fall apart as they are beset by a series of assassinations and betrayals.

### Elf Scout Level 2 Skirmisher

“Lolth will savor your exquisite pain as my poison courses through your veins.”
—Matron Urlvrain of Phaervorul
Ettin

The two-headed ettin presents a double threat for any who are unfortunate enough to encounter one as it tramples through the hills in search of food and treasure. Even with two brains, though, an ettin’s intellect is limited.

Although kin to the giants, a two-headed ettin lives like an ogre and eats like a troll. Two puny minds drive the creature’s powerful body to kill anything that comes across its path. Only spells and swords can reason with these savage humanoids.

Quarrelsome Heads: Each ettin has two ugly heads, and the small brains in each thick skull feud over control of its body. An ettin is constantly at war with itself. Each head’s personality strives to assert control. The heads often squabble with the same selfishness and rancor as a pair of young siblings. Because an ettin cannot survive without both heads, though, it avoids self-destructive behavior and manages to achieve a tenuous degree of teamwork. In combat and under stress, the two heads achieve surprising cooperation as each drives the ettin’s body to take actions twice as fast as a normal giant.

TRAITS

Rage Song
Aura 5

Enemies take a -2 penalty to attack rolls and gain a +2 bonus to damage rolls while in the aura. Allies gain a +2 bonus to attack rolls and damage rolls while in the aura.

Double Actions
The ettin makes two initiative checks and takes a full turn on each initiative result. The ettin can take two immediate actions per round but only one between one turn and the next.

Dual Brain
At the end of each of its turns, the ettin automatically ends any dazing, stunning, or charm effect on itself.

STANDARD ACTIONS

Smash
contrat: Melee 2 (one creature); +13 vs. AC
Hit: 2d8 + 7 damage, and the target falls prone.

Invoke Fury
Effect: Close burst 5 (one enemy in the burst). The target must use a free action to charge or make a basic attack against a target of the ettin’s choice. The movement for this charge does not provoke opportunity attacks.

**Vicious Hunters:** A small tribe of ettins can carve a path of destruction through borderlands. A lone ettin could be less destructive but might instead build a savage fiefdom by bullying weaker humanoids to bring it tributes of wealth and food. An ettin will hunt, kill, and eat any creature—even other ettins, if they are vulnerable. The creature's tremendous strength and voracious appetite means that little remains of a victim, not even bones. Smashed caravans, collapsed houses, and churned earth are often the only evidence of an ettin attack.

“Stay here, next to squishy wizard!”
“No, elf’s arrows hurt! Smash elf!”

—Gurgnash, ettin (to himself)

An ettin is a sinister creature driven by instinct to seek dominance, inflict pain, and cause terror. Power pleases an ettin, and it enjoys victimizing those it sees as weak or defenseless. Warriors take advantage of this trait, using vulnerable bait to set ambushes for ettins. Usually, livestock doesn’t suffice to lure an ettin out. The terrified screams of a potential victim are the surest way to draw an ettin into the open.

Primordial Demonism: Legend says that ettins arose from the blood of Storralk, a mighty primordial of earth and stone. In ancient times, this primordial set upon Demogorgon when the demon lord was nearly split in two by the god Amoth. Demogorgon defeated Storralk and, as punishment, entombed the primordial beneath his throne in the Abyss. After the battle concluded, Demogorgon’s two heads gazed into the pools of Storralk’s blood, and from those pools arose ettins. Demogorgon cast most of the giants out of the Elemental Chaos and into the world, knowing that as manifestations of Storralk’s blood, any pain the ettins suffered would be inflicted upon the bound primordial.

Few ettins of the world know this story. An ettin that is aware of the tale, typically one living in the Elemental Chaos, tends to regard Demogorgon as the father of its race. An ettin respects strength, and it prefers to be associated with Demogorgon, since he was triumphant in the battle against Storralk. Ettins that know the story of their creation often worship other demons in addition to Demogorgon. Such ettins believe that demons are a closer representation of their kin than giants are. Tribes of these demon-worshiping ettins are more savage and evil than other tribes, and many of their members are possessed by demons or maddened by abyssal power.

A gargoyle is a vicious, stealthy creature that disguises itself as a statue by turning to stone. It waits for a potential victim to pass by and then swoops down to attack.

### Gargoyle Rake
Medium elemental humanoid (earth) XP 200

**HP**: 52; **Bloodied**: 26  
**AC**: 19, **Fortitude**: 17, **Reflex**: 15, **Will**: 15  
**Speed**: 6, fly 8  
**Initiative**: +8  
**Perception**: +9  
**Darkvision**

### Standard Actions

1. **Claw** ✦ At-Will  
   **Attack**: Melee 1 (one creature); +10 vs. AC  
   **Hit**: 1d10 + 4 damage plus 2 extra damage for each one of the gargoyle’s allies adjacent to the target.

2. **Swoop Attack** ✦ At-Will  
   **Effect**: The gargoyle flies up to its fly speed and uses **claw** at the end of the move. This movement does not provoke opportunity attacks.

3. **Stone Form** ✦ At-Will  
   **Effect**: The gargoyle enters stone form until it ends the effect as a minor action. While in this form, it gains tremorsense 10 and resist 20 to all damage, gains 5 temporary hit points at the start of each of its turns, and cannot take actions except to end the effect. When the gargoyle ends the effect, it gains a +15 bonus to its next damage roll before the end of its next turn.

Gargoyles take on grotesque, statuelike forms, lurking in these guises for days or weeks until prey comes near. A gargoyle might keep itself entertained by attacking birds or rodents, but what it really wants are sentient creatures. A gargoyle revels in ripping apart its enemies with its claws. Although a gargoyle might easily slay a normal humanoid with a single blow, it prefers to enjoy the kill by harrying its prey and delivering several raking attacks that leave a victim alive but incapacitated. A gargoyle will eventually kill and devour a victim after the monster has had its fun.
A gargoyle lives in any environment where stone is common, whether it’s an area of buildings, mountains, cliffs, or underground caves. Statues of gargoyles appear on buildings throughout the world, and many gargoyles hide among these features. A gargoyle’s reputation for cruelty has transformed its visage into a sign of warning against intruders.

**Boasts and Torture:** Crude creatures that operate on base desires, gargoyles derive amusement from taunting and threatening foes. A gargoyle singles out an enemy that is physically weak, mocking the opponent as it swoops down to claw at the creature. A gargoyle issues dire threats of torture and pain, attempting to foster fear in its foe and cause the creature to bolt. Gargoyles don’t require sustenance, but most enjoy gnawing on their still-living foes. A gargoyle roost is often adorned with the fresh corpses of victims. By the time a traveler spots such signs, though, a gargoyle is usually swooping down to attack.

**The Element of Surprise:** A gargoyle’s stone form doesn’t necessarily look like its natural form. The creature hides along high precipices and among statues, maintaining a humanoid, demonic, or reptilian shape to mislead observers. In their natural form, gargoyles have horns, wings, rocky flesh, and red eyes. When a gargoyle charges down to deliver a surprise attack, its adopted features melt away and are replaced by its natural appearance.

The Chaos and the Abyss: Gargoyles live throughout the planes, from perches on ruined gates of Shadowfell cities to fortresses within the domains of dead gods in the Astral Sea. Home for most gargoyles is the churning landscape of the Elemental Chaos. There, gargoyles rarely pose as statues and instead hunt on the wing, often alongside other elemental creatures. Within and near the Abyss, deadly nabassu gargoyles join the ranks of demons to wage war or to capture creatures that elude the abyssal hordes.

Reluctant Guardians: Gargoyles sometimes serve demons or powerful spellcasters as guardians, keeping watch over gates and walls. A gargoyle rarely performs this service willingly; it is usually bound by magic or cowed by threats. A gargoyle might possess a key or a password to open a locked door or gate. A traveler who answers a riddle or provides the proper identification might be allowed to pass through the barrier unscathed. Gargoyles use the smallest mistake as an excuse to attack, though. Such guardian gargoyles are usually more intelligent than their untamed kin, but just as cruel and vicious.
Ghoul

Haunting graveyards, battlefields, and crypts, ghouls hunger for the flesh of living or recently dead creatures. They were once cannibalistic humanoids, but their actions caused them to be cursed in death with ravenous appetites that cannot be sated.

When an intelligent humanoid resorts to cannibalism or lives a life of gluttony and greed, it can be cursed to transform into a ghoul upon its death. Unlike a zombie or a skeleton, a ghoul retains sentience and many of the memories of its life. The creature’s perspective is twisted by its death, though, and as a result, it recalls with torment a time when it was not driven by a gnawing hunger for living flesh. A ghoul has a humanoid appearance, but its skin sloughs away or turns a sickly cast of gray or green. The transformation causes a ghoul to grow sharp fangs and claws to tear at flesh. A ghoul dwells anyplace where bodies are discarded or left unattended, so a group of them might congregate in a cemetery or a battlefield. Clerics must often be called in to repel the creatures while bodies are gathered or sanctified for protection.

“Endless hunger for the flesh of the living, never sated, no matter how much it consumes—that is the dismal unlife of a ghoul.”
—Verinn, paladin of the Raven Queen

**Hunger for Flesh:** A ghoul’s hunger for flesh is its primary motivator, and it drives the ghoul to desperation when food is not in abundance. Although ghouls tend to lurk in graveyards and charnel houses, they sometimes attack settlements when food is scarce. Such attacks leave few survivors, for a group of ghouls will kill and eat anyone in its path. A pack of ghouls might even resort to attacking a well-protected settlement or keep, especially when it can gain entrance through sewers, tunnels, or gaps in the walls. Even in desperation, ghouls are cunning attackers. A horde of ghouls might wait until nightfall before slinking through a drainage tunnel to get inside a city’s walls. Once the feeding begins, though, ghouls enter a ravenous frenzy. They pursue weak targets to sate their hunger quickly, but they gang up on tougher defenders if necessary.

**Abyssal Blessings:** Most ghouls are wretched, cursed beings that dwell in the dark places of the world, but some retain enough memories of life to yearn for a purpose. Many ghouls turn to Doresain, an exarch of Orcus, to find that purpose. The so-called Ghoul King commands his servants to empower some ghouls with additional strength, speed, and durability. The ghouls that receive these abyssal blessings are more powerful and are beholden to Doresain and his demonic master. Although these abyssal ghouls still possess a ravenous hunger, they work toward a greater end by focusing their violence against enemies of Orcus.

**The White Kingdom:** In the Abyss lies the White Kingdom, the seat of Doresain’s power and a domain populated almost entirely by ghouls and other flesh-eating undead. The buildings in the White Kingdom are made from bones left over from devoured creatures. Doresain’s palace, the largest of these buildings, is built from the remains of a massive primordial. The Ghoul King calls abyssal ghouls here to receive instructions. Although few living creatures see the
White Kingdom and live to tell about it, rumors tell of a ritual that can temporarily transform a living being into a facsimile of undeath. It is said that the ritual was crafted by one of Doresain’s rivals, perhaps a demon lord, in the hope of infiltrating the White Kingdom. Anyone hoping to obtain such a ritual would be required to pay a terrible price, though.

GHOUl
Giant

These massive humanoids once ruled the world beside the primordials. Now, they dominate petty kingdoms and crush any who oppose their tyrannical reign.

Shortly after the world emerged from the smoldering forges of the primordials, titans stepped forth to help explore and shape the new creation. They walked atop the world’s still-cooling crust and swam through its churning seas, yet even in their immensity, the titans were too few to explore the vast world. They created giants as a servant race, modeling them to resemble the titans’ own elemental natures. With the aid of the giants, the titans spread out across the world. In time, the giants enslaved some of the nascent races of the gods, most notably the dwarves. Under the giants’ steady gazes and heavy hands, these industrious slaves brought beauty and refinement to the world.

A Shattered Legacy: When the Dawn War began, titans and giants joined the side of their creators in the battle against the gods. Although often outnum-bered by their foes, titans and giants possessed nearly unmatched strength. For a while, the giants were victorious, and they filled their halls with the spoils of their victories. Over time, the resolve of the giants was weakened as many of the great titans and mighty citadels began to fall and the gods slew or trapped some of the primordials. The blow that finally crippled the giants came from a source the creatures never predicted. The dwarves, who had maintained their secret devotion to Moradin for many years, rose up against their masters, unleashing the fury of a hundred generations of repression.

The giants and titans still covet the power they once possessed, and they have never forgiven the dwarves’ betrayal. Although giants exist only in small, scattered colonies across the planes, many scheme to reclaim their former glory. They aspire to knock down the gods and bring the dwarves and other humanoid races under their heel. Few giants still serve the primordials or work together as once they did, yet even divided, they remain a powerful and dangerous threat.

Born from Furor: Giants stride about the planes, crafting castles in the highest clouds and building citadels in the darkest stretches of the Underdark. The most common types of giants in the world are hill giants, fire giants, and frost giants.

Dim-witted and bullying, a hill giant lives like a savage. With others of its kind, a hill giant builds crude log forts and mud-wattle huts in the hills and mountain valleys. Although brutish by nature, a hill giant possesses more cunning than an ogre. A hill giant might attempt to ape the traditions of a realm it destroys, anointing itself king and demanding a daily tribute of pumpkins and cows. Hill giants are the weaker branch of the family of earth giants, which all share connections to the primordial elements of earth and stone. Earth titans, towering brutes that appear to be made of living rock and soil, are the mightiest of these giants.
Militaristic and domineering, a fire giant has a fiery body and a temper to match. The fire giants’ mastery of metalwork is legendary, and many weapons of renown have been struck from their forges. A fire giant prefers to dwell in or around volcanoes and other areas of molten rock. If such areas are unavailable, fire giants will often build fortresses in rocky mountains. Behind the burning iron walls of these citadels, fire giants keep slaves—particularly dwarves—to mine ore or attend to mundane tasks.

Frost giants live in the frozen wastes, where they carve fortresses from the ice. In these chill domains, skalds sing of the giants’ victories and of the bravery of their warriors. When food runs low or warriors grow bold, these fearsome giants leave their realms to raid along the borders, seeking glory, carnage, and wealth.

**Titanic Leaders:** Titans believe themselves to be the firstborn of creation, and they seek to emulate their primordial creators. They shape imitations of the world from the raw pieces of the Elemental Chaos. Unlike efreets, they do not try to impose order on the regions they control. Instead, the titans revel in the entropic jumble of elemental forces.

A titan realm might contain places where the Elemental Chaos erupts into the world, spilling into the heart of an active volcano, into the midst of a permanent storm, or into the deepest reaches of a frozen wasteland. In the world, these areas are usually populated by giants. Through these natural planar connections, giants and titans can wreak havoc upon nearby realms, conquering vast tracts of land until someone stops them by closing the portal or slaying their chief.
Hill Giant
Large natural humanoid (earth, giant) XP 800

HP 159; Bloodied 79
AC 25, Fortitude 27, Reflex 23, Will 25
Speed 8

Initiative +5 Perception +7

STANDARD ACTIONS
✦ Greatclub (weapon) At-Will
  Attack: Melee 2 (one creature); +18 vs. AC
  Hit: 3d10 + 11 damage.

✦ Hurl Rock (weapon) At-Will
  Attack: Ranged 10 (one creature); +18 vs. AC
  Hit: 2d10 + 8 damage.

✦ Sweeping Club (weapon) Encounter
  Attack: Melee 2 (one or two creatures); +18 vs. AC
  Hit: 3d10 + 11 damage, and the giant pushes the target up to 2 squares and knocks it prone.

Alignments: chaotic evil Languages: Giant
Equipment: greatclub, 5 rocks

“Don’t be fooled by its brutish appearance. A hill giant is as close to the earth beneath your feet as a storm giant is to the thunderhead above you.”

—Noldir of Hammerfast

Hill Giant Hunter
Large natural humanoid (earth, giant) XP 800

HP 103; Bloodied 51
AC 27, Fortitude 26, Reflex 23, Will 23
Speed 8

Initiative +5 Perception +12

STANDARD ACTIONS
✦ Javelin (weapon) At-Will
  Attack: Melee 2 (one creature); +18 vs. AC
  Hit: 2d8 + 7 damage.

✦ Javelin (weapon) At-Will
  Attack: Ranged 20 (one creature); +20 vs. AC
  Hit: 2d8 + 12 damage.

✦ Hurl Rock (weapon) Recharge
  Attack: Ranged 20 (one creature); +20 vs. AC
  Hit: 4d8 + 12 damage, and the giant can push the target 1 square and knocks it prone.

Alignments: chaotic evil Languages: Giant
Equipment: 6 javelins, 4 rocks
Hill Giant Earth Shaman  Level 13 Controller (Leader)
Large natural humanoid (earth, giant)  XP 800

HP 131; Bloodied 65  Initiative +6

TRAITS

❄ Winter’s Breath (cold) ✦ Aura 2
Squares in the aura are difficult terrain for enemies. In addition, any enemy that starts its turn in the aura takes 5 cold damage.

Icebound Footing
When an effect pulls, pushes, or slides the titan, it can choose to move up to 4 squares less than the effect specifies. The titan can make a saving throw to avoid falling prone when an attack would knock it prone.

Melting Flesh
When the titan takes fire damage, it takes a –2 penalty to AC until the end of its next turn.

STANDARD ACTIONS

❄ Icy Greataxe (cold, weapon) ✦ At-Will
Attack: Melee 3 (one creature); +25 vs. AC
Hit: 4d8 + 7 cold damage, and ongoing 10 cold damage (save ends). If the titan scores a critical hit, the damage is 4d8 + 39 cold damage, and ongoing 10 cold damage (save ends).

← Blast of Winter (cold) ✦ Encounter
Attack: Close blast 5 (creatures in the blast); +23 vs. Reflex
Hit: 3d12 + 12 cold damage, and ongoing 10 cold damage (save ends). In addition, the target is immobilized until the end of the titan’s next turn.
Miss: Half damage.

MINOR ACTIONS

❄ Cold-Blooded Kick ✦ At-Will (1/round)
Attack: Melee 3 (one creature); +23 vs. Reflex
Hit: 4d10 + 8 damage, and the titan pushes the target up to 2 squares and knocks it prone.

TRIGGERED ACTIONS

Furious Swipe ✦ At-Will
Trigger: The titan is first bloodied or drops to 0 hit points.
Effect (Immediate Interrupt): The titan uses icy greataxe.

GITHYANKI

Pirates, raiders, and soldiers of the Astral Sea, githyanki are bloodthirsty and ruthless in pursuit of their goals. Githyanki raiders use astral vessels to stage incursions, both on their home plane and in the world, pillaging their targets.

The githyanki are fierce psychic warriors that ply the Astral Sea and fight with silver swords. They were once members of a race known as the gith which spent countless years enslaved by mind flayers. After winning their freedom, a faction of gith fled to the Astral Sea and became xenophobic and militaristic. There, the githyanki built citadels and armies, and then set out to conquer everything in their path.

Astral Pirates: Arguably the most skilled navigators of the Astral Sea, githyanki appear suddenly, seemingly out of nowhere, to launch surprise attacks on their victims. Githyanki use raids to obtain wealth both to sustain their ships and to provide their capital, Tu’narath, with supplies for the githyanki military machine. Githyanki pirate ships act at the discretion of their captains,

“It’s almost as though the githyanki feel that the entire universe owes them reparations for the years of slavery they endured under the mind flayers.”
—Philaster of Hestavar

---

(Left to right) githyanki mindslicer, githyanki warrior, githyanki raider
yet some githyanki raids are more than just grabs for plunder; they are part of a larger plan hatched by the githyanki leadership.

Githyanki are ruthless in their raids. They restrain themselves only enough to leave their prey with a bit to survive on. The githyanki know that a target can be harvested more than once only if the target isn’t completely crushed, and they might return months or years later to plunder a target again.

**Invaders from Another Plane:** Githyanki incursions into the world are rare, but when they do occur, they can be devastating. Most of them are major military initiatives that feature fleets of planar ships and legions of githyanki warriors. They take advantage of complex military strategies, including establishing beachheads, securing defensive fortifications, dispatching advance scouts, and planning sorties into enemy territories.

---

**Githyanki Raider**

Medium natural humanoid

**Hit Points:** 126; Bloodied 63

**Armor Class:** 27, Fortitude 23, Reflex 25, Will 27

**Speed:** 6

**Traits**

- **Combat Advantage** (psychic)

  The githyanki deals 2d8 extra psychic damage against any creature granting combat advantage to it.

**Standard Actions**

1. **Silver Longsword** (psychic, weapon) ✦ At-Will

   **Attack:** Melee 1 (one creature); +18 vs. AC
   **Hit:** 2d8 + 12 psychic damage.

2. **Raiders’ Strike** (psychic, weapon) ✦ At-Will

   **Attack:** Melee 1 (one creature); +18 vs. AC
   **Hit:** 2d8 + 12 psychic damage.
   **Effect:** The githyanki shifts up to 2 squares.

3. **Slash and Dash** (psychic, weapon) ✦ Encounter

   **Attack:** Melee 1 (one or two creatures); +18 vs. AC. The githyanki can shift up to its speed before making the second attack.
   **Hit:** 4d8 + 14 psychic damage.
   **Miss:** Half damage.

**Move Actions**

---

**Monsters A-Z**
Once a githyanki incursion has begun, the githyanki sometimes seek allies among the natives of the area. It is rare for any natives to side with them, but occasionally the githyanki do find collaborators who seek protection, advantage, or both. Particularly cunning githyanki commanders dispatch emissaries to the world prior to an invasion, either to sabotage their targets’ defenses or to identify potential collaborators. A greedy noble might be promised a kingdom captured by the githyanki in exchange for information and aid, or a wizard might be intimidated into providing assistance in return for the githyanki’s promise to leave the wizard’s tower untouched during the incursion. Additionally, githyanki often retain the service of red dragons, which serve them as mounts in battle.

**Denizens of Tu’narath:** Despite the fact that many of them spend their days wandering the Astral Sea, githyanki call the fortress-city Tu’narath their home and capital. Built atop the remains of a long-dead god, Tu’narath is the seat of power of the githyanki lich-queen Vlaakith.

Tu’narath serves as the focal point for githyanki navigational charts, the supply point for their mobile shipyards, and the center of githyanki culture. The city is also the basis for the githyanki method of navigation in the Astral Sea. Long ago, githyanki cartographers learned to read the echoes of magical energy created by Tu’narath, using the city as a central location around which other objects in the sea can be found. The navigators aboard githyanki vessels possess magic maps that remotely receive the latest navigational data from the capital’s cartographers each day.
GNOLL

Gnolls are feral, demon-worshiping marauders. They attack communities along the borderlands without warning and slaughter without mercy, all in the name of the demon lord Yeenoghu.

Gnolls drive fear into the souls of many. These mad humanoids know nothing of mercy and think of little but bloodletting. For most, to see a gnoll’s hyenalike face is to see one’s death.

A Demon’s Dogs: The Destroyer, the Beast of Butchery, and the Ruler of Ruin—Yeenoghu has many names, but the most famous among them is Demon Prince of Gnolls. Yeenoghu appears like a massive gnoll and has acted as a patron to the race for as long as any can remember.

As the mortal instruments of Yeenoghu, gnolls constantly perform atrocities. They follow the demon lord’s edicts and the orders of his demons without question. When not marauding in Yeenoghu’s name, gnolls fight among themselves and participate in ceremonies that involve acts of depravity and self-mutilation. Some gnolls are known to mate with demons or perform rituals that bind their bodies or souls to demonic forces.

Nomadic Destroyers: Gnolls rarely stay in one place for long. Their tribes rove en masse, laying waste when they can. When gnolls attack and pillage a settlement, they leave little behind but razed buildings, gnawed corpses, and befouled land.

**Languages** Abyssal, Common

**Equipment** leather armor, handaxe, longbow, 30 arrows
Gnolls rarely build permanent structures and craft little of lasting value. Indeed, they see such permanence as an affront to the Destroyer. Their only sense of art manifests itself as grisly displays of past victories. Gnolls decorate their armor and encampments with the bones of their victims. Impatient and unskilled artisans, they wear patchwork armor and wield weapons taken from the dead.

**Insatiable Bloodlust:** Nothing pleases a gnoll more than wanton slaughter. Because of that fact, gnolls don’t bargain or parley, and they can’t be bribed. Nothing stops gnolls from killing except for overwhelming opposition, and even then, gnolls try to kill many foes before fleeing. Fortunately for other creatures, the gnolls’ warmongering makes them an enemy to all. Even orcs avoid allying with gnolls.

**Savage Slavers:** Gnolls detest physical labor and often use slaves to perform menial chores. Slaves follow behind their raiders to haul their tents and the few goods that the gnolls deign to carry with them. Guarded by merciless gnoll youths, the slaves’ only hope of living to the next day is to show strength and to obey.

The life of a slave in a gnoll camp is brutal and short. That said, slaves who show physical endurance and savagery might be indoctrinated into the gnoll vanguard. Such creatures are usually broken in mind and spirit, having become as cruel and ruthless as their masters.

GNOME

Many believe that the gnomes are in decline, and some even think them long extinct. As with most things gnomish, the truth hides behind these illusions. Gnomes live in a culture of slyness and subtlety, so it is with good reason that they are known as the hidden people.

Long ago, gnomes fell under the sway of the giants of the Feywild known as fomorians. Sages say that this was when gnomes first mastered the magic of illusions. With the help of the eladrin—some say with their unwitting aid—gnomes escaped the yoke of their hideous masters and fled to the world. Now gnomes live in great numbers on both planes, although few know this fact.

Secretive and Cautious: Gnomes live in secret places. They are unobtrusive by nature and avoid confrontation when they can. In the forests of the Feywild and the world, communities of gnomes live among the roots of trees and within gigantic fallen trunks. Gnomes embed their structures in the forest floor, and their camouflaged chambers often have hidden passages.

**Traits**

Reactive Stealth
If the gnome has cover or concealment when it rolls initiative, it can make a Stealth check to become hidden.

**Standard Actions**

1. **Short Sword (weapon) ♦ At-Will**
   
   **Attack:** Melee 1 (one creature); +10 vs. AC
   
   **Hit:** 2d6 + 4 damage, or 4d6 + 4 if the gnome was invisible to the target when it attacked.

2. **Dagger (weapon) ♦ At-Will**
   
   **Attack:** Ranged 10 (one creature); +10 vs. AC
   
   **Hit:** 2d4 + 5 damage, or 4d4 + 5 if the gnome was invisible to the target when it attacked.

3. **Vanish from Sight (illusion) ♦ At-Will**
   
   **Effect:** The gnome becomes invisible until it hits or misses with an attack or until the end of its next turn.

**Triggered Actions**

1. **Fade Away (illusion) ♦ Encounter**
   
   **Trigger:** The gnome takes damage.

   **Effect (Immediate Reaction):** The gnome becomes invisible until it hits or misses with an attack or until the end of its next turn.

Common, Elven

**Equipment**
leather armor, short sword, dagger
When gnomes must dwell outside forests, they use the same ingenuity and instinct to hide. A gnome in a big city might dwell in the hidden space between the walls of two buildings and use sewers and alleys to move about. A gnome merchant might hide his traveling goods in secret compartments built into his wagons. Gnomes are similarly circumspect in their interpersonal interactions. They prefer to go unnoticed and to watch and learn, but when directly approached, they offer friendly smiles, a rapier wit, and as little reason to take offense as possible. Yet even after years of such amiable interactions, a gnome might still consider another person a rival or a foe. A gnome’s pleasantries might camouflage his or her true intentions, just as foliage hides gnomish homes.

**Masters of Illusion:** Gnomes enjoy illusion and trickery, and they regularly use magical means to distract and deceive. Gnomes often study arcane or shadow magic and have many wizards and warlocks among them. Even without formal study, a typical gnome can turn invisible, and many gnomes have other magical abilities of deception.

### Gnome Illusionist

<table>

**STANDARD ACTIONS**

- **Gnarled Staff** (weapon) ♦ **At-Will**
  - **Attack:** Melee 1 (one creature); +11 vs. AC
  - **Hit:** 1d8 + 6 damage.

- **Bedazzle** (illusion, implement, radiant) ♦ **At-Will**
  - **Attack:** Area burst 1 within 10 (enemies in the burst); +11 vs. Will
  - **Hit:** 2d6 + 5 radiant damage, and the target grants combat advantage (save ends).

- **See Me Not** (illusion, implement, psychic) ♦ **Recharge**
  - **Attack:** Close blast 3 (enemies in the blast); +9 vs. Will
  - **Hit:** 2d6 + 10 psychic damage, and the target cannot see the gnome (save ends).

**MOVE ACTIONS**

**There, Not There** (illusion, teleportation) ♦ **Encounter**

- **Effect:** The gnome teleports up to 5 squares and creates two duplicates of itself within 5 squares of its destination space. The duplicates last until the gnome attacks or until they are destroyed.
  - Each duplicate has 1 hit point and the same ability scores and defenses as the gnome. The gnome can use its actions to have a duplicate act in any way it could, except that the duplicates cannot use powers and cannot flank.

**MINOR ACTIONS**

- **Veil** (illusion) ♦ **At-Will**
  - **Effect:** The gnome can disguise itself and up to three allies within 5 squares of it to appear as any Small or Medium creatures. A creature can see through the disguise with a successful Insight check opposed by the gnome’s Bluff check.

- Wis 13 (+4)
- Cha 16 (+6)

**Alignment**
unaligned

**Languages**

- Common
- Elven
Disguises—both mundane and magical—cloak gnome communities. Many potential foes have passed through a gnome community without ever knowing it. When enemies manage to find a gnome settlement, the gnomes use illusions to draw them off and then move through secret passages to surround and attack them. Gnomes also employ traps to safeguard themselves and their prized possessions. A gnome’s dwelling might contain misleading passages that lead only to entrapment. The coin purse on a gnome’s belt might hold a hand trap to catch would-be thieves. Through the use of traps and trickery, gnomes have earned a reputation for being more dangerous than they appear.

**A Dark Side:** The gnomish penchant for secrecy and deception leads some gnomes to be exceedingly suspicious. Others are drawn to professions where they can make careers out of duplicity. Gnomes are known to work for the eladrin as spies or burglars. Some gnomes worship Vecna, the keeper of secrets. Others go so far as to aid the fomorians, their former masters, acting as double agents in eladrin courts or as informers about the affairs of the world. Far from their traditional forest homes, gnomes also form their own guilds of thieves.

Goblins live for conquest and seek to rule all they can through the might of blade or spell.

Aggressive and cruel, goblins range in disposition from outright savage to rigidly disciplined. Accompanied by their trained beasts, goblins go to war for conquest, not mere destruction.

Three Types: Goblins come in three distinct types: goblins, bugbears, and hobgoblins. All three have common physical characteristics: large and pointed ears, a prominent jaw filled with sharp teeth, a small nose, and dark hair. Their skin might be any shade of green, yellow, or orange, with goblins tending toward yellow-green, bugbears yellow-brown, and hobgoblins orange that can be nearly red. Although these types are frequently thought of as separate species that share a common ancestor, interbreeding is possible and results in offspring of either parent’s type.

Goblins are the most common type of goblin and the ones that give name to the whole race. These small, ill-tempered, and wicked creatures are well known for their treacherous nature and infamous for their wolf-riding raiders.

“Goblins might be pathetic if they weren’t so habitually vicious.”
—Anastrianna of Mithrendain

---

*(Left to right) bugbear thug, goblin cutthroat, hobgoblin spear soldier*
Bugbears weigh in as the largest and burliest of the goblins. Despite their power, the brutes often possess astonishing skill in stealth. Whatever they can’t bully out of weaker goblins, they can often gain through theft and assassination.

The bellicose and militaristic hobgoblins are the most civilized and intelligent of the goblin types, and they often rule over goblins and bugbears. After receiving training from hobgoblins, a savage goblin tribe known to raid caravans might become disciplined cavalry for an invading army of hobgoblins.

**Beast Masters:** Goblins possess a mysterious knack for beast mastery. They might not always tame the beasts they capture, but they often achieve success in channeling the creatures’ aggression. Goblins frequently ride wolves or giant spiders into battle, and hobgoblins have used manticore and wyverns as mounts. Goblins train drakes like others train dogs, goad carrion crawlers into serving them as battle beasts, and put basilisks in wagons to act as war machines. The truly wild monsters they capture find their way into fighting pits where bold warriors or captives battle them to the death in front of cheering crowds.

“She thinks she is so smart. Hah! Next time he turn his back … shhhhhkkt!”
—Grukik, goblin cutthroat

An Ancient Empire: The goblin tradition of beast mastery might have originated in the legendary empire the goblins once controlled. Stories of this realm often conflict, but accounts agree on three points: Hobgoblins built it up through conquest in the name of the god Bane, it stretched into the Feywild, and it fell due to internal strife, which was stoked by the fey. To this day, goblins loathe fey and often make special efforts to harm them, particularly elves and eladrin.

Diverse and Widespread Tribes: Goblins share a common history, a vicious nature, beast-taming traditions, and the worship of Bane. Beyond these features, each tribe of goblins might differ radically in culture. Spider-riding goblin savages might dwell in nests within the web-strewn crowns of trees, sharing space with allied ettercaps. Another goblin tribe might live constantly on the move with a pack of wolves, wearing wolf pelts and howling to communicate. A tribe of bugbears and goblins might live in the sewers of a city and act as a thieves’ guild of sorts. Hobgoblins might live in a grand city-state of their own

Goblin Hex Hurler
Small natural humanoid

HP 46; Bloodied 23
AC 17, Fortitude 14, Reflex 15, Will 16
Speed 6

Initiative +3
Perception +2

Standards Actions

✦ Staff (weapon) ✦ At-Will
   Attack: Melee 1 (one creature); +8 vs. AC
   Hit: 1d6 + 7 damage, and the goblin can slide the target 1 square.

✦ Blinding Hex ✦ At-Will
   Attack: Ranged 10 (one creature); +6 vs. Fortitude
   Hit: 2d6 + 1 damage, and the target is blinded until the end of the goblin’s next turn.

✦ Stinging Hex ✦ Recharge
   Attack: Ranged 10 (one creature); +6 vs. Will
   Hit: The target takes 3d6 + 1 damage if it moves during its turn (save ends).

✦ Vexing Cloud (zone) ✦ Encounter
   Effect: Area burst 3 within 10. The burst creates a zone that lasts until the end of the goblin’s next turn. Enemies take a –2 penalty to attack rolls while in the zone.
   Sustain Minor: The zone persists until the end of the goblin’s next turn, and the goblin can move it up to 5 squares.

Triggered Actions

✦ Goblin Tactics ✦ At-Will
   Trigger: The goblin is missed by a melee attack.
   Effect (Immediate Reaction): The goblin shifts 1 square.

✦ Lead from the Rear ✦ At-Will
   Trigger: An enemy hits the goblin with a ranged attack.
   Effect (Immediate Interrupt): The goblin can change the attack’s target to an adjacent ally of the goblin’s level or lower.

and war with nearby realms. Other hobgoblins might be ruthless headhunters who ride behemoths through the jungle.

Many goblins still dwell in the Feywild, where their cultures take on even stranger forms. Goblins in the Feywild dominate sentient plants and fey beasts, and they harness the magical energy of the fey realm. Hobgoblins might cruise through forests on floating crystals, hunting with pet will-o’-wisps.

These disparate tribes often battle one another just as readily as they do other races, but strong leaders can bring them together. Typically a charismatic hobgoblin warlord uses might and legends of the goblins’ fallen empire to inspire unity. Then the traditions of wildly different tribes become the deadly tactics of military divisions.

Golems might be made from humble stuff—stone, iron, or flesh and bones—but they possess astonishing power and durability. These automatons obey their creators above all else. Not even the threat of destruction can affect their obedience.

Golems have no wants, need no sustenance, require no rest, feel no pain, and know no remorse. No secrets pass their lips. No thoughts of betrayal fester in their simple minds. They seek only to follow their creators’ commands. Golems protect or attack whomever or whatever their creators demand.

Created by Others: Only those who cannot trust living servants or who require ageless guardians go to the great expense and effort of creating golems. Dwarves who would see their tombs protected for eternity, a wizard who wants to work his will upon a frightened populace, a general who desires an unstoppable soldier, a queen who needs an enforcer and guard beyond reproach—such are the people who craft golems.

Traits

Primal Fear
When the golem takes fire damage from an attack, it takes a free action to move up to its speed, and each square it moves must place it farther from the attacker. If it cannot move at least half its speed, it grants combat advantage until the end of its next turn.

Life-Giving Jolt
When the golem takes lightning damage, it can make a basic attack as a free action.

Standard Actions

† Slam † At-Will
Attack: Melee 2 (one creature); +17 vs. AC, or +19 vs. AC while the golem is bloodied
Hit: 3d10 + 9 damage.

‡ Double Attack † At-Will
Effect: The golem uses slam twice. Each attack knocks the target prone if it hits.

‡ Golem Rampage † Recharge—1
Effect: The golem moves up to its speed + 2. During this movement, the golem can move through enemies’ spaces, and when the golem first enters a creature’s space, it uses slam against that creature.

Triggered Actions

‡ Berserk Attack † At-Will
Trigger: An attack damages the golem while it is bloodied.
Effect (Immediate Reaction): The golem uses slam against a random target within its reach.

**Painstakingly Crafted:** The construction of a golem begins with the building of its body. This work requires great command of the craft, whether it’s stoneworking, ironworking, or surgery. Sometimes a golem’s creator is the master of the art, but often the individual who desires a golem must hire highly skilled artisans to do the work. If the artisans won’t do the work for pay, they are sometimes kidnapped and forced into it.

Once a golem’s body has been constructed, a ritual must be performed to give it life. There are many versions of such rituals, but all require a sacrifice of both wealth and blood or spirit. The vilest of these rituals are the least expensive in gold and the most expensive in life. All of them result in the establishment of a connection to the Elemental Chaos. Through a tiny rent in the fabric of reality, the golem’s creator draws forth the same spirit stuff tapped by the gods and the primordials when they created the creatures of the world. This tiny spark of life has no memory, personality, or history. It is merely the impetus to move and obey. It sees and knows its creator, and nothing else matters.

*“Live, my darling, my precious one. Live!”*  
—Drellin the Mad
Witless Wonders: A golem cannot think or act for itself. It can understand its creator’s commands perfectly, but it has no grasp of language beyond that understanding. Thus, a golem cannot be reasoned with or confused. In a way, nothing exists for the golem but its creator’s commands, and it takes their intent literally. This characteristic is the golem’s greatest strength and its greatest weakness.

When its creator is on hand to command it, a golem performs flawlessly. However, if that creator leaves the golem with instructions or is incapacitated, the golem continues to follow its last orders to the best of its ability. A golem knows the intent of its creator’s orders, but when it cannot fulfill such orders or does not know how to do so, it might react violently or simply stand and do nothing. A golem that has conflicting orders might alternate between them. A golem told to guard the door of a treasure vault against entry might break down the door itself if it detects intruders inside. A golem commanded to kill a foe might do so and then simply stop if it cannot hear its master’s calls to return and does not have standing orders to return once its task is complete.

Some creators grant another person or any person with a special symbol the right to command a golem. Such practices allow for the possibility that the golem might be used against its creator’s interests, if not against the creator directly, and those powerful enough to create a golem are usually loath to accept that risk.

TRAITS

〇 Noxious Fumes (poison) ✦ Aura 2
While the golem is bloodied, any creature that enters the aura or starts its turn there takes 5 poison damage.

Energizing Flames
The first time the golem takes fire damage each turn, it can shift up to 2 squares as a free action, even if it could not normally shift.

Interfering Bolts
When the golem takes lightning damage, it is slowed until the end of its next turn.

STANDARD ACTIONS

✧ Iron Blade ✦ At-Will
Attack: Melee 2 (one creature); +25 vs. AC
Hit: 3d10 + 12 damage.
Effect: The golem marks the target (save ends).

✧ Cleave ✦ At-Will
Effect: The golem uses iron blade twice, each time against a different target.

← Breath Weapon (poison) ✦ Recharge 2 of 3
Attack: Close blast 3 (creatures in the blast); +23 vs. Fortitude
Hit: 4d8 + 9 poison damage, and ongoing 15 poison damage (save ends).

TRIGGERED ACTIONS

✧ Dazing Fist ✦ At-Will
Trigger: A creature that is within 2 squares of the golem and marked by it moves.
Attack (Immediate Interrupt): Melee 2 (triggering creature); +23 vs. Fortitude
Hit: The target is dazed (save ends).

← Toxic Death (poison) ✦ At-Will
Trigger: The golem is first bloodied or drops to 0 hit points.
Attack (No Action): Close burst 3 (each creature in the burst); +23 vs. Fortitude
Hit: 2d8 + 11 poison damage, and ongoing 10 poison damage (save ends).

“This apparatus will channel the fury of the storm above us into the iron body of the construct, opening a tiny portal to the Elemental Chaos and enabling the merest spark of life to give it animation.”

—Archimandrius of Vor Rukoth
**Hag**

Black-hearted hags embody all that is ugly and frightful in nature. These hideous fey relish the opportunity to ruin lives and disrupt the natural order. Wicked doesn’t even begin to describe them.

Ancient and cunning, hags are wrathful, greedy, deceptive, and cruel. Despite these characteristics, hags can be bargained with, if one has the courage to attempt doing so. Hags’ schemes are patient, their webs of manipulation wide, and their lives long; they can afford to talk a little. Besides, the generosity of hags has felled far more heroes than their claws.

**Strange Sisters:** Hags come in a bewildering variety, each tied to nature or some ancient force. They share certain traits, such as having withered, hideous female forms. Hags also share the ability to disguise their true shapes magically. Most can adopt the appearance of an old woman of any humanoid race, and some can assume comely guises.

“Teeth! Teeth! I’ll tie your teeth to my necklace with thread from your sinews!”

—Korrigan, green hag of the Mistmarsh

cows that give venom instead of milk; hatching from snakes’ eggs kissed by virgins; incubating in the coffins of the unconsecrated dead; a hag transforming a cursed baby into another hag; and being poured whole out of cauldrons of boiling blood.
Regardless of their origins, hags see one another as sisters. And like sisters, they squabble. A rivalry can deteriorate into outright enmity. Such feuds between sisters might last for decades or even centuries, as the hags manipulate events against one another. Also like sisters, the hags might reconcile, especially if they share some new focus for their hatred.

**Bizarre and Dangerous Lairs:** Hags dwell in the most desolate locales: boot-sucking fens, mist-shrouded moors, howling mountain passes, forbidding tundra, damp caves, dark and thorny woods. In these lonesome places, hags twist Feywild magic to create eerie homes that suit their wicked sense of humor and unsettling aesthetics. A green hag’s lair might be within a tree grown into the shape of an enormous headless body, and the hag might fly about in a titan’s skull, which it leaves atop its house when within. A night hag could travel with a menagerie of monsters and slaves kept in cages, and all disguised by illusions to...
 lure in hapless victims. Bog hags dwell in swamps and mires, from where they emerge to ambush unwary travelers.

**Foul Covens:** Hags often gather in covens of like-minded members numbering three to thirteen. A coven shares foul goals, and its members share information and magical knowledge. Together a coven’s members can perform powerful rituals to scry upon distant places, control weather, command beasts, cause plagues, divine the future, and lay curses.

**Standard Actions**

**† Hurl through the Earth** (teleportation) **At-Will**

*Attack:* Melee 1 (one creature); +17 vs. AC

*Hit:* 2d6 + 9 damage.

*Effect:* The hag teleports the target up to 3 squares.

**Grasping Roots** **At-Will**

*Attack:* Area burst 2 within 5 (creatures in the burst); +15 vs. Reflex

*Hit:* The target is restrained (save ends).

*Miss:* The target is slowed until the end of the hag’s next turn.

**Rampant Growth** (zone) **Encounter**

*Attack:* Area burst 2 within 5 centered on a creature restrained by grasping roots (creatures in the burst); +15 vs. Reflex

*Hit:* 2d8 + 8 damage.

*Effect:* The burst creates a zone that lasts until the end of the encounter. Squares in the zone are difficult terrain for any creature that doesn’t have forest walk, and such a creature takes 5 damage for each square of movement in the zone.

**Stagnant Miasma** (poison, zone) **Recharge 2**

*Attack:* Area burst 2 within 5 (creatures in the burst); +15 vs. Fortitude

*Hit:* 2d10 + 11 poison damage.

*Effect:* The burst creates a zone of lightly obscured squares that lasts until the end of the hag’s next turn. Any creature that ends its turn in the zone takes 10 poison damage.

**Minor Actions**

**Change Shape** (polymorph) **At-Will**

*Effect:* The hag alters its physical form to appear as a crone or a young woman of any Medium humanoid race until it uses change shape again or until it drops to 0 hit points. To assume a specific individual’s form, the hag must have seen that individual. Other creatures can make a DC 33 Insight check to discern that the form is a disguise.

**Traits**
- **Shroud of Night** Aura 10
  - Within the aura, bright light is dim light, and dim light is darkness.

**Standard Actions**
- **Claw** At-Will
  - **Attack:** Melee 1 (one creature); +19 vs. AC
  - **Hit:** 1d6 + 6 damage. If the hag has combat advantage against the target, the target is also stunned (save ends).

- **Dream Haunting** (psychic) At-Will
  - **Attack:** Melee 1 (one stunned or unconscious creature); +18 vs. Will
  - **Hit:** 3d6 + 4 psychic damage, and the hag disappears into the target’s mind. While in this state, the hag is removed from play and does nothing on subsequent turns but deal 3d6 + 4 psychic damage to the target (no attack roll required). When the target is no longer stunned or unconscious, or when the target dies, the hag reappears adjacent to the target and is insubstantial until the start of its next turn.

- **Wave of Sleep** (charm, psychic) Recharge
  - **Attack:** Close blast 5 (creatures in the blast); +17 vs. Will
  - **Hit:** 1d8 + 3 psychic damage, and the target is dazed (save ends).
  - **First Failed Saving Throw:** The target is unconscious instead of dazed (save ends).

**Minor Actions**
- **Change Shape** (polymorph) At-Will
  - **Effect:** The hag alters its physical form to appear as a crone of any Medium humanoid race until it uses change shape again or until it drops to 0 hit points. To assume a specific individual’s form, the hag must have seen that individual. Other creatures can make a DC 33 Insight check to discern that the form is a disguise.

HALFLING

Halfings say they travel the world, flowing with life’s ups and downs and offering friendship to all. Some non-halfings think the little folk are criminals on the run. The truth is a complication that halfings prefer to leave in their wake.

Wherever waters run, halflings roam. These outwardly amiable wanderers move their settlements all over the world, using waterways as their highways.

“There’s no need for a fight. Why don’t we talk about this?”
—Jarrett Farwhere

When a quick wit and a guileless grin fail them, a quicker blade or a sly hand carries them through.

Friendly but Dangerous: Smiles hide more threats than shadows, or so the halfling saying goes. Halfings instinctively present a friendly face in front of even the most intimidating behavior. Open bloodshed does provoke a more serious attitude from a halfling, but halfings prefer to talk their way out of trouble—or talk enemies into it.

Living by Their Own Laws: Halfings lack domains of their own, but they share a culture and a sense of fellowship all over the world. This culture includes reliance on their own justice. As wanderers who glide in and out of settled lands and alliances, halflings have developed their own code of conduct. Like any system of justice, it can be harsh, but it protects them and provides stability in their wandering way of life.
Halfling Thief  
Small natural humanoid  
XP 125

HP 34; Bloodied 17  
AC 16, Fortitude 13, Reflex 16, Will 14  
Speed 6

**Traits**

- **Nimble Reaction**

  The halfling gains a +2 bonus to AC against opportunity attacks.

**Standard Actions**

- **Dagger** (weapon)  
  **At-Will**
  **Attack:** Melee 1 (one creature); +7 vs. AC
  **Hit:** 2d4 + 5 damage, plus 1d6 if the halfling has combat advantage against the target.
  **Effect:** The halfling can shift 1 square.

- **Throwing Dagger** (weapon)  
  **At-Will**
  **Attack:** Ranged 5 (one creature); +7 vs. AC
  **Hit:** 2d4 + 5 damage, plus 1d6 if the halfling has combat advantage against the target.

- **Mobile Melee Attack**  
  **At-Will**
  **Effect:** The halfling moves up to 4 squares, using dagger at any point during the move. This movement does not provoke opportunity attacks from the target of the attack.

When compared to other humanoid races, humans sprint through existence. They leave blazing trails of emotion that warp and weft across the natural world.

**Great Ambition:** From the first days of life, aspiration colors a human’s squalls and animates its features. Members of some races believe that humans never really leave an infant state. However, most acknowledge that humans pursue their goals with unmatched zeal and fervor. Although few humans reach great heights, those who do so can alter the world.

**Susceptible to Temptation:** The flip side of humankind’s great ambition is its susceptibility to corruption. Unparalleled passion regularly overshadows logic and mercy. A human might rise up as an epic hero worthy of bardic song, but he or she might also sink to the deepest lows, bathing in treachery and villainy to succeed.

“You humans—in such a rush to get to the end of your hurried lives.”
—Vyndra Sysvani of Mithrendain

Hydra

Reptilian heads extend from a hydra’s thick, serpentine body, poised to snap at any creature that comes within reach.

Hydras are legendary creatures that stand alongside giants and dragons in the world’s lore. Most humanoids know hydras from chilling bedtime stories. The same cannot be said of adventurers, sailors, and peddlers, who witness these multiheaded predators stalking the hinterlands. These travelers know that the myths of hydras are rooted in reality.

**Born of Primordial Blood:** In the age before the Dawn War, the primordial Bryakus pulsed through the uncharted reaches of the Elemental Chaos, moving like a kraken through the deepest seas. Bryakus was so tall that stars danced

**Languages** —
around his crown. His enormous hands bore hundreds of draconic heads, and his legs were tangles of viper coils capped with hissing, venomous maws. Bryakus, the Colossus of Chaos, the Father of Fear, awed even the gods.

When the gods fought the primordials, Bryakus was among the last to fall. According to legend, the furious, besieged primordial hurled mountains across the world’s surface before swirling into a hurricane that whipped up noxious clouds. When the gods managed to entangle and quarter Bryakus, hydras swam from the primordial’s severed limbs in a flood of poisonous liquid. Not even the gods know how many hydras Bryakus’s destruction birthed; nor can they be sure of the various manifestations of elemental power found among the creatures. As a result of Bryakus’s death, hydras spread across the planes, thriving in virtually every environment.

**Predatory Water Dwellers:** Although hydras cannot breathe underwater, they are natural swimmers and prefer rivers, lakes, or oceans to land. A hydra can hold its breath for hours, and only a single head must surface for the hydra to breathe.

Hydras slither through swamps, lurk in lakes, and slink through rivers. Some find their way into city sewers or use underground waterways to emerge from village wells. Hydras also slide through Underdark tunnels, depleting the prey from one body of water before moving on to another. Huge venom-maw hydras swim through the depths of an ocean, rising to threaten ships.

When a hydra rests, only half its heads sleep. A hydra rarely requires shelter from the elements, so it usually doesn’t claim a cave or a ruin. In frosty climes, a hydra might move into the depths of a cavern for warmth during the coldest seasons. A hydra’s preferred lair is a wallow where it can submerge its body except for a couple of wakeful heads that keep watch above water or mud. Such
behavior makes a hydra adaptable to threats while relieving it of the vulnerability that usually comes with sleep.

**Deadly Pets:** A hydra is a terrifying creature and a cunning hunter, but it is still only a beast. Unless trained to do otherwise, it kills to eat. Despite having numerous heads, a hydra in the wild seems no more intelligent than a crocodile or a dog. Indeed, a hydra’s own heads might fight over prey or choice bits of meat.

Despite their limited intellect, hydras removed from the wild have proved capable of learning and following commands. Each hydra presents a trainer with at least four students. When one of a hydra’s heads learns a trick, the others...
instantly assimilate the knowledge. A trainer that survives the initial stages of training a hydra can usually teach the creature far more commands than a typical beast could follow.

Giants, minotaurs, and powerful spellcasters use hydars as guardians or war beasts. Occasionally, a formidable human, goblin, halfling, or elf leader manages to adopt a hydra. Given the creatures’ proclivity for water, these pets can be found lurking in moats, swimming alongside warships, or dwelling in constructed pools near objects or locations in need of protecting.

KOBOLD

The small stature and cowardly behavior of these reptilian savages disguises a devious and murderous cunning.

Kobold. Few can say the word with anything but disgust and disdain—few except for the proud and proliferate kobolds, of course. These primitive reptilian humanoids pose a threat to civilized people who allow the scaly monsters to encroach on their settlements. Although kobolds are cowardly and somewhat dim, many braver and smarter foes have fallen to their cunning after underestimating the diminutive savages.

Trap-Filled Warrens: Kobold tribes seek out the shelter of a warren. Like rats, they think nothing of tunneling through the ground to make a maze of crisscrossing passages and stacked chambers. A warren’s complex structure gives the kobolds multiple routes for escape or ambush, and the passages provide ample room for traps and murder holes in case anything tries to root out the creatures. Nomadic kobolds litter their camps with snares, deadfalls, and trip wires. Once an area is trapped, they dig shallow pits in which to sleep, or else drag together hollow logs that work as makeshift warrens.
Mines, abandoned or otherwise, are favorite kobold haunts. The sites offer only a small number of entrances but provide vast interior spaces. If a mine isn’t depleted, kobolds might continue to dig ore in order to gain wealth or make weapons. When a mine isn’t available, a tribe of kobolds might inhabit a cave, a ruin, or a city sewer. Any place that puts a roof over their heads and can accommodate new passages can become a stronghold.

Creature Keepers: Kobold tribes rarely live alone in warrens. Rather, they keep local beasts as barely tamed pets and allow larger creatures to lair in sections of the warren that the kobolds then avoid. Insects of all sizes, odd slimes and oozes, burrowing animals, and deadlier threats such as stirges and cave bears, can be found dwelling side by side with kobolds.

Devious Thieves and Cunning Killers: It is a mistake to think of kobolds as daft simpletons. In reality, their feeble appearance masks a devious and murderous mentality.

Kobolds prefer to live in the vicinity of a dragon’s lair or near communities from which they can steal goods and consumables. Although they are vicious foes if confronted, kobolds work to avoid notice. They can steal from fields and storehouses for months before their presence is discovered. They rarely reveal their true numbers, and they don’t set traps outside their strongholds until after the surrounding inhabitants realize the kobolds are in residence.

Communities that declare war on an established kobold tribe often face destruction. When kobolds know the jig is up, they go on the offensive, booby trapping buildings and ambushing residents in their homes. Overnight,

settlements can become battlegrounds. If a militia tries to take the fight to the kobold warren, the crafty fiends make themselves scarce, allowing the hapless invaders to stumble into the tribe’s deadly traps and pets.

**Dragon Worshipers:** Dragons rarely take notice of the tiny humanoids crawling, wormlike, from holes in the ground, which is why kobolds can survive in the vicinity of the creatures. A tribe goes to any length to worship at a dragon’s feet. The sight of one of the majestic creatures in flight sends a tribe into frenzied activity. Its members don cobbled-together dragon costumes and heap up offerings in hopes of the dragon returning. When a lucky kobold tribe attracts a dragon’s attention with its odd displays, doing so can have fatal results. Numerous deaths do nothing to dampen a tribe’s enthusiasm for a dragon. Kobolds consider it an honor to be consumed by a dragon.

Young dragons capable of tolerating fawning kobolds occasionally sponsor a tribe’s presence in or around their lairs. The kobolds prove useful as servants, guardians, and early alerts to danger. Older dragons interested in employing minions flush out kobold infestations and turn to more powerful servants. Even in such events, a few cunning kobolds might survive to serve their angry gods in secret. These kobolds often come to resent a dragon’s new servants, though, so they might seek to harm new minions or sabotage the creatures’ efforts.

Lich

A dark spellcaster who covets immortality and spend his or her life in pursuit of necromantic power might gain the ability to become a lich. A lich ties its life force to a phylactery, ensuring that its body will coalesce in a hidden location even if some creature were to slay it.

A lich views the world through a prism of endless opportunity, where time is no longer a relevant concern. It severs ties to its past life, shedding its mortal name to adopt a false title, such as the Forgotten King or the Bronze Lich. Self-centered and black-hearted, a lich abuses and maims with ease as it collects knowledge and gains influence.

The prospect of a lich rising to power isn’t hypothetical. The god Vecna, the githyanki queen Vlaakith, and the demilich Acererak have won great power and infamy. A lich left unchecked conquers free lands, bends influential people to its will, and destroys anyone and anything that stands between it and its ambitions.

**Complex Scheming:**
A lich seeks mortals to dominate, places to control, wealth to acquire, and magic to harness. Its thirst for power and knowledge is never quenched. As a mortal spellcaster, it worked feverishly, racing the sands of time to attain its goals. But with eternity in its pocket, a lich can afford to be patient. A lich’s plans might ripen over generations as it taints a royal bloodline with magic, forms and fosters an evil organization, or reanimates legions of undead warriors. The complexity of a lich’s scheme usually
stymies its pursuers. Scholars say that discovering a lich’s motivation requires delving into the creature’s former life to find clues about why it first became a dark necromancer.

**Insane and Irredeemably Evil:** To become a lich, a spellcaster must be devoted to evil and adept at performing unspeakable acts of violence. Few spellcasters have a shred of morality remaining after their transformations into liches. The process of attaining lichdom bends the mortal mind in unnatural and crippling ways. Many liches rise up insane, but even they enact cunning plans; they just do so for incomprehensible reasons.

Evil Sanctuaries: A spellcaster must travel far—even across the planes—to collect the scraps of lore and esoteric components needed to enact the ritual to transform into a lich. After the transformation, though, a lich typically returns to its home plane and moves back into its old tower or stronghold. A lich fears anything that might jeopardize its eternal life or acquisition of power. Thus, it surrounds its lair with deadly traps, arcane tests and riddles, and forbidding terrain. A lich might travel out into the world if its scheme depends on it, but it prefers to send magical messages while staying close to its citadel.

“With an eternal semblance of life to study and practice their magic, most liches are incredibly powerful—and insatiably restless.”

—Mari Valmidren, cleric of Ioun

Few and Faithful Allies: A lich spends its time alone in its sanctuary. It dislikes being tied to allies, most of which have life spans too short to be of use. Malevolent creatures idolize liches, though, serving them willingly so they can bask in the undead creature’s depths of depravity. A lich uses such hangers-on as field agents, usually because its preferred servants—undead and constructs—have a hard time blending in.

The Precious Phylactery: The act of becoming a lich encases a mortal’s life force in a specially prepared item called a phylactery. The most common type is a

metal box that contains strips of parchment with arcane writing. Any small item, such as a gemstone, a ring, or a statue, can be a phylactery. Destroying a lich’s phylactery prevents the undead creature from rematerializing, which makes the item’s concealment and safekeeping a top priority for a lich.

A lich, fearing being separated from its citadel of power, might keep its phylactery in a hidden room or nearby town. Another, focused on secrecy, might secure its phylactery on another plane. The most cautious liches place their phylacteries in changing or confusing locations. A phylactery might be hidden on a traveling ship with a band of devotees, or its appearance might be duplicated in a dozen copies that are distributed across the world, ensuring that no one knows which version is the true phylactery.

Magic wards and physical barriers are a phylactery’s final defense. Even if a mortal survives a lich’s allies, that person must still overcome powerful magic to destroy a phylactery.

LIZARDFOLK
These primitive hunters stalk swamps and jungles, springing with ease from murky water and overgrown foliage. Lizardfolk tribes pair sacrificial rituals with uproarious feasts, cooking up beasts and trespassers alike.

“Fog rose up around us as evening settled in, carrying the stench of the swamp with it. Then the weeds and vines started coiling around our legs.”
—Anders Partieren of Fallcrest

Lizardfolk live in forbidding grottos, dangerous tropical isles, abandoned jungle temples, and underground caverns that water-filled passageways protect. Lizardfolk can create hut villages, but they prefer to slaughter inhabitants of a jungle city or temple and take over the ready-made site.

Fiercely territorial, lizardfolk use camouflaged snares and scouts to guard the tribe’s encampment. They rarely are caught unawares on their home turf. When unwelcome visitors approach the outskirts of lizardfolk territory, a hunting band is sent to ambush or harass the trespassers. If the interlopers appear too threatening as a group, the band tricks some into blundering into the lairs of crocodiles or other dangerous animals.

**Languages** Draconic
Intruders aren’t the only creatures in danger. Since lizardfolk are dominant hunters, a tribe quickly clears its territory of choice small prey. Once lizardfolk begin searching for new meat sources, they come into conflict with civilized tribes or cities. Unlike a brutal orc attack, a lizardfolk raid is brief and mysterious. A silent band breaks from nearby cover to swiftly capture a few succulent, small humanoids. Then the hunters disappear back into the wilderness. Rescuing captured victims involves tracking the lizardfolk through their native terrain, an often deadly proposition.

**Masters of Traps and Tricks:** Though far from being great thinkers, lizardfolk are clever predators in their home environment. Hunters carry nets and poison darts, and trappers set well-hidden snares and pitfalls. Weaker lizardfolk, especially the poisonscales, harvest toxic plants with which to brew a spectrum of poisons. Excepting some of the more brutish blackscales, all lizardfolk become masters of camouflage. They liberally apply mud and leaves from the swamp or jungle floor, and they move silently through thick underbrush and still water alike.

Lizardfolk share a predatory mindset and other echoes of their reptilian heritage. They grow docile on sunny days and bicker and spar when clouds obscure the sky.

Many Breeds, Each Deadly: The lizardfolk lineage splits into several breeds, each of which has a specific purpose within the tribe. Greenscales, the most common variety, hunt medium-sized game and build traps. Most mystics come from the ranks of the greenscales, as do lizardfolk adept at training wild beasts. The hulking blackscales provide the intimidation factor, lending brute strength to their more clever and deft kin. A tribe has only a few blackscales. Even though they aren’t suited to leadership roles, their physical might is a boon to their kinsfolk. Poisonscales are the smallest of the lizardfolk. They are the tribe’s stealthiest members and masters of crafting poison. When raiding, they hide in trees or shallow pools, attacking soundlessly. Poisonscales frequently serve as teachers for young greenscales, which are the same size as full-grown poisonscales.
**Intimidation and Fanaticism:** Might makes right in the patriarchal structure of a lizardfolk tribe. The strongest of mind and body becomes the lizard king. Mystics also wield great power among these easily awed creatures. Mysterious outsiders can win slavish devotion with a few well-timed tricks or overt uses of magic.

Powerful creatures, especially dragons, can be found ruling lizardfolk tribes. Even young dragons or wyrmlings can seem like terrifying gods to lizardfolk. Adventurers who defeat the lizard king might earn a horde of unwanted worshipers. Although most lizardfolk are unaligned, their leaders are typically evil. Even lizardfolk that serve good-intentioned masters behave brutishly and succumb to their baser instincts more often than not.

**Great Feasts and Sacrifices:** After capturing creatures, especially humanoids, lizardfolk throw huge feasts and riotous religious festivities. Their rites include dancing, chittering, and wrestling. Victims are either cooked and fed to the tribe or sacrificed to a god. Lizardfolk don’t know much about true deities. Instead, they worship a motley combination of primal spirits and powerful mundane creatures.

Lycanthrope

Lycanthropes shift between human and animal forms, comfortably traveling both in society and in the wild.

Shapeshifters remain in human form around other creatures, revealing their bestial nature only when in the company of other lycanthropes or moments before a kill. The carnivorous creatures are born with a craving for human flesh. An instinct to survive and the awareness that discovery means death drives lycanthropes to lie, cheat, steal, and murder.

True lycanthropes are born only to shapeshifter mates, but legends tell a different story. According to these myths, a lycanthrope’s bite or a mystic’s curse can infect a mortal with lycanthropy.
Masters of Infiltration: Lycanthropes in human form blend easily into crowds. They use their talents of deception to infiltrate organizations for personal gain, possibly to grow wealthy or to win access to a specific victim. Some shapeshifters work for hire. Even a modest-sized group might have werecreature members.

When a lycanthrope gains access to its intended prey, the creature shifts into hybrid form to gloat before meting out the killing blow. A lycanthrope is typically patient, content to enjoy the intricacies of the chase. When it feels threatened, though, it tends to make rash decisions.

A lycanthrope’s human form hints at its bestial nature. Wererats are short, wiry, and naturally fidgety; werewolves have prominent canine teeth and a fierce gleam in their eyes.

Three Forms for Three Worlds: Lycanthropes live in three distinct worlds: humanoid society, shapeshifter clans, and animal packs. In cities, they remain in human form, going to great lengths to avoid revealing their bestial forms. Only the most vicious lycanthropes—creatures that revel in debauchery, theft, and violence—spend more time than absolutely necessary in civilization. Among clan members, lycanthropes form cabals and remain in their hybrid forms. Shapeshifters that rarely part from clan society typically embrace a baser lifestyle as they age, combining the cruelest characteristics of humankind with the brutality of beasts. Sometimes, these cabals take over small villages and enslave the inhabitants.

Tied to the Moon: When the full moon rises, werecreatures stalk city streets and wild places alike. Their howls echo across the land, filling settlers with dread. Families make offerings to Sehanine, goddess of the moon, beseeching her to protect them from shapeshifters. Silver is associated with the moon, but it causes werecreatures pain and prevents their wounds from healing as quickly as normal. Hunting parties intent on slaying a lycanthrope are wise to use silver-coated weapons.

Rulers of the Underworld: The most urban of lycanthropes, wererats dwell in packs inside sewers or catacombs. More cunning and materialistic than their shapeshifter kin, wererats join criminal organizations or start their own. A wererat might be a pickpocket, a criminal mastermind, or a spy.

Living on the Fringe: Brutish and feral, werewolves dwell alone or in small wilderness clans. They frequently run with wolf packs, especially when the moon is full. They sometimes join bandit gangs or become mercenaries. Werewolves prefer to stick to the borderlands but occasionally work inside cities. Anyone who employs a werewolf must be prepared to satisfy the creature’s thirst for human blood.

“"The moon rises full tonight, and I’ve heard wolves howling on the downs. Best lock your doors.”
—Salvana Wrafton of Winterhaven
Scurrying Wererat

**Level 3 Skirmisher**

Medium natural humanoid (shapechanger), human

**HP** 37; **Bloodied** 18

**AC** 17, **Fortitude** 16, **Reflex** 14, **Will** 13

**Speed** 6, climb 4 (rat or hybrid form only)

**Initiative** +7

**Perception** +7

**Low-light vision**

**Traits**

**Regeneration**

The wererat regains 5 hit points whenever it starts its turn and has at least 1 hit point. When the wererat takes damage from a silvered weapon, its regeneration does not function on its next turn.

**Standard Actions**

1. **Dagger** (weapon) ♦ At-Will
   
   **Requirement:** The wererat must be in human or hybrid form.
   
   **Attack:** Melee 1 (one creature); +8 vs. AC
   
   **Hit:** 1d6 + 6 damage, or 2d6 + 6 if the wererat has combat advantage against the target.

2. **Bite** (disease) ♦ At-Will
   
   **Requirement:** The wererat must be in rat or hybrid form.
   
   **Attack:** Melee 1 (one creature); +8 vs. AC
   
   **Hit:** 1d4 + 4 damage. If the target is granting combat advantage to the wererat, it also takes ongoing 5 damage (save ends). At the end of the encounter, the target makes a saving throw. On a failure, the target contracts wererat filth fever (stage 1).

**Move Actions**

1. **Rat Scurry** ♦ At-Will
   
   **Requirement:** The wererat must be in rat form.
   
   **Effect:** The wererat shifts up to its speed.

**Minor Actions**

1. **Change Shape** (polymorph) ♦ At-Will
   
   **Effect:** The wererat alters its physical form to appear as a Tiny rat, or a Medium unique human or hybrid.

**Skills**

- **Bluff** +6
- **Stealth** +10

**Str** 10 (+1)  
**Con** 15 (+3)  
**Dex** 18 (+5)

**Wis** 12 (+2)  
**Cha** 11 (+1)

**Languages**

- Common

**Alignment**

- evil

**Equipment**

- dagger

**Wererat Filth Fever**

**Level 3 Disease**

Those infected by this disease waste away as they alternately suffer chills and hot flashes.

**Stage 0:** The target recovers from the disease.

**Stage 1:** While affected by stage 1, the target loses a healing surge.

**Stage 2:** While affected by stage 2, the target loses a healing surge. The target also takes a -2 penalty to AC, Fortitude, and Reflex.

**Stage 3:** While affected by stage 3, the target loses all healing surges and cannot regain hit points. The target also takes a -2 penalty to AC, Fortitude, and Reflex.

**Check:** At the end of each extended rest, the target makes an Endurance check if it is at stage 1 or 2.

- **8 or Lower:** The stage of the disease increases by 1.
- **9–12:** No change.
- **13 or Higher:** The stage of the disease decreases by 1.
**Frenzied Werewolf**

Medium natural humanoid (shapechanger), human

**Level 6 Brute**

XP 250

- **HP**: 78; **Bloodied**: 39
- **AC**: 18, **Fortitude**: 19, **Reflex**: 18, **Will**: 16
- **Speed**: 6 (8 in wolf form)

**Traits**

**Regeneration**

The werewolf regains 5 hit points whenever it starts its turn and has at least 1 hit point. When the werewolf takes damage from a silvered weapon, its regeneration does not function on its next turn.

**Standard Actions**

1. **Claw** ✦ At-Will

   **Requirement**: The werewolf must be in wolf or hybrid form.

   **Attack**: Melee 1 (one creature); +11 vs. AC

   **Hit**: 2d8 + 3 damage, or 2d8 + 8 against a bloodied target, and the target falls prone.

2. **Bite** (disease) ✦ At-Will

   **Requirement**: The werewolf must be in wolf or hybrid form.

   **Attack**: Melee 1 (one creature); +11 vs. AC

   **Hit**: 1d10 + 7 damage. At the end of the encounter, the target makes a saving throw. On a failure, the target contracts werewolf moon frenzy (stage 1).

3. **Club** (weapon) ✦ At-Will

   **Requirement**: The werewolf must be in human or hybrid form.

   **Attack**: Melee 1 (one creature); +11 vs. AC

   **Hit**: 2d8 + 4 damage, or 2d8 + 9 against a bloodied target.

4. **Lycanthrope Fury** ✦ At-Will

   **Requirement**: The werewolf must be in hybrid form.

   **Effect**: The werewolf uses claw and bite. Then the werewolf takes 5 damage.

**Minor Actions**

**Change Shape** (polymorph) ✦ At-Will

**Effect**: The werewolf alters its physical form to appear as a Medium wolf, unique human, or hybrid.

**Skills**

- Bluff +8, Intimidate +8
- Str 19 (+7)
- Dex 17 (+6)
- Con 18 (+7)

- Int 10 (+3)
- Cha 11 (+3)

**Alignment**: evil

**Languages**: Common

**Equipment**: club

---

**Werewolf Moon Frenzy**

**Level 6 Disease**

*This disease starts with a fever, which soon becomes a violent and unpredictable rage.*

**Stage 0**: The target recovers from the disease.

**Stage 1**: While affected by stage 1, the target takes a -2 penalty to Will.

**Stage 2**: While affected by stage 2, whenever the target becomes bloodied, it makes a melee basic attack as a free action against an ally adjacent to it.

**Stage 3**: While affected by stage 3, whenever the target is hit by an attack, it makes a melee basic attack as a free action against an ally adjacent to it.

**Check**: At the end of each extended rest, the target makes an Endurance check if it is at stage 1 or 2.

- 10 or Lower: The stage of the disease increases by 1.
- 11–14: No change.
- 15 or Higher: The stage of the disease decreases by 1.
MANTICORE

Flying hunters with leonine bodies, manticores swoop from mountainside lairs to seize prey. They are vicious, dim-witted beasts that kill for pleasure.

Manticores hunt alone or in small prides and prefer earthbound prey. Travelers who venture near caves or rocky ledges where manticores lair risk death. The fearsome predators claim expansive hunting grounds, and a settlement could be annexed into a manticore’s territory without warning. Some evil humanoids capitalize on manticores’ predictable hunting behavior. Most people prefer to avoid the beasts, though, and they go to great lengths to stay clear of potential manticore habitats.

Voracious Monsters: Manticores eat all types of meat, but they most enjoy dwarf and human flesh. Poorly guarded caravans and inexperienced hunting parties make ideal targets. Although a manticore has vicious teeth, it prefers to attack with its tail and claws, leaving its fangs for tearing at the flesh of its kill. A passerby who comes across a massacre site might find iron spikes and serrated teeth, sure signs that at least one manticore was involved in the attack.

“*They call a group of manticores a pride, just like lions. But there’s nothing proud or noble about those beasts.*”

—Kelana Dhoram, mayor of Moonstair

Manticores regularly shed their three rows of teeth. Finding a tooth warns that one of the vicious creatures could be near, but it is also considered an ill omen. Rampant fear of the winged beasts infects borderland communities. In such a place, someone who finds a tooth might not reveal that information, for fear of facing life as a pariah if his or her compatriots learn of the discovery. And thus, what little warning the settlement might have had about an impending attack goes unheeded.

Brutish and Violent: Although they’re smarter than most beasts, manticores operate mostly on instinct and their hateful emotions. Much like ogres, manticores have a reputation as brutish beasts that live in rural areas and end up under the command of smarter creatures. Manticores have barely enough intelligence to speak, but they don’t often care to. With its short temper and limited ability to reason, a manticore takes offense at concepts and innuendos it doesn’t understand. When a manticore wants to make a point, it uses claws, teeth, and spikes rather than words.

Steeds of Evil: Manticores fight alongside other evil creatures, often serving as mounts. Some humanoids, especially hobgoblins, steal and train manticore cubs. There’s no guarantee that the winged beasts won’t turn on their trainers, however. Bribery remains the safest method for making and keeping manticore allies. The creatures have a strong mercenary streak and accept food and treasure in exchange for service. It’s not uncommon for a tribe of goblins or ogres to
pay tribute to a nearby manticore in hopes of securing the predator’s aid in an attack. A manticore might turn up at the battle, but it fights for its own enjoyment. If it becomes tired or irritated, the manticore will fly away and leave its temporary allies to die.

Symbols of Danger: In heraldry and iconography, the manticore represents peril or viciousness. A sign at an abandoned mine might depict a manticore or a symbol of a manticore’s tooth to warn that the area inside is unstable or dangerous. Groups of adventurers, mercenaries, or thugs sometimes choose a manticore as a symbol of their ruthlessness. Warriors who want to look especially tough hunt down manticores to gather trophies. They wear the beasts’ pelts as capes, string manticore teeth on necklaces, or turn iron tail spikes into weapons and adornments.

Devils’ Unlikely Allies: Devils make use of manticores, despite the beasts’ unpredictable temperament. Devils claim that Alloces, the Butcher of Nessus, created the first manticores in experiments that weaved together the flesh of men, lions, and bats. Although manticores seem more sedate around devils, the fiends still have to pay or enslave manticores to ensure their service.

Medusa

Medusas are a people of such hideous aspect that their gazes render flesh to stone. Lithe females with snakes for hair and powerful males whose glances poison body and mind, they are deadly adversaries.

Fey creatures believe medusas are the cursed descendants of elves, betrayers who willingly bowed to Zehir and helped slaughter an entire city of eladrin. Human and dwarf sages think medusas are the progeny of yuan-ti and basilisk blood, created to be a slave race to the yuan-ti. Other scholars theorize that Zehir remade dragonborn or humans during the chaos following the Dawn War. No matter how the medusas were created, all races believe them to be unnatural creatures. Maybe some truth can be plucked from all three stories.

Deadly in Different Ways: Medusa males and females are inherently different beyond their gender. All medusas have scaled bodies, forked tongues, and snakelike eyes, and are resistant to poison. The similarities end there, however. Males are bald-headed, while females grow dozens of poisonous snakes from their scalps. Males’ eyes project mind-infecting poison, while females’ eyes turn creatures to stone. No female can turn another female to stone, but only special males are immune to their mates’ petrifying glares.

The sexual dimorphism of the race would appear to put the genders on equal footing. Invariably, however, the females form a matriarchy within which males fill subservient roles as hunters, guardians, scouts, and mates. Only males that have immunity to petrification can hope to rise above females in medusa society.
Such males are singled out by females for special treatment from birth, and they have little sympathy for their brothers.

**Domineering and Proud:**
Medusas believe that their killing gaze is evidence that they are destined to rule over other humanoids. A medusa is sensitive to its mortality and the limited distance of its petrifying gaze, so it chooses its adversaries carefully. Small medusa clans move through the wilderness in search of weak settlements to rule. Individuals settle in cities to build up criminal guilds and eventually make a play for power. Medusas that gain control bully the populace, quelling dissent with statuary gardens, venomous snakes in surprising places, and the deaths of those who speak against them. Some medusas claim godhood and demand worship, while others tout themselves as oracles.

“It’s easy to underestimate a male medusa, the one without the snakes on its head. Easy, but deadly. It won’t turn you to stone, but it will tear your mind apart.”

—Vadriar the Sage

**MIND FLAYER**

The ultimate megalomaniacs, mind flayers use their ability to enslave minds to play puppeteer to countless thralls while they feast on the brains of less useful creatures. Their goal is nothing short of world domination.

As ambitious as they are sinister, mind flayers hatch sprawling plots to achieve dominion. A single mind flayer might control an entire dungeon or settlement; a small cabal could set its sights on ruling a continent; a city of mind flayers aims to conquer and reshape the planes.

Mind flayers, or illithids as they call themselves, are the embodiment of mortals’ worst fears. They dwell in darkness and order monsters on foul errands. They slaughter or enslave multitudes of peaceful creatures and exert total dominance over prisoners. Mind flayers have spent centuries on selective breeding and magical manipulation experiments in an attempt to create the perfect slave race. Their efforts birthed the githyanki race, which eventually escaped the mind flayers’ control. Mind flayers can control countless thralls at once. No one knows how many worlds have crumbled under their deadly embrace, nor how many innocents have nourished the mind flayer hordes.

Perhaps the most horrifying and repulsive attribute of the illithids is their physical form, a grisly mockery of the humanoid victims from which they were birthed. Mind flayers use other creatures to reproduce. They implant a juvenile illithid inside a victim’s skull, where the tadpole-shaped offspring eats the creature’s brain.
The progeny’s Far Realm essence irrevocably alters the creature’s form, turning it into an adult illithid with features that hint at its former occupant. Some mind flayer cabals search out specific vessels for their young, believing that a powerful host body makes for a strong illithid.

**Solitary Masterminds:** With far-reaching plans and a vast pool of thralls, a mind flayer dips its tentacles into regional affairs without getting involved in them. The fiend prefers to remain unnoticed, notching milestone after milestone until its overarching goal is realized. A mind flayer isn’t solitary in the sense that it lives alone. Rather, it abides only the company of mindless thralls and illithids.
that have goals identical to its own. Illithids believe all creatures are their inferiors. To an illithid, other creatures exist for one of three purposes: host vessel, food, or slave. When a mind flayer aligns with another creature, it has already plotted how and when it will betray its new ally.

Canny But Not Cowardly: An illithid is intent on keeping its location and involvement secret until it can claim victory. Its thralls serve as decoys and a buffer against attack. When a mind flayer’s sanctum is breached or when its plans are at risk of failing, the fiend doesn’t hesitate to enter combat or make its presence known.

Only the most arrogant illithid operates without an escape plan. A mind flayer rarely risks its life, for it believes that nothing else is more valuable. In fact, numerous mind flayers become liches or search for other ways to extend their life spans.

Masters in the Underdark: Mind flayers are most comfortable in the Underdark’s black chasms. They enslave subterranean races and send their thralls into the harsh topside light to collect victims. Only a few illithid cities exist, in great caverns where even drow and other formidable Underdark races fear to tread.

**Mind Flayer Unseen**
Medium aberrant humanoid

**Level 18 Lurker**

| HP | Initiative |
| 126; Bloodied 63 | +20 |
| AC, Fortitude 28, Reflex 31, Will 30 | Perception +18 |
| Speed 7 | Darkvision |

**Traits**

Unseen Focus (illusion)
The mind flayer is invisible while it has a creature grabbed.

**Standard Actions**

1. **Tentacles ✦ At-Will**
   
   Requirement: The mind flayer must not have a creature grabbed.

   **Attack:** Melee 1 (one creature); +21 vs. Reflex. This attack automatically hits a dazed or stunned target.

   **Hit:** 1d6 + 6 damage, and the mind flayer grabs the target (escape DC 23) if it does not have a creature grabbed.

2. **Extract Brain (healing) ✦ At-Will**

   **Attack:** Melee 1 (one creature grabbed by the mind flayer); +21 vs. Fortitude

   **Hit:** 6d6 + 20 damage, and the target is dazed until it is no longer grabbed. If the attack reduces the target to 0 hit points or fewer, the target dies and the mind flayer regains 15 hit points.

3. **Mind-Clouding Blast (illusion, psychic) ✦ Encounter**

   **Attack:** Close blast 5 (enemies in the blast); +21 vs. Will

   **Hit:** 3d8 + 7 psychic damage, and the target is dazed (save ends).

   **Miss:** Half damage.

**Move Actions**

Mental Cloak (illusion, teleportation) ✦ Recharge when an attack hits the mind flayer

**Effect:** The mind flayer teleports up to its speed, and it becomes invisible until the end of its next turn.

**Skills**

**Languages** Deep Speech, telepathy 20
Mind flayers of a great city follow the commands of an elder brain—a living, pulsating conglomeration of the knowledge and mental strength sucked from dozens or even hundreds of mind flayers that died to create their king. The elder brain speaks telepathically, giving orders from its briny pool in a well-guarded section of the city and orchestrating a vast conspiracy of its own design.

Goal Oriented: At its basic level, a mind flayer needs brains for sustenance, and it prefers to use thralls to collect would-be victims. When first building its power base, a mind flayer might live hand to mouth for a while. As an illithid’s legions reach a healthy size, it launches into the heart of its plans. It might collect arcane writings and items of power to increase its knowledge; it could meddle in the politics of the surface world; it might even be intent on creating portals to summon more of its kin from the Far Realm.

The ultimate crown every mind flayer covets is rulership over the planes, which would be reshaped in the Far Realm’s image. Given a chance, illithids would extinguish the sun, blister the world, warp flesh into aberrant forms, and rewrite every natural race’s history with mad gibbering.

**Standard Actions**

1. **Tentacles ✦ At-Will**
   - Requirement: The mind flayer must not have a creature grabbed.
   - Attack: Melee 1 (one creature); +22 vs. Reflex. This attack automatically hits a dazed or stunned target.
   - Hit: 3d6 + 8 damage, and the mind flayer grabs the target (escape DC 24) if it does not have a creature grabbed.

2. **Enthrall Brain (charm) ✦ At-Will**
   - Attack: Melee 1 (one creature grabbed by the mind flayer); +22 vs. Fortitude
   - Hit: 5d6 + 10 damage, and the target is dazed until it is no longer grabbed. If the attack reduces the target to 0 hit points or fewer, the target instead has 1 hit point, and it is dominated until the mind flayer dies.

3. **Mind Blast (psychic) ✦ Encounter**
   - Attack: Close blast 5 (enemies in the blast); +22 vs. Will
   - Hit: 3d8 + 10 psychic damage, and the target is dazed (save ends). If the mind flayer scores a critical hit against the target, the target is dominated instead of dazed (save ends).

**Triggered Actions**

1. **Shared Pain (psychic) ✦ At-Will**
   - Trigger: An ally within 5 squares of the mind flayer takes damage from an attack.
   - Effect (Immediate Reaction): Close burst 5 (one creature dominated by the mind flayer other than the triggering ally in the burst). The target takes 20 psychic damage, which ignores any of the target’s resistances.

Minotaurs present the world’s other races with a dilemma. On the one side, minotaur cities and clans can be mighty allies and determined partners in civilizing the world. On the other, their baffling culture and demon-worshiping ways threaten to bring anyone they meet to ruin.

An old adage says, “No road in a minotaur kingdom runs straight for long.” It refers to the queer civil engineering that minotaurs employ as well as their way of thinking. The bull-headed brutes’ impressive strength and baffling culture is enough to make most people avoid the creatures.

Minds Like Mazes: Minotaurs approach life as if it were a labyrinth. Taking an action is stepping onto a path. Roads can lead away from the past, circumnavigate critical destinations, hit dead ends, or open new passageways. This moment-by-moment drama isn’t only a philosophy; it’s an internal decision-making mechanism inherent to minotaurs.

The minotaurs’ diplomatic and commercial partners struggle to unravel the convoluted negotiation style that fuels the creatures’ politics and customs. They debate, bargain, argue, distract, equivocate, and generally appear to procrastinate for a long time. Then suddenly a decision is made, and they roar into action with single-minded vigor. The swiftly shifting social cues of aggression and compliance leave outsiders blundering along completely unaware of the debate’s

**Standard Actions**

1. **Battleaxe** (weapon) ♦ At-Will
   - **Attack**: Melee 1 (one creature); +13 vs. AC
   - **Hit**: 1d10 + 8 damage, and the minotaur uses shield bash against the same target.

**Minor Actions**

1. **Shield Bash** ♦ At-Will (1/round)
   - **Requirement**: The minotaur must be using a shield.
   - **Attack**: Melee 1 (one creature); +11 vs. Fortitude
   - **Hit**: 1d6 damage, and the target falls prone.

**Triggered Actions**

1. **Goring Toss** ♦ At-Will
   - **Trigger**: An enemy adjacent to the minotaur shifts.
   - **Attack (Immediate Interrupt)**: Melee 1 (triggering enemy); +11 vs. Reflex
   - **Hit**: 1d6 + 5 damage, the target is immobilized until the end of its turn, and the minotaur slides the target up to 2 squares to a square adjacent to the minotaur.

| Str 20 (+9) | Dex 14 (+6) | Wis 14 (+6) |
| Con 17 (+7) | Int 10 (+4) | Cha 13 (+5) |

**Alignment**: unaligned

**Languages**: Common

**Equipment**: heavy shield, battleaxe
nuances. For a minotaur, though, a decision’s minutia has far-reaching consequences. A minotaur believes that each time it agrees to a contract or a condition, it actively declines taking the opposing path.

“I’ve known some minotaurs to be honorable, brave, and stalwart allies. But even some of them gave in to the beast within during the time I lived among them. Baphomet’s touch is like a curse that dooms the entire race to savagery, much as some of them try to stave it off.”

—Deric Widewanderer

**Labyrinthine Lands:** Minotaurs prefer landscapes that mimic their worldview. They feel at home among islands in a web of rivers, interlacing caverns, jumbled valleys, and other natural features that might at first appear chaotic. In such locales, minotaurs and their slaves construct their infamous cities. Roads on open plains twist; halls bend when they could go straight; dead ends, which confound outsiders, form the foundation of the race’s architectural style.
The famous minotaur settlement known as the Labyrinth City of Leng is a haunting testament to the power of the minotaurs’ construction when paired with the creatures’ unique mindset. Hidden in a serpentine volcanic landscape of mazelike canyons, the massive settlement withstood centuries of war before collapsing into ruins at the minotaurs’ own hands. Now demons, maddened minotaurs, and ghosts guard the nation’s treasures and buried secrets.

Demon Worshipers: Baphomet, known as the Horned King, Demon Prince of Beasts, and the Minotaur Lord, plays a crucial role in minotaur society. His creed—“Unleash the beast within”—frees his followers from the moral and mental complexities of their decisions and teaches them to live by instinct. His cults honor savagery, wrath, and brute strength. In the Temples of Ire, minotaur cabalists spill blood in Baphomet’s name and engage in cannibalism. Even some humans, elves, and orcs pay secret homage to him.

In about half the minotaur cities, the cult of Baphomet openly seeks converts and serves an important role in the settlements’ armies and defenses. Minotaurs that are infused with demonic blood are driven mad with savagery and grow to stupendous strength and size.
The cult keeps these bestial monsters in check and unleashes them in times of war or during wild festivals and bloody contests. In other minotaur communities, the cult must work behind a respectable facade. So as the magi summon demons in the dark, the diabolical organization works to win accolades as a noble fraternity or an honorable guild.
Mummy

A mummy embodies the wrath of the dead. It rises from its stillness to avenge a transgression.

The slow and shuffling gait of a mummy can paralyze a creature with fear. In its shambling steps, a foe sees not just the present danger but also the inevitability of death. The inexorable approach of a mummy replaces confidence with dread and hope with doom.

“Such a fate! To rule a vast empire, die honored and revered, enjoy a lavish royal funeral . . . and then spend a thousand years waiting for some fool to come try to plunder your tomb. No wonder he seemed a little crazed.”

—Uldane of Winterhaven

Retribution Fueled: Whether created in the dry desert heat, the sucking moisture of a desolate bog, or the frozen heights of a lofty mountain, a mummy exists for vengeance. A number of sins can awaken a mummy, from disturbing its tomb, despoiling a place sacred to it in life, or the theft of a prized object. Some mummies seek to avenge less material offenses, such as a loved one marrying someone the mummy loathes or an unwelcome alliance of the mummy’s enemies

**Languages**

- Common
accompany a mummy's entombment help protect its body from rot. Soft organs are removed and placed in special jars, and the corpse is treated with preserving oils, herbs, and wrappings. Less common means of preservation include freezing a body, baking it in dry heat, or using magic.

A mummy's creator usually seeks to use the creature to crush the life out of a victim, yet a mummy is not an easy weapon to wield. It cannot be forced to behave in a certain way. Once awakened, a mummy behaves according to the will of the amoral animus that gives movement to the creature's form. The animus causes a body to do in undead what its living essence might not have consented to in life. It is wrath incarnate, so even a minor wrong might be met with the deadly force of the mummy's strength and the unwholesome energy of its curse. The trick to shaping a mummy's rampage is imbuing the corpse through ritual with the proper reason to rise. This reason draws from the passionate beliefs and prejudices of the body's original owner. Once a person creates a mummy, he or she need only stay out of the way and let the mummy do its job.

**Ending a Mummy's Curse:** Each mummy awakens with the power to curse its enemies. Thus, when it dies a second death, it can still have its revenge. Rituals can remove these debilitating hexes, and the surest way to put an end to a mummy's affliction is to undo the transgression that caused the corpse to rise.

Redressing the wrong can remove the curse and sometimes cause the mummy to return to rest. A sacred idol might be replaced in its niche, a stolen treasure could be returned to its tomb, or a temple might be cleansed of the evidence of unwelcome blood. More ephemeral or permanent offenses, such as revealing a secret the mummy wished kept or killing someone the mummy loved, cannot be so easily remedied. In such cases, a mummy might slaughter everyone responsible and still not find its anger sated.
Ogre

Ogres are brutish, stupid, and grand in number. They kill for food and pleasure, often combining those pursuits.

Big, dumb, brutal, savage. Even though these words accurately describe ogres, none succeeds in capturing the extent to which the massive humanoids embody these traits. An ogre smashes a creature’s head for laughs and then eats its victim raw after it forgets how to make fire. If enough parts remain after the brute has gorged itself, the ogre might make a loincloth from its quarry’s skin and a necklace from any leftover bones. By the time it’s finished, the ogre is probably hungry again.

**Legendary Stupidity:** Few ogres can count to ten, even with their fingers in front of them. Most can barely speak a rudimentary form of Giant and know only a handful of Common words, with “smash,” “gimme,” and “food” being the most prevalent. Ogres are easy to fool or confuse, though they smash things they don’t understand. Silver-tongued tricksters who test their talents on these savages typically end up eating their eloquent words along with an ogre’s club.

**Equipment** greatclub, 4 rocks

---

**Primitive Wanderers:** Ogres live in small, nomadic groups. Various bands trade or capture members when they meet, depending on how the encounter goes. Being only slightly more cultured than a pride of lions, ogres lack a true sense of tribalism. They switch groups easily, especially if the welcoming band is momentarily flush with food and weapons.

Ogres aren’t great crafters. They use pelts for clothing and uproot trees and boulders as crude tools and weapons. They prefer stone-tipped javelins for hunting and stone axes for fighting.
Ogres don’t erect shelters. They sleep in caves, animal dens, or under overhangs or trees. When they find other forms of shelter, such as a cabin in the woods, ogres kill the inhabitants and lair there. An ogre with a lair is a lazy lout. When bored or hungry, it heads out to find something to kill, attacking virtually anything that crosses its path. Once an ogre has depleted an area of quarry, it moves on. Ogres often lair near the rural swaths of civilized lands, where they take advantage of poorly protected livestock, undefended larders, and unwary farmers.

**Bloodthirsty and Casually Cruel:** Calling someone an ogre is a grave insult, and not just because of the race’s well-known witlessness. Cruelty is an ogre’s dominant trait. Amoral and brutal, these fiends refrain from slaughtering one another out of a sense of familiarity and a kind of camaraderie. If an ogre doesn’t kill its quarry straightaway, it saves the hapless creature as a treat for later. Lacking focus, however, the brute might forget about its captive and allow it to starve or freeze to death.

**Lazy, Surly, and Easily Cowed:** As terrible as ogres are, far worse creatures exist in the world. Such creatures often round up ogres as slaves or willing servants. Even weaker creatures can frighten an ogre into submission if their numbers are great enough. Since power rules ogres’ lives, they understand strength and readily bow to domineering opponents. Large orc tribes, giants, hags, dragons, gnolls, and others employ ogres as warriors and workers. Some especially bright ogres learn to work for pay and equipment, becoming mercenaries for bosses who can tolerate their crude and bloodthirsty behavior.

✦ Greatclub (weapon) ♦ At-Will

Attack: Melee 2 (one creature); +15 vs. AC
Hit: 4d8 + 5 damage.

✦ Rock ♦ At-Will

Attack: Ranged 5 (one creature); +15 vs. AC
Hit: 3d6 + 7 damage.

✦ Juggernaut Push ✦ Recharge

Attack: Melee 1 (one creature); +13 vs. Fortitude
Hit: The ogre pushes the target 1 square and knocks it prone. The ogre then shifts 1 square to the square the target vacated. The ogre can push the target an additional number of squares equal to the ogre’s speed, shifting an equal number of squares and remaining adjacent to it. The target takes 1d8 damage for each additional square the ogre pushes it.

“Brutally strong, absolutely fearless, and dumb as rocks. That’s what makes ogres so useful . . . and so dangerous.”

—Rothar of the Seven-Pillared Hall
OOZE

Among the more peculiar creatures in the world, formless oozes squeeze through dank underground passages, mindlessly feeding on creatures and objects that dissolve in their acidic bodies.

Similar to a goopy melding of vermin and natural hazard, oozes are a nuisance and a danger. Ordinary folks know the creepy creatures exist and follow a simple rule: If you see an ooze, go the other way. Survivors swear by the maxim. Of course, oozes aren’t always easy to spot, because the sludgy predators tend to cling to ceilings and seep from unlikely crevices.

Ochre Jelly

| Con 11 (+1) | Int 1 (-4) | Cha 1 (-4) |

**Alignment** unaligned **Languages** –

Lurk in the Dark: Oozes dwell in tunnels, caverns, and sewers. They slink along the ground, drip from walls and ceilings, spread across the bottoms of underground pools, and squeeze through narrow tunnels. The dark and damp keep the creatures comfortable, and they shun areas with light or extreme temperatures. Other underground creatures easily avoid oozes. Bats or stirges even live in rooms surrounding an ooze’s lair. More intelligent cave-dwellers, such as roopers, wait for creatures to wander into an ooze’s domain and capitalize on the situation to snag an easy meal.
Everything Is Food: Oozes don’t really think. Even insects have a better sense of tactics and self-preservation. Consequently, the creatures are direct and predictable. An ooze finds something, attacks it, and eats it. Every variety of ooze secretes digestive acids that dissolve materials. Most can consume flesh and wood (albeit slowly), but a few are capable of eating through metal and stone.

Oozes are drawn to movement and warmth, which means they frequently eat creatures. They also consume the grime that coats dungeons, so an immaculate passage is a likely sign that an ooze lairs nearby. When an ooze is sated, it falls into a torpor and remains motionless on the ground. Since not all oozes digest all...
substances, some have coins, metal gear, bones, or debris suspended inside their bodies. A slain ooze can be a windfall for its killers.

**Death Is Slow:** An ooze dissolves its prey slowly. Some varieties, such as the gelatinous cube, anesthetize their meals first, a process that numbs victims and muddies their senses. Most oozes don’t, though, and their meals die in agony as the creature’s acid digests bits of flesh at a time. The upside of these torturous, digestive deaths is that a morsel’s comrades might rescue him before he’s fully consumed.

**Easy to Trick:** Though oozes aren’t capable of aligning with creatures, they sometimes end up fighting for or alongside others after being lured to a particular cellar or cave. Clever monsters might keep oozes around to defend passageways or dispose of refuse. Likewise, an ooze could be enticed into a pit, where its captors feed it only enough to keep it from coming after them. Crafty creatures place torches and flaming braziers in prime spots to dissuade an ooze from leaving a particular tunnel or room.

**Unknown Origins:** Some oozes are found in nature, but nobody knows where they originate from. Phenomena and magical experimentation have been known to create such creatures. Similarly, failed attempts at performing a powerful ritual could cause an ooze to spontaneously appear. The creatures are simple to summon as well. So even inexperienced spellcasters can bring these creatures—uncontrolled—into battle at a moment’s notice.

**Traits**

Ooze

While squeezing, the ooze moves at full speed rather than half speed, it doesn’t take the –5 penalty to attack rolls, and it doesn’t grant combat advantage for squeezing.

Translucent

The cube is invisible until seen (Perception DC 25) or until it attacks. A creature that fails to notice the cube might walk into it, automatically being hit with **engulf**.

**Standard Actions**

1. **Slam (acid)** ✦ **At-Will**

   **Attack:** Melee 1 (one creature); +8 vs. Fortitude

   **Hit:** 2d6 + 9 acid damage, and the target is immobilized (save ends).

2. **Engulf (acid)** ✦ **At-Will**

   **Requirement:** The cube must have no more than two creatures grabbed.

   **Attack:** Melee 1 (one or two creatures); +8 vs. Reflex

   **Hit:** The cube grabs the target (escape DC 15) and pulls the target into its space. Until the grab ends, the target takes ongoing 10 acid damage and is dazed. When the cube moves, it pulls with it any creature grabbed by it, and the creature remains grabbed and within the cube’s space. This movement does not provoke an opportunity attack from the grabbed creature.

OOZE
Orcs put their faith in two things: their bloodthirsty, one-eyed god and the blind savagery of destruction.

Hate beats in their hearts, and rage runs through their veins. What thoughts emerge from the ignorant darkness of their minds are bent on ruination and death. They are orcs, and in their wakes, ash and bone remain.

**Faith in Destruction:** Orcs worship Gruumsh, and theirs is a primal religion of brutality and bloodletting. Orcs hear their god’s voice in the storm’s howl, recognize his wrath in the earth’s quaking, and see his face in an avalanche’s wreckage. Orcs slaughter the weak to earn Gruumsh’s favor, and they pluck out one of their own eyes to prove their faith in him.

**Tribes Like Plagues:** Orc tribes scourge the land, devouring or driving off beasts and plundering villages. As each region is consumed, the monsters move on. A tribe divides into roving bands that search abroad for the choicest new hunting grounds, leaving a small contingency behind to receive returning parties. As the orcs filter in, they bring trophies and news of targets ripe for attack. Once the tribe is whole, the savages set out, desecrating the land and its creatures as they cut a path to their new territory. On rare occasion, a tribe’s leader chooses to hold onto a particularly defensible lair for decades, and its orcs must range far into the countryside to sate their appetites.
Scavengers, Not Builders: Orcs on the move grudgingly camp in the open, but their instinct is to fortify for long residence. Ruins, cavern complexes, and defeated foes’ villages are easily converted into strongholds. Orcs build only for defensive purposes, such as erecting log-and-earth walls to encircle huts. If orcs choose to live in their victim’s homes, they close the gaps they exploited in the settlement’s defenses. Orcs don’t set traps around their lairs unless the makings for the trap existed prior to the tribe’s arrival. Instead, the brutes build spiked walls and dig pits to ensnare invaders and buy sentries time to alert the tribe.

Although capable of ironworking and some subtler arts, orcs prefer the strong-arm method of procurement. After savaging a colony, they pick it and its dead clean of usable items and cart the booty back to their base. The skeletal remains of the settlement are then set alight.

Orcs often range through the hills and mountains that dwarves prefer. The countless battles between the two races have awarded orcs control over a handful of dwarven holds and mines. Yet even when controlling a prime location, orcs fail to do anything with it. The real pleasure had been in wresting control of the site from the dwarves. One unusually industrious orc sent slaves into a mine for a season, but the weaklings had the temerity to keep dying.

Bloodthirsty Cannibals: No one can negotiate with orcs unless perched in a position of overwhelming strength. Orcs see weakness outside their tribe as an exploitable source of food and treasure. Even weaker orc tribes are prey for stronger ones. Powerful creatures can direct an orc tribe’s ferocity through intimidation, but none can hope for fine control or discipline.

Orcs have no qualms about eating any flesh, including that of other orcs. Cannibalism within a tribe remains taboo except in special savage rites of passage, such as when an orc eats its own eyeball in a religious ceremony or an incoming chief feasts on his predecessor to symbolize virility. Orcs are especially fond of how fattened animals taste. When the savages slaughter a farm’s residents, they might eat the victims right away and save the animals for later meals. Orcs have no patience for animal husbandry, though, and such creatures are soon stewing in their own juices.

“Don’t try to tell me there’s a soul that can be redeemed inside that monster. An orc’s little better than a demon.”

—Caiphas, paladin of Pelor

“Whether it calls on some violent primal spirit, on a savage primordial of wind and thunder, or on a demon prince of storms, an orc storm shaman is a force to be reckoned with.”

—Oak Warden Sharasta
Otyugh

An otyugh’s unsavory scent sets creatures to retching, an advantage the detritus-dwelling beast exploits.

These noisome monsters live in filth, subsisting on dung, rot, and carrion as they await fresh meat.

**Rank Homes:** Otyughs snuggle into squishy nests of decaying matter, which provide excellent camouflage for their mottled flanks. Heaps of moldering plants, piles of maggot-ridden bodies, pools of unidentifiable slime, and pits brimming with excrement are favored nesting sites. An otyugh can survive for some time on the gruesome gruel a well-steeped domicile provides.

Otyughs wallow in stagnant swamps, scum-filled ponds, and damp forest dells. The smell of civilization can attract the creatures as well. Fresh mass graves, city sewers, village middens, and manure-filled animal pens are sure to host one or more otyughs. The solitary creatures prefer to live far from others of their kind, but they don’t become territorial unless suitable nesting sites are scarce or fresh prey wanders past.

**Ambush Hunters:** An otyugh is a natural ambusher. Its massive bulk and ungainly, three-legged form rule out speed-based attacks, but the rest of its body reeks of predatory ability. The beast sinks into its wallow. Its center tentacle, which is outfitted with two eyes and nostrils, barely breaches the pit’s surface as it watches a creature approach. Then it silently draws back and awaits the perfect moment to strike. With a great splash, an otyugh’s other two tentacles, well muscled and equipped with claws, whip out to smash into startled prey. Even the creature’s scent aids it in battle, as disoriented and sickened foes stumble around trying to settle their bellies long enough to unsheathe their weapons.
**Strong but Needy Guardians:** With plentiful sustenance, otyughs are content to grow fat in their wallows. Not even the desire to mate stirs one from its putrid stew. This sedentary nature and their hunger for refuse make otyughs valuable guard beasts and disposal units for unwanted guests. They are ideal pets for keeping interlopers from poorly guarded sewers, middens, dungeons, cesspools, oubliettes, and moats. However, some would-be masters underestimate how plentiful a supply of waste, carrion, and victims is needed to keep an otyugh from wandering off. And the creatures do not tame well, especially when peckish. Thus, more than one “trained” otyugh has eaten its master when its wallow has turned bland or tasteless.

16 or Higher: The stage of the disease decreases by 1.
Charnel Otyugh
Large natural beast

HP 212; Bloodied 106
AC 26, Fortitude 27, Reflex 21, Will 24
Speed 5, swim 5
Resist 5 necrotic
Saving Throws +2; Action Points 1

Traits

Otyugh Stench ✦ Aura 1
Living enemies take a –2 penalty to attack rolls while in the aura.

Standard Actions

✦ Charnel Lash (necrotic) ✦ At-Will
Attack: Melee 3 (one creature); +15 vs. AC
Hit: 1d8 + 8 damage, and ongoing 5 necrotic damage (save ends). The otyugh pulls the target up to 2 squares and grabs it (escape DC 18).

✦ Rotting Bite (disease, necrotic) ✦ At-Will
Attack: Melee 1 (one creature); +15 vs. AC
Hit: 2d12 + 6 necrotic damage, and ongoing 5 necrotic damage (save ends). In addition, at the end of the encounter, the target makes a saving throw. On a failure, the target contracts greater otyugh filth fever (stage 1).

✦ Charnel Frenzy (necrotic) ✦ Recharge 5:5
Attack: Close burst 3 (enemies in the burst); +15 vs. AC
Hit: 1d8 + 8 damage, and ongoing 5 necrotic damage (save ends).

Minor Actions

✦ Life Leech (healing, necrotic) ✦ At-Will (1/round)
Attack: Melee 3 (one creature grabbed by the otyugh); +13 vs. Fortitude
Hit: 10 necrotic damage, and the otyugh regains 5 hit points.

Strange Mutations: Soaked in disease and decay, an otyugh gradually evolves in appearance to complement its environment. An otyugh living in offal turns a multihued brown, and its skin grows mottled. The skin of a creature dwelling in a pond scum-covered pool gains a bright green sheen and blisters that mimic the pool’s slime bubbles.

An otyugh’s propensity for mutating makes it particularly susceptible to Far Realm influences. If it eats an aberrant creature’s flesh, the pit dweller rapidly morphs into a much larger, more intelligent, and deadlier neo-otyugh. It also gains psychic and telepathic abilities. Neo-otyughs form dangerous partnerships with allies, bargaining their services for payments in food they consider delicacies.
Neo-Otyugh  Level 11 Elite Controller
Huge aberrant magical beast  XP 1,200

TRAITS

.neo-Otyugh Stench ✦ Aura 2
Living enemies take a –2 penalty to attack rolls while in the aura.

Threatening Reach
The neo-otyugh can make opportunity attacks against enemies within 4 squares of it.

STANDARD ACTIONS

 полу TENTACLE ✦ At-Will
Attack: Melee 4 (one creature); +16 vs. AC
Hit: 3d6 + 9 damage, and the neo-otyugh pulls the target up to 3 squares and grabs the target (escape DC 19).

Massive Maw of Decay (disease, necrotic) ✦ At-Will
Attack: Close blast 2 (creatures in the blast); +16 vs. AC
Hit: 2d6 + 7 damage, or 2d6 + 10 against a creature grabbed by the neo-otyugh, and ongoing 5 necrotic damage (save ends). In addition, at the end of the encounter, the target makes a saving throw. On a failure, the target contracts greater otyugh filth fever (stage 1).

MINOR ACTIONS

Disgusting Lure (charm, psychic) ✦ At-Will
Attack: Ranged 20 (one creature); +14 vs. Will
Hit: 2d8 psychic damage, and if the target does not end its next turn adjacent to the neo-otyugh, the target takes 15 psychic damage.

TRIGGERED ACTIONS

Body Shield ✦ At-Will
Trigger: An enemy hits the neo-otyugh while the neo-otyugh has a creature grabbed.
Attack (Immediate Interrupt): Melee 1 (one creature grabbed by the neo-otyugh); +14 vs. Fortitude
Hit: The triggering enemy’s attack hits the grabbed creature instead of the neo-otyugh.

Greater Otyugh Filth Fever  Level 11 Disease

Those infected by this disease waste away as they alternately suffer chills and hot flashes.

Stage 0: The target recovers from the disease.
Stage 1: While affected by stage 1, the target loses a healing surge.
Stage 2: While affected by stage 2, the target loses a healing surge and takes a –2 penalty to AC, Fortitude, and Reflex.
Stage 3: While affected by stage 3, the target loses all healing surges and cannot regain hit points. The target also takes a –2 penalty to AC, Fortitude, and Reflex.

Check: At the end of each extended rest, the target makes an Endurance check if it is at stage 1 or 2.
12 or Lower: The stage of the disease increases by 1.
13-18: No change.
19 or Higher: The stage of the disease decreases by 1.
**Owlbear**

Owlbears are terrifying, nocturnal predators that inhabit the forests of the world and the Feywild, where they hunt to satisfy their voracious appetites. Their haunting cries echo through valleys and across plains, warning to travelers that they are on the prowl.

An owlbear’s innocuous name belies its deadly ferocity. These hunters possess more cunning than an owl and more ferocity than a bear, and they have a ravenous appetite far exceeding either animal.

**Alignment:** unaligned

**Languages:** —
An owlbear has a powerful body and bristly fur similar to that of a bear, but they also possess feathers, a wicked beak, and sharp talons. Despite its exotic appearance, an owlbear is not a magical beast, the creation of some mad wizard who sought to combine the bear and owl. Whatever its origin might be, the owlbear is a species unto itself, occurring with the same regularity that one might encounter other predatory beasts.

**Consummate Predators:** Gifted with the vision of an owl, an owlbear emerges from its den around sunset and hunts into the darkest hours of night. The creature’s den, usually a cave, a ruin, or a hollow tree, is littered with shattered bones and offal, the ghastly remains of the creature’s prey. When prey is plentiful, an owlbear drags its kills back to its lair, where it adorns nearby trees or rocks with the corpses. This flesh attracts scavengers, giving the owlbear more opportunities to catch prey. The scent of blood and rotting meat is thick near an owlbear’s lair. Aside from the baleful hoot of the creatures, the smell is usually the only other warning that an owlbear is near.

Owlbears hunt alone or in mated pairs. If quarry is plentiful, a family of owlbears might remain together for longer than is required to rear cubs. Otherwise, the irascible creatures typically go their own ways as soon as their young are ready to hunt. Few things can dissuade a hungry owlbear from attacking. An owlbear is a stubborn predator that fights without a sense of self-preservation. Even when it is about to die, an owlbear still keeps its victim clenched tightly in its claws, snapping at the foe with its bone-crushing beak.
Supernatural Powers: Despite resembling fairly mundane animals, an owlbear possesses some extraordinary powers based on the environment in which it lives. All owlbears possess a magical call, and each species’ call has a different effect. During the night, an owlbear hoots or screeches to declare territory, search for mates, or to flush prey from terrain that is hazardous or has no escape route.

Savage Pets: An owlbear’s carnivorous and violent nature doesn’t rule out the ability to train them. Owlbears are difficult to tame, but with enough time and food, a person can train an owlbear to recognize him or her as a master. Owlbears are used as guard beasts and mounts, though even a trained owlbear can still be dangerous.

An elf community sometimes encourages owlbears to den beneath their treetop village, using the beasts as a natural defense during the night. Hobgoblins favor owlbears as war beasts when they manage to control them. A starved owlbear might show up in a gladiatorial arena, where it eviscerates foes with ruthless efficiency. Large humanoids, such as hill or frost giants, sometimes keep owlbears as pets and playmates.

Purple Worm

Massive burrowing creatures, purple worms are feared for their ability to swallow enemies whole. They are capable of burrowing through solid rock and leave huge tunnels in their wake.

Purple worms are unintelligent beasts attracted to loud noises. They have no regard for other creatures, often interrupting battles, tearing through cities, or disrupting mining operations. Most purple worms are found in the Underdark or in rocky regions near mountains.

Ravenous Hunger: A purple worm is a voracious beast that is large enough to swallow a giant whole. Because a purple worm usually goes several days without eating, it tends to gorge when it finds food. A purple worm’s emergence is difficult to predict, and the creature is prone to showing up at the worst possible times. Many underground civilizations, such as those of the drow, the duergar, and the mind flayers, maintain special wards around their fortresses and cities to deter the great beasts.

A purple worm is widely regarded as a living natural disaster. The creatures are engines of chaos and destruction. Many Underdark races will sabotage their enemies’ wards against the worms, leaving a settlement vulnerable to attack. A worm cares nothing for whom it helps or hinders. A purple worm is motivated only by hunger, so the only predictable characteristic of its attacks is that it favors larger groups over smaller ones. Dwarves have learned to take advantage of this behavior, luring the worm out with a large group only to slay it with artillery and massive siege weapons.

Weapons and Tools: A few people have discovered ways to turn purple worms into weapons. Stories tell of powerful spellcasters who specialized in charm and enchantment and were able to magically seize control of the creatures. The tales recount how these spellcasters could direct the worms at their enemies, wiping out entire cities or armies with a single worm.

Rumors also circulate that some drow priestesses hold worms under their sway and use them for defense in remote areas where reinforcements aren’t available. Dwarves are known to use purple worms for mining and tunnel-building, yet despite centuries of effort, the beasts have never been tamed or domesticated. All attempts to control the beasts eventually end in disaster.

Boons of the Worm: When a purple worm burrows through the ground, it consumes earth and rock, breaking down the substances and quickly excreting

“Purple worms are among the largest beasts found in the world, enormous brutes driven by nothing but hunger and the instinctive drive to tunnel, to consume, to destroy.”

—Zardkeran of Forgehome
them. Hard substances, such as valuable metals and gems, remain within their bodies for weeks or months. A brave or foolhardy treasure hunter might attempt to hunt down a purple worm in hopes of claiming the treasures within its gizzard. A worm’s body also has a boon to offer: Drow and assassins value the poison that a purple worm carries in its stinger.

A burrowing purple worm creates new corridors and highways throughout the Underdark. And, because a purple worm rarely returns to one of its tunnels, such passageways are usually safe from the beasts, as long as an interloper remains quiet. Areas that are rich in prey become interlaced with complex tunnel systems as a result of several worms hunting the area. It’s not long after a purple worm forges a tunnel that smaller Underdark denizens begin to move into the tunnel to do their own hunting.
Adult Purple Worm

Huge natural beast (blind)

**XP 5,000**

**HP 560; Bloodied 280**

**AC 28, Fortitude 28, Reflex 26, Will 24**

**Speed 6, burrow 6 (tunneling)**

**Immune** blindered, gaze effects

**Saving Throws** +5; **Action Points** 2

**Traits**

**Ponderous**

The purple worm can take immediate actions while stunned, dazed, or dominated.

**Blooded Frenzy**

While bloodied, the purple worm takes an extra minor action during its turn.

**Standard Actions**

- **Bite** ✦ **At-Will**
  
  **Attack:** Melee 3 (one creature); +19 vs. AC
  
  **Hit:** 4d8 + 8 damage.

- **Devour Whole** (acid) ✦ **At-Will**
  
  **Attack:** Melee 3 (one creature); +17 vs. Fortitude
  
  **Hit:** 3d10 + 7 damage, and the target is swallowed (escape DC 21). While swallowed, the target does not occupy a square and has neither line of sight nor line of effect to anything except the worm and other creatures swallowed by the worm; in addition, nothing has line of sight or line of effect to the target except other creatures swallowed by the worm. If the target attacks the worm using a close or an area attack, that attack targets all other creatures swallowed by the worm. While swallowed, the target takes 30 acid damage at the end of its turn. When the effect ends or the worm drops to 0 hit points, the target appears in an unoccupied square of its choice adjacent to the worm.

**Minor Actions**

- **Fling** ✦ **At-Will**
  
  **Attack:** Melee 3 (one creature); +17 vs. Fortitude
  
  **Hit:** 3d10 + 8 damage, and the purple worm slides the target up to 4 squares.

- **Poison Stinger** (poison) ✦ **At-Will**
  
  **Attack:** Melee 3 (one creature); +19 vs. AC
  
  **Hit:** 2d8 damage, and ongoing 15 poison damage (save ends).

- **Regurgitate** ✦ **At-Will**
  
  **Effect:** One creature swallowed by the purple worm appears in a square of the worm’s choice within 4 squares of it. That creature is no longer swallowed and takes 3d10 + 8 damage.

**Triggered Actions**

- **Thrash** ✦ **At-Will**
  
  **Trigger:** An attack hits the purple worm.
  
  **Attack** (Immediate Reaction): Melee 3 (one or two creatures); +17 vs. Reflex
  
  **Hit:** 3d12 + 5 damage, and the purple worm pushes the target up to 6 squares.

Purple Worm Tunneler

Huge natural beast (blind) XP 12,000

HP 728; Bloodied 364
AC 33, Fortitude 33, Reflex 31, Will 29
Speed 8, burrow 8 (tunneling)
Immune blinded, gaze effects
Saving Throws +5; Action Points 2

Traits

Ponderous
The purple worm can take immediate actions while stunned, dazed, or dominated.

Blooded Frenzy
While bloodied, the purple worm takes an extra minor action during its turn.

Standard Actions

✦ Bite ♦ At-Will

Attack: Melee 3 (one creature); +24 vs. AC
Hit: 4d8 + 9 damage, and the purple worm shifts up to half its speed.

✦ Devour Whole (acid) ♦ At-Will

Attack: Melee 3 (one creature); +22 vs. Fortitude
Hit: 3d10 + 8 damage, and the target is swallowed (escape DC 24). While swallowed, the target does not occupy a square and has neither line of sight nor line of effect to anything except the worm and other creatures swallowed by the worm; in addition, nothing has line of sight or line of effect to the target except other creatures swallowed by the worm. If the target attacks the worm using a close or an area attack, that attack targets all other creatures swallowed by the worm. While swallowed, the target takes 30 acid damage at the end of its turn. When the effect ends or the worm drops to 0 hit points, the target appears in an unoccupied square of its choice adjacent to the worm.

Move Actions

✦ Barrel Through ♦ At-Will

Effect: The purple worm shifts up to its speed. Each time the purple worm enters a square adjacent to any enemy for the first time during the move, it makes the following attack against that enemy.
Attack: Melee 1; +22 vs. Reflex
Hit: 2d8 + 4 damage, and the purple worm pushes the target up to 2 squares.

Minor Actions

✦ Stinger Impalement (poison) ♦ At-Will

Attack: Melee 3 (one creature); +24 vs. AC
Hit: 2d8 + 8 damage, and the purple worm slides the target up to 4 squares. The target takes ongoing 10 poison damage (save ends).

Triggered Actions

✦ Thrash ♦ At-Will

Trigger: An attack hits the purple worm.
Attack (Immediate Reaction): Melee 3 (one or two creatures); +22 vs. Reflex
Hit: 2d12 + 11 damage, and the purple worm pushes the target up to 6 squares.

Rakshasa
Cunning masters of illusion, rakshasas are cruel, intelligent humanoids that resemble tigers. Rakshasas enjoy luxury and seldom appear without a veil of illusion to disguise their feline forms.

Rakshasas have mastered the power of illusion, and they use that power to conceal their catlike forms while living among other races. A rakshasa is one of the most intelligent and cunning humanoids that one will ever encounter, though a person is rarely aware that he or she is dealing with a rakshasa. Avaricious and self-serving, a rakshasa is capable of unspeakable evil in the pursuit of whatever it covets, be that wealth, power, influence, or hedonistic pleasure. To attain its goals, a rakshasa will ruin, injure, or kill anyone in its path.

Masters of Misdirection:
A rakshasa conceals its true form and adopts whatever guise serves it best. Typically, it masquerades as a noble or a wealthy merchant, using money and clever lies to manipulate other creatures into doing its bidding. Rakshasas serve as villains and masterminds; they rarely face enemies unless they want to and unless backup plans are ready should an encounter go awry. Rakshasas prefer misdirection over combat, and they use their powers of illusion to turn potential adversaries against each other. When a rakshasa can’t avoid battle, it becomes a fierce and ruthless foe. A rakshasa uses illusion to distract and deflect enemies, wearing them down and then striking when its foes are weakest.
“I can see your nightmares and present them to your eyes. I can also show you your heart’s deepest desires, or rip your throat out with my claws. And you think to toy with me?”

—Ashatra, rakshasa mage

Rakshasa Warrior
Medium natural humanoid

Perception +16
Low-light vision

STANDARD ACTIONS

1️⃣ Longsword (weapon) ✫ At-Will
   Attack: Melee 1 (one creature); +20 vs. AC. The rakshasa makes two attack rolls and uses either result.
   Hit: 2d8 + 7 damage, and the rakshasa marks the target until the end of the rakshasa’s next turn.

2️⃣ Claw ✫ At-Will
   Attack: Melee 1 (one creature); +20 vs. AC
   Hit: 2d6 + 6 damage, and ongoing 10 damage (save ends).

MINOR ACTIONS

Deceptive Veil (illusion) ✫ At-Will
   Effect: The rakshasa disguises itself to appear as a Medium humanoid until it uses deceptive veil again or until it drops to 0 hit points. Other creatures can make a DC 35 Insight check to discern that the form is an illusion.

Illusory Ambush (illusion) ✫ Encounter
   Effect: The rakshasa becomes invisible, and an illusion of it appears in its square. The transition is indiscernible to observers, and the illusion lasts until the start of the rakshasa’s next turn or until a creature attacks the illusion. After the illusion appears, the rakshasa shifts up to its speed.

TRIGGERED ACTIONS

Tiger Pounce (teleportation) ✫ At-Will
   Trigger: An enemy marked by and within 5 squares of the rakshasa shifts or makes an attack that does not include it as a target.
   Effect (Immediate Reaction): The rakshasa teleports up to its speed and uses claw against the triggering enemy. If claw hits, the target also falls prone.

Str 20 (+12)  Dex 18 (+11)  Wis 18 (+11)
Con 14 (+9)  Int 12 (+8)  Cha 14 (+9)

Alignment evil  Languages Common
Equipment scale armor, heavy shield, longsword
A Life of Luxury: Most rakshasas love luxury and vice. For this reason, they often impersonate nobles, royalty, and other wealthy individuals. One of a rakshasa’s favorite tactics is to infiltrate a noble house under the guise of a servant or a distant relative. Under this facade, the rakshasa studies the noble in charge of the house before eventually killing and replacing him or her. A rakshasa’s self-indulgence is perhaps its one true weakness. A rakshasa will often blindly endanger itself in the pursuit of new pleasures.

Once a rakshasa has acquired a position of wealth and influence, it ruthlessly maintains that position. It disposes of anyone who threatens to reveal its identity, even if it must leave a trail of bodies in its wake. This fierce defense of one’s status and wealth makes larger groups of rakshasas unable to work closely together. A single community rarely has enough wealth to satiate the desires of more than a few rakshasas. When rakshasas work together, the size of a group rarely exceeds three, for larger numbers inevitably lead to violent infighting.
Reincarnation: Upon its death, a rakshasa is immediately reincarnated, retaining all the memories and knowledge of its former lives. This trait is perhaps the main source of a rakshasa’s cunning. A rakshasa has lifetimes to learn from its mistakes, and each rakshasa has the cumulative wisdom of a thousand lifetimes, giving it first-hand knowledge of history and the experience from tens of thousands of schemes. During its various incarnations, a rakshasa might learn many languages and skills that it can put to use against its adversaries.

Death is no barrier against a rakshasa taking revenge upon those that wrong it. When a person slays a rakshasa, it’s usually a matter of time before the creature shows up to exact its vengeance. Rakshasas are also linked to a race of immortal beings called devas. Sages believe that rakshasas originate from evil devas who reincarnated in a new form that marked their vice and wickedness. Over time, the number of rakshasas has grown as more and more devas have succumbed to temptation. Few rakshasas ever seek the redemption necessary to reincarnate as a deva once more.

**Standard Actions**

1. **Claw (teleportation)** ✦ At-Will
   - **Attack:** Melee 1 (one creature); +21 vs. AC
   - **Hit:** 3d6 + 10 damage, and the rakshasa teleports the target up to 3 squares.
   - **Miss:** The rakshasa can teleport the target 1 square.

2. **Misleading Visions (illusion, psychic)** ✦ At-Will
   - **Attack:** Area burst 1 within 5 (enemies in the burst); +19 vs. Will
   - **Hit:** 2d10 + 11 psychic damage, and the rakshasa slides the target up to 4 squares.
   - **Miss:** The rakshasa can slide the target 1 square.

3. **Visions of Terror (fear, illusion, psychic)** ✦ Recharge ✦ 1
   - **Attack:** Area burst 1 within 5 (enemies in the burst); +19 vs. Will
   - **Hit:** 3d10 + 13 psychic damage, and the target is immobilized (save ends).
   - **Miss:** Half damage, and the target is slowed until the end of the rakshasa’s next turn.

**Minor Actions**

1. **Deceptive Veil (illusion)** ✦ At-Will
   - **Effect:** The rakshasa disguises itself to appear as a Medium humanoid until it uses deceptive veil again or until it drops to 0 hit points. Other creatures can make a DC 36 Insight check to discern that the form is an illusion.

2. **Persistent Image (illusion)** ✦ At-Will
   - **Effect:** The rakshasa creates an illusion of a Medium or smaller object or creature in an unoccupied square within 10 squares of it. The illusion can be animate, but it does not produce noise. The illusion lasts until the end of the rakshasa’s next turn. A creature that succeeds on a DC 22 Insight check can see through the illusion.
   - **Sustain Minor:** The illusion persists until the end of the rakshasa’s next turn, and the rakshasa can move the illusion up to 6 squares.

**Roper**

Ravenous ropers jut up from the ground or hang from cavern ceilings. They look like stalagmites or stalactites until prey draws near, at which point they lash out with tentacles and pull quarry toward their toothy maws.

Ropers are methodical hunters that inhabit caves and passageways that are frequented by smaller creatures. A roper creeps into position and hides itself amid the rock. A roper’s lair is safe only to creatures that have reached an understanding with the resident roper. A roper might have specific tastes, preferring to eat elves or humans over beasts or less civilized humanoids. When a roper kills a creature that has valuables, it devours the treasure, which it keeps inside its gizzard to help with digestion.
Deal Makers: Ropers might look like brainless beasts, but they’re fairly intelligent and frequently make agreements with other creatures that live near them. These arrangements are usually truces between ropers and other underground denizens. For example, rather than fight a roper and lose numbers to it, a drow patrol might agree to bring a roper a prisoner or treasure as payment for passage. Canny Underdark creatures use the presence of ropers to thin the numbers in a group of intruders. A creature might lure a party into a cavern of ropers and then attack anyone a roper doesn’t grab. Ropers have long life spans, so a deal with a roper might extend for several generations—as long as each side continues to honor the agreement. A humanoid community might be required to pay a seasonal or yearly tribute to appease a roper.

Slow to Act, Quick to Kill: Since ropers live in a dormant state most of the time, they don’t share the voracious appetite that leads many dungeon monsters to attack anything they see. A roper waits until the time is right—until the perfect victim wanders by. It might wait for large traveling parties to pass, looking for a smaller group or a lone traveler. Once it does strike, the roper drags enemies toward its maw to devour them quickly. When facing a group, it hopes that seeing the grisly fate of the first victim will cause the others to retreat.

Living Treasure Troves: Adventurers and treasure hunters seek out ropers because of the wealth of gems and magic trinkets stored within the creatures’ gizzards. Tales of roper treasure troves usually neglect to mention that a roper acquires such valuables over many generations of slaying travelers and adventurers. Thus, it’s common for a towns-person or explorer to underestimate the power of a roper when he or she sets out to kill one. A roper sometimes regurgitates a few gems onto the floor near its hiding spot. It waits patiently, sometimes for

weeks, until a foolhardy humanoid comes along, notices the gems, and bends over to recover the treasures.

**Born in the Elemental Chaos:** Although ropers are found throughout the caves and tunnels of the world, they hail from the Elemental Chaos. There, they cluster into huge colonies. Creatures inhabiting the Elemental Chaos are wary of a migrating earthmote called the Spired Hell, where hundreds of ropers live. When this earthmote crashes into another piece of land, ropers spread out across the new landscape. After stripping the area of living creatures, they return to the Spired Hell and hibernate until they crash into a new destination.

**They Share Memories:** A roper reproduces asexually and passes on all its memories to its offspring. As a result, a roper that has lived in one cave for its entire life can remember distant lands, and even other planes. If a roper is bribed

**Traits**

**Tentacle Release**

Before a creature makes an attack roll against the roper, it can choose to target one of the roper’s tentacles. The tentacles use the same defenses as the roper. If the attack hits, it does not deal damage or otherwise affect the roper, but one of the roper’s grabs end (of the attacker’s choice).

**Stony Body**

The roper can retract its tentacles and closes its eye and mouth to resembles a natural rock formation. While the roper is on a horizontal rock surface, a creature must succeed at a DC 28 Perception check to see through the roper’s disguise.

**Standard Actions**

1. **Tentacle ✦ At-Will**

   *Requirement:* The roper must have fewer than two creatures grabbed.
   *Attack:* Melee 10 (one creature); +15 vs. Reflex
   *Hit:* 2d8 + 9 damage, and the roper grabs the target (escape DC 20). Until the grab ends, the target is weakened.

2. **Double Attack ✦ At-Will**

   *Effect:* The roper uses tentacle twice.

3. **Bite ✦ At-Will**

   *Attack:* Melee 1 (one creature grabbed by the roper); +17 vs. AC
   *Hit:* 4d12 + 12 damage.
   *Miss:* Half damage.

**Minor Actions**

4. **Reel ✦ At-Will (1/round)**

   *Attack:* Melee 10 (each creature grabbed by the roper); +17 vs. Fortitude
   *Hit:* The roper pulls the target up to 5 squares.

with treasure or a delectable living creature, it might reveal information or secrets from its ancient memories. A story that every roper knows (yet few will share) tells of the ropers’ creation. The tale claims that the first ropers sloughed off from the rocky flesh of the primordial Vezzuvu, the Burning Mountain. At first, the ropers were fast and hot, like lava, but eventually they cooled and became the creatures they are today. Ropers believe that one day Vezzuvu will return and reignite them and call upon them to serve as his forces against the gods.

“It looks like a cursed stalagmite! It has no right to be this terrifying!”

—Last words of Agroth of the Winterbole
Rust Monster

Rust monsters are the bane of underground societies and subterranean adventurers. Their appetite for metals leads them to attack travelers and destroy magic items.

The ecology and habits of a rust monster have made the creatures a pestilence upon civilizations that rely upon metal. A rust monster’s saliva and the substance it excretes from its carapace are highly corrosive and can break down metals quickly through rapid oxidation. These liquids are harmless to flesh but cause metal to corrode upon contact. The chemical is so powerful that some races work to harvest it for the removal of degraded metal in dilapidated structures. The difficulty in harvesting a rust monster’s excretions makes a single vial of the substance rare and valuable.

Metal Eaters: A rust monster’s diet consists primarily of metal. Refined metals, especially iron, steel, gold, silver, and platinum, are its favorite source of nutrients. For this reason, a rust monster will attack travelers and adventurers laden with armor, weapons, and magic items. In the absence of refined metal, a rust monster consumes raw ore, leading it to inhabit mines and old ore refineries.

A rust monster is an unintelligent beast that acts on instinct alone; it pursues a source of metal if it has even a small chance of acquiring food and escaping alive. The availability of food has an effect on the number of offspring that a pair of rust monsters can produce. In areas where metal is abundant, rust monsters can produce swarms of young, while in areas where food is sparse, they might have only a few offspring. A rust monster infestation can quickly become unmanageable, potentially wiping out a settlement. For this reason, people act quickly to eliminate rust monster nests.
Scourge of Civilization: Rust monsters typically dwell underground and gravitate toward mines, so dwarves, duergar, and other subterranean cultures consider them a pestilence on civilization. A rust monster might feed on mining equipment, metal support beams, or mine cart rails, disrupting operations and potentially causing the death of those working there. A group of rust monsters might devour the support beams for a dam holding back an underground lake. In the worst case, a locustlike swarm of rust monsters could wash over a subterranean city and, in a matter of hours, leave nothing behind but rubble and death.

Although a single rust monster is a minimal threat, once they grow numerous, only magic is likely to halt their advance. Some civilizations develop complex warding rituals to keep rust monsters away, but these magical defenses are expensive to perform, and rust monsters have a knack for finding ways through the wards. Some dwarven settlements have warning systems that allow clerics and spellcasters time to perform a defensive ritual before rust monsters overwhelm a town’s defenses. When the early warning systems are disrupted, though, it can mean disaster for a settlement that relies only on magic wards.

### Rust Monster

**Medium natural beast**

- **XP 250**
- **HP 66; Bloodied 33**
- **Initiative +10**
- **AC 20, Fortitude 16, Reflex 21, Will 17**
- **Perception +5**
- **Speed 8 Low-light vision**

### Traits

**Rusting Defense**

Whenever an attack using a metal weapon hits the rust monster, the weapon used in the attack is rusting until the end of the encounter. While the weapon is rusting, attacks with the weapon take a –1 penalty to attack rolls. If the weapon used to attack the rust monster is already rusting, the penalty to attack rolls worsens by 1 (to a maximum penalty of –5).

### Standard Actions

**Bite ✦ At-Will**

*Attack:* Melee 1 (one creature); +11 vs. AC

*Hit:* 2d8 + 5 damage. If the target is wearing heavy armor, the armor is rusting until the end of the encounter. While the armor is rusting, the target takes a –1 penalty to AC. If the target is wearing armor that is already rusting, increase the penalty to AC by 1 (to a maximum penalty of –5).

*Effect:* The rust monster shifts 1 square.

**Devour Metal ✦ Recharge if the power misses**

*Attack:* Melee 1 (one creature wearing or wielding a rusting item); +9 vs. Reflex

*Hit:* The rusting item is destroyed. If the item was magical, residuum worth the item’s market value can be retrieved from the rust monster after the creature is slain.

Residuum Sources: Although most humanoids regard rust monsters as a plague, the creatures do offer a boon to anyone who manages to slay them. A rust monster often consumes magic items, and as it devours the metals of an object, its body stores deposits of *residuum* created by the decomposition of the item. *Residuum*, the valuable substance used in magic item creation, is prized by merchants and smiths, who hire specialized hunting parties to collect the material. Devious malcontents sometimes surreptitiously unleash rust monsters in armories or magic vaults and then offer to exterminate the creatures in exchange for the *residuum* stored in the monsters’ bellies.

“The problem with fighting a rust monster is that every time you think you have an opening and swing your sword, it raises its feelers eagerly, like you’re handing it a snack.”  
—Tennaris of Silver Spire
Necromancy grants violent motion to these fleshless bones, letting them defy death and deliver it to others.

It is said that the history of a life is written in bone. The fall from a tree in youth, the kick of a horse in middle age, a trip upon the stairs in the late years of life—all make their marks upon bone. These scars are whispers of the past that echo quietly after death. Few parts of a person’s life speak when all that remains is a barren skeleton. No memory or dream lingers in the empty shell of a skull. No hint of the joy or sorrow can be seen upon the grimacing teeth. For a few skeletons, though, death doesn’t mean decay and ruin. These wordless forms might not speak, but their actions bear a clear message: They come to deliver death.

Symbol of Death: Even inanimate skeletons have the power to inspire fear. Bones are important pieces of life. They are an unseen part of the body that supports and sustains life. When bones appear, they are associated with death.

An animate skeleton provokes greater fear than ordinary bones can. These undead are twisted mockeries that lack everything that makes life worthwhile—sentience, emotion, pleasure. The walking dead know only how to obey.
“Nothing holds them together but magic, a necromantic binding that knits bone with scraps of soul and the merest hint of will.”

—Kalarel, scion of Orcus
Mindless Horrors: A skeleton has no desires, passions, or goals. It knows neither good or evil. A skeleton’s creation is considered a vile act, though, for it requires disturbing a creature’s bones in the most profane way. A skeleton raised into undeath moves through the power of a soul’s discarded animus; it is a primal force that binds the soul and body to make life possible. Without an animus, a skeleton cannot exist.

A skeleton might bear scars from its former life—a broken rib, a cracked femur, a missing hand. Some skeletons don the artifacts with which they were laid to rest out of an echo of memory or a vestige of habit. To an onlooker, these relics might be striking or horrifying. To a skeleton, though, the objects are meaningless like everything else in the world.

Driven by Another’s Will: A skeleton does not want anything; a person or force is always responsible for a skeleton’s actions. Many powers can cause a skeleton to rise from the grave: holy power, necrotic energy, a dark ritual, a necromantic spell or hex, a curse from the lips of a dying person. A skeleton that is animated and given little direction might wait in torpor for centuries, collecting moss or gradually growing brittle. A skeleton set to turn the winch of a bridge might crank it long after the bridge has fallen into disrepair. A skeleton commanded to slay all it encounters might wander a forest for decades. A group of skeletons set to guard a dwarven tomb might lack the wherewithal to distinguish between a dwarven descendant seeking an ancestral weapon and thieves seeking plunder. When a creature comes along to disturb a skeleton, the undead acts according to the exact instructions of its master or animate force, sometimes even blindly contradicting the true intent of the orders.

Deadly Servants: Skeletons are usually found in the service of one who requires faultless followers or remorseless killers. A spellcaster might employ skeletons for manual labor and menial tasks, but more often than not, they are used in battle or as guardians. Many continue to follow their final orders even after a master dies, though some skeletons have also been known to go berserk, behave erratically, or collapse into piles of bones after a master’s death.

Skeletons do not always serve spellcasters; they might have various functions in a society. A noble family might ride through a city in a carriage drawn by skeletal horses, reveling in the fright of onlookers. A pirate captain could employ a skeleton crew so that none of the booty need be shared. Or, a group of assassins might command skeletons to kill a person publicly while the group’s members remain safely in the shadows.

STIRGE

Size is no concern for stirges. Swarms of these flying menaces can drain a large creature of blood in minutes. In their wake, stirges leave withered bags of skin and bones—food for any scavengers that dare to approach.

Few can forget the dreadful drone of stirge wings; the distinct sound of their dual wings flapping in time joins a cacophony of other stirge wings, creating a buzz that drowns out all other noises. With elements of lizard, bat, crab, and mosquito, a stirge might be comical if not for its feeding habits. A stirge hovers on four membranous wings, which support the creature as it searches for warm-blooded quarry. When a stirge spots prey, it flies up close and clamps onto the creature with four clawed limbs. The stirge then plunges its pointed proboscis into the victim's body, draining the victim of blood. When the creature has had its fill, it lifts its bloated body aloft and seeks a safe place to digest.

Hunters in Darkness: Like bats, stirges dwell in darkness. Caves, dungeons, hollow trees, cellars, sewers, and crypts make excellent places for stirges to sleep. Possessed of preternatural sight, stirges hunt in the darkest hours and the blackest places. On the surface of the world, a stirge swarm is a nocturnal threat, but in the confines of caves, there is no escape.

Widespread Threat: Stirges prefer to feast on creatures of halfling to horse size, so they live wherever people or herd animals dwell. They are a constant threat to humanoids, and each race has a strategy for dealing with the pests. The creatures sometimes hide in ships or caravans like rats, so merchants have developed repellents that are unpleasant to the creatures. Swarms of stirges menace halfling boat villages as they pass through swamps and down rivers, so halflings erect great nets and wicker lattices to protect them. Stirges also dwell in the sewers of human cities. They boil up at night, requiring residents to secure their doors and shutters as if as a hurricane were coming through. Elves resort

**Speed**: 2, fly 6

**Initiative**: +9

**Perception**: +7

**Darkvision**

**Traits**

**Nimble Bloodsucker**

While the stirge has a creature grabbed, the stirge gains a +2 bonus to AC and Reflex.

**Standard Actions**

0

**Bite ✦ At-Will**

*Attack*: Melee 1 (one creature); +10 vs. AC. While the stirge has a creature grabbed, it can use bite only against that creature, and it hits automatically.

*Hit*: 5 damage, and the stirge grabs the target (escape DC 15). Until the target is no longer grabbed by any suckerlings, it takes damage at the start of its turn equal to the number of stirge suckerlings grabbing it. The target takes this damage only once each turn, regardless of how many suckerlings are grabbing it.

...
to setting fire to trees in which stirges nest. Dwarves, on the other hand, send out heavily armored extermination teams who cut the stirges to bits after luring them into a trap.

**Other Stirge Threats:** A stirge makes little distinction between horse or human, bear or basilisk. Blood draws it like a moth to flame. A stirge is dangerous for more than its lethal ability to drain blood, though. A survivor of a stirge attack might contract a strange illness as a result of the diseased blood the stirge transmits from another creature it has feasted upon.

Despite the dangers of stirges, some creatures value them for the very qualities that make others fear them. Kobolds capture stirges to use them in clever traps where cages containing stirges are dropped on foes. Practitioners of dark magic capture stirges and train them to retrieve blood for foul rituals. Necromancers trap stirges in the cavernous bodies of giant undead. When the undead opens its maw, famished stirges come pouring out to attack the nearest warm-blooded creature.

**Death Husk Stirge**

Small natural animate (undead) XP 250

- **HP:** 71; Bloodied 35
- **AC:** 20, Fortitude 16, Reflex 20, Will 18
- **Speed:** 2, fly 6
- **Immune:** poison; **Resist:** 10 necrotic

**Traits**

- **Necromantic Flyer**

A death husk stirge that takes radiant damage cannot fly until the end of its next turn; if in the air, it falls.

**Standard Actions**

- **Bite** ✦ At-Will
  
  **Attack:** Melee 1 (one creature); +11 vs. AC
  
  **Hit:** 2d6 + 7 damage, and the death husk stirge recharges *rotted blood*.

- **Rotted Blood** (necrotic) ✦ Encounter

  **Attack:** Close blast 3 (living creatures in the blast); +9 vs. Fortitude

  **Hit:** 1d6 + 7 necrotic damage, and the target is blinded until the end of the stirge’s next turn.

  **Effect:** Undead in the blast can shift 2 squares as a free action.

**Move Actions**

- **Nimble Wing** ✦ At-Will

  **Effect:** The death husk stirge flies 4 squares. This movement does not provoke opportunity attacks.

**Triggered Actions**

- **Necrotic Miasma** (necrotic) ✦ At-Will

  **Trigger:** The death husk stirge drops to 0 hit points.

  **Attack (No Action):** Close burst 2 (living creatures in the burst); +9 vs. Fortitude

  **Hit:** 5 necrotic damage, and the target is weakened until the end of its next turn.

TIEFLING

Hellish power courses through the veins of tieflings—power they can use for great good, or for terrible evil.

Tieflings have a dark reputation as a result of their sinister past and uncertain future. They now live every day with the sins of their ancestors written across their faces.

A Hellish History: Long ago, the human empire of Bael Turath stood on the brink of chaos. To preserve the empire, its ruling class signed blood pacts with devils. Their compacts transformed the empire and the humans’ bodies. Eventually, both infernal forces and the tieflings of Bael Turath would break their bargain, and the result would leave the empire in ruins.

Making Bad Choices: Despite their appearance, tieflings have as much freedom to set the course of their lives as humans do. Nonetheless, tieflings are still a target of prejudice and suspicion. Many tieflings eventually grow tired of fighting their reputation and choose to embrace it.

**Treant**

A few great trees of the forest harbor the hearts of mighty fey. These titanic treants violently protect the wild, giving little regard to the consequences for civilized races.

Some parts of the forest seem more alive. The flowers grow bright even in deep shadows. The insects drone louder. Wind sways the high branches, causing the constant rustle of leaves. In these parts of the forest dwell the treants, living trees that are always alert for the enemies of nature.

**Wild at Heart:**
A treant meditates through the cycle of seasons, often remaining dormant for decades or centuries before awakening when nature has need. During these periods of dormancy, a treant’s roots entwine with a network of plants, and its branches serve as homes for animals. While a treant sleeps, it dreams of the world around it, remaining cognizant of the happiness or sorrow of the living things in the forest.

The thoughts of a treant flow as swiftly as those of humanoids, and its emotions run just as deep. A treant is passionate about the forest but cares little for the lives of any who live beyond the forest. The death of a humanoid is to a treant as the death of a tree is to a person. A whole city might erupt in flames, but the treant spares thought only for the danger to the wilderness surrounding the city.
Civilization’s Enemies: A treant sees the wilderness much like humans view their villages and towns; while people struggle to expand the light of civilization, a treant works to halt its growth and sometimes even to expunge it. A treant prefers nature in its purest and most untamed form, and many oppose even natural changes to its state such as fire, storm, or flood.

Their staunch opposition to civilization puts treants at odds with many societies. Unfortunately for their foes, treants are like nature’s siege engines. A single crushing blow from one of these titans of the forest can crumple a person’s body. Treants recognize their strength, and they expect little opposition once they have turned their thoughts toward destruction. Only terrible fire or a great number of foes can give pause to a group of treants.

Ally to Many, Friend to None: As a fey and a defender of the wild, a treant might ally with elves, eladrin, dryads, and other nature-loving fey. The connection between treants and elves or eladrin is related more to their mutually long lives than to any sympathy between them. Although some elves and eladrin have formed strong bonds with treants through decades of diplomacy, most regard treants warily, knowing that the tree creatures regard their civilizations in the same way they do other humanoid settlements.

A treant allies with any creature that respects its values and opposes its enemies. A treant might guard the lair of an orc tribe, so long as that tribe

#### Traits

- **Bramble Branches ✦ Aura 2**
  - Enemies treat squares within the aura as difficult terrain.

- **Wooden Body**
  - Whenever the treant takes fire damage, it also takes ongoing 5 fire damage (save ends).

#### Standard Actions

- **✦ Slam ✦ At-Will**
  - **Attack:** Melee 2 (one creature); +15 vs. AC
  - **Hit:** 1d12 + 12 damage.
  - **Effect:** The treant marks the target until the end of the treant’s next turn.

- **✦ Throw Stone ✦ At-Will**
  - **Attack:** Ranged 20 (one creature); +15 vs. AC
  - **Hit:** 2d6 + 7 damage.

#### Triggered Actions

- **✦ Entangling Branch ✦ At-Will**
  - **Trigger:** An enemy within 2 squares of the treant moves.
  - **Attack (Immediate Interrupt):** Melee 2 (triggering enemy); +13 vs. Reflex
  - **Hit:** The treant grabs the target (escape DC 18).

#### Stats

- **Str 21 (+10)**
- **Dex 14 (+7)**
- **Wis 22 (+11)**
- **Con 20 (+10)**
- **Int 14 (+7)**
- **Cha 12 (+6)**

- **Alignment:** unaligned
- **Languages:** Elven
focuses its destruction outside the wilderness. Dryads and other plant creatures are treants’ most frequent allies. A dryad and a treant share the same disposition and feelings about the forest, and their close proximity often leads the creatures to develop a symbiotic relationship. A follower of Melora can also find common cause with treants, so the tree creatures are sometimes found acting as oracles or leaders for Melora’s druids or guarding locations sacred to the goddess.

A treant’s allies should be careful to avoid doing anything a treant might perceive as betrayal. Like dryads, a treant is swift to anger and difficult to placate. It holds grudges long after the grandchildren of the offender have come and gone. A human who wrongs a treant might doom generations of unrelated humans to death in that treant’s forest. A treant’s bark might grow to conceal its scars, but the wood beneath the bark never forgets.

Troglodyte

Foul-smelling creatures that dwell in the shallow depths of the Underdark, troglodytes are violent, primitive monsters that use force to take what they want.

Considered by many to be the most loathsome of all humanoids, troglodytes are degenerate reptile folk whose subterranean homes are warrens of filth and disease. Troglodytes are characterized by their foul stench and their primitive ways. They possess enough intelligence to speak and make weapons, and they are even more animalistic and barbaric than orcs and gnolls. A troglodyte is governed by instinct and primitive desires; it lacks the rational thought to resolve disputes through diplomacy. The vile reptile creatures take advantage of unwary travelers, eating the people and taking their valuables. Even a seasoned warrior or explorer might run afoul of troglodytes. As a result of such conflicts, a troglodyte lair becomes littered with trophies from kills, the value of which troglodytes remain oblivious of.

Loathsome Primitives: A troglodyte tribe consists of about thirty members. The creatures are xenophobic and war with other troglodyte tribes to guard their territory. Sometimes a conflict between multiple troglodyte warrens spills onto the surface of the world with deadly repercussions. In these cases, the troglodytes might forget about fighting each other and instead turn their attention to new prey. The other races of the Underdark have concluded that reasoning with troglodytes is impossible, so they enslave the creatures and force them to do their bidding. A troglodyte’s penchant for wanton violence makes it difficult to control. Slave masters must remain vigilant lest the troglodyte
slaves turn against them or resort to killing each other. Drow and duergar use troglodyte slaves as fodder in battles or as tools for devastating smaller enemy settlements.

**Servants of Torog:** Troglodytes worship many dark entities, the most prominent of which is Torog, the King that Crawls. Torog is the god of torture and imprisonment, and he dwells in the deepest reaches of the Underdark. The troglodytes’ primitive religion calls for them to make sacrifices to Torog in order to earn the god’s favor. Because Torog feeds on agony and torture, subjects of troglodyte sacrifices usually endure hours of torment before death comes. Sacrifices are often conducted in the deepest chambers of a lair. These rooms contain unhatched troglodyte eggs that await the blessing of the King that Crawls. A troglodyte tribe rarely conducts a raid for the sole purpose of collecting victims for sacrifice. When a tribe lacks for captives, though, a group gathers to go to the surface to drag back the weakest and most vulnerable individuals it can find.
Raiders from the Underdark: Food and other resources are frequently scarce in the Underdark because of heavy competition between subterranean races. These shortages drive troglodytes to launch raids on surface settlements. These raids are swift and straightforward; troglodytes lack the capacity for trickery or cunning plans. The most shrewdness a tribe exhibits is attacking outlying farms and homes in order to draw out a settlement’s defenders, which can then be more easily slaughtered. Otherwise, a troglodyte raiding party distinguishes only between strong settlements and weak settlements. A troglodyte tribe might pillage a small, undefended village to revel in violence, but it will risk an attack on a larger settlement only out of greed for plunder. Troglodytes rarely attack towns or cities, because they tend to have more organized defenses. Occasionally a group of troglodytes emerges into a city through a sewer or a cellar. This advantage can lead troglodytes to launch nighttime raids even in well-fortified locations. Troglodytes rarely take captives, and they don’t leave them alive for long. Anyone taken back to a troglodyte warren is either devoured or sacrificed to Torog within a matter of hours or days. A rescuer wishing to find a victim alive must act quickly after a troglodyte raid.

TROLL

The ultimate survivors, trolls can regenerate mortal wounds and regrow lost limbs. They are ugly, stupid creatures, always searching for their next meal.

After securing a lair, a troll spends its days hunting and eating anything edible that lives nearby. A troll is well suited for its lifestyle: Its long, strong arms are perfect for ripping off limbs, its jaws are massive enough to devour large hunks of flesh and bone, and its personality is cruel enough to enjoy every second of the process. Trolls know they have a reputation. People fear them, and trolls are glad to satisfy expectations. A troll believes that a victim paralyzed with terror tastes better, so it seeks out a weak-willed target long before it resorts to hunting a brave foe.

Trolls are notoriously stupid. A smart troll can barely outwit a normal human. Even a small child might be able to trick a troll. Of course, once a troll realizes it has been fooled, it will find the culprit and rip the creature apart. Conversing with a troll is an exercise in futility and frustration (and it requires a person to convince the troll not to eat him or her at first sight). Aside from recalling preferences in what it likes to eat, a troll can remember very little. At best, a troll might be able to recite a couple of short songs or a few phrases as taunts, even if they don’t entirely make sense.

**Troll**

Large natural humanoid

**Level 9 Brute**

XP 400

HP 120; Bloodied 60

AC 21, Fortitude 22, Reflex 18, Will 18

Speed 8

**Traits**

- **Regeneration**
  - The troll regains 5 hit points whenever it starts its turn and has at least 1 hit point. When the troll takes fire or acid damage, its regeneration does not function on its next turn.

- **Troll Healing** (healing)
  - Whenever an attack that doesn’t deal acid or fire damage reduces the troll to 0 hit points, the troll does not die and instead falls unconscious until the start of its next turn, when it returns to life with 15 hit points. If an attack hits the troll and deals any acid or fire damage while the troll is unconscious, it does not return to life in this way.

```
Slain by Fire or Acid: Troll flesh regrows at an alarming rate. Only burning a troll with fire or acid can keep the creature down. Anyone familiar with trolls carries a torch when traveling through their lands. When rumors spread that a troll has moved near a settlement, people sometimes leave torches burning on stakes near their doors. Most trolls aren’t afraid of fire, though, so the torches just inform a troll that its soon-to-be victims are inside.

Lairs in the Wild: A troll lair is usually a grimy cave or an abandoned building overgrown with vegetation. Trolls prefer cozy lairs, so they pile up leaves, bones, and other filth to make beds. A troll cave can sometimes be located by searching for vultures circling above its lair. Trolls that are fearful of fire and acid might live on islands in foggy lakes, under bridges, or in places where water is accessible. Because trolls are resilient, they can live almost anywhere, from caves in the icy north of the Frostfell to abandoned dwellings in murky swamps.

—I don’t care about light. The reason I always carry a burning torch? Trolls.” —Harbek of Hammerfast
Bladerager Troll

TRAINS
Regeneration
The troll regains 5 hit points whenever it starts its turn and has at least 1 hit point. When the troll takes fire or acid damage, its regeneration does not function on its next turn.

STANDARD ACTIONS

Claw ✦ At-Will
Attack: Melee 2 (one creature); +17 vs. AC
Hit: 3d10 + 9 damage. If the attack bloodies the target, the troll regains the use of bladerager rend.

Bladerager Rend ✦ Encounter
Attack: Melee 2 (one creature); +17 vs. AC
Hit: 4d10 + 5 damage, and ongoing 10 damage (save ends).
Miss: Half damage, and ongoing 5 damage (save ends).

TRIGGERED ACTIONS

Death Burst
Trigger: The troll drops to 0 hit points.
Attack (No Action): Close burst 2 (creatures in the burst); +15 vs. Reflex
Hit: 4d6 + 7 damage.
Effect: The troll is destroyed.

Alignment chaotic evil
Languages Common, Giant

The Rank and File: Villains, tyrants, and criminals recruit trolls into their gangs or armies, using the creatures for their muscle, toughness, and ability to inspire fear. Trolls don’t always follow orders, though, so they can be undependable thugs and soldiers. Until a battle starts, they’re undisciplined and reckless. Once a battle begins, a troll gleefully rips through foes, paying little heed to commands or directions. A troll soldier is content to be paid with a little gold and a lot of food, and it uses whatever gear it is provided with. Heavily armored battle trolls are a mainstay of large armies that fight for evil causes.

Fodder for Experiments: Sinister spellcasters capture trolls in order to tinker with their miraculous healing abilities. These experiments might be aimed at perfecting eternal life, creating the perfect soldier, or fulfilling a sadistic urge. As a result of these profane experiments, many varieties of trolls exist. These creatures, warped in mind and body, fight under the command of the foul spellcasters who spawned them. A bladerager troll, for example, is the result of a ritual that attaches blades and armor plates permanently to the body of a troll. The process typically drives the creature insane, making it even more violent and deadly than a normal troll. When a bladerager troll dies and the magic binding the blades and plates ends, shrapnel hurtles outward, skewering those who managed to slay the creature.
### Ghost Troll Render
Large natural humanoid (undead) XP 800

- **HP**: 161; Bloodied 80
- **AC**: 25, Fortitude 27, Reflex 24, Will 23
- **Speed**: fly 7 (hover); phasing
- **Immune**: disease, poison

### Traits
- **Insubstantial**: The ghost troll takes half damage from all attacks, except those that deal force damage. When it takes acid, fire, or radiant damage, it loses this trait until the start of its next turn.

  - **First Failed Saving Throw**: The target is knocked unconscious instead of slowed (save ends). If the target takes damage, the effect also ends.
**Umber Hulk**

Horrors from the deepest Underdark caverns, umber hulks burrow through the earth in search of prey. When one bursts into a surface realm, its claws rend flesh and its gaze sows chaos among its victims.

Umber hulks are deadly predators that lurk in the dark spaces of the world. With their strange second set of eyes, they confuse, disorient, and madden, leaving creatures defenseless against their claws, which are strong enough to rip through stone.

**Burrowing Beasts:** An umber hulk uses its tough claws to cut through solid stone. It steadily scoops away rock as easily as a humanoid might shovel snow. As the creature swiftly digs, it hurls crumbling boulders behind it, creating tunnels just large enough to allow its hardened body to pass through.

Burrowing takes a lot of energy, so an umber hulk must eat often to replenish its strength. Although digging through solid stone is a loud and slow process, an umber hulk usually has a purpose or direction in its travels. In most cases, the creature burrows to create connections between existing tunnels. With its tremorsense, an umber hulk might detect an open space in nearby bedrock and then tunnel to discover what lies beyond.

**Standard Actions**

**Claw ✦ At-Will**

*Requirement*: The umber hulk must not have a creature grabbed.

*Attack*: Melee 2 (one creature); +17 vs. AC

*Hit*: 3d6 + 10 damage.

**Double Attack ✦ At-Will**

*Effect*: The umber hulk uses claw twice. If both attacks hit the same target, the umber hulk grabs the target (escape DC 20).

**Rending Claws ✦ At-Will**

*Effect*: Melee 2 (one creature grabbed by the umber hulk). The target takes 40 damage.

**Minor Actions**

**Confusing Gaze ✦ At-Will** *(1/round)*

*Attack*: Close blast 5 (creatures in the blast); +15 vs. Will

*Hit*: The umber hulk slides the target up to 5 squares, and the target is dazed until the end of the umber hulk’s next turn.

**Alignment**: unaligned

**Languages**: –
Creators of Subterranean Passages: Through their tunnels, umber hulks string together caverns and dungeons into local networks of caves. While a purple worm might create a great highway between the grand caverns of the Underdark, umber hulks make the back streets and alleys.

The tunnels that an umber hulk creates are large enough for a creature smaller than it to walk comfortably, but creatures of equal size must squeeze, and creatures larger than the umber hulk cannot fit at all. Drow, duergar, and illithids use trained umber hulks to dig tunnels for them, although they must employ slaves to expand the tunnels to a more comfortable size.

Although an umber hulk leaves behind a passage when it burrows, the tunnel is not necessarily safe or easy to traverse. Debris sometimes chokes the path. An umber hulk has little need to clear or stabilize the tunnel, after all, since it can simply dig itself out.

“Two big bug eyes, two little eyes that can almost make you think there’s a brain behind those huge mandibles—it’s confusing just to look at the thing. Never mind whatever magic lets it dig into your mind like its claws dig through rock.”

—Elior of Harkenwold

**Ambushers Through Stone:** Umber hulks are on a constant search for prey or carrion. Gifted with neither stealth or speed, an umber hulk uses its tremor-sense to ambush prey. The monster first finds a road or well-trod passage and then digs a tunnel that comes to within a few feet of the opening. When the umber hulk detects movement through the wall or floor, it bursts through the remaining stone and attacks. By the time a surprised creature reacts, it often finds its body gripped in the monster’s enormous claws.

Wild umber hulks do not distinguish between natural stone and that of buildings. They are just as likely to explode into a dungeon chamber as to appear out of the darkness of a cave. Umber hulk incursions into dwarven settlements and the sewers of human cities present a dire threat to those communities.

**Unnerving Eyes:** An umber hulk possesses two pairs of eyes: a set of small, black ones and a set of large, faceted ones. The large eyes are the source of an umber hulk’s dangerous gaze. Depending on the variety of an umber hulk, its gaze might confound a foe, drive an enemy to attack its allies, or assault a creature’s psyche. The magical power of an umber hulk’s eyes cuts away at a creature’s sanity as easily as the monster’s claws sever flesh.

- **Alignment:** unaligned  
  - **Languages:** –
Awakened to an endless night, a vampire lusts for the life it lost and sates that hunger by drinking the blood of the living. In their dark and decadent dreams, they live in luxury, ruling over kingdoms of mortals who exist to satisfy their most sinister appetites.

Kings and queens of undeath, vampires rule the night. Some are fiends driven only by their lust for blood. These simple spawn are easily dispatched by those with skill. Other vampires are true lords of darkness, mighty creatures that have achieved a semblance of immortality and have come to control legions of vampires and other undead.

“There’s something so pure about a vampire’s evil, so perfect in its utter corruption. . . .”

Cloaked in Superstition: Vampires are the subject of many superstitions. Garlic and holy symbols are supposed to repel them. Tales say they cannot cross running water or pass the threshold of a house uninvited. Vampires might even be the source of such falsehoods, though it’s likely that fear of the creatures propagates the rumors. Ultimately, few things can protect a person from a vampire other than a sturdy weapon or a powerful implement.
Only a couple of the superstitions about vampires are true: Vampires abhor sunlight, and they cast no shadows or reflections. Not surprisingly, any vampire that wishes to move unnoticed among the living tends to remain in poorly lit areas where mirrors and other reflective surfaces are absent.

**Born from Death:** Anyone who survives an attack from a vampire might fall prey to the vampire’s curse, entering into a deep, deathlike sleep. A person under this curse is often assumed dead and ushered through funeral rites. When that person awakes at the next sunset, he or she is a vampire. If confined within a coffin, this vampire might already be buried or could be awaiting burial in a temple or a family member’s home. Most vampires awaken as slavering spawn, but a few retain enough of themselves to emerge from death as true vampires.

Although a vampire might retain memories of its life, most of the emotional attachments are gone, replaced by the insatiable hunger for warm blood. Only the strongest bonds remain, and often they are negative emotions, such as hate or desire for revenge. Once-pure feelings become twisted by undeath: Love transforms into hungry obsession, and friendship becomes bitter jealousy.
Some sages whisper of rituals that can stop the transformation and awaken a person under the vampire's curse. If the transformation cannot be stopped in this way, then the only way to stop a person from becoming a vampire is to burn or dismember the body. This puts a vampire hunter in the awkward position of slaying a helpless innocent to prevent him or her from becoming a vile creature.

**Chained to the Grave:** Every vampire remains bound to its coffin, crypt, or grave site, requiring that the vampire rest there every day. Unlike most living humanoids, though, vampires must rest during daylight hours. If a vampire did not receive a formal burial, it must lie under a foot or so of earth at the place of its transition to undeath (a cave or a dungeon chamber beneath the earth also suffices). A vampire can move its place of burial or set up multiple places of burial by transporting a significant amount of grave dirt or a large coffin pieces to another location, where a similar resting place can be crafted.
A vampire that fails to find rest each day struggles to maintain its strength and sanity. As days without rest go by, a vampire goes mad with hunger for blood, eventually coming to desire the blood of its former race above anything else. Its feeding becomes a strange, externalized self-destruction. A vampire crazed by such bloodlust cannot heal damage to its body until it rests.

**VAMPIRE**
Wraith

Bereft of life and soul, the intangible wraith feels nothing except loss, hate, and wrath.

When a person dies and his or her spirit departs, the animus can remain, clinging to a vestige of life. The animus can become a wraith, an insubstantial creature that emerges amid the vanishing memories of a person’s life; it becomes trapped in an endless afterlife, tortured by remembered sensations and driven mad by a hunger to reclaim the life it once had.

**Life’s Castaways:** Life consists of three parts: body, spirit, and will. Without will, the body ceases to function and the spirit leaves. Sages call the will the animus, and they regard it as the shadow of the soul. When a body dies or a spirit departs, sometimes the animus remains in the world. Without the spirit, though, the animus has no purpose, and it runs amok. Like many undead, a wraith is the result of an unfettered animus.

</table>

**Traits**

**Insubstantial**

The wraith takes half damage from all attacks, except those that deal force damage. Whenever the wraith takes radiant damage, it loses this trait until the start of its next turn.

**Spawn Wraith**

When the wraith kills a humanoid, that humanoid becomes a wraith figment at the start of this wraith’s next turn. The new wraith appears in the space where the humanoid died or in the nearest unoccupied square, and it rolls a new initiative check. The new wraith acts under the Dungeon Master’s control.

**Standard Actions**

**1 Shadow Touch** (necrotic) ✦ At-Will

*Attack:* Melee 1 (one creature); +8 vs. Reflex

*Hit:* 2d6 + 6 necrotic damage, or 4d6 + 14 necrotic damage if the wraith was invisible to the target when it attacked.

**Triggered Actions**

**Shadow Glide** (teleportation) ✦ At-Will

*Trigger:* An attack that does not deal force or radiant damage hits the wraith.

*Effect (Free Action):* The wraith becomes invisible until it hits or misses with an attack or until the end of the encounter. The wraith teleports up to 6 squares and cannot attack until the end of its next turn.

**Skills** Stealth +11

| Str 4 (-1) | Dex 18 (+6) | Wis 10 (+2) |
| Con 17 (+5) | Int 6 (+0)  | Cha 15 (+4) |

**Alignment** chaotic evil  **Languages** Common
When a wraith slays a living humanoid, another wraith emerges from that person’s body within a few minutes, or within a few seconds in areas of intense necrotic energy. Even when powerful magic returns a person to life, his or her wraith remains. A restored cadaver regains its soul and heals fatal wounds, but rather than it regaining its former animus, a new one forms to close the gap between body and spirit. A wraith is consumed by the blackest hate for its twin, and it goes to great lengths to murder the person carrying the new animus.

**Bereft of Body:**
Without the intermediary of the body, wraiths experience the world as if through a veil of shadow. Although everything has some weight and substance, nothing feels solid, and everything is cold. Colors appear dim, and light is hazy. Nearby sounds seem to come from a great distance away. A wraith can remember the taste and smell of things, but it can no longer experience the physical sensations.

As intangible creatures, wraiths can move through solid objects as easily as a corporeal creature might move through fog. A newly formed wraith might initially avoid passing through walls or doors, recalling them to be solid. As these memories fade, a wraith takes to using its power to pass through barriers in order to find and kill living creatures out of a hunger for the life it lost.

**Haunted by the Past:** Soulless undead, such as wraiths, retain memories of their previous loves, passions, and interests, but these are dim echoes of the life experiences. Even the strongest emotions from a wraith’s life become little more than faint feelings. A wraith might pause to stare at something that fascinated it once, or it might curb its wrath in acknowledgment of a past friendship. Such actions are rare, though. Instead, recognition of something from its past usually provokes mindless fury. The wraith of a caring husband might, for example, deliberately seek out its former wife to exact blind vengeance without ever comprehending why it is angry.
Without a soul, a wraith lacks any true sense of honor, morality, or reason. When it awakens and realizes that all it has lost is now beyond its grasp, a madness sets in, and the wraith slays any around its body. This action does nothing to abate a wraith’s anger and usually incites the creature further. The souls of the people a wraith slays rarely tarry, leaving a wraith more alone than before and causing the creature only more anguish at its circumstance.

**Many Hateful Forms**: Although wraiths do not resemble their former bodies, they still vary widely in form. Some wraiths are shreds of their former selves, harrowing reminders of the horrors of death. Other wraiths gibber insanely, driven mad by their inability to comprehend their situation. A wraith might recall its ambition or leadership in life, acting as commander over a cadre of wraiths. Regardless of its kind, though, a wraith rarely possesses the mental faculties or the charisma to formulate long-term plots. Instead, a wraith is usually content to haunt an area where it can exact revenge on the living, bowing only to the might of powerful undead and necromancers.

**Traits**

- **Mad Whispers** (psychic) ✦ Aura 3
  Any enemy that ends its turn in the aura takes 5 psychic damage, and the wraith slides it up to 2 squares.

- **Insubstantial**
  The wraith takes half damage from all attacks, except those that deal force damage. Whenever the wraith takes radiant damage, it loses this trait until the start of its next turn.

- **Spawn Wraith**
  When the wraith kills a humanoid, that humanoid becomes a wraith figment at the start of this wraith’s next turn. The new wraith appears in the space where the humanoid died or in the nearest unoccupied square, and it rolls a new initiative check. The new wraith acts under the Dungeon Master’s control.

**Standard Actions**

- **Touch of Madness** (psychic) ✦ At-Will
  
  **Attack**: Melee 1 (one creature); +9 vs. Will
  
  **Hit**: 2d6 + 7 psychic damage, and the target takes a –2 penalty to all defenses (save ends).

- **Touch of Chaos** (charm, psychic) ✦ Recharge ❇️ ‡‡
  
  **Attack**: Melee 1 (one creature); +9 vs. Will
  
  **Hit**: 2d6 + 7 psychic damage, and the wraith slides the target up to 5 squares. The target must then use a free action to make a basic attack against its nearest ally.
  
  **Miss**: Half damage, and the wraith slides the target up to 2 squares.

YUAN-TI

Whether they walk on two legs or slither on a scaled tail, the snake-headed yuan-ti plot dominion over all. Their sibilant whispers lurk behind many vile plots and dire calamities, though few discover their machinations until it’s too late.

Those who know of this sinister and secretive race of serpentine creatures rarely speak their name above a whisper. The reptilian humanoids seem to come writhing out of myth and bedtime stories. Although rarely seen, yuan-ti have been ubiquitous for generations, their secret existence a nightmarish reality since the end of the Dawn War.

World Domination: When the gods were in the midst of creating the creatures of the world, Zehir found he could not craft his own creature, so he decided to steal one. He appealed to Avandra to teach him how to change the creations of others. At first Avandra refused, but through his silver tongue, Zehir convinced her. Despite being enamored of Zehir, Avandra did attach a condition to his power of alteration: He could change a creature only with its creator’s permission. Zehir saw only one way to have his will: to kill humanity’s creator so that no one existed to deny him the permission he required.

After the Dawn War ended and the other gods had exhausted much of their strength, Zehir remained strong and vigilant for his opportunity. When the time came, he murdered the now-forgotten creator of humans and laid claim to
the race as his own. Under his powers of alteration, countless humans were transformed into members of a serpentine race that became known as yuan-ti. For a time, the other immortals could do nothing to halt the progress of these creatures as they formed the great yuan-ti empire of Zannad. Eventually, when the other gods had regained their strength, they forced Zehir to relinquish control of the human race. The gods squabbled over who should have power over humanity, and in the end, nothing was decided, for the contest continues today. As a result, humans have the potential to be both the most corruptible and most devout of any race.

During the time of the empire, yuan-ti lorded over human servants and monstrous slaves, living as royalty. Over time, those who suffered under the yuan-ti united and worked to divide and defeat their former masters. These rebellions led to the first human empires and an end to Zannad. Since then, yuan-ti have schemed to regain their former glory, and they have come close many times. Yuan-ti orchestrate the actions of cultists of Zehir, subtly shifting events in their favor. In a few places, such as the Zahnshahan, the Slithering City, yuan-ti rule openly as in the days of old. For now, these serpentine city-states treat neighbors as friends and allies, at least until the neighboring regions are sufficiently weakened by yuan-ti plots.

“Perhaps we once were human, as you say. But what does it matter? Zehir has made us so much more.”

—Vastrana, yuan-ti malison

Poisonous Plots: Yuan-ti learn well from the lessons of past failures. They are patient, hatching plots that extend for generations. They plan multiple contingencies, so that when one avenue to power becomes blocked, another opens up. Many people of good intention receive encouragement and rewards from yuan-ti or those who serve yuan-ti. A yuan-ti tries to influence people not through force or fear but through the promise of wealth, fame, or helping others. Yuan-ti direct the actions of those who attract their interest, employing more subtlety than mind flayers and more cunning than drow.

Vile Acts and Cruelty: As subtle and cunning as yuan-ti are, they sometimes employ openly evil tactics. A cult of Zehir might infiltrate a city under the guise of a beneficial organization or an elite secret society. Members of the cult, called snaketongue cultists, might be of any humanoid race. They gain serpentine traits and special powers in return for loyalty. Proving one’s loyalty usually requires a person to commit a heinous act, such as murder, kidnapping, enslavement, or extortion. Members of the cult perform rituals that force a physical transformation upon a victim. The snaketongue cultists convince a victim that he or she has no option but to serve the yuan-ti, now that the individual is marked by Zehir.

ZOMBIE

These mindless, shambling corpses murder anyone not swift enough to get away.

From somewhere in the darkness comes a thump and a scuffle. As the noise comes again, drawing closer, a gurgling moan can be heard—the rattling wheeze of rotten lungs pressing air out. A form lurches into view, dragging one foot as it raises bloated arms and broken hands like a child seeking an embrace. This creature is a zombie, and it blindly seeks to crush life.

Many Hideous Forms: Fueled by dark magic, malevolent forces, dire curses, or angry spirits, zombies are animate corpses. Any corpse with flesh suffices to make a zombie. It might be a dead warrior from a battlefield, distended from days in the sun, guts trailing from a mortal wound. It might be a muddy cadaver of a woman recently buried and risen again, leaving maggots and worms in her wake. A zombie could wash ashore or rise from a marsh, swollen and reeking from weeks in the water. A zombie could instead appear alive, crafted from a recently deceased corpse.

A zombie need not be the size of a normal humanoid, or even humanoid in form. When a necromancer or a natural phenomenon causes a corpse to rise, the corpse could belong to the smallest beast or the largest giant. When a zombie plague infects a city, any size or kind of creature can be affected—horses, dogs, children, cats—anything that has a pulse.
Shadows of Life: Zombies possess a semblance of life. Sludgelike blood trickles through their veins, and cold, rank breath gusts from their lungs. And yet death has rendered zombies immune to pain, disease, and poison. Although their lungs spasm and stomachs churn, they need not breathe, eat, or sleep. Undeath has given them the power to see in darkness—even without eyes—and the necrotic energy that fuels the creatures makes them tireless.

Zombies do not require food, but some are driven by a hunger for the flesh of the living. These zombies consume their victims while remaining heedless of their struggles and screams. A zombie feasts on a body until another living meal comes along or until the chill of death settles over a body. Some zombies hunger for a particular part of the body, such as the heart or the brain, but such peculiar obsessions are usually the byproduct of a zombie’s creator.

“Now zombies, they still have flesh and sinew to hold them in one piece, more or less. It makes them so much more . . . persistent.”

—Kalarel, scion of Orcus
Soulless, Fearless, and Stupid: For a zombie to be animated, a body’s soul must have departed. What remains in the corpse is an animus, a vital spark that drives the body without thought or conscience. Without a soul or memories, a zombie has no more humanity or intelligence than a simple animal. As a result, it also lacks a sense of self-preservation. Unless a zombie is properly commanded, a zombie might beat at the door of a home while its residents escape out a nearby window. Despite a zombie’s stupidity, the creature remains a dangerous foe due to its resilience. A zombie might step off a ledge to reach a foe and in so doing break its legs. Instead of ceasing its pursuit, though, the zombie will drag its broken legs behind it as it claws toward its target. Another zombie might walk right through a fire and become ignited in flames as it attacks a foe.

A Terrifying Plague: In most cases, a zombie serves its creator or rises in response to the defilement of a sacred location. At rare times, zombies arise in the hundreds. These zombie plagues are provoked by cosmic, magical, or divine events. A zombie plague might be the result of an angry god, a magical experiment gone wrong, a powerful ritual, or a falling star. When the event occurs, the bodies of the dead claw out of their graves and attack the living. Anyone who dies as a result of such an assault soon becomes a zombie after acquiring the disease or curse that the zombies carry. These terrifying plagues can consume an entire civilization if left unchecked.

Large natural beast (mount) XP 100

HP 36; Bloodied 18
AC 13, Fortitude 15, Reflex 13, Will 10
Speed 10

Initiative +1
Perception +5

AC 13, Fortitude 15, Reflex 13, Will 10

Charger (mount)
The horse’s rider gains a +3 bonus to damage rolls on charge attacks.

Kick ✦ At-Will
Attack: Melee 1 (one creature); +6 vs. AC
Hit: 2d6 + 4 damage.

Trample ✦ Encounter
Effect: The horse moves up to its speed and can move through enemies’ spaces during the move.
Each time the horse enters an enemy’s space for the first time during the move, it makes the following attack against that enemy.
Attack: Melee 0; +4 vs. Reflex
Hit: 2d8 + 4 damage, and the enemy falls prone.

“Sure, you’ll strike terror into your enemies’ hearts if you ride a manticore or a dire wolf into battle. But a horse is the most likely to carry you back off the battlefield.”

—Oakley, knight of Therund
Hyena

**War Hyena**

*Level 8 Minion Soldier*

Medium natural beast

XP 88

**Stats**

- **HP:** 1; a missed attack never damages a minion.
- **AC:** 24, Fortitude 21, Reflex 20, Will 19
- **Speed:** 8

**Traits**

- Harrier ✦ Aura 1
  - Any enemy in the aura grants combat advantage.

**Standard Actions**

- **Bite ✦ At-Will**
  - Attack: Melee 1 (one creature); +13 vs. AC
  - Hit: 8 damage.

**Triggered Actions**

- **Savage Response ✦ At-Will**
  - **Trigger:** An enemy adjacent to the hyena makes an attack that doesn’t include it as a target.
  - **Effect (Immediate Reaction):** The hyena uses **bite** against the triggering enemy.

**Stats**

- **Str:** 20 (+9)
- **Dex:** 17 (+7)
- **Wis:** 15 (+6)
- **Con:** 16 (+7)
- **Int:** 2 (+0)
- **Cha:** 5 (+1)

**Alignment:** unaligned

**Languages:** –

Rat

**Dire Rat**

*Level 1 Brute*

Small natural beast

XP 100

**Stats**

- **HP:** 38; Bloodied 19
- **AC:** 13, Fortitude 13, Reflex 11, Will 9
- **Speed:** 6, climb 3

**Standard Actions**

- **Bite (disease) ✦ At-Will**
  - Attack: Melee 1 (one creature); +6 vs. AC
  - Hit: 1d10 + 5 damage. At the end of the encounter, the target makes a saving throw. On a failure, the target contracts dire rat filth fever (stage 1).

**Stats**

- **Str:** 14 (+2)
- **Dex:** 15 (+2)
- **Wis:** 10 (+0)
- **Con:** 18 (+4)
- **Int:** 2 (-4)
- **Cha:** 6 (-2)

**Alignment:** unaligned

**Languages:** –

**Dire Rat Filth Fever**

*Level 1 Disease*

*Those infected by this disease waste away as they alternately suffer chills and hot flashes.*

**Stage 0:** The target recovers from the disease.

**Stage 1:** While affected by stage 1, the target loses a healing surge.

**Stage 2:** While affected by stage 2, the target loses a healing surge. The target also takes a –2 penalty to AC, Fortitude, and Reflex.

**Stage 3:** While affected by stage 3, the target loses all healing surges and cannot regain hit points. The target also takes a –2 penalty to AC, Fortitude, and Reflex.

**Check:** At the end of each extended rest, the target makes an Endurance check if it is at stage 1 or 2.

- **7 or Lower:** The stage of the disease increases by 1.
- **8-11:** No change.
- **12 or Higher:** The stage of the disease decreases by 1.
Scurrying Rat Swarm
Medium natural beast (swarm) XP 100

HP 27; Bloodied 13

**Alignment** unaligned **Languages** –
This glossary defines some of the game terms used in this book, as well as terms related to them. The material here assumes you’re familiar with the basic rules of the game.

aberrant [origin]: Aberrant creatures are native to or shaped by the Far Realm.

acid [keyword]: A damage type. See also damage type.

air [keyword]: An air creature is strongly connected to the element of air.

angel [keyword]: Angels are immortal creatures native to the Astral Sea. They don’t need to breathe, eat, or sleep.

animate [type]: Animate creatures are given life through magic. They don’t need to breathe, eat, or sleep.

aquatic [keyword]: Aquatic creatures can breathe underwater. In aquatic combat, an aquatic creature gains a +2 bonus to attack rolls against nonaquatic creatures.

beast [type]: Beasts are either ordinary animals or creatures akin to them. They behave instinctively.

blind [keyword]: A blind creature relies on special senses, such as blindsight or tremorsense, to see within a specified range, beyond which the creature can’t see. The creature is immune to gaze attacks and cannot be blinded.

blinded [condition]: While a creature is blinded, it can’t see, which means its targets have total concealment against it, and it takes a -10 penalty to Perception checks. It also grants combat advantage and can’t flank.

blindsight: A creature that has blindsight can clearly see creatures or objects within a specified range and within line of effect, even if they are invisible or in obscured squares. The creature otherwise relies on its normal vision.

blocking terrain: A type of terrain that blocks squares, often by filling them. Examples: Walls, doors, and large pillars. Blocking terrain provides cover, interferes with movement around it, and blocks line of effect. It also blocks line of sight, unless it’s transparent.

burrow speed: A creature that has a burrow speed can move through loose earth at a specified speed, and the creature can move through solid stone at half that speed. The creature can’t shift or charge while burrowing.

charm [keyword]: An effect type. A charm power controls a creature’s actions in some way. This control is often represented by the creature being forced to attack its ally or being subjected to the dominated condition.

climb speed: A creature that has a climb speed moves on vertical surfaces at that speed without making Athletics checks to climb. While climbing, the creature ignores difficult terrain, and climbing doesn’t cause it to grant combat advantage.
clumsy: Some creatures are clumsy while using a specific movement mode (noted next to that mode in the creature’s “Speed” entry), and others are clumsy while on the ground (noted next to the creature’s speed). While a creature is clumsy, it takes a –4 penalty to attack rolls and all defenses.

cold [keyword]: A damage type. A creature that has this keyword is strongly connected to cold. See also damage type.

construct [keyword]: Constructs are not living creatures, so effects that specifically target living creatures do not work against them. They don’t need to breathe, eat, or sleep.

damage type: Many attacks deal a specific type of damage. Each damage type has a keyword associated with it. If a power has such a keyword, the power deals that type of damage (the exception is poison, the keyword for which refers to damage, a nondamaging effect, or both).

darkvision: A creature that has darkvision can see in dim light and darkness without penalty. This means the creature ignores the –2 penalty to attack rolls when it attacks a target that has partial concealment as a result of dim light and the –5 penalty to attack rolls when it attacks a target that has total concealment as a result of darkness.

dazed [condition]: While a creature is dazed, it doesn’t get its normal complement of actions on its turn; it can take either a standard, a move, or a minor action. The creature can still take free actions, but it can’t take immediate or opportunity actions. It also grants combat advantage and can’t flank.

deafened [condition]: While a creature is deafened, it can’t hear, and it takes a –10 penalty to Perception checks.

demon [keyword]: Demons are chaotic evil elemental creatures native to the Abyss. They don’t need to sleep.

devil [keyword]: Devils are evil immortal creatures native to the Nine Hells. They don’t need to sleep.

disease [keyword]: Some powers expose a creature to a disease. If a creature is exposed to a disease one or more times during an encounter, it makes one saving throw at the end of the encounter to determine if it contracts that disease. If the saving throw fails, the creature is infected.

dominated [condition]: While a creature is dominated, it can’t take actions. Instead, the dominator chooses a single action for the creature to take on the creature’s turn: a standard, a move, a minor, or a free action. The only powers and other game features that the dominator can make the creature use are ones that can be used at will, such as at-will powers. For example, anything that is limited to being used only once per encounter or once per day does not qualify. In spite of this condition, the creature’s allies remain its allies, and its enemies, its enemies.

In addition, a dominated creature grants combat advantage and can’t flank.
dying [condition]: A dying creature is unconscious and must make death saving throws. Monsters normally die when they drop to 0 hit points, so they suffer this condition only in exceptional situations.

dragon [keyword]: Dragons are reptilian creatures. Most of them have wings as well as a breath weapon.

earth [keyword]: An earth creature is strongly connected to earth.

earth walk: A type of terrain walk. A creature that has earth walk ignores difficult terrain that is rubble, uneven stone, or an earthen construction.

elemental [origin]: Elemental creatures are native to the Elemental Chaos.

extra damage: Many powers and other effects grant the ability to deal extra damage. Extra damage is always in addition to other damage. This means an attack that deals no damage, such as the wizard power sleep, can't deal extra damage.

fear [keyword]: An effect type. A fear power inspires fright. This fright is often represented by a creature being forced to move, taking a penalty to attack rolls, or granting combat advantage.

fey [origin]: Fey creatures are native to the Feywild.

fire [keyword]: A damage type. A creature that has this keyword is strongly connected to fire. See also damage type.

fly speed: A creature that has a fly speed can fly a number of squares up to that speed as a move action. If it is stunned or knocked prone while flying, it falls. See also “Flying” in the Rules Compendium.

force [keyword]: A damage type. See also damage type.

forest walk: A type of terrain walk. A creature that has forest walk ignores difficult terrain that is part of a tree, underbrush, or some other forest growth.

gaze [keyword]: A kind of attack. Blind or blinded creatures are immune to gaze attacks, and a creature cannot make a gaze attack while blinded.

giant [keyword]: Giants are Large or larger humanoid creatures that trace their origin back to the primordials and the Elemental Chaos.

grabbed [condition]: While a creature is grabbed, it is immobilized. Maintaining this condition on the creature occupies whatever appendage, object, or effect the grabber used to initiate the grab. This condition ends immediately on the creature if the grabber is subjected to an effect that prevents it from taking actions, or if the creature ends up outside the range of the grabbing power or effect.

half damage: When a power or another effect deals half damage, apply all modifiers to the damage, including resistances and vulnerabilities, and then divide the damage in half.

healing [keyword]: An effect type. A healing power restores hit points, usually either by restoring hit points immediately or by granting regeneration.
**heavily obscured**: A measure of visibility. A creature has total concealment when it is in a heavily obscured square, although it has only partial concealment against an enemy adjacent to it. *Examples*: Heavy fog, smoke, or foliage. Contrast with **lightly obscured** and **totally obscured**.

**helpless [condition]**: While a creature is helpless, it grants combat advantage and can be the target of a coup de grace.

**hidden**: When a creature is hidden from an enemy, the creature is silent and invisible to that enemy. A creature normally uses the Stealth skill to become hidden. See also **invisible**.

**hindering terrain**: A type of terrain that hinders creatures, usually by damaging them. *Examples*: Pits, lava, and deep water. A creature can make a saving throw when it is pulled, pushed, slid, or teleported into hindering terrain. See also **teleportation**.

**homunculus [keyword]**: Homunculi are animate constructs tasked with guarding a creature, an area, or an object.

**hover**: If a creature can hover, it can remain in the air if it is stunned. See also **fly speed**.

**humanoid [type]**: Humanoid creatures vary greatly in how much they resemble humans. Most are bipedal.

**ice walk**: A type of terrain walk. A creature that has ice walk ignores difficult terrain that is ice or snow.

**illusion [keyword]**: An effect type. An illusion power deceives the mind or the senses. Illusions often obstruct vision or redirect attacks. If an illusion power deals damage, the damage itself is not an illusion.

**immobilized [condition]**: When a creature is immobilized, it can’t move, unless it teleports or is pulled, pushed, or slid.

**immortal [origin]**: Immortal creatures are native to the Astral Sea. Unless they are killed, they live forever.

**implement [keyword]**: An accessory type. This keyword identifies a power that can be used through an implement. A monster’s statistics block notes the implements it uses.

**insubstantial**: When a creature is insubstantial, it takes half damage from any damage source, including ongoing damage. See also **half damage**.

**invisible**: If a creature is invisible, it has several advantages against creatures that can’t see it: It has total concealment against them, it doesn’t provoke opportunity attacks from them, and they grant combat advantage to it.

**lightly obscured**: A measure of visibility. A creature has partial concealment when it is in a lightly obscured square. *Examples*: Dim light, foliage, fog, smoke, and heavy rain or falling snow. Contrast with **heavily obscured** and **totally obscured**.
lightning [keyword]: A damage type. See also damage type.

living construct [keyword]: Unlike other constructs, living constructs are living creatures.

low-light vision: A creature that has low-light vision can see in dim light without penalty. This means the creature ignores the –2 penalty to attack rolls when it attacks a target that has partial concealment as a result of dim light.

magical beast [type]: Magical beasts resemble beasts but often behave like people.

marked [condition]: When a creature marks a target, it takes a –2 penalty to attack rolls for any attack that doesn’t include the marking creature as a target. A creature can be subjected to only one mark at a time, and a new mark supersedes an old one. A mark ends immediately when its creator dies or falls unconscious.

minion: A minion is destroyed when it takes any damage. If a minion is missed by an attack that deals damage on a miss, the minion doesn’t take that damage.

mount [keyword]: A creature that has the mount keyword has at least one mount trait or mount power.

natural [origin]: Natural creatures are native to the natural world.

necrotic [keyword]: A damage type. See also damage type.

once per round: Some effects are usable only once per round (sometimes noted as “1/round”). If a creature uses such an effect, it can’t use the effect again until the start of its next turn.

ooze [keyword]: Oozes are amorphous creatures.

petrified [condition]: While a creature is petrified, it is unconscious. In addition, it has resist 20 to all damage and doesn’t age.

phasing: While phasing, a creature ignores difficult terrain and can move through obstacles and other creatures, but it must end its movement in an unoccupied space.

plant [keyword]: Plant creatures are composed of vegetable matter. They don’t need to sleep.

poison [keyword]: A damage and effect type. A poison power delivers a nondamaging poisonous effect, deals poison damage, or both. See also damage type.

polymorph [keyword]: An effect type. Polymorph powers change a creature’s physical form in some way.

One Polymorph at a Time: If a creature is affected by more than one polymorph power, only the most recent one has any effect. The other powers’ effects remain on the creature and their durations expire as normal, but those effects don’t apply. However, when the most recent effect ends, the next most recent one that is still active applies to the creature. For example, if a hag is under the effect of change shape and a character uses a polymorph
power against the hag, the effect of change shape is suppressed until the character’s polymorph effect ends on the hag.

Changing Size: If a polymorph power reduces a creature’s space, the creature doesn’t provoke opportunity attacks for leaving squares as it shrinks.

If a polymorph effect would make a creature too large to fit in the available space, the effect fails against the creature, but the creature is stunned (save ends).

Death Ends: Polymorph effects end on a creature immediately when it dies.

prone [condition]: When a creature is prone, it is lying down. It takes a -2 penalty to attack rolls, and the only way it can move is by crawling, teleporting, or being pulled, pushed, or slid. In addition, it grants combat advantage to enemies making melee attacks against it, but it gains a +2 bonus to all defenses against ranged attacks from enemies that aren’t adjacent to it.

If a creature is flying when it falls prone, it safely descends a distance equal to its fly speed. If it doesn’t reach a solid surface, it falls.

A creature can end this condition on itself by standing up. A creature can drop prone as a minor action.

This condition can affect limbless creatures, such as fish and snakes, as well as amorphous creatures, such as oozes.

psychic [keyword]: A damage type. See also damage type.

radiant [keyword]: A damage type. See also damage type.

removed from play [condition]: Some effects can temporarily remove a creature from play. While a creature is removed from play, its turns start and end as normal, but it can’t take actions. In addition, it has neither line of sight nor line of effect to anything, and nothing has line of sight or line of effect to it.

reptile [keyword]: Reptiles are cold-blooded creatures that have scaly skin.

restrained [condition]: While a creature is restrained, it can’t move, unless it teleports. It can’t even be pulled, pushed, or slid. It also takes a -2 penalty to attack rolls, and it grants combat advantage.

save: A successful saving throw. A save ends an effect that includes one of the following notations in parentheses: “save ends,” “save ends both,” or “save ends all.”

shadow [origin]: Shadow creatures are native to the Shadowfell.

shapechanger [keyword]: Shapechangers have the ability to alter their form, whether freely or into specific forms.

slowed [condition]: When a creature is slowed, its speed becomes 2 if it was higher than that. This speed applies to all of the creature’s movement modes (walking, flying, and so on), but it does not apply to forced movement against it, teleportation, or any other movement that doesn’t use the creature’s speed. The creature also cannot benefit from bonuses to speed, although it can take actions, such as the run action, that allow it to move farther than its speed.
spider [keyword]: Spider creatures include spiders as well as creatures that have spiderlike features: eight legs, web spinning, and the like.

spider climb: A creature that can spider climb can use its climb speed to move across overhanging horizontal surfaces (such as ceilings) without making Athletics checks. See also climb speed.

stunned [condition]: While a creature is stunned, it can’t take actions. It also grants combat advantage and can’t flank.

surprised [condition]: While a creature is surprised, it can’t take actions. It also grants combat advantage and can’t flank.

swamp walk: A type of terrain walk. A creature that has swamp walk ignores difficult terrain that is mud or shallow water.

swarm [keyword]: A swarm is composed of multiple creatures but functions as a single creature. A swarm can occupy the same space as another creature, and an enemy can enter a swarm’s space, which is difficult terrain. A swarm cannot be pulled, pushed, or slid by melee or ranged attacks.

A swarm can squeeze through any opening large enough for even one of its constituent creatures. For example, a swarm of bats can squeeze through an opening large enough for one of the bats to squeeze through.

swim speed: A creature that has a swim speed moves through water at that speed without making Athletics checks to swim.

telepathy: A creature that has telepathy can communicate mentally with any creature that has a language, even if they don’t share the language. The other creature must be within line of effect and within a specified range. Telepathy allows for two-way communication.

teleportation [keyword]: An effect type. A teleportation power transports creatures or objects instantaneously from one location to another.

threatening reach: A creature that has threatening reach can make an opportunity attack against any enemy within its reach that provokes an opportunity attack.

thunder [keyword]: A damage type. See also damage type.

totally obscured: A measure of visibility. A creature has total concealment when it is in a totally obscured square. Example: Total darkness. Contrast with heavily obscured and lightly obscured.

tremorsense: A creature that has tremorsense can clearly see creatures or objects within a specified range, even if they are invisible, obscured, or outside line of effect, but both they and the creature must be in contact with the ground or the same substance, such as water or a web. The creature otherwise relies on its normal vision.

tunneling: A creature that has tunneling leaves tunnels behind it as it burrows. The creature, as well as smaller creatures, can move through these tunnels without any reduction in speed. Creatures of the same size as the tunneling
creature must squeeze through these tunnels, and larger creatures cannot move through them at all. See also **burrow speed**.

**unconscious** [condition]: While a creature is unconscious, it is helpless, it can’t take actions, and it takes a -5 penalty to all defenses. It also can’t flank and is unaware of its surroundings. When a creature is subjected to this condition, it falls prone, if possible. See also **helpless** and **prone**.

**undead** [keyword]: Undead are not living creatures, so effects that specifically target living creatures don’t work against them. They don’t need to breathe or sleep.

**water** [keyword]: A water creature is strongly connected to water.

**weakened** [condition]: While a creature is weakened, its attacks deal half damage. However, two kinds of damage that it deals are not affected: ongoing damage and damage that isn’t generated by an attack roll. See also **half damage**.

**weapon** [keyword]: An accessory type. This keyword identifies a power that is used with a weapon, which can be an unarmed strike. Monster attacks don’t use proficiency bonuses.

**zone** [keyword]: An effect type. Powers that have the zone keyword create zones, magical areas that last for a round or more.

  - **Fills an Area of Effect**: A zone is created within an area of effect and fills each square in the area that is within line of effect of the origin square.
  - **Unaffected by Attacks and the Environment**: A zone cannot be attacked or physically affected, and terrain and environmental phenomena have no effect on it. For example, a zone that deals fire damage is unaffected by cold damage.
  - **Movable Zones**: If the power used to create a zone allows the zone to be moved, it’s a movable zone. At the end of its creator’s turn, the movable zone ends if it is not within range of at least 1 square of it (using the power’s range) or if the creator doesn’t have line of effect to at least 1 square of it. A zone can’t be moved through blocking terrain.
  - **Overlapping Zones**: If zones overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping zones is subjected to the worst penalty; the penalties are not cumulative. For instance, if a creature is affected by three overlapping zones that each impose a -2 penalty to attack rolls, the creature takes a -2 penalty, not a -6 penalty.
  - **Death Ends**: A zone ends immediately when its creator dies.

## Monsters by Level

Every monster in the book appears on this list, which is sorted alphabetically by level and monster role.

CAIRN OF THE WINTER KING™
A ROLEPLAYING GAME ADVENTURE FOR 4TH-LEVEL CHARACTERS

Matthew Sernett
INTRODUCTION

Cairn of the Winter King™ is a Dungeons & Dragons® adventure for four to six characters of 4th level. To run this adventure as the Dungeon Master, you need the Dungeon Master’s Book and the tokens from the Dungeon Master’s Kit™. (The Rules Compendium™ offers a more extensive treatment of the rules and can be used in place of the Dungeon Master’s Book.) Players need Heroes of the Fallen Lands™ or another book for players that enables them to create characters.

Adventure Background

A half-elf fugitive from justice has come to Fallcrest bearing a powerful item stolen from the Winter King. The half-elf traveled to Fallcrest through the Frostjaw Peaks far to the south. As he traveled through a mountain range during a storm, he took shelter in a frozen cave beneath a pillar of ice filled with skulls—the Cairn of the Winter King. Exploring deep into the cave, he found the ice scepter in the grip of a figure frozen to a throne and encased in ice. He took the scepter and left the cave when the storm cleared. Now a seemingly endless winter has befallen the land in the middle of summer, and the people of Fallcrest and the surrounding lands are desperate.

Adventure Synopsis

The characters arrive in Fallcrest just as another snowstorm begins to fall from the black clouds. Unprepared for the sudden freeze, the people of Fallcrest have gathered together to discuss what to do, and the characters capture their interest as travelers who might have news of a place not consumed by winter. While the characters are talking about the strange weather, a rhythmic and deep chanting resonates between peals of thunder, and it appears to come from the sky. When the characters investigate, they witness a ship filled with undead warriors descending from the clouds. The ship bears a message from the Winter King: Return the ice scepter!

The characters must use the ship to fly to the Cairn of the Winter King and either return his scepter or kill the Winter King. Only then will winter loosen its grip. They can choose to bring the fugitive and the scepter with them, or make the journey without one or both.

The characters must succeed on a skill challenge as they row the sky ship back through the storm or face the first battle at the Cairn in an injured state. They must navigate the dangers of the Winter King’s realm and find their way to his throne room to confront or appease him. If they succeed, they win much treasure and save thousands from a cold and hungry death. If they fail, winter might claim the Nentir Vale forever.
STARTING THE ADVENTURE

When the adventure starts, the characters are assumed to be arriving in the city of Fallcrest in the Nentir Vale. For information about Fallcrest and the Nentir Vale, see the Dungeon Master's Book.

Optionally, you can place the start of this adventure in whatever settlement you like or put Fallcrest wherever you wish in your campaign. “Opening Scene” on page 4 uses names and places in Fallcrest for convenience, but feel free to change any such elements in the ways that suit you. In any event, the adventure doesn’t linger long in the town before sending the characters off to the Cairn of the Winter King.

To start this adventure, you can do the following:
✦ Use one of the following hooks for the characters’ travel to Fallcrest, or use one of your own devising.
✦ Describe and roleplay through the events of the opening scene (page 4).
✦ Continue the adventure with “Aftermath of the Battle,” page 8, or, if the characters leave on the sky ship right after encounter 1, with the skill challenge on page 10.

Hook: Investigate the Iron Circle’s Ties

If the characters just completed the Reavers of Harkenwold adventure from the Dungeon Master’s Kit, they could be traveling to Fallcrest prepared to pretend to be Iron Circle mercenaries. They learned from a letter on an Iron Circle member that the individual and a number of other Iron Circle mercenaries are supposed to go to Fallcrest and meet up with a man named Armos Kamroth to work for him.

QUEST: INVESTIGATE THE IRON CIRCLE’S TIES
4th-Level Minor Quest (175 XP)
The characters complete this quest if they talk with Armos Kamroth and discover what he knows about the Iron Circle: nothing! Armos wanted to hire extra muscle from out of town to break some legs and steal the possessions of debtors, but the current situation has him more interested in hiring the characters as guards for his estate. The Iron Circle intended to turn Armos to its side with blackmail and bribery once some agents gained his trust. The characters have ruined those plans.

Hook: Boat Guards

A friend of the characters and her partners have taken a more lucrative stint of caravan guard duty and can’t make it to their usual summer jobs in Fallcrest as boat guards for the Turnfin clan of halflings. The friend has asked the characters to take over guardianship of the halflings and their goods. The work promises to be relaxed and net them 50 gp each. All they have to do is show up in Fallcrest and greet the halflings’s leader, Barro Turnfin, with their friend’s special handshake. From there on, it should be a month of smooth sailing down the river to new sights and sounds to the south. (Of course, it doesn’t work out that way.)

QUEST: MEET UP WITH THE HALFLINGS
4th-Level Minor Quest (175 XP)
The characters complete this quest if they meet up with the halflings at their camp in Fallcrest. Their leader, Barro Turnfin, has no work for the characters now that winter has frozen much of the river and stalled trade, but he offers to pay each character 150 gp for the job they came out to do if the strange winter weather ends within the month.

Hook: Marriage Proposal

The characters bear happy news for Amara Azaer, a tiefling merchant in Fallcrest. Bellis Ironoak, a merchant of Hammerfast whom she has long pursued, has accepted her proposal for marriage and the joining of their companies. Amara runs House Azaer, a trading company in Fallcrest.

When you read the second passage of read-aloud text in “Opening Scene” on page 4, the warehouse the characters pass on the way to the halfling camp belongs to Amara. She is there arguing with the guards and the people who are cutting up her clients’ goods.

QUEST: AZAER BELLIS’S ANSWER
4th-Level Minor Quest (175 XP)
The characters complete this quest if they let Amara Azaer know Bellis’s answer. It should provide a nice roleplaying moment as Amara worries about her ability to see Bellis Ironoak again. It shocks her out of her anger at the guards and gives her the opportunity to describe the situation in the town from her perspective as someone whose goods have been commandeered.

Hook: Discover the Cause

News of the unnatural winter has traveled quickly, but the weather itself has not yet spread as far as the ironically named Winterhaven, a fortified town about 50 miles to the northwest. Its leader, Lord Padraig, sent the characters into the storm to see if they could bring back news of its cause. He paid them in advance, hoping they would honor their promise once they had information.

QUEST: DISCOVER THE CAUSE
4th-Level Minor Quest (175 XP)
The characters complete this quest if they learn of the Winter King and successfully communicate that information to Lord Padraig.
OPENING SCENE

While the characters were traveling to Fallcrest, snow began to fall in the middle of summer. This turned out to be no freak weather occurrence but a long-term trend. Dark clouds covered the sky, and the snow hasn’t stopped falling. The hardship this is causing people becomes obvious as the characters near Fallcrest. Outlying farms are abandoned, their crops buried in snow and blighted by cold.

When the characters arrive in Fallcrest, read:

Your hopes for hot food and a warm fire seem dashed as you approach Fallcrest. The gate in its high stone walls stands unguarded, and a drift of snow holds open the huge wooden doors. Inside are few signs of life. Businesses and homes stand tightly shuttered, and you spy only a couple thin trails of smoke from nearby chimneys. Even the lord’s castle, barely visible through the gloom and blowing snow, looks dark and lonely on a distant hilltop.

You spot a few dots of ruddy light by the river where a crowd is gathered amid some tents. Plumes of white smoke rise from bonfires to streak across the darkening sky, looking like the claw marks of some behemoth.

Allow the characters to explore the town as they wish. Most of the buildings in the town are currently locked up and abandoned or occupied by suspicious people carefully guarding what little food and fuel for fire they possess. Most of those who stayed have sent a representative to the camp of the Turnfin halflings in response to a call from the Lord Warden. Everyone else has gone to the camp.

Lord Warden Faren Markelhay decided to hold a town meeting at the halflings’ camp so everyone could hear what he and the halflings had to say. If you used one of the hooks that came with this adventure, the characters can learn that the person they are looking for is likely at the Turnfin camp with the other folk from the town.

When the characters go to the tents by the river, read:

As you approach the camp, you pass a warehouse with crates and barrels lying in tumbled heaps outside it. Six humans and a dwarf are dumping their contents into the snow and hacking the containers up. Food appears to be the only exception. They take the food back inside through doors flanked by members of the Fallcrest Guard. One of the guards sees you looking and nods his head toward the camp. His message is clear: Move along.

When the characters continue on, read:

Unprepared for the sudden winter, the citizens are running out of coal and wood for fires, and tempers are high. Lord Warden Faren Markelhay has brought the people together to explain his plan to take all food and keep it under guard for rationing while teams of people cut up furniture and other objects for firewood. The Lord Warden is earnest in his desires to help his people, but many consider his efforts draconian.

The Turnfin halflings are a clan of river-traveling shippers who come up the Nentir River to Fallcrest at this time of year to collect goods before traveling south again. They have brought news that the lands to the south are no better off. Their journey through the Witchlight Fens—which often has its perils—was made eerily easy by the stillness brought by the cold. They had to contend with the freezing water, though, and had to break ice to make their way to the light of Fallcrest’s civilization. Barro Turnfin, leader of the Turnfin clan, says as much when several of the Lord Warden’s people raise him on their shoulders.

Roleplay the characters’ interactions with the citizens and the Lord Warden. The characters’ words are of great interest to the people because they are travelers and might know a land not blighted by the unnatural cold. As such, those gathered push the characters to the center to stand by the Lord Warden so that everyone can hear what they say. The characters’ report likely confirms what most people fear: The winter is widespread and has been for weeks.

Although normally the people follow their Lord Warden’s orders without much complaint, the dire nature of the town’s predicament is causing unrest. Things could get ugly. Use the following statements from some of the citizens of Fallcrest as inspiration for roleplaying with the players.

USING THIS ADVENTURE

As with any published adventure, Cairn of the Winter King might not be perfectly suited to your group and the world in which you set it. Make any changes you need to make your game more fun.

Some of the encounters use the poster map provided in this product. For the others you can use D&D Dungeon Tiles, or draw their maps out on a blank battle grid.
Faren Markelhay, Human Lord Warden of Fallcrest: “You’ve heard from Barro Turnfin! The lands downriver are in winter too! Rationing is the only way. We will outlast this. Strange weather has come and gone in the past. This too shall pass!”

Armos Kamroth, Human Landowner and Secret Cleric of Tiamat: “Let each person take care of himself! Until this is over we should be with our families, not standing about the freezing cold and starving ourselves. First we chop up trade goods. Will we cut up our houses for firewood next?”

Barstomun Strongbeard, Dwarf Leader of the Porters’ Guild: “You’ve got more than you need, Armos! If you don’t want to share, maybe we should help ourselves!”

Amara Azaer, Tiefling Merchant and Operator of House Azaer: “Armos is right! You’ll pay every copper for my property, Lord Warden, or . . . or . . .”

Bors Hungren, Human Farmer: “Or you’ll what, tiefling? What will you do to the Lord Warden? What will you do to the man who is trying to feed my family? You forget that the people who put food on your table—the farmers—are the ones worst hit by this storm.”

Rag Vannar, Human Farmer: “You merchants worry over a few crates? A few contracts broken? I’ve lost everything! My whole crop is dead! Now I’m just trying to keep my family alive, and the Lord Warden has a plan to do it.”

Lannar Thistleton, Halfling Owner of the Fallcrest Stables: “When will it be over? It’s been snowing for over a week, and it’s getting worse. We should pack up what we can and head north!”

Armos Kamroth, Human Landowner and Secret Cleric of Tiamat: “Fool of a halfling! When has the winter ever been made better by heading north? Perhaps we should all head into the Winterbole Forest and camp on Lake Wintermist. I’m sure the Tigerclaw barbarians will welcome us with open arms!”

Grundelmar, Dwarf Priest of Pelor: “Pelor is the god of arms!” I’m sure the Tigerclaw barbarians will welcome us with open heads into the Winterbole Forest and camp on Lake Wintermist.

Dirina Mornbrow, Human Priest of Erathis: “Nonsense! Erathis is our city’s patron god! We have taken the safety of our lands for granted. We must make sacrifices to Erathis!”

At some point, small groups start forming in the crowd. Some of the farmers start murmuring together, joined a moment later by porters and other less well-off citizens. Merchants cluster around Armos Kamroth, worriedly discussing their future. The Turnfin halflings start winding their way through the crowds toward their tents, and the guards look about nervously with hands on their weapons.

Have the characters make an Insight check (a character can aid another character if he or she wishes) and let them know the following about the groups based upon how high their check result was.

General Crowd (DC 10): Most of the citizens are conflicted. They want to obey their lord, but they’re all worrying about what they’ll have to give up.

Guards (DC 10): The guards are getting nervous. A few of them are downright twitchy, putting hands to sword hilts whenever anyone in the crowd shouts.

Turnfin Halflings (DC 10): The Turnfins sense danger in the crowd and are retreating to their tents. Some are keeping hands close to weapons.

Farmers (DC 14): The farmers look pretty desperate. They’re inclined to support the Lord Warden and are looking for a way to do that.

Merchants (DC 14): The merchants are worried, and Armos is telling them what they want to hear. They’re getting worked up to defend their possessions but are worried about opposing the Lord Warden.

Porters and Others (DC 21): The strong-looking porters have made a silent alliance with some shifty-looking halflings and humans. They’re fanning out through the crowd and occasionally whispering into ears while the dwarf who shouted at Armos talks to the farmer who shouted at the tiefling. It looks like they’re trying to start a riot.

While this is unfolding, ominous thunder begins to roll in the darkening sky, and the snow begins to fall more heavily. Allow the characters to do what they like with the information their Insight check gains. They might try to counter the ill will in the crowd toward the merchants or try to calm everyone down. Perhaps they point out the ne’er-do-wells to the guards or warn the Lord Warden.

Read “War Chant from the Sky,” below. During whatever drama unfolds, introduce this element at a dramatically appropriate moment.

**War Chant from the Sky**

When things start to become tense or a fight breaks out, have the characters least involved in the hullabaloo make Perception checks.

Perception Check (DC 14): A character who fails this check can barely discern frightened shouting from a few members on the edge of the crowd.

If a character succeeds on this check, he or she hears the shouting but also something more ominous. Between peals of thunder, a deep and rhythmic chanting reverberates through the area. The sound is similar to that a crew might make when rowing a ship—and it seems to be coming not from the river but from above!

This revelation should cause the characters to look around. Turn to Encounter 1: Sky Raiders, on the next page, to continue the adventure.
ENCOUNTER 1: SKY RAIDERS

Encounter Level 5 (1,200 XP)

Setup
6 decrepit skeletons (D)
2 flesh-crazed zombies (F)
3 skeletons (S)
5 zombie shamblers (Z)

When the characters investigate, read:
The wind changes, and you can hear the chanting more clearly. It's a war chant of some kind, and it's coming from the sky. You see a few folk pointing to the clouds and shouting, but you perceive nothing. Then thunder explodes above you and, in the flash of lightning that comes a moment later, you see it: a longship with a tattered black sail being rowed through the air! Suddenly it takes a curving dive and drops into the frigid river, only to skid up onto the icy shore near the halfling camp. The chanting stops as fur-clad warriors leap from the boat, each letting loose an unearthly roar. After a moment of shock, the terrified crowd surges away.

The fur-clad warriors are undead servants of the Winter King come to deliver a deadly message.

Tactics
The undead spread out wide from the ship like living raiders crazed for plunder and blood. They attack the townsfolk and the characters in equal measure. All attack until destroyed. The characters should have a hard time protecting the citizens from the undead.

The characters might not know how to permanently kill the zombies at first. If no player talks about kicking them while they're down or making sure they are dead, a character skilled in Religion can surmise how they must be destroyed. In any event, it should not remain a mystery for more than a couple of rounds.

The Sky Ship
The longship is a semisentient vehicle with a talking dragon figurehead.

When a living creature comes within 5 squares of the sky ship, read:
The dragon figurehead at the prow of the ship shakes free of the ice around its face and turns to look at you. In a deep voice that booms out above the rumble of thunder, it intones, “Return the ice scepter to the grasp of the Winter King, or this shall be a forever winter, and the cold and dead shall feast upon the warm and living.”

When a living creature comes within 3 squares of the sky ship, read:
The figurehead turns to you and asks, “Do you carry the ice scepter of the Winter King?”

If the character answers yes, the figurehead inclines its head slightly and says, “Then you may board.” It makes no attempt to discern the truth or worry about how many people say they have the ice scepter.
If the character answers no or gives no answer, a bolt of lightning explodes from the sky, striking the mast and passing through the ship to leap from the figurehead’s mouth at the offending character. The ship also attacks in response to any attack.

**Attack:** Ranged 20 (one creature); +8 vs. Reflex

**Hit:** 3d8 + 4 lightning damage.

---

### Features of the Area

**River:** Any creature that enters the frigid river or starts its turn in it takes 5 cold damage.

**Ice:** The ice at the edge of the river is difficult terrain. A creature that attempts to run or charge over a square of ice must succeed on a DC 14 Acrobatics check or fall prone on the first ice square it enters. Dealing 10 damage to a square of ice can turn it into a square of river instead.

**Guards and Citizens:** Treat the guards and citizens as minions with defenses of 10 and a +5 attack that deals 5 damage if it hits. Many run, some try to help against the undead, but most become victims, particularly in the tight confines of the tents. Use as many as you see fit.

**Fires:** A creature that moves into a fire square or starts its turn in one takes 5 fire damage.

**Difficult Terrain:** The logs and boats are difficult terrain and provide cover.

**Tents:** The tents provide cover, but an attack directed at a tent’s side that deals 5 damage opens a rent through which creatures and attacks can freely pass.

**Totem Poles:** The halflings erect these animal totems when they camp. They feature birds, fish, and amphibians—the animals the halflings see in their travels. A DC 10 Athletics check allows a creature to climb one, something a citizen might do if pursued by undead.

### Development

Continue the adventure with “Aftermath of the Battle” on the next page or, if the characters leave on the sky ship right after encounter 1, with the skill challenge on page 10.
**Aftermath of the Battle**

In the immediate aftermath of the battle, the sky ship still sits along the shore of the river, occasionally intoning its demand for the ice scepter. As the people in the town return to take care of the dead and injured, the area is quickly consumed in a tumult of mourning, cries of the wounded, cheers for the bravery and skill of the characters, wonder and fear at the sky ship, and questions and theories about what happened and most of all why.

Roleplay some of these interactions, using the information below as inspiration.

**Thurmina, Human Sergeant of the Guards:** “The Winter King? That’s just an old story!”

**Barro Turnfin, Halfling Leader of the Turnfin Clan:** “No, it’s not! My cousin said he’s seen his cairn in the Frostjaw Peaks. A great pillar of ice with skulls inside!”

**Nimozaran the Green, Human Wizard Occupying the Septarch’s Tower:** “The halfling is correct. There was a Winter King once. In the chaos before the rise of the Empire of Nerath, the Winter King ruled lands to the south of here.”

**Orest Naerumar, Tiefling Owner of Naerumar’s Imports, Fallcrest’s Finest Shop:** “I’m familiar with many types of magic items, but I’ve never heard of an ice scepter.”

**Nimena Sandercot, Human Owner of Sandercot Provisions:** “Well, whatever it is, it must be here. Why else would a ship come down from the sky? Someone bring me more bandages—and an ale!”

**Armos Kamroth, Human Landowner and Secret Cleric of Tiamat:** “That’s right! And that means someone brought it here, recently! You there! You’re strangers in town! You brought this winter upon us, didn’t you?”

Allow the characters to take the lead in talking to the townsfolk. If they want more information about the Winter King and the ice scepter, several people can contribute pieces of the legend, and Nimozaran the Green can confirm the details:

✦ The Winter King was a human warlord who united several barbaric tribes over a hundred miles to the south.

✦ He is called the Winter King because in the course of a single long winter, he conquered several human cities and laid claim to a dwarven kingdom, erecting a towering pile of skulls of those he defeated to loom over his fortress’s entrance.

✦ The winter lasted so long and was so advantageous to his soldiers that it was said he made a pact with a fey lord of great power known as the Prince of Frost.

✦ However, the Winter King did not count upon the enmity between the Prince of Frost and the Raven Queen. For his hubris and his alliance with her foe, the Raven Queen cursed the Winter King so that all he touched would turn to ice.

✦ Amid the finest food and drink, the Winter King starved. He demanded that the Prince of Frost remove the curse, but that fickle lord instead froze the king solid and entombed his fortress in ice. The frozen pile of skulls became the cairn that marked the Winter King’s grave.

✦ No one the characters speak to is certain what the ice scepter is, but clearly it belonged to the Winter King.

Eventually, Lord Warden Faren Markelhay convinces everyone to be quiet and stands again on the chair to address them. If your players are likely to take the hint, you might have the Lord Warden be rattled by the attack and roleplay through characters’ attempts to convince him that his people need him to act like a leader.

**Read or paraphrase the following words from Faren Markelhay:**

“People of Fallcrest! My people! The terrible things we witnessed on this day were not an accident. Someone in Fallcrest has the Winter King’s scepter. But these heroes who saved us from the monsters aboard that ship are not to blame. They came late—just in time to help. No, someone else has brought this doom upon us. You know who you are. Come forward now to enter my protection, or face the gallows!”

At this point, have the characters make a DC 14 Perception Check: On a success, a character notices a male half-elf trying to sneak away while most everyone else is silent and still. If all the characters fail, someone in the crowd notices the half-elf and shouts about it. They attack with the intention of severely beating him.

The half-elf is Marko Lancet, a criminal and fugitive from a prison in the distant southern city-state of Hadrakar. He has the ice scepter.

**Ice Scepter**

This regal scepter seems made of ice and is set with sapphires. Though the scepter is cold to the touch, its wielder nevertheless feels warm and comfortable in the coldest wind.

**Level 6 Rare**

Marko Lancet

Marko Lancet grew up on the mean streets of Hadrakar. He lived a life of fraud, gambling, and petty theft until he was caught. It was his sentence to slave away in the mines of the Frostjaw Peaks, but he escaped, killing a guard in the process. While on the run from patrols, he was forced to head higher into the mountains. A storm in the cold peaks forced the patrols to give up, and Marko saved himself by taking shelter in an ice cave beneath a pillar of ice filled with skulls—the Cairn of the Winter King.

Exploring deep into the winding cave, Marko Lancet found the ice scepter in the grip of a figure frozen to a throne and obscured by a thick coating of ice. He took the valuable-looking object and felt warmer. When the storm cleared, he left, now unafraid of the cold. The strange winter has bothered Marko, but he didn’t know the climate of these northern lands, and the ice scepter has kept him warm. He intended to sell it in Fallcrest, but given the mood of the crowd just now, he thought it best to leave.

Marko doesn’t want to admit any of his past and calls himself a traveler until hard-pressed. At first he isn’t willing to admit where he got the ice scepter, but he quickly realizes his hopeless situation and tells how he entered the ice cave and claimed it.

Marko does not want to go back to the Cairn of the Winter King and is willing to give up the ice scepter to settle the matter. However, the people of Fallcrest aren’t satisfied by Marko’s story. They think he had the scepter and want him to help them stop the endless winter. Marko is hardly pleased to go, but he feels that it’s better than the noose. If you like, you can photocopy the statistics on this page and allow the players to use Marko as a companion character.

The characters complete this quest if they kill the Winter King, return his ice scepter and convince him to end the winter, or trick him into becoming frozen once again.

What happens to Marko is up to the characters. Depending on how the characters handle things, the discovery of Marko Lancet can have many different results.

The heroes don’t intervene: The people of Fallcrest Lynch Marko and hurl the ice scepter onto the ship. The sky ship does not leave. Instead it demands rowers to take it and the scepter back to the Cairn of the Winter King. And the snow continues to fall.

The heroes agree to take Marko with them: Marko is hardly pleased to go, but he feels that it’s better than the noose. If you like, you can photocopy the statistics on this page and allow the players to use Marko as a companion character.

The heroes board the ship without the scepter: The ship believes them when they say they have it and it takes off. Lacking the ice scepter can impact later parts of the adventure, but for now you can continue with “Skill Challenge: Sailing Stormy Skies” on the next page.

A Lord’s Request

The ship strikes out with lightning against individuals who attack it, and snow squalls quell fire or other ongoing effects that might damage it. Someone must board it and return to the Winter King, with or without the ice scepter. Marko Lancet cannot row the ship on his own, and most people in town would rather face prison than board the unearthly vessel. Lord Warden Faren Markelhay again turns to the characters.

Read or paraphrase the following:

“My new friends, you’ve seen how poorly we dealt with the Winter King’s minions. None of us are up to this task. If you will go to the Winter King, you take the hopes of Fallcrest and all the surrounding lands with you. Will you board the ship, go to the Winter King, and stop this endless winter?”

**QUEST: STOP THE ENDLESS WINTER**

4th-Level Major Quest (875 XP)

The characters complete this quest if they kill the Winter King, return his ice scepter and convince him to end the winter, or trick him into becoming frozen once again.

If the characters talk about rewards, townsfolk begin promising free boarding, free food and drink whenever they are in town, free repairs to armor and weapons, and anything else they can think of. Buoyed by his people’s reaction to the characters’ request, the Lord Warden offers them the Tower of Waiting and the island it sits on in the river. It’s little more than an empty shell right now, but Faren Markelhay assures the characters that work can begin to turn it into a strong and comfortable home.

Assuming the characters accept, continue the adventure with “Skill Challenge: Sailing Stormy Skies” on the next page.

**SKILL CHALLENGE: SAILING STORMY SKIES**

The figurehead of the sky ship is concerned only with two things: bringing the ice scepter back to the Winter King and having enough people to row the ship. Being a construct of no great intellect or discernment, it cares only that it receives answers in the affirmative to its questions. Beyond that, it knows the way to the Cairn of the Winter King, and it knows when enough people are working the oars to send it airborne.

For the purpose of this adventure, the number of crew needed to row the ship is equal to the number of characters, but if you want, you can have the ship require more people. Perhaps some brave townsfolk must also come along. There might be tearful good-byes with loved ones certain that those on the ship are going to their deaths. People might make brave speeches, or the characters might need to convince the townsfolk that some of them must come along.

**Boarding the Sky Ship**

When the characters board the ship and enough crew are aboard to row, the figurehead intones, “Set to the oars, and I shall pilot our course through the storm.” It says nothing else until its commands are followed.

*When the characters start to row, read:*  
*As you pull upon the oars, the great ship glides into the air like an arrow shot from a bow. Each stroke you make feels like you are pulling heavily at water, and yet it sends you hurtling skyward.*

If more than two of the characters stop rowing, the ship plummets and warns them, “Row or die. The Winter King can send another ship.”

*Assuming the characters continue to row, read:*  
*Your view of the ground below quickly becomes obscured by clouds. Through the freezing mist and wind, you see flashes of lightning. Ice begins to crust the ship, and your fingers and face become numb with cold. You lose any sense of how far you’ve gone or where you’re heading.*

**Running the Skill Challenge**

The characters need to continue rowing the ship and avoid or endure the dangers of the storm, or else they lose healing surges. This skill challenge has a different format from others. Instead of using primary and secondary skills, it relies on a number of events to provoke skill checks. Describe these events as you wish.

Try to engage the players in the narrative and react to their actions. Rather than running events sequentially, you can have events happen concurrently or interrupt the characters’ actions with new events. You can run any of the events multiple times. Remember that only two characters can stop rowing at a time.

**Event A:** Frozen ropes snap, and the sail flaps wildly. The ship heaves and sways violently, and the figurehead calls out, “Set that sail! Secure the lines!” A character needs to make a DC 14 Athletics check to climb the mast and gather the flapping material while another character makes a DC 14 Thievery check to throw and secure the lines. Both characters must make checks until both succeed. Each time that one or both fail, the characters lose a healing surge apiece from the jostling of the ship.

**Event B:** The characters spot whirling funnel clouds ahead as a fierce snow squall obscures the path forward. A successful DC 21 Perception check or DC 14 Nature check can determine the safest direction. If the characters fail, they lose two healing surges apiece as they pass through a tornado. If they succeed, a DC 21 Diplomacy check convinces the figurehead to pick the safest route, or a DC 14 Athletics check can trim the sail to cause the ship to travel the better course. Failing either of these checks causes the characters to lose two healing surges apiece in the whirling tempest.

**Event C:** The cold becomes intense. Each character must succeed on a DC 14 Endurance check or lose a healing surge. Characters who have cold resistance gain a bonus to the check equal to the amount of resistance.

**Event D:** Huge hail batters the ship. Characters who can’t take shelter somehow while rowing (such as by covering up with a shield) must succeed on a DC 14 Endurance check or lose a healing surge. Also, the figurehead gets damaged and disoriented. A character must succeed on a DC 21 Arcana check to revive it, or the characters lose a healing surge apiece before the ship revives itself.

**Event E:** The ship tumbles in a strong wind. Each character must succeed on a DC 14 Acrobatics check or lose a healing surge. One character who falls also falls overboard and ends up gripping the frosty edge of the ship. The character or a helping character must succeed on a DC 14 Athletics check to pull the character back on board. The character hanging over the ship loses a healing surge each time he or she fails this check.

**Ending the Skill Challenge:** Achieving 8 successes indicates that the characters receive the XP, not that the skill challenge has ended. Failing checks can still cause the loss of healing surges as described below. The skill challenge should not end until each character has made at least two skill checks—and you’ve had enough fun.

**Resolution:** When the skill challenge is over, continue with “Arriving at the Cairn” on the next page.
ARRIVING AT THE CAIRN

Read the following when the characters have completed the skill challenge and you are ready to continue the adventure:
The sky ship descends rapidly through the clouds to reveal snow-capped mountains all around. The air is cold here but preternaturally still as the sky ship slows to a glide. Fat snowflakes wetly slap against you and the ship.

The ship slides to a stop in a snowy valley in the shadow of a huge spike of ice filled with skulls. Beneath the 40-foot-tall ice pillar is a tunnel into the mountain. Once the ship stops, all you hear is the whisper of snowflakes striking snow.

Into the silence the figurehead suddenly intones, “Behold the Cairn of the Winter King. Bring the ice scepter before his throne, or the snow will never stop falling.”

Marko Lancet

If Marko is with the heroes, he is astonished to be back at the Cairn. In fact, he has a hard time believing it.

Read or paraphrase the following words from Marko Lancet:

“I’m back. It’s not possible. I thought it would take weeks to get here. I thought we’d die. But there it is, that horrible pillar of skulls, and here I am. Maybe I never left. Maybe I’m delirious. Maybe . . . Maybe I’m dead, and my head is in that cairn. Could I go there now and see myself? If I climb up and look into the ice, will my eyes be looking back at me?”

Marko has experienced some strange stuff recently, and the harrowing trip through the storm after the attack of the undead warriors has unhinged him a little. Unless the characters stop him and snap him out of it, he climbs the hillside surrounding the tunnel entrance and starts peering in at the skulls inside, examining every one for some resemblance to himself. Nothing happens unless he attacks the Cairn, which might occur if he sees his reflection in its surface.

Unstable as he is, Marko is willing to continue with the characters once they calm him. (“What else should I do? Stand out here and freeze?”) Marko wants to help with his knowledge of the ice cave. If the characters ask, Marko can guess which path heads toward the throne room. You can decide if he is right, or you can roll a d6 and allow Marko to be right on a roll of 3 or higher.

Other Characters If the characters brought others along, the latter folk are too frightened to enter. However, any nonplayer character tag-alongs might help out later. Perhaps they fearfully stay near the sky ship but rally their courage to miraculously show up in the dungeon when the characters are in the direst need. You might use some of the human statistics in Monster Vault to represent them. Their ultimate fates are up to you and the players.

The Cairn

The Cairn is a 40-foot-tall spike of blue-white ice that resembles a great overturned icicle. Within it are hundreds of skulls: human, elf, dwarf, halfling, tiefling, dragonborn, children, adults—even some giants. A steep pile starts at the bottom within the pillar of ice, but farther up the pillar the skulls are frozen aloft in the ice, eerily floating.

If someone attacks the Cairn, it unleashes an attack in a close burst 20 that deals 4d10 + 10 cold damage to all creatures in the burst. The Cairn has AC 2, Fortitude 20, Reflex 2, 200 hp, and immunity to cold, necrotic, poison, psychic, forced movement, all conditions, and ongoing damage.

Entering the King’s Realm

The characters have some time to take stock and examine their situation. They might want to rest, but unless they have a magical means to camp, the interior of the cave offers the only natural shelter. The characters might also consider resting in the boat, but the weather conspires against this.

The tunnel into the mountain extends a mere 20 feet before being blocked by two huge doors—doors that Marko Lancet did not encounter. The doors are not locked, but ice encrusts them, and it takes a DC 14 Strength check to crack them open. A DC 21 Perception check detects no sound through the door, but the barest hint of smoke does scent the air.

When the characters open the door, read:

A wave of warm air bursts through the doors, carrying with it the scents of rich food and wood smoke. The smells of roast goose, sucking pig, lemon tarts, and other foods you haven’t eaten since childhood linger around your head.

Down the tunnel you see the source of these delightful memories. A room glitters with candlelight around a table laden with plates of food and goblets of drink. Beyond it, a bearded man dressed in furs sits with a demure young woman at a table by a fire. Three hunting hounds lie at their feet lazily looking in your direction.

The man lifts his strong face up at the cold air coming from the doorway, sees you, and smiles. “Come in, friends,” he says. “And close the doors behind you against that cold. Sit, eat, and rest after your long journey.”

The man is a servant of the Winter King, and his hounds are dire wolves disguised by an illusion. He hopes to hull the characters into a false sense of security. The food and drink is an illusion that holds a curse for those who consume it. Read more about this area and continue the adventure on the next page with “Encounter 2: A Warm Welcome.”
**ENCOUNTER 2: A WARM WELCOME**

**Encounter Level 5 (1,050 XP)**

**Setup**

Bortek, human barbarian (B)
2 dire wolves (D)
Zanna, gnome illusionist (Z)

The contents of the table, the two hunting hounds, and the demure young woman are cloaked with illusions. The table holds a disgusting array of bones, rotting flesh, and gore from travelers through the mountains who passed too close to the Cairn of the Winter King. The hunting hounds are in fact dire wolves. The human woman who appears to be a servant is Zanna, a gnome illusionist loyal to the Winter King.

Bortek is the only creature who is as he appears—a powerfully built human warrior. Yet Bortek has a secret agenda. He hopes to win honor with the Winter King by bringing back the agenda. He hopes to win honor with the Winter King by powerfully built human warrior. Yet Bortek has a secret

Bortek does all the talking. His “servant” Zanna doesn’t talk because she’s concentrating on keeping up the illusions on herself and the wolves. She smiles and nods when she must, but she tries to escape notice by playing the part of a servant (passing out drinks, taking away dishes, and so on).

Bortek’s ploy is to claim that he is the Winter King. He wants the characters to partake of the food and drink and to give him the ice scepter. If things go as he plans, they’ll rest in the room while barred from entering the rest of the dungeon, and Bortek will return to finish them off once he has brought the scepter to the Winter King.

Assuming the characters give him the chance, Bortek starts the conversation. Read:

“Welcome. I am the Winter King. I assume you have something for me. You can give it to my servant Zanna. Once we have that business out of the way, I hope you’ll dine with me and tell me how the world has changed during my long sleep.”

Bortek doesn’t lie well (Bluff +3), so he tries to stick to the facts. Characters who succeed on Insight checks against his Bluff can tell he is anxious and suppressing some anger. Zanna plays her part impeccably (Bluff +13), but someone who exceeds her Bluff with Insight understands magic is somehow at play in disguising her appearance.

Bortek and Zanna have been frozen alive for hundreds of years. They know nothing of the outside world as it is, and they’re unwilling to tell the characters about the rest of the dungeon. They don’t know by what means the Winter King fetched the characters. Sooner or later, combat should break out.

**Tactics**

When combat breaks out, the illusions on the dire wolves and Zanna fade (but not the table; that’s the Winter King’s doing). Bortek mounts one of the dire wolves and rides it over the table to attack the characters. The other two surround them from the sides, hoping to gain combat advantage. Zanna uses her powers against the characters, but tries to flee when she is bloodied—if possible, invisibly due to see me not.
Features of the Area

Table of Illusory Delights: The table of gore is disguised by an illusion of fine victuals. A character trained in Arcana can detect its magic with 1 minute of study and a successful DC 21 Arcana check. The character must then succeed on a second DC 21 Arcana check to know it is an illusion and that it bears a curse.

A creature that eats or drinks from the table cannot regain encounter powers and cannot regain hit points except by using its second wind. These effects last until the creature takes an extended rest.

At some point after the characters have fallen for the illusion or discovered it, it vanishes, revealing the messy remains of the travelers and the blood-filled cups. Words in frost appear amid the gore: “Do you think you are guests in my house?”

Cursed Beds and Resting: The beds in the chamber are large, comfortable, and covered in multiple thick blankets. The beds are not illusions but true invitations to rest well. The chests are empty and safe for the characters to use.

However, anyone who rests in this chamber or takes the blankets or beds from it suffers nightmares of a freezing death. The next time such a character is in combat after an extended rest, he or she takes a -2 penalty to attack rolls and damage rolls due to flashbacks of the dimly remembered nightmares. A character can eliminate the penalties by taking an extended rest elsewhere.

A character trained in Arcana can detect magic associated with the beds and the chamber after 1 minute of study and a successful DC 21 Arcana check. The character must then succeed on a second DC 21 Arcana check to understand the nature of the magic.

Fires: A creature that starts its turn in the same square as a brazier or moves into one takes 5 fire damage.

Dog Pen: The adjacent chambers are dank and dark rooms that smell heavily of dog. Dirty rags, which are the torn remains of the clothes of unfortunate travelers, litter the floor. Despite the unwelcoming nature of each one, each chamber is a safe resting spot for a character.

Development

If Zanna escapes the room, she heads to area 20 (page 17) to warn the Winter King, and then she heads to area 10 (page 16) to join her sister, Azrinda. If she makes it there, Zanna and Azrinda can be a challenge as a team.

Once the characters defeat the foes in this area, no one comes to attack them. The Winter King set up the table of illusory delights and the cursed beds to test the astuteness or humility of the bearers of his ice scepter. If the characters presume they are guests and fall prey to his curses, so much the better. Yet if the characters do not eat or drink from the table and decide to rest in the dog pen, their safety and a good rest are assured.
**The Winter King’s Realm**

These chambers once served as some of the holdings of a clan of dwarves. The construction is clearly dwarven. Ceilings in corridors are 10 feet high, and ceilings in chambers are 20 feet high. The dungeon is freezing cold except in rooms with fires (areas 1 and 8). Frost coats most everything. Icicles hang from the ceiling and walls where water from the mountain has leaked into the area. Although you should feel free to describe slippery footing, the ice is not difficult terrain unless otherwise noted. Nonplayer characters carry torches with them except in rooms that contain fires. In combat, they set the torches down before engaging. Otherwise, the dungeon is dark.

**Running Events in this Dungeon**

The Winter King sent the sky ship to retrieve the *ice scepter*, but he’s in no hurry. He can freeze the lands for miles around until he gets what he wants. Of course, he might continue to freeze them. Plus, the characters are lost high in the icy mountains; they have nowhere to go.

The Winter King’s minions, on the other hand, constantly vie for his attention and esteem. Many of them hope to win power by being the one who brings him either the *ice scepter* or the individual that carries it. Thus, inhabitants in this dungeon aren’t inclined to attack the characters if they seem willing to go quietly (to an ambush in the Winter King’s throne room). Nor are the inhabitants particularly likely to help one another if waiting to attack the weakened characters later makes for a better strategy.

At its core, this is a dungeon where the characters can wander and the nonplayer characters might move about. The nonplayer characters have good reason to be where they are, and elements of their movement around the dungeon are built into the adventure, but you should feel free to improvise. If the characters are being incautious, they should be attacked by the dungeon’s denizens. If they’re trying hard to be stealthy and barely scraping by, the nonplayer characters in the dungeon might not notice them, or might grow overconfident.

Similarly, the characters might pick a route through the dungeon that avoids battles or prevents them from seeing certain rooms. They might be lucky and head straight for the Winter King’s throne room. That’s okay. They still might visit other locations later. If you feel the need to show them a particular area or encounter, adjust things so that the characters are likely to head that way. Maybe a mysterious noise is all your players need. Perhaps a nonplayer character might beg for its life in exchange for information that makes the players go the way you wish. Alternatively, a guard patrol might draw or drive the characters into a room or corridor.

**Floating Encounter**

Encounter 10: Guard Patrol (page 30) can be placed wherever you like in the dungeon. Use it to increase the difficulty of an otherwise easy encounter, or have the characters hear the approaching easy encounter, or have the characters hear the approaching guards as they wander the dungeon. No map is provided for this encounter. Instead, have it occur in the characters’ current location. Also, consider using the encounter if the players are bogged down in discussing what to do.

Don’t wait so long for the opportune moment that it never comes. Instead, use this encounter early on, and then use it again when it feels right. Another patrol can easily be wandering the dungeon in another area.

**Area Descriptions**

The numbered locations on the map on page 32 are detailed below.

1. **A Warm Welcome**
   This area is described in encounter 2 (page 12).

2. **Guardroom**
   The door into this chamber from the hall is locked, and carved into the ancient wood are the words “Do not open on pain of death by order of the Winter King.” The door can be opened with a DC 14 Thievery check or a DC 21 Strength check.

   In the time of the dwarves, this chamber constantly had guards who protected the complex from unwanted entry through the teleportation circle in the adjacent chamber. When the Winter King occupied the dungeon, the guards’ spirits haunted the place and kept him from using it as well. They still guard the teleportation circle and attack as soon as a creature passes through the eastern doors in this area. Run Encounter 4: Spirit Guardians, page 19, when this happens.

3. **Teleportation Chamber**
   When the characters enter this area, read:
   *The floor of this chamber is engraved with a circle of runes.*

   The dwarves of old used a teleportation circle to quickly return to their home when traveling abroad. At your option, a character who succeeds on a DC 21 Arcana check can determine that the circle is still functional, but it works only as a destination and not also as a starting point.

   The presence of the teleportation circle gives you and the players the opportunity to return to the Cairn of the Winter King at some later date—after the characters have learned how to use the device. Gaining that knowledge could be the subject of a quest or an entire adventure: How do the characters learn the information they need? What dangers lurk in these dungeons upon the characters’ return? It’s up to you!
4. Frozen Temple
When the Winter King claimed this complex from the dwarves who built it, he froze their temple to Moradin while its high priest was kneeling at the altar. The chamber is now filled with solid ice from floor to ceiling, and its doors are frozen shut with an enchanted ice lock that requires two keys. The Winter King feared that his sacrilege might have angered Moradin, and he planned to reopen the temple once he found a way to placate the god. Yet the vengeance of Moradin never came to pass, and the two keys became symbols of rank among the Winter King’s followers.

The ghost of the high priest now haunts this temple, and it cannot leave the chamber. The spirit has no power to speak, but if the characters come close to the frozen doors, the ghost’s hands and face poke through the doors’ surface like a prisoner through bars. The ghost tries to get the characters to examine the magic lock, and he mouths the words for “ice” and “key” in Dwarven, pleading for release.

The characters can open the frozen lock on the door with a DC 21 Thievery check. A DC 26 Strength check can also pull open the doors. Each failed Thievery check or Strength check causes the lock to unleash a blast of cold that deals 2d10 + 5 cold damage to all creatures adjacent to the door. Once the doors are opened, however, the room is filled solid with ice and the ghost still begs for release, this time pointing to the keyhole in the ice surrounded by runes and mouthing the words for “fire key.” A Thievery check has no effect on this magic lock.

The outer door can be opened safely with the ice key found around the white dragon’s neck in area 11 (page 16). The ice inside might be melted with days of effort by the characters, but using the fire key causes it all to evaporate in an instant. The fire key is with the tiefling named Anger in area 14 (page 17).

QUEST: THAW MORADIN’S TEMPLE
4th-Level Minor Quest (175 XP)
The characters complete this quest if they open the outer doors and melt all the ice inside the temple. The ghost of the high priest then stands up out of the kneeling dwarf corpse before the altar and turns to face the characters, bowing gratefully once before vanishing. At that moment, the characters regain any healing surges they have lost or spent.

5. Great Hall
When the characters enter the chamber, read:
This large chamber holds two massive tables. Scenes of dwarves eating and drinking are carved into the walls and pillars.

Perception DC 14: You can see light dimly flickering and hear clattering coming from the area to the north. It sounds like someone is moving dishes.

6. Collapsed Passage
This rubble-filled hall once led to living quarters for dwarf servants, crafters, and miners, as well as to the mines.

7. Kitchens
This area served the dwarves and the Winter King as kitchens for the complex. One of the Winter King’s recently thawed servants, a human transmuter named Ravide the Black, is in here trying to warm up and find something to eat before he reports for duty. He’s intent on getting dry and looking presentable before his audience with the Winter King, so he isn’t interested in engaging in any battle he might hear nearby, instead hoping that the problem takes care of itself. An otyugh is in a pit that the Winter King’s kitchens used as a garbage and body disposal, and some dwarves who thawed out at about the time that Ravide did are awaiting his orders. For more about this chamber, see Encounter 8: What’s for Dinner?, page 26.

8. Library
When the characters enter the chamber, read:
Stone shelves line the walls of this room, bookshelves stand amid it, and the floor tiles are shaped like opened scrolls. The books and scrolls in this room have all turned to soggy mush.

Perception DC 21: Characters searching this chamber can find a vial made from the horn of a minotaur. The airtight container opens with an audible pop, and inside is an elixir of dragon breath (fire).

Elixir of Dragon Breath (Fire) Level 7 Uncommon
Elixir 100 gp
Power (Consumable ♦ Fire): Minor Action. Use this power after you drink the elixir. Until the end of the encounter, you gain an at-will attack power that requires a standard action to use: Close blast 3 (each creature in the blast); +10 vs. Reflex. Hit: 2d6 + Constitution modifier fire damage.
9. Alchemist’s Chamber
This room served a gnome alchemist as a lab. The alchemist stands frozen in area 11, but her work remains.  
**Treasure:** Characters can find three potions of healing in this room. All three potions are still frozen inside their containers. The characters can use them after thawing them over a fire. Or, they can break the containers and consume the potions as though they were solid.

10. Prison
The stout, iron-reinforced door to this area is locked. When the characters investigate the door or come near it, they hear a woman’s voice calling weakly from within the area.

**Read:**
“Help! Whoever you are, if you are not one of the Winter King’s servants, you must help me. I can help you if you release me! Please, it’s so cold.”

The characters can talk to the speaker through the door, but her voice gradually grows hoarse and weak, and she begs them for something to drink and eat with her last whispered pleas before becoming silent.

The door can be opened with a DC 21 Thievery check or a DC 21 Strength check. It has AC 5, Fortitude 10, Reflex 5, and 30 hit points.

The woman behind the door is Azrinda, a gnome illusionist and sister to Zanna, whom the characters met in encounter 2 on page 12. She claims to be the Winter Queen, scorned by her hateful husband and imprisoned before the Prince of Frost froze them all. For more information about Azrinda and how to roleplay her, turn to Encounter 7: An Audience with the Queen, page 24. If the characters ignore her pleas and continue on, after a few rounds she gathers her forces and follows the characters to attack them wherever they go next.

11. An Army on Ice
The doors to this chamber are slightly ajar. When the characters open it, read:

**Warriors and monsters stand in frozen ranks, coated in thick ice. A white dragon the size of a grizzly bear hangs from the ceiling, its enormous span of wings clasped by icicles and its body encased in ice. You see a large key made of ice hanging from a rope around the dragon’s neck.**

When the Winter King’s curse caused him to start turning things he touched to ice, many of his victims were his own soldiers and servants. These frozen victims were brought to the dwarves’ old guard barracks. Later, when the Prince of Frost punished the Winter King, he froze all those he found in and around the Winter King’s Realm and had servants place them here. When Marko Lancet stole the ice scepter, it disrupted the Prince of Frost’s magic and thawed much of the dungeon along with freeing some of the Winter King’s followers (those who rode the sky ship to Fallcrest and those now occupying the dungeon). Puddles of water near the front of the room indicate where they stood.

Many more of the Winter King’s army await release in these ranks of ice-coated creatures. Most are human warriors, but a few gnomes, dwarves, tieflings, ogres, and other monsters are here. Put whatever frozen foes you like in this room. In addition to these creatures, at the back of the chamber stand ranks of those frozen by the Winter King’s touch. These statues of people and creatures are entirely made of ice except for their skulls—an eerie warning of what the Winter King might do to the characters.

Allow the characters to investigate as they like. The servants of the Winter King are thawing, but only slowly. The characters can attack them, or take their mundane equipment by chipping away the ice. If the characters attack the white dragon or take its ice key, the ice surrounding it cracks. See Encounter 3: Let Sleeping Dragons Die, page 18, for what happens next.

**Treasure:** The equipment carried by the frozen people is largely unremarkable except for one magic item jutting from the ice around one human. Pick a common level 7 magic item that would be useful to one of the characters.

12. Trapped Room
Read the following when the characters open the door to this room:

**This chamber bristles with traps and dangerous defensive measures. A lever projects from the floor on the far end, and you see sawing blades and portcullis spikes poking from the ceiling. An open pit and holes in the walls promise death. Yet everything is coated in a thick layer of ice, freezing traps in the middle of activation.**

None of the traps in this room are currently a danger to the characters. The ice coating them prevents their activation, a fact that a DC 10 Thievery check can deduce with a glance. If the characters decide to mess around with the traps—perhaps resetting them while they rest in the vault—a DC 14 Thievery check, the application of fire, or an attack against the ice can allow a trap to be active. For more information about the traps and the levers, see Encounter 5: Trapped Ambush, page 20.
13. Vault
The dwarves kept their riches in this chamber, but the Winter King spent much of the dwarves’ wealth upon his armies. Some of the treasure still remains, including a pile of coins separated from the rest that was to be the hoard of the white dragon Thrymzen (see area 11, above, and encounter 3, page 18).

The heavy iron door to the vault is locked by a kind of combination lock. Letters in Davek script, the alphabet of the Dwarven and Giant languages, are on four wheels internal to the door such that only one letter is visible at a time. Each wheel has all the letters in the alphabet on it. Inscribed in the door are the following words in Dwarven: “None but a dwarven hand can open me, and only after bringing me a giant’s head.” The solution to this riddle is to use the wheels to spell the word “head” in Giant and then “hand” in Dwarven. When this is done, the lock clicks open.

If the characters don’t speak Dwarven and Giant, they can’t solve this riddle. If the characters know those languages but the players can’t solve the riddle, allow them to make DC 21 Intelligence checks and give them a hint or the answer if they succeed. A DC 26 Thievery check can detect the faint clicks of the wheels and allow a character to unlock the door.

Treasure: Inside the vault are crates, barrels, and chests of treasure: 450 cp, 255 sp, 300 gp, and gems and jewelry worth a total of 350 gp. The vault can be locked, unlocked, and opened from the inside, so it makes a great room in which to rest.

After the characters have rested and opened the door, while they are looting the chamber, or while they are trying to figure out the riddle, run Encounter 5: Trapped Ambush, page 20.

14. Cold Forges
This chamber served as the forge room for the dwarves. Now its chimneys are clogged with ice, and the forges burn with cold flame. The Winter King changed the fires of the forges with his cursed touch.

The tiefling named Anger is in this room with a couple of undead allies and an ogre. For more information about this chamber or to run an encounter with these characters, turn to Encounter 6: Cold Anger, page 22.

15A and 15B. Guardrooms
Although different in shape and scope, both these locations served as waiting rooms and guardrooms. Area 15A has a gong that would have been rung to announce guests or as an alarm. It is now made of brittle ice.

16. Well
This well served the dwarves and the Winter King as an internal water supply. The well is 30 feet deep, and the water in it has a thin coating of ice. If the characters investigate the well, you might use it as a source for another adventure. Perhaps a cave entrance is at the water level, or a secret door is somewhere in the chute.

17. Conference Room
The dwarf king and later the Winter King used this room for private meetings.

Perception DC 21: A character can notice a spy hole that allowed eavesdropping from the royal quarters. Peeking through it reveals the dark interior of the icy bedroom.

18. Royal Quarters
The dwarf kings of old and the Winter King used these chambers as a private residence. Thanks to the Winter King, everything in these rooms is made of ice: tables, chairs, beds, the mirror, and other personal effects and furniture.

Perception DC 21: A character searching in the bathroom can find a secret door behind the frozen garderobe. Opening it reveals area 19.

19. Secret Passage
This secret passage serves as a means of entering or exiting area 20 unseen. At the top of the spiral stairs is a collapsed passage that served as an escape tunnel.

20. Throne Room
When the characters enter this area, read:
This huge and freezing cold chamber has high ceilings dripping with icicles like stalactites in a cave. Four massive and glittering ice chandeliers illuminate the room with heatless blue flames on hundreds of unmelting ice candles. On a high dais at one end stands a high-backed throne on which sits a figure as still as death. Skeletal and silent, the Winter King is entombed in solid ice at least a foot thick. One hole pierces the cold coating: a slot over his right hand in which the ice scepter would easily fit. To add to the eeriness of the scene, you hear voices whispering, “Beware the wrath of the Winter King.”

The Winter King does not speak or move and seems frozen in place until someone attacks him, gives him the ice scepter, or addresses him. Turn to Encounter 9: Uncrown the Winter King, page 28, when one of these happens.

Perception DC 21: A character searching behind the tapestry can find a secret door. Opening it reveals area 19.
ENCOUNTER 3: LET SLEEPING DRAGONS LIE

Encounter Level 3 (750 XP)

Setup

1 young white dragon (D)

If the characters take the ice key from around the white dragon's neck or attack it, the ice around it explodes away, and the dragon attacks.

The dragon is named Thrymzen. It allied with the Winter King to experience the slaughter of conquest and gain treasure. Thrymzen served as the Winter King's mount on several occasions. Thrymzen would rather not speak to anyone but the Winter King, preferring to use brute force to make its intent known, but a character who uses Draconic to speak to the dragon might shock Thrymzen into a brief conversation.

Thrymzen has no idea how long he has been frozen, and if told, he demands information about the world beyond. Thrymzen might leave the Cairn of the Winter King if the characters can convince him that the Winter King's kingdom is long dead and that a new world lies ready for exploration and plunder. On the other hand, it has been a long time since Thrymzen has eaten.

Tactics

The dragon attacks the bearer of the key as best as it can. However, it's not terribly bright, and it might be fooled by misinformation or bluffing.

Treasure

The enchanted ice key is freezing to the touch and deals 5 cold damage to any creature that ends its turn carrying it. It has no intrinsic value beyond opening the outer doors to area 4. Once it has been used to open the doors, it melts away.

Development

This battle might occur in area 11. If so, use the map on page 32 and remember that the ranks of frozen creatures stand in the room. On the other hand, the characters might take some precautions against the dragon waking, such as using a rope or magic to remove the key from afar and quickly closing the door behind them. If so, the dragon looks about itself in confusion for a few moments and then goes on the hunt for the key throughout the dungeon.

This event can make for a lot of fun tension as the characters try to stay away from the dragon or pick their battlefield to fight it. For its part, the dragon looks for signs of invaders, but none of its allies are above suspicion as thieves aside from the Winter King. The dragon intimidates any allies it finds into forming search parties to locate the characters, assuming they understand its intent (Thrymzen speaks only Draconic).
ENCOUNTER 4: SPIRIT GUARDIANS

Encounter Level 3 (750 XP)

Setup
3 mad wraiths (W)

When a creature enters the guard chamber, the mad wraiths attack.

When the characters enter the area, read:
Frost spreads like spilled water over the wall and door in the far wall of this small chamber, and then things made of shifting shadows appears to ooze from the wall. A moment later you hear a group of haunting and deep voices babbling in broken Common, making no sense at all.

If a character tries to make sense of the mad wraiths’ whispered babble, the character is affected by the creatures’ mad whispers aura regardless of distance. The wraiths move to surround and attack the characters.

Tactics
The wraiths phase through the walls and out into the halls to surround the characters if they can. They attack until they are destroyed or until no creature is within 10 squares of area 4.

3 Mad Wraiths (W) Level 6 Controller
Medium shadow humanoid (undead) XP 250 each

HP 73; Bloodied 36
AC 20, Fortitude 16, Reflex 19, Will 18
Speed 0, fly 6 (hover); phasing
Immune disease, poison; Resist 10 necrotic

Skills
Stealth +13
Str 6 (+1) Dex 20 (+8) Wis 3 (-1)
Con 17 (+6) Int 11 (+3) Cha 19 (+7)

Alignment chaotic evil Languages Common

### TRAITS
- **Mad Whispers** (psychic) ✦ Aura 3
  - Any enemy that ends its turn in the aura takes 5 psychic damage, and the wraith slides it up to 2 squares.

- **Insubstantial**
  - The wraith takes half damage from all attacks, except those that deal force damage. Whenever the wraith takes radiant damage, it loses this trait until the start of its next turn.

- **Spawn Wraith**
  - When the wraith kills a humanoid, that humanoid becomes a wraith figment at the start of this wraith’s next turn. The new wraith appears in the space where the humanoid died or in the nearest unoccupied square, and it rolls a new initiative check. The new wraith acts under the Dungeon Master’s control.

### STANDARD ACTIONS
- **Touch of Madness** (psychic) ✦ At-Will
  - Attack: Melee 1 (one creature); +9 vs. Will
  - Hit: 2d6 + 7 psychic damage, and the target takes a –2 penalty to all defenses (save ends).

- **Touch of Chaos** (charm, psychic) ✦ Recharge ×2
  - Attack: Melee 1 (one creature able to take free actions); +9 vs. Will
  - Hit: 2d6 + 7 psychic damage, and the wraith slides the target up to 5 squares. The target must then make a basic attack against its nearest ally.
  - Miss: Half damage, and the wraith slides the target up to 2 squares.
ENCOUNTER 5: TRAPPED AMBUSH

Encounter Level 5 (1,050 XP) or Encounter Level 8 (1,925 XP with traps)

Setup
1 ettin thug (E)
4 human barbarians (H)
3 falling iron portcullises
2 false-floor pits
1 poisoned dart wall
2 whirling blades

The Winter King’s lieutenant, a tiefling named Anger, grew tired of waiting for the characters and sent some of those under his command to look for them. They have orders to find the characters and bring them to the Winter King or to kill them. They catch up with the characters as they are around area 12 (page 16).

When appropriate, read:
You hear multiple booted feet and the heavy tread of something huge from the hall and see torchlight shining from around the corner. Then you hear a deep human voice say, “Thad, no kill! That goes for you too, Thunk. No kill, understand? Not until one of us says so. Got it?”
Almost simultaneously, two much deeper voices begin intoning, “Kill . . .”
“No, you idiots! No kill! Don’t kill! We’re supposed to talk to them!”
“Kill . . .” say the deeper voices again.
“Fine. We’ll do it your way.”

The characters have 1 round to ready themselves before the ettin and its human allies round the corner. When they do, the characters see an enormous two-headed ettin lumbering forward in front of four tough-looking humans in hide armor. The humans bear torches, but the ettin carries only a club.

The humans have orders to kill the characters if they refuse to come before the Winter King with the ettin and humans as guards. The dim-witted ettin understands only Giant, and the humans can’t make it understand any word of Common other than “kill.” When the ettin sees the characters, it attacks, and the humans follow suit.

Traps
If the traps are inactive, they are not part of the encounter and do not grant XP. However, the characters might have freed them from ice and reset them. Also, the lever can be used to manually trigger the traps if they are active. A DC 14 Thievery check, the application of fire (such as a barbarian’s torch), or an attack against the ice can allow a trap to be active. If the characters don’t try to use the traps to their advantage, the human barbarians do, and the ettin likely accidentally frees traps from the ice with wild swings. Active traps that become hazards to the characters should grant XP.

Lever: As a standard action, a character can pull this lever in one of two directions. Pulled one way, it activates all portcullises that have not fallen and then resets them in the ceiling. Pulled the other way, it causes both of the whirling blades to travel along their tracks and vanish into the ceiling, resetting them.
ENCOUNTER 5: TRAPPED AMBUSH

Tactics

The ettin and the humans attack fiercely despite the traps. The humans attempt to make use of the traps, working their way to the lever if they can. If the ettin dies before all the humans are dispatched, any bloodied humans who remain try to fight a retreat and return to Anger in area 14. They do not surrender.

Features of the Area

**Falling Iron Portcullises**: These three traps are indicated by dotted lines running through the squares they occupy.

**Poisoned Dart Wall**: This trap extends along the southern wall of area 12.

**Whirling Blades**: The tracks that hold these two traps are indicated by dashed lines running through the squares they occupy.

**False-Floor Pits**: These two traps are located where the pits appear on the map. Those pits, however, are not visible until the traps are triggered.
ENCOUNTER 6: COLD ANGER

Encounter Level 4 (900 XP)

Setup

Anger, tiefling fury (T)
2 blazing skeletons (B)
1 ogre hunter (O)

When the characters enter the area, read:
This large room is lit with flickering blue light from two forges that glow with azure flames. The fires must be cold, because the room is positively freezing. A tiefling male in chainmail armor is gingerly holding something in one of the forges with tongs, while a bored ogre sits in one corner picking its teeth and two skeletons stand idle nearby.

The Winter King's lieutenant, a tiefling named Anger, has been ordered to this room to try to alter the forges to make them hot so weapons and armor can again be made for the Winter King's army. His first attempt to use the blazing skeletons failed, and now he's using his fire key to see what it can do. He's not having much success and is grumbling about how the Winter King should wait until Ravide the Black, one of the wizards, thaws out.

When the characters show themselves, read:
The tiefling straightens up from bending over the forge, pulling out a flaming key on a golden chain, which he quickly puts around his neck. "How did you get here?" he says in shock. "I sent my ettin after you!" He draws a jagged blade, and the skeletons suddenly burst into orange flames as the ogre scrambles to its feet.

Anger wants to take the ice scepter to the Winter King, and if the characters go quietly with him and his minions to meet the king, he is delighted to bring them. He knows they are no match for both his group and the Winter King. If the characters don't go quietly, he orders his allies to attack, telling the ogre to dip its weapons in the cold flames as he does so.

Tactics

The ogre hunter moves to a forge to dip a javelin in it and then hurls it at a character. One blazing skeleton takes cover away from the characters and uses flame orb while the other moves into melee alongside Anger, hoping to flank with him and burn foes with its fiery aura. Anger takes no damage from the aura, and thus can move about freely. If necessary and useful, one or more of them uses the other exit to the chamber and runs around to attack the characters from another side.
Features of the Area

**Cold Forges**: The two forges in the room burn with blue flames of cold. When the Winter King was first cursed by the Raven Queen, he came to the forges to try to burn the curse away. Instead the flames transformed and became eternal chillfires.

A chillfire deals 1d8 cold damage to a creature that enters it or ends its turn within it.

A character who puts a weapon or implement into the chillfire of a forge causes it to flicker with wisps of blue fire. As long as the weapon or implement is not extinguished or used to attack, it shines like a torch with flickering blue light. The next attack the character makes with the enflamed weapon or implement deals 1d8 extra cold damage on a hit.

**Crates**: The crates and barrels contain supplies for the forge, such as iron and coal. They are difficult terrain and provide cover.

**Water Barrels**: These ornate barrels contain water for cooling items taken from the forge. At this point, the water in each of them is frozen solid. The barrels are difficult terrain and provide cover.

**Treasure**

Anger wears three gold earrings set with tiny rubies worth 20 gp each. In addition, he wears the fire key around his neck on a thick gold chain worth 20 gp.

The enchanted fire key is burning hot to the touch and deals 5 fire damage to any creature that ends its turn carrying it. It has no intrinsic value beyond melting the ice that fills area 13 (page 17). Once it has been used to cause the ice to evaporate, it vanishes in a flash.

**Development**

If it looks to Anger as though he will outlast the ogre and his blazing skeletons, he attempts to escape, shouting for help as he does so. His first choice is to go toward the barracks in hopes of finding allies. (The Winter King might punish him for his failure, so he avoids the throne room.) If the characters have not yet explored area 7, perhaps Anger flees there. Otherwise, his escape should provoke an encounter with him and a guard patrol (encounter 10, page 30).
**Encounter 7: Audience with the Queen**

**Encounter Level 5 (1,000 XP)**

**Setup**

Azrinda, gnome illusionist (G)

4 grasping zombies (Z)

Hootie, young owlbear (O)

Read or paraphrase the following when the characters enter this room:

A dank prison confronts your senses when you open the door. Cages line the walls. Most are occupied by unmoving corpses, and the smell of rot fills your nostrils. Something huge covered with fur slumbers fitfully in the farthest cage, but a whisper draws your attention to the nearest. In the shadows of that cage you hear the weak voice of the woman you spoke to through the door, “Thank Sehanine you came!”

She’s lying on her side, her arm outstretched and her hand between the bars of her cell. She seems near death.

Azrinda has cloaked herself in the illusion of what she thinks the characters expect of the Winter Queen: a middle-aged but still beautiful human woman, gaunt and pale with blonde hair and wearing a tattered blue dress with its jewels and finery torn from it. She is barefoot and wears no jewelry. A DC 21 History check allows a character to realize that no Queen of Winter was ever affiliated with the Winter King.

If her sister Zanna has made it here from encounter 1 (page 6), she plays the roll of a weeping lady in waiting, frightened of the characters. She’s lying on her side, her arm outstretched and her hand between the bars of her cell. She seems near death.

Azrinda wants the characters to believe that she can help them defeat “my husband, the cruel Winter King” if Azrinda says the corpses are zombies waiting for Azrinda’s command, and the furred thing in the largest cage is her pet owlbear, Hootie, which Azrinda says will be meat for the king’s kitchen. Azrinda says that the corpses draw your attention to the nearest. In the shadows of that cage you hear the weak voice of the woman you spoke to through the door, “Thank Sehanine you came!”

She’s lying on her side, her arm outstretched and her hand between the bars of her cell. She seems near death.

She is barefoot and wears no jewelry. A DC 21 History check allows a character to realize that no Queen of Winter was ever affiliated with the Winter King.

If her sister Zanna has made it here from encounter 1 (page 6), she plays the roll of a weeping lady in waiting, frightened of the characters. She’s lying on her side, her arm outstretched and her hand between the bars of her cell. She seems near death.

Azrinda wants the characters to believe that she can help them defeat “my husband, the cruel Winter King” if Azrinda says the corpses are zombies waiting for Azrinda’s command, and the furred thing in the largest cage is her pet owlbear, Hootie, which Azrinda says will be meat for the king’s kitchen. Azrinda says that the corpses
were travelers through the mountains who were killed by the Winter King’s servants, yet a close examination (DC 14 Perception check) reveals that they resemble some of the warriors from the sky ship. See “Development” for more advice about how to handle the encounter.

Tactics

When combat breaks out, Azrinda calls for the zombies to arise and for Hootie to awaken. She brings her powers to bear against the characters from inside the cage, using it as cover unless that becomes impractical. Then she unlocks it by using a minor action (if the characters haven’t done so already) and tries to move behind any of her allies for protection. If both Azrinda and Zanna are in the combat, they both use *disguise self* to appear as the Winter Queen, and then both use *there, not there* at the same time in hopes of thoroughly confusing the characters. The zombies and the owlbear move toward the nearest prey and attack mindlessly.

Features of the Area

**Cages:** The side of a cage blocks movement and provides cover against melee attacks. A locked cage door can be opened with a DC 21 Thievery check or a DC 21 Strength check. If a character wants to attack the bars to escape, at least one bar must be broken to squeeze through (AC 8, Fortitude 8, 30 hp; immune poison, psychic, necrotic, and attacks that target Will).

**Well:** This well contains icy but drinkable water.

Development

If the characters ignore Azrinda’s pleas through the door and continue on their chosen path, she waits a few rounds before she gathers her forces and follows the characters. Like other people in the Winter King’s Realm, Azrinda wants to take the characters and the ice scepter to the Winter King so that she can attack them with the king’s help. Azrinda’s ploy is a dangerous one, however, because no Winter Queen ever existed in conjunction with the Winter King. She’s hoping the characters’ ignorance of the ancient past is as great as her ignorance of the present, but in case it’s not, she has ordered Hootie to follow after her if she leaves the prison, and the zombies are ordered to follow Hootie. In this way she hopes to have her allies with her when she takes the characters to the Winter King or in advance of their next fight.

If the characters fight her in the prison, Azrinda is as concerned for her skin as Zanna was. She tries to flee when bloodied, but only if her sister Zanna is dead or comes with her. If she gets away, she goes to join the Winter King in his throne room.

Treasure

Azrinda has a purse hidden under her clothes (DC 10 Perception when searching her) with 45 gp and a golden ring set with a blue topaz worth a total of 100 gp.
ENCOUNTER 8: WHAT’S FOR DINNER?
Encounter Level 4 (975 XP)

Setup
3 dwarf brawlers (D)
1 otyugh (O)
Ravide the Black, human transmuter (H)

Recently thawed, Ravide the Black and his companions are here trying to warm up and find food. They aren’t expecting trouble, and they don’t know why they were frozen or who the characters are, and they are not aware that the Winter King wants the ice scepter. When the characters arrive, they are suspicious but not hostile.

When the characters enter or look into this area, read:
This room appears to be a kitchen. You smell some wood smoke, but the dominating odor comes from a slowly thawing refuse pit on one side of the room.

A thin male human stands next to a fireplace, squeezing water from his black robes and shaking it from his black hair while three dripping dwarves with ice still in their beards open drawers and cupboards looking for something.

“Have you found any food yet?” the man groans while pouring water out of one of his boots. The dwarves only grumble in reply.

If the characters are openly carrying the ice scepter, Ravide and the dwarves are on their guard, asking why the characters have it as they reach for weapons. Otherwise, Ravide is more interested in gaining information than in fighting.

Ravide the Black is vain, egotistical, and cranky from his long freeze. The first thing he says when he sees the characters is, “Who are you? Were you frozen too?” Ravide wants to know why he was frozen, for how long, and if the Winter King still lives. He assumes so, since he himself has survived.

The dwarves do remember who was with them when they were frozen, but it takes them a while to come to a whispered consensus. They alert Ravide the Black when they agree, and this event might start a fight depending on Ravide’s disposition toward the characters at that point.

Tactics
When a fight breaks out in this chamber, Ravide stays away from the refuse pit and uses capricious earth to slide characters into it or next to it. He delights in using beast curse to turn the characters into piglets, fish, or ducks, and then threatening to make a meal of them. However, Ravide is nothing if not an opportunist. If he can switch sides and save his skin, he does so in a heartbeat.

The dwarves do remember who was with them when they were frozen, but it takes them a while to come to a whispered consensus. They alert Ravide the Black when they agree, and this event might start a fight depending on Ravide’s disposition toward the characters at that point.

The dwarves attack in melee or hurl handaxes. They also do their best to stay away from the refuse pit.

The otyugh, hidden in the refuse pit when combat begins, surges to grab at any creature that ends up adjacent to the pit. It pulls victims down to it, and a fall into the pit deals only 1d6 damage due to the cushioning of the refuse. If a couple of rounds pass during which the otyugh cannot attack a creature, it attempts to climb out, anxious for the taste of warm flesh after its long, cold sleep.
Features of the Area

Fire: A character who starts his or her turn in a square of the fireplace or moves into one takes 5 fire damage. The fireplace sheds bright light out to 10 squares, effectively illuminating this entire area except for the refuse pit.

Refuse Pit: This pit is 10 feet deep and has uneven sides that require a DC 14 Athletics check to climb.

Development

If the characters don’t kill Ravide the Black, he could make an interesting person for them to interact with over time, whether he’s an ally or enemy. Ravide might share some of his knowledge about treasure troves of the ancient world—if the characters agree to his terms.

The dwarves were not part of the clan that held these halls. In fact, they were from a clan that had long been at war with them, and they allied with the Winter King to crush their enemies. If they learn how long it has been since the clan they know of was alive, they side more firmly with the Winter King out of despair, seeing him as the only part of their lives that is a constant.

If the characters haven’t dealt with Anger and his allies in encounter 7 (page 24), a combat here alerts the tiefling to danger, and he sends a blazing skeleton to look for a guard patrol. When you run encounter 7, subtract one blazing skeleton but have it arrive with a guard patrol (encounter 10, page 30) a few rounds into the battle.

Treasure

Ravide the Black has 50 gp and two 50 gp rubies in a bag on his belt.
Attempt to engage in diplomacy before or during the battle. Use the Words Winter King attacks the characters or demands they kneel before him, depending on their actions. Use the Words Against the Winter King skill challenge if the characters attempt to engage in diplomacy before or during the battle.

Treat any attempt to influence the Winter King as a skill challenge. Successes in this skill challenge result in the wearing down of the Winter King’s resolve.

Tactics
The Winter King uses his powers mercilessly, often demanding his ice scepter and promising to turn the characters to ice unless they surrender. He uses the ice chandeliers against the characters whenever possible.

Skill Challenge: Words Against the Winter King
Treat any attempt to influence the Winter King as a skill challenge. Successes in this skill challenge result in the wearing down of the Winter King’s resolve.

Allow each character to make one skill check per round as a free action, but if the character also attacks in that round, the attempt automatically results in a failure.

If the characters lack the ice scepter, the Winter King ruthlessly attacks them, shouting for any allies to come to his aid. Attempts to influence him with words automatically fail unless the characters are begging for mercy and a chance to return with the Winter King’s coveted scepter.
ENCOUNTER 9: UNCROWN THE WINTER KING

Level: 4 (XP 175).
Complexity: 1 (requires 4 successes before 3 failures).

The primary skill that a character uses on a check depends on what the character says to the Winter King or how the character says it. The six skills listed above are the ones most likely to come into play; imaginative players might devise uses for other skills that would also be appropriate. Every skill check in this challenge has a DC of 14.

Success: The Winter King’s confidence crumbles as the characters get the better of him with their words, and he takes 50 damage as a result. If you like, the characters can attempt this skill challenge multiple times. If the final damage the Winter King takes is dealt through succeeding on this skill challenge, the king turns to solid ice that then cracks apart into tiny pieces until only the crown of winter remains.

Failure: The Winter King is done with listening! Now nothing will appease him but freezing the characters solid.

Features of the Area

Icy Pool: The pool of water by the main entrance is covered in a thin layer of ice that breaks as soon as a character enters one of the squares. A character who enters or ends its turn in the icy pool takes 5 cold damage. Leaving a pool square requires a DC 14 Athletics check and an extra square of movement.

Spirit Ice: The bridge across the pool is made of ice within which swirl the groaning faces of ghosts. These spirits undermine the characters’ confidence by whispering pleas that the characters not anger or fight the Winter King. They tell the characters to be humble and to kneel before him. The bridge is difficult terrain and exiting a square requires a DC 10 Acrobatics check. Failure results in the characters falling prone in a random adjacent square (roll a d8). During combat with the Winter King, a character who ends his or her turn on one of the bridge squares or enters one takes 10 necrotic and cold damage.

Tapestries: These brittle but beautiful tapestries are made of solid ice. A secret door hidden behind the northernmost tapestry (DC 21 Perception check to discover it) leads to area 19.

Fallen Pillars: The area covered by the fallen pillars is difficult terrain.

Treasure

The Winter King wears the crown of winter.

Crown of Winter

Level 8 Rare

This imposing crown appears to be made of ice and is chilly to the touch.

Item Slot: Head

3,400 gp

Property: You gain resist 5 cold.

Power (Encounter ✫ Cold, Psychic): Immediate Reaction, Trigger: An enemy damages you. Effect: The triggering enemy takes 5 cold and psychic damage, and it is immobilized until the end of its next turn.

Power (Daily): Free Action, Trigger: You make an attack roll for a cold power and dislike the result. Effect: You reroll the attack roll and use the new result.

Development

If the characters are brought to the throne room by enemies, the enemies join the battle when it starts or start the battle the first time the characters succeed on the skill challenge. Once the characters have defeated the Winter King, they can explore parts of the dungeon they might have missed or return outside. Turn to “Concluding the Adventure,” page 31, when the characters have failed or are ready to leave.
ENCOUNTER 10: GUARD PATROL

Encounter Level 3 (850 XP)

Setup

1 gnome spy
3 town guards
4 tiefling hoodlums

The statistics blocks on this page describe unfrozen troops from area 11 on patrol. They might be searching for the characters, walking about on guard, searching for other servants of the Winter King who might have been unfrozen, or on an errand for another person. Perhaps they have a survivor of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger of the travelers whom they took custody of after he was questioned about the present day by someone such as Anger.

Before they were frozen, these warriors were considered the elite among the Winter King’s soldiers. They had the pick of the loot from raids and had the best accommodations. They are loyal to the Winter King because they believe his power will rise again; the winter that grips the land for hundreds of miles is proof of that.

Tactics

The guards are hostile to the characters (they know they were not among the frozen warriors), but if the guards have a specific mission, they might make a fighting retreat and attempt to go around the characters.
CONCLUDING THE ADVENTURE

If the characters fail, the Winter King does not stop the winter until he reclaims his ice scepter. His army thaws, and he sets about carving a new kingdom from the lands south of the Nentir Vale.

If the characters prevail, they can claim the treasures of the Winter King. His unnatural winter ceases, becoming an unnatural spring, which in turn becomes a warm and welcome summer. A second season of growth and renewal begins, and the dead crops of the lands affected by winter regrow with stunning abundance. People all over the area praise Pelor, but the people of Fallcrest save special thoughts of thanks for the characters.

Iced Adventurers

Any creature turned to ice by the Winter King’s touch can be turned back to normal by placing the crown of winter upon the character (A DC 21 Arcana check deduces this).

The Sky Ship

When the characters exit the dungeon, read: The freezing valley in which you landed has been transformed. The snow is gone, and the sky above the mountains is a beautiful blue. A few spring flowers poke up among the rocks, waving in gusts of warm wind. Atop an escarpment of stone, the sky ship shines in the light like diamond. It has been transformed into solid ice!

If the characters investigate the sky ship further, its dragon figurehead appears to awaken, and it speaks to them: “My magic is melting, like a snowflake in summer’s sun. He who wears the winter crown can take me upon a final journey. But hurry. Time is short.”

The figurehead then subsides and says no more. The characters can freely board and row the ship away into the sky, whereupon it takes them on a much less perilous journey back to Fallcrest or to wherever they decide to go. Alternatively, the ship might melt after the flight, stranding them in the location of a new adventure.

The Army on Ice

Unless they are somehow dealt with by the characters, the frozen forces of the Winter King gradually thaw. Some see the characters as saviors. Others believe they owe the characters nothing, but they see the death of the Winter King and their awakening to a new world as a chance to start over. The rest are craven, selfish, ambitious, or evil individuals who hope to start where they left off, gaining power and wealth for themselves. One or two might become determined foes of the characters. It’s up to you.

The Cairn of the Winter King

The Winter King’s realm gradually thaws, becoming yet another dungeon inhabited by whatever creatures find it useful (perhaps by enemies or allies of the characters). The Cairn, with its skulls frozen in place, remains as a constant reminder of the past.

Other Characters

If Marko Lancet is still alive, he is grateful to the characters but not inclined to stay with them and face more dangers. Nor is he looking forward to returning to Fallcrest; he’s not certain he would receive the happy welcome likely to be given to the characters. Marko hikes out of these mountains once before, and he’s willing to do it again. He says his goodbyes, gathers what supplies he can, and sets out.

If the characters brought allies with them from Fallcrest, those individuals are eager to return home. If the characters decide to head a different direction, they might prefer to go with the characters rather than risk the long journey home alone, but eventually they grow tired of danger.

If the characters befriended anyone from the dungeon, the result of that alliance is up to you and the actions of the characters. Anyone from the Winter King’s forces has a lot to learn about the present and the intervening years.

Fallcrest

The next time the characters enter Fallcrest, a great cry goes up about their return, and they receive a heroes’ welcome. The new spring and summer brought unprecedented harvests, and the town is beautiful with flowers and greenery. An impromptu celebration breaks out in the streets with the characters carried upon the shoulders of the townsfolk and handed food and drink all the way up to Moonstone Keep, the Lord Warden’s residence, where the festivities continue well into the night.

The townsfolk are true to their word about free lodging, goods from shops, mounts, and so on. Construction has already begun on the Tower of Waiting in the river, and in about a month the characters will have a fine home in Fallcrest. In addition, the results of the characters’ actions have so exceeded the Lord Warden’s expectations that he gives them a common level 4 magic item (pick one or allow the players to pick one) and 500 gp as an additional reward.

Further Adventures

The characters might have more adventures in Fallcrest, the Frostjaw Peaks, or with the Turnfin halflings as they travel downriver. You might decide to give the characters the ability to use the teleportation circle to return to the cairn, whereupon they might find it repopulated with a new mix of creatures.
CAIRN OF THE WINTER KING

1 square = 5 ft.
MONSTERS READY TO PLAY RIGHT OUT OF THE BOX

This essential supplement for Dungeon Masters collects the most iconic monsters of the Dungeons & Dragons® Fantasy Roleplaying Game in one handy box and presents all-new variants of such beloved monsters as dragons, orcs, and vampires. The monsters featured herein are easy for Dungeon Masters to use and fun for players to fight. In addition to combat statistics, all monsters come with story information to help DMs incorporate them into their adventures and card stock tokens for use on battle maps.

Contents:
- 320-page book of monsters
- "Cairn of the Winter King," a 32-page adventure featuring monsters in this box
- Double-sided, foldout battle map
- 10 sheets of die-cut monster tokens
