INTRODUCTION

LEGENDARY ACTIONS ARE ONE OF THE COOLEST, most memorable aspects of fifth edition for me. As a DM, they allow you to make dynamic choices throughout a combat round, not just relying on a single action to make a huge impact. This element of unpredictability keeps the more tactics-minded players guessing as well, which is likely a big reason they come to the table.

Fifth edition’s legendary actions address one of the biggest problems in previous editions: ‘big bads’ often needed a lot of minions to survive more than a couple of rounds against cunning players. This never felt quite right for every ‘boss’ encounter; sometimes a creature is solitary and should be fearsome on their own.

With the success of Legendary Bestiary: Legendary Actions for Low-Level Monsters, we wanted to take these ideas and apply them across the fifth edition landscape, travelling where Volo and Mordenkainen have stepped and taking a look toward the worlds of Ravnica and Eberron.

HOW TO USE THIS BOOK

We wanted this book to be as easy to use at the table as possible. You get exactly what is on the tin: legendary action options for CR 1–3 monsters and NPCs from Volo’s Guide to Monsters, Mordenkainen’s Tome of Foes as well as the setting guides Guildmasters’ Guide to Ravnica and Eberron: Rising from the Last War. You can either look up a creature ahead of time and create a ‘boss’ version of them, or even add to a planned encounter on the fly. The latter option is particularly great if the player characters have blown through what you thought were some really challenging encounters and you still want to test their mettle.

DESIGN AND CHALLENGE RATINGS

As we worked through this project, we wanted to hold ourselves to a few design constraints, which I hope we have successfully delivered:

- When possible, creatures should have a mix of low- and high-impact legendary actions. These range from simply moving to a whole new mechanic for the creature.
- Since these are lower-CR creatures, no legendary action should grant ‘free damage.’ Damaging actions should require specific set up or other circumstances or have multiple ways to defend against it.
- Deliver on the theme of the existing creature; a legendary berbalang should not become a huge hulking brute.

Adding legendary actions to a lower-CR creature certainly makes for a more difficult encounter. We have not recommended a specific CR increase, but if you use traditional XP for character advancement, you may want to consider offering an additional 50% or so XP for defeating a legendary creature.

You may also decide to introduce one of these legendary creatures to a higher-level party than their CR would typically merit. If you do this, you may want to consider raising the creatures AC, hit points, attack modifier, or spell save DC. There’s a great ‘cheat sheet’ for that on the Blog of Holding, which you can find here: Blog of Holding

We hope you enjoy what’s inside, and thank you for your support!

CHALLENGE RATING 1 (CR1)

The monster can take 1 legendary action, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. The monster regains spent legendary actions at the start of its turn.

CLAWFOOT

Opportune Hunter. The clawfoot moves up to 15 feet towards a hostile creature it can see, or up to 30 feet if the creature is prone.

Snarl. One creature that the clawfoot can see within 15 feet of it must succeed on a DC 10 Wisdom saving throw or become frightened of it until the end of the clawfoot’s next turn.

IRON DEFENDER

Defensive Intercept. The iron defender moves up to half its speed towards its creator. Opportunity attacks made against it as a result of this movement have disadvantage.

Living Burning Hands

Overcharge. Creatures that hit the iron defender with a melee attack before the start of its next turn must succeed on a DC 13 Constitution saving throw or lose their reaction.

Threat Assessment. The iron defender makes a Wisdom (Perception) check focused.

LIVING BURNING HANDS

Arcane Interrupt. Creatures within 10 feet of the living spell that are concentrating on a spell must make a DC 10 Constitution saving throw to maintain concentration.

Flash Point. The living spell ignites a flammable object within 10 feet of it that isn't being worn or carried.

Transference. The living spell teleports to an unoccupied space within 30 feet of it that is adjacent to a burning flame.
CHALLENGE RATING 2 (CR2)

The monster can take 2 legendary actions, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. The monster regains spent legendary actions at the start of its turn.

INSPIRED

**Inspired Defense (Cost 2 Actions).** The inspired targets a hostile creature it can see within 30 feet. The inspired makes a Wisdom (Insight) check contested by the target’s Charisma (Deception) check. If the inspired wins the contest, the target’s attacks against the inspired have disadvantage until the end of its next turn.

**Psionic Glimpse.** Hostile creatures within 10 feet of the inspired glimpse the visage of the quori spirit within. They must succeed on a DC 13 Wisdom saving throw or become frightened of the inspired until the end of their next turn.

**Whispered Insight.** The inspired whispers telepathic instruction to a friendly creature it can see within 30 feet of it. The target creature has advantage on its next attack roll before the end of its turn.

TARKANAN ASSASSIN

**Aberrant Energy (Costs 2 Actions).** On the assassin’s next turn, its Unstable Mark feature deals force damage as if it rolled 8 on the damage die. The assassin takes half this damage if any creature is harmed by this feature.

**Parasitic Dragonmark.** The assassin gains temporary hit points equal to its Constitution modifier if any creature within 10 feet of it is concentrating on a spell.

**Vanish.** The assassin takes the Hide action.

UNDYING SOLDIER

**Aereni Vigor.** The soldier gains temporary hit points equal to its Constitution modifier if it has another undying within 5 feet of it.

**Discipline.** The soldier rerolls a saving throw against being turned or frightened.

**Rally Up.** The soldier moves up to its speed to an unoccupied space within 5 feet of another undying.
**CHALLENGE RATING 3 (CR3)**

The monster can take 3 legendary actions, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. The monster regains spent legendary actions at the start of its turn.

**DOLGAUNT**

**Eerie Perception.** The dolgaunt pinpoints the location of a creature within 300 feet of it until the end of its next turn, even if the target creature is outside the range of its blindsight. The dolgaunt can’t target a creature that is actively hiding with a result greater than its passive Perception.

**Khyber’s Command (Costs 2 Actions).** The dolgaunt commands a dolgrim it can see within 30 feet of it to attack. The dolgrim can make one weapon attack as a reaction against a creature within reach.

**Lifethirst.** The dolgaunt regains hit points equal to its Constitution modifier if it has at least one creature grappled by a tentacle.

**KARRNATHI UNDEAD SOLDIER**

**Defensive Stance.** The soldier gains +1 to its AC until the start of its next turn or until it uses this legendary action again.

**Grasp of Mabar.** The soldier’s next weapon attack deals cold damage instead of its normal damage type.

**March of Bones.** The soldier moves up to half its speed. It has resistance to nonmagical bludgeoning, piercing, and slashing damage during this movement.

**WARFORGED SOLDIER**

**Ever Forward.** The warforged moves up to half its speed in a straight line.

**Soldier’s Eye.** The warforged targets a creature it can see within 30 feet of it; the first attack roll it makes against that creature before the end of its next turn is made with advantage.

**Strength in Numbers (Costs 2 Actions).** The warforged gains a bonus to its AC equal to the number of friendly warforged within 5 feet of it, up to +4. This bonus lasts until the end of its next turn.

---

**After the Last War,**

Derivative joined a paramilitary organization called the Talon Band. The warforged rose through the ranks quickly and completed critical missions.

Breland offers a bounty for the capture of the warforged soldier, who is charged with sabotage and grand larceny.

Derivative is disappointed by the measly sum Breland offers and hopes to accrue more during its next covert operations.
The monster can take 1 legendary action, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. The monster regains spent legendary actions at the start of its turn.

**Category 1 Krasis**

**Major Combat Mutation.** The category 1 krasis takes 2 (1d4) necrotic damage and rolls on the Major Adaptations table (see p. 210 of Guildmasters’ Guide to Ravnica) to induce a sudden mutation and improve its combat characteristics.

**Average Combat Mutation.** The category 1 krasis gains a random mutation from the Average Mutation table. The mutation lasts until the end of its next turn.

**Project Force.** The galvanice weird casts the ray of frost cantrip (+3 to hit).

**Shock Therapy (Recharge 6).** The galvanice weird casts the shocking grasp cantrip (+3 to hit). On a hit, the target is stunned until the end of its next turn.

HYBRID POISONER

Poison Glob. The hybrid poisoner casts the fire bolt cantrip, which deals poison instead of fire damage.

Poison Mist. A creature within 5 feet of the hybrid poisoner must succeed on a DC 12 Constitution saving throw or become blinded until the end of its next turn.

Reposition. The hybrid poisoner moves up to half of its speed and takes the Hide action.

HYBRID SHOCKER

Discharge (Recharge 6). The hybrid shocker casts the chromatic orb spell, dealing lightning damage. As long as Discharge has not recharged, the hybrid shocker’s Electrified Body trait is inactive.

Overcharge (Recharge 6). The hybrid shocker overcharges its body, takes 18 (4d8) necrotic damage, and produces a blinding light. Creatures within 15 feet of the hybrid shocker must succeed on a DC 12 Constitution saving throw or are blinded for 1 minute. A target can repeat its saving throw at the end of its turn, ending the effect on a success.

Strangle. A creature grappled by the hybrid shocker’s tentacle must succeed on a DC 10 Strength saving throw or take 2 (1d4) bludgeoning damage.

INDENTURED SPIRIT

Collect Debt. If the spirit occupies the space of another creature, the creature must succeed on a DC 12 Constitution saving throw or take 2 (1d4) necrotic damage. The spirit gains temporary hit points equal to the damage dealt.

Lawyered. If the spirit occupies the space of another creature, it whispers stories about Orzhov Syndicate lawyers into the creature’s ear. The target must succeed on a DC 12 Intelligence saving throw or take 2 (1d4) psychic damage and be frightened of the spirit until the end of its next turn.

Repossess (Recharge 3-6). If the spirit occupies the space of another creature, it attempts to possess its body. The creature must succeed on a DC 12 Wisdom saving throw or comes under the spirit’s control. The spirit can use an action to make an attack or cast a spell during the target’s next turn. At the end of the target’s next turn, the spirit exits its body in an unoccupied space within 5 feet of it.

“Two things are certain in life: undeath and taxes.” — Orzhov saying
RAKDOS PERFORMER

Horrific Performance. The performer makes a DC 16 Charisma (Performance) check. If it succeeds, it deals 3 (1d6) damage to itself and forces creatures other than Cult of Rakdos guild members within 30 feet that can see the performer to make a DC 12 Wisdom saving throw. On a failure, the target is frightened of the performer until the end of the performer’s next turn.

In Rakdos’ Name. The performer makes a DC 16 Charisma (Performance) check. If they succeed, they summon a cackler (GGtR) in an unoccupied space within 5 feet. The cackler disappears in a puff of smoke after 1 minute or when it is reduced to 0 hit points. The cackler acts on the performer’s turn but does not follow their commands, although it generally acts in accordance to Rakdos’ goals. The performer can have one cackler summoned in this way at a time.

THOUGHT SPY

Combat Analytics. The thought spy attempts a DC 15 Wisdom (Perception) check to discern a creature’s weaknesses. On a success, the thought spy gains advantage on its next attack against the target.

False Foresight. The thought spy attempts to cast detect thoughts on a creature. As long as the spell is active, the target’s attacks against the thought spy have disadvantage.

Observe. The thought spy moves up to 20 feet and takes the Hide action.

CHALLENGE RATING 2 (CR2)

The monster can take 2 legendary actions, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature’s turn. The monster regains spent legendary actions at the start of its turn.

COUNTERFLUX BLASTSEEKER

Detonate. If the blastseeker controls a sphere created through its Counterflux Overcast, it destroys the sphere. Creatures inside the sphere, including the blastseeker, must make a DC 14 Dexterity saving throw or take 7 (2d6) force damage or half damage on a successful one. Any advantage or disadvantage conferred by the sphere affects this saving throw.

Prepare. Until the end of the blastseeker’s next turn, if the blastseeker is subjected to an effect that allows it to make a Dexterity saving throw to take only half damage, it instead takes no damage if it succeeds on the saving throw, and only half damage if it fails.

Untap. The blastseeker rolls to recharge its Counterflux Overcast.

The lab lay in ruin, countless delicate instruments blown across the streets; the homes nearest the blast sit askew on their foundations now. But the experiment was a success! Blastseeker Xir was sure to rise in the League.
**HYBRID BRUTE**

*Hook Claw.* The hybrid makes a special attack (+6 to hit) against a target within reach. This attack does not deal damage, but if it hits, the target is knocked prone.

*Pursue.* The hybrid moves up to 30 feet toward a hostile creature.

*Temporary Growth.* The hybrid’s limbs grow longer until the end of its next turn, increasing their reach to 10 feet.

**HYBRID FLYER**

*Armor Meld.* The hybrid pulls its gliding wings into itself, melding the flesh with its body to create a semi-solid carapace. The hybrid loses its flying speed but gains a +3 bonus to its AC. The hybrid can use this legendary action again to regain their flight speed, losing the bonus to AC.

*Erode Armor (Costs 2 Actions).* The hybrid spits acid on a character wearing nonmagical metal armor or wielding a nonmagical metal shield. If the target fails a DC 13 Dexterity saving throw, the armor or shield takes a permanent and cumulative −1 penalty to the AC it offers. Armor reduced to an AC of 10 or a shield that drops to a +0 bonus is destroyed.

*Flutter.* The hybrid flies up to 15 feet away. This movement does not provoke opportunity attacks.

**RAKDOΣ LAMPOONER**

*Cantrip.* The lampooner casts a cantrip.

*Charming Performance (Costs 2 Actions).* The lampooner makes a DC 16 Charisma (Performance) check. If it succeeds, it deals 3 (1d6) damage to itself and forces creatures other than Cult of Rakdos guild members within 30 feet that can see the lampooner to make a DC 14 Wisdom saving throw. On a failure, the target is charmed by the lampooner until the end of the lampooner’s next turn.

*Feint.* The lampooner makes a DC 16 Charisma (Deception) check against a target within 5 feet. If the lampooner succeeds, it has advantage on its next attack against the target.

**SKYJΕK ROC**

*Eagle Eye.* The roc makes a Wisdom (Perception) check.

*Snatch.* The roc attempts to grapple a Medium or smaller creature within 5 feet. If it succeeds, it can fly up to half its speed.

*Swoop.* The roc flies up to half its speed. If it passes within 5 feet of a hostile creature that can be frightened, that creature must succeed on a DC 12 Wisdom saving throw or fall prone.
CHALLENGE RATING 3 (CR3)

The monster can take 3 legendary actions, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. The monster regains spent legendary actions at the start of its turn.

FLYING HORROR

Consume Fear (Costs 2 Actions). The horror psychically feasts on the fear it has sown. Creatures within 10 feet of the horror that are frightened due to its Frightening Screech are no longer frightened and the horror gains 2 temporary hit points per target.

Deep Breaths. The horror rolls to recharge its Frightening Screech.

Weaken. The horror chooses a creature within 30 feet of it that is immune to its Frightening Screech. The target loses its immunity.

PRECOGNITIVE MAGE

Search the Timestream. Roll a d6, on a 5 or 6, the mage regains a use of its Precognitive Insight.

Second Chance. The mage allows an allied creature within 30 feet of it that it can see to repeat a saving throw against an ongoing magical effect.

Temporal Shift (Costs 2 Actions). The mage chooses its initiative for the next round. After that round, it continues to act on its normal initiative.
CHALLENGE RATING 1 (CR1)

The monster can take 1 legendary action, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature’s turn. The monster regains spent legendary actions at the start of its turn.

BRONZE SCOUT

*Enhance Sensors.* The bronze scout gains tremorsense out to a range of 60 feet until the end of its next turn.

*Rolling Charge.* The bronze scout curls up into a ball and rolls up to 60 feet toward a target. If the bronze scout rolls at least 10 feet, the target must make a DC 13 Strength saving throw or be knocked prone.

*Thrash.* The bronze scout churns up the ground under it, creating a 5-foot-square area of difficult terrain. The bronze scout is immune to difficult terrain created in this way.

CHOKER

*Lurk.* The choker moves up to 15 feet and takes the Hide action.

*Schloop.* The choker slingshots itself up to 20 feet in a straight line toward a creature it has grappled. This movement does not provoke opportunity attacks and can extend beyond the grappled creature; the grappled creature serves as an anchor point.

*Smash Prey.* If the choker has two targets grappled, it slams them together. Each target takes 5 (1d4 + 3) bludgeoning damage and must make a DC 15 Constitution saving throw or become stunned until the end of the next turn.
**DUERGAR SOULBLADE**

*Break Free.* The duergar rerolls a saving throw for any one effect that has charmed or paralyzed it. The duergar’s Duergar Resilience trait applies to this saving throw.

*Overload Soulblade.* The duergar pours their psychic energy into their soulblade, taking 1d8 psychic damage. If the duergar makes a successful attack with the soulblade before the end of their next turn, the attack deals an extra 1d6 psychic damage and knocks the target prone. The soulblade becomes unstable and vanishes at the end of the duergar’s turn.

*Psychic Shove.* The duergar telekinetically shoves a creature it can see within 30 feet of it. If the target fails a DC 12 Strength saving throw, they fall prone or are pushed 5 feet directly away from the duergar.

**FEMALE STEEDER**

*Hang Up.* The steeder attaches a creature it has grappled to a surface. The escape DC remains unchanged.

*Goo Trap.* The steeder secretes goo and covers the 5-foot square it occupies with the sticky substance and moves up to 5 feet. Creatures that move into the space must succeed on a DC 12 Strength saving throw or are stuck, reducing their speed to 0. A target can use its action to attempt a DC 12 Strength (Athletics) check to wrestle itself free. The goo loses its potency after 1 minute.

*Shove.* The steeder makes an attack (+5 to hit) to shove a creature 5 feet away from it.

**MEAZEL**

*Artificial Night (Recharge 6).* The meazel casts *darkness*, through which it can see.

*Chill Touch.* The meazel casts the *chill touch* cantrip, requiring no somatic components.

*Little Helper.* While in dim light or darkness, the meazel summons a *crawling claw* that acts after the meazel’s turn. The meazel can control three crawling claws at a time.

**STONE CURSED**

*Eldritch Whisper.* The stone cursed murmurs maddening words into a creature’s ear within 5 feet that can hear it. The target must succeed on a DC 12 Wisdom saving throw or become frightened of the stone cursed until the end of its next turn.

*Harden.* The stone cursed’s AC increases to 19 until the beginning of its next turn. Until then, it can’t make opportunity attacks.

*Siphon.* The stone cursed draws strength from its victims. For each petrified creature within 30 feet of the stone cursed, discounting other stone cursed, it gains 5 temporary hit points.

---

*During a terrible famine, a halfling once killed his brother over the last wedge of cheese. Ashamed by his deed, he escaped into the shadows. Now, he goes by the name of Garot and hunts for other kinds of food.*
The monster can take 2 legendary actions, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. The monster regains spent legendary actions at the start of its turn.

**ADULT KRUTHIK**

*Burrowing Escape.* The kruthik Disengages and burrows up to 20 feet.

*Call the Pack.* The kruthik chitters and hisses, allowing any other kruthik within 60 feet of it to use their reaction to move up to their movement toward the kruthik.

*Reaping Swipe.* The kruthik makes an attack (+5 to hit) against a target within reach. If the attack hits, instead of dealing damage, the target falls prone.

**BERBALANG**

*Astral Jump.* The berbalang teleports to its duplicate's location and dismisses the duplicate.

*Spectral Spy (Costs 2 Actions).* The berbalang's spectral duplicate becomes invisible until it attacks.

*Whispers of Dead Gods (Costs 2 Actions).* Choose a cleric spell of 3rd level or lower. The berbalang has a 25% chance of casting the spell using Intelligence as its spellcasting modifier (spell save DC 13).

**DUERGAR HAMMERER**

*Punishing Upgrade.* The hammerer takes 5 (1d8) psychic damage as it drains the pilot, fueling its systems for 1 minute. Choose one of the following:

- +10 movement speed.
- Gain a burrow speed of 10 feet.
- Resistance to bludgeoning, piercing, or slashing damage (choose one) from nonmagical attacks.

You can choose each of these options more than once. Each time you use this legendary action after the first, the damage increases by 1d8.

*Pained Scream.* If the hammerer has 15 or fewer hit points, the hammerer’s pilot lets out a psychically charged howl. Creatures within 10 feet of the hammerer must make a DC 12 Wisdom saving throw or take 4 (1d6) psychic damage.

The Broker, as it calls itself, is possibly the most well-known berbalang in the multiverse. It offers its wealth of knowledge for sale and hunts down the most obscure lore—for outrageous prices. Most often, it demands the bones of ancient dragons or other, even more ancient, evils.
DUERGAR KAVALRACHNI

Cavalry Charge. If the duergar is mounted on a female steeder, it takes the Dash action.

Evasive Actions. Attacks made against the duergar’s female steeder mount have disadvantage until the end of the duergar’s next turn.

Steeder Slam. If the duergar’s female steeder mount has grappled a target, the duergar commands the steeder to slam it into the ground, dealing 4 (1d6) bludgeoning damage.

DUERGAR MIND MASTER

Illusory Decoy. The duergar creates an illusion of itself as if it had cast the silent image spell (spell save DC 12). The duergar does not need to concentrate on this effect. The illusion persists until the end of the duergar’s next turn when it disappears, as if becoming invisible. This legendary action does not break the duergar’s invisibility.

Mind Games. The duergar rolls to recharge its Invisibility action.

Quick Escape. The duergar moves up to 15 feet and takes the Hide action.

DUERGAR STONE GUARD

Blood Bond. The stone guard psychically binds itself to a duergar it can see within 30 feet of it, sharing in its pain. If the target takes damage before the end of the stone guard’s next turn, half of the damage is transferred to the stone guard.

Deathly Sacrifice. The duergar takes 1d8 psychic damage and heals an ally within 30 feet of it that it can see for the same amount.

Liege Guard. The duergar moves up to 25 feet toward an ally. Until the end of the duergar’s next turn, the ally has +2 to their AC if they remain within 5 feet of the duergar.
**DUERGAR XARRORN**

**Choking Exhaust.** The duergar’s fire lance spews thick black smoke in a 10-foot cone. Any creature in the area must make a DC 12 Constitution saving throw or spend their action on their next turn choking and coughing.

**Guiding Charge.** The duergar loads a special psionically powered charge into its fire lance. The next time the duergar makes a successful attack with its fire lance, the next attack against the target made before the end of the duergar’s next turn has advantage.

**Load Fuel.** The duergar rolls to recharge its Fire Spray action.

**OGRE BOLT LAUNCHER**

**Angry Idiot.** The ogre makes a Bolt Launcher or Fist attack against a target that used words the ogre cannot understand (such as casting a spell with verbal components or speaking in an unknown language) this round.

Renewed Bloodlust (Costs 2 Actions). The redcap rubs its hat on a hostile creature within 5 feet of it that doesn’t have all of its hit points. The redcap has advantage on attack rolls until the end of its next turn.

Fight Me! The redcap hollers and bangs its sickle on the ground, challenging anyone nearby. Until the beginning of the redcap’s next turn, attacks against it have advantage, but attacks against any of its allies have disadvantage, if the attacker can see the redcap.

To Battle! The redcap uses the Dash action. If it is under the effects of its Renewed Bloodlust legendary action, it can make an attack at the end of this movement.
