Opus of Extrinsic Substance

0 - 9th level Conjuration, Force, Illusion, Necrotic, Psychic, and Radiant spells
WHILE NATURE MAY BE HARNESSED AS A powerful weapon of creation and destruction, a great deal of magic's power and scope lie far beyond the limitations of the natural world. Such spells are anchored in what lies beyond the understanding those not familiar with arcane studies in metaphysics.

This collection of arcane manifestations contains spells that can be harnessed through study or powers borrowed from beings beyond the mortal world. Such spells rarely ever occur naturally.

These magical effects will prove rare compared to those found in the Players Handbook, but should do much to embolden practitioners in aetherian magic, encompassing lost things that lie beyond the physical planes.

A NOTE ON DESIGN

It was my intention, when tackling this fairly sizable project, to approach each spell as though it were a single tool available in an expansive toolbox. Not all spells will seem useful compared to others of the same level, but particular spells will be incredibly potent in the hands of specific builds or thematically appropriate for certain characters. The intent was to give unique options for each of the six aetherian classifications.

I attempted to keep the power of each spell relative to the various spell levels, as related in the Dungeon Master's Guide. My one design goal was to ensure each spell was enjoyable, thematic, and easy for the dungeon master to adjudicate.

With those philosophies in mind, I deemed to design spells that complimented the offerings already on-hand for each of the aethers already present in Dungeons and Dragons covering the themes of the environmental manipulation, creature control, and unstoppable forces such as gravity, light, and darkness.

If a spell seems too strong, take into consideration the damage type, the area of effect, the number of creatures affected, and casting ranges. It may seem overly powerful for a spell to multiply the gravity in a given location until one of your companions is dragged into it screaming “Oh no, my bones; I need those to do things!”

An aether, we’ll define, is any metaphysical element that composes the universe. The following 6 aethers populate this opus of spells: conjuration, force, illusion, necrotic, psychic, and radiant.

Through the folding of space or time and the manipulation of natural energies to form physical creatures or objects, conjurations are harnessed. Most conjurations are temporary, though high level effects can be permanent.

Creatures or objects made through conjuration magic deal the damage inherent to the form that was manifested. When used to transport creatures or objects, conjuration magic varies widely from caster to caster: some slip through slivers cut into the fabric of reality while others forcibly tear open such portals with sheer force of will.

The manipulation of gravity, the use of non-elemental damage, and manifestation of magical barriers fall into the category of force. Force damage is a special type of magical damage that circumvents not only the elements but typed damage present in spells (bludgeoning, piercing, and slashing damage).

Very few creatures have resistance or immunity to force damage. It is considered the most reliable damage type for spell effects.

The manifestation of physical sensations perceivable by creatures are deemed illusions. Many such illusions are non-corporal and cannot be touched or interacted with directly, though high level practitioners of magic have been known to manifest physical objects based on illusions.

Illusions can sometimes be so realistic as to cause damage to a creature that witnesses them. Such damage often mirrors that of an effect that is harmful to the creature, such as fire, or damages the creature's mind in the form of psychic damage.
**Necrotic**

In direct opposition to positive energy and radiant energy, necrotic magic is the absorption, destruction, or corruption of life. Necromatic energy can imbue corpses with unlife, causing them to rise as undead creatures.

Necrotic damage is the antithesis of vitality. It can cause living flesh to decay, induce torpor, and draw essential components of life from creatures, such as water or heat. Ancient dead are often immune to such life-destroying magic.

**Psychic**

Magical abilities sometimes target the mental processes of a creature, beyond their physical bodies. Such spells and spell-like abilities can warp how a creature perceives reality, disrupt their thoughts, or cause harmful psychic damage.

While illusions can trick the senses, effects brought on by psychic energy are completely realistic to targeted creatures.

**Radiant**

The overabundance of vitality, light, and positive energy manifests itself as radiant energy. Even angels, born of the astral essence of benevolent gods, can be seared by spells that harness pure radiance.

Many sources of radiant damage are divine in nature but can be harnessed from the natural creation of light. Even still, it is inherently formed of positive energy.

**1st – 9th Level**

Learned through study, natural ability, or bestowed by a powerful being, spells of 1st through 9th level vary widely and require great effort from those who cast them.

**Hush**

*1st-level illusion*

*Casting Time:* 1 action  
*Range:* 60 feet  
*Components:* S, M (a strip of wet leather, braided cloth, or spool of thread)  
*Duration:* 1 minute

One creature you can see within range loses the ability to speak, vocalize, or communicate audibly for the duration. While under the effect of this spell, an illusory impediment appears on or over the creature’s mouth, if it has one, such as a cloth gag, a metal plate, chains, or stitches.

As an action, the target can make a Charisma check opposed by your spell save DC. On a success, the spell ends on the target.

**Mind Wrack**

*1st-level evocation*

*Casting Time:* 1 action  
*Range:* 30 feet  
*Components:* V, S  
*Duration:* Instantaneous

Form a crippling blast of psychic energy in the mind of a creature within range. The target must make an Intelligence saving throw, taking 2d10 psychic damage on a failed save or half as much damage on a successful one.

A creature concentrating on a spell or magical ability takes additional psychic damage equal to its Intelligence modifier and makes its Constitution saving throw made to maintain concentration on the spell or ability at disadvantage.

**At Higher Levels.** When you cast this spell using a spell slot of 2nd level or higher, the spell’s damage increases by 1d10 and 5 for each slot level above 1st.

**Shatter Shield**

*1st-level abjuration*

*Casting Time:* 1 reaction

Opus of Elemental Substance

which you take when you are hit by an attack

*Range:* Self  
*Components:* S, M (an piece of polished shale)  
*Duration:* Instantaneous

A bubble of arcane force absorbs the damage of an attack before bursting into a powerful shockwave. You gain damage reduction against the triggering attack.

Each Huge or smaller creature within 5 feet of you must succeed on a Strength saving throw or be knocked prone.

**Sinkhole**

*1st-level conjuration*

*Casting Time:* 1 action  
*Range:* 60 feet  
*Components:* V  
*Duration:* Instantaneous

You cause a 15-foot square of earth, stone, or wood that you can see within range to collapse. A Huge or smaller creature in the area when this spell is cast must make a Dexterity saving throw. On a failed save, the creature is trapped inside the sinkhole.

While trapped, its speed is reduced to 0. As an action, the trapped creature can make a Strength check opposed by your spellcasting ability modifier. On a success, it frees itself from the collapsed ground.

Additionally, the ground in that area becomes difficult terrain until cleared away. Each 5-foot-square portion of the area requires at least 1 minute to clear by hand.

**Witness Devotion**

*1st-level evocation*

*Casting Time:* 1 action  
*Range:* 30 feet  
*Components:* V, S  
*Duration:* Concentration, up to 1 minute

Infuse your holy symbol with undeniable divine energy. A creature of your choice that can see you within range must succeed on a Charisma saving throw or take your choice of 2d8 radiant or necrotic damage.

A creature that takes damage from this spell has its speed reduced to 0 for the duration. The spell ends early on that creature if it can no longer see the holy symbol, if you move from the space in
which the spell was cast, or cast a spell that does not target the affected creature.

The target can use an action to make a Charisma check opposed by your spellcasting ability modifier. On a success, the spell ends on that creature.

**Wounding Bolt**

**Casting Time:** 1 action  
**Range:** 60 feet  
**Components:** V, S, M (a strip of gangrenous flesh preserved in amber)  
**Duration:** Concentration, up to 1 minute

Hurl an orb of necrotic energy at one creature you can see within range. Make a ranged spell attack. On a hit, the target takes 2d8 necrotic damage. For the duration, any time the target would regain hit points, the creature instead regains none and takes necrotic damage equal to your spellcasting ability modifier.

**At Higher Levels.** When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d8 for each slot level above 1st.

**Blockade**

*2nd-level conjuration*

**Casting Time:** 1 action  
**Range:** 60 feet  
**Components:** V, S, M (a disk of adamantine worth 50 gp)  
**Duration:** Concentration, up to 1 minute

You create a wall of shimmering force on a solid surface within range. The wall is 10 feet wide, 10 feet high, and 1 inch thick.

The wall has AC 15 and 50 hit points. The spell ends early if the wall is reduced to 0 hit points. A disintegrate spell destroys the wall completely. Creatures and objects cannot pass through the barrier. If the wall cuts through a creature's space when it appears, the creature is pushed to one side of the wall (your choice which side).

As an action you can slide the wall along the ground 5 feet in any direction. When the wall enters a space occupied by a creature, the creature must succeed on a Strength saving throw or be pushed 5-feet back by the wall. On a successful save, the creature and the wall do not move.

**At Higher Levels.** When you cast this spell using a spell slot of 3rd level or higher, the wall's hit points increase by 5 for each slot level above 2nd.

**Conjure Monstrous Hound**

*2nd-level conjuration*

**Casting Time:** 1 action  
**Range:** 30 feet  
**Components:** V, S, M (a crystal sculpture of a hound worth 25 gp)  
**Duration:** 10 minutes

You summon an otherworldly spirit that takes the form of a grotesque, unnatural mastiff which appears in an unoccupied space that you can see within range. The mastiff is also considered a monstrosity, and it disappears when it is reduced to 0 hit points or when the spell ends. The DM has the mastiff's statistics.

When summoned, the mastiff gains temporary hit points equal to half of your hit point maximum and gains a bonus to its attack and damage rolls equal to your spellcasting ability modifier.

The hound is friendly to you and your companions and shares your initiative in combat. It obeys any verbal commands that you issue to it (no action required by you). If you don't issue any commands, it acts with reckless abandon, attacking the nearest creature or object it can see.

**At Higher Levels.** When you cast this spell using a spell slot of 3rd level or higher, the amount of temporary hit points gained by the hound increases by 5 for each slot level above 2nd.

**Death’s Breath**

Flood a 10-foot radius sphere with negative energy. Creatures in the area must succeed on a Constitution saving throw or take 5d6 necrotic damage.

A corpse in the area of this spell when it is cast becomes invested with a malevolent spark of unlife and lashes out at a creature within 5 feet of it. Make a melee spell attack. On a hit, the target takes bludgeoning damage equal to 1d6 + your spellcasting ability modifier.
Glittering Veil

Range: 120 feet (60-foot cube)
Components: V, S, M (a diamond worth 50 gp)
Duration: Concentration, up to 1 minute

A flash of brilliance comes to life at a point within range and expands to fill a 60-foot cube for the duration. The area is bright light. You can choose up to 3 creatures to not be affected by the spell when you cast it.

Any other creature that ends its turn in the area must succeed on a Constitution saving throw, taking 2d6 radiant damage on a failed save or half as much damage on a successful one.

At Higher Levels. When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d6 for each slot level above 2nd.

Muffled Celerity

2nd-level illusion

Casting Time: 1 action
Range: Touch
Components: S, M (a pouch filled with wool and toenail clippings)
Duration: 1 hour

A creature you touch makes no sound while moving at half speed or slower. The illusion muffles such noises as footfalls, the sounds of equipment being jostled, and the swish of fabric from clothing or a cape. It does not conceal outside sources of noise, such as a kicked pot or dropped weapon.

Creatures take a -10 penalty to Wisdom (Perception) checks made to detect the target through hearing.

Transfix

2nd-level enchantment

Casting Time: 1 action
Range: 30 feet
Components: V, M (a length of braided silk rope)
Duration: Concentration, up to 1 minute.

You lace mundane words and movements with engrossing magic. Up to 2 creatures of your choice that can see and hear you within range must make an Intelligence saving throw. Any creature that can’t be charmed succeeds on the saving this saving throw automatically. On a failed save, the target cannot willingly move more than 30 feet away from you for the duration and spends its action on each of its turns gazing at you, captivated. On a successful save, the target is unaffected and is unaware a spell was cast on it.

The spell ends early if the target takes damage or is forced to make a saving throw.

Conceal Contents

3rd-level illusion

Casting Time: 1 hour
Range: Touch
Components: V, S, M (a blank sheet of parchment)
Duration: Instantaneous

You infuse a powerful illusion into a single tome or container weighing no more than 10 pounds such as a journal, spellbook, bag, or lockbox.

All script inside a book targeted by this spell, including on the cover, is obscured with magical illusions that make it impossible to read by anyone other than the caster or creatures designated by the caster when this spell is cast.

Any creature attempting to decipher the illusory text must succeed on a Wisdom saving throw or be forced to return the book to the caster, as though under the effects of a suggestion spell.

A container targeted by this spell appears empty upon visual inspection. Any contents are rendered invisible and give off no odor. The illusion ends of the contents of the container are removed or the container is destroyed.

Icon of Decay

Range: Touch
Components: V, M (a small onyx box worth 150 gp filled with skin from a humanoid cadaver)
Duration: 24 hours

You target a non-magical object no larger than a 10-foot cube. The target is imbued with an aura that draws life from all living creatures near it.

Each creature that ends its turn within 30 feet of the icon takes 2d6 necrotic damage. Creatures in the area cannot regain hit points and make death saving throws at disadvantage.

Undead and constructs are unaffected by this spell. Corpses inside the area of this spell...
deteriorate 10 times faster than normal.

If you cast this spell over 24 hours, the duration increases to 10 days.

**Icon of Renewal**

*3rd-level evocation*

**Range:** Touch  
**Components:** V, S, M (a platinum oil lantern worth 200 gp)  
**Duration:** 24 hours

You target a non-magical object no larger than a 10-foot cube. The target is imbued with an aura that bombards all creatures near it with waves of positive energy.

Each creature that starts its turn within 30 feet of the icon takes 2d6 radiant damage. Creatures that are not undead or constructs within the area regain an additional 1d6 hit points when healed by magic.

A creature that has 0 hit points takes no damage from this spell and is instead stabilized at the start of its turn.

If you cast this spell over 24 hours, the duration increases to 10 days.

**Instant Traversal**

**Casting Time:** 1 minute  
**Range:** Touch  
**Components:** V, M (an amethyst or amethyst dust worth 5 gp which the spell consumes)  
**Duration:** Instantaneous

Trace an arcane glyph onto an object that weighs no more than 10 pounds. The arcane mark sheds dim light out to a distance of 5 feet.

While within 1 mile of the glyph, you can use a bonus action to teleport yourself to an unoccupied space within 5 feet of the item, which appears in your open hand. The glyph then disappears from it.

**At Higher Levels.** When you cast this spell using a spell slot of 5th level or higher, the number of creatures that can be grappled by the spell increases by 1 for every two slot levels above 3rd.

**Magnetize**

*3rd-level enchantment*

**Casting Time:** 1 action  
**Range:** Touch  
**Components:** V, M (a disk of pure iron)  
**Duration:** 1 minute

You infuse an object no larger than 5 feet on a side that is not being worn or carried with arcane energy. For the duration, the item is immovable while in contact with a surface. You can use a bonus action on each of your turns to cause the enchanted object to draw in one creature of your choice within 20 feet of it. The target must make a Strength saving throw. On a failed save it is pulled adjacent to the enchanted object and is grappled for the spell’s duration. A creature weighing 1,000 pounds or more automatically succeeds on the saving throw against this effect.

Only one creature can be grappled by this spell at a time. A grappled target can use an action to make a Strength check against your spell save DC. On a success, the creature breaks free.

**Mental Vortex**

*3rd-level evocation*

**Casting Time:** 1 action  
**Range:** 60 feet  
**Components:** S, M (a pouch of sapphire dust worth 500 gp)  
**Duration:** 1 minute

You disrupt the concentration of one creature with an Intelligence of 6 or higher that you can see within range. The target must make an Intelligence saving throw. On a failed save, the target has disadvantage on Intelligence, Wisdom, and Charisma checks for the duration.

**Armor of Brilliance**

*Components:* S, M (a 1-inch rod of onyx and platinum worth 50 gp)

Each creature within 10 feet of the corpse must make a Constitution saving throw, taking necrotic damage on a failed save or half as much damage on a successful one. The damage dealt is equal to the hit dice the corpse had in life, such as 2d6 for a goblin or 7d10 for an owlbear. A creature killed by this spell explodes as though this spell were cast on it.

*At Higher Levels.* When you cast this spell using a spell slot of 6th level or higher, the radius of the explosion increases to 20 feet at 6th level and 30 feet at 8th level.

**False Face**

5th-level illusion

**Casting Time:** 1 action  
**Range:** 30 feet  
**Components:** V, S  
**Duration:** Concentration, up to 1 hour

You make a single humanoid target within range – including its clothing, armor, weapons, and other belongings – look different until the spell ends, until the target takes damage, or until you use your action to dismiss the spell early.

You can make the target appear up to 1 foot shorter or taller and can appear thin, fat, or in between. You can't change the target's body type, so you must adopt a form that has the same basic arrangement of limbs. Otherwise, the extent of the illusion is up to you.

The changes wrought by this spell fail to hold up to physical inspection. For example, if you use this spell to add a hat to a target's outfit, objects pass through the hat, and anyone who touches it would feel nothing.

To discern that the target is disguised, a creature can use its action to inspect its appearance and must succeed on an Intelligence (Investigation) check against your spell save DC.

You have advantage on Charisma checks made to influence the slaad but it is not under your control.

Any creature that ends its turn within the storm must make a Strength saving throw, taking 8d6 bludgeoning damage on a failed save or half as much on a successful one.

A creature weighing 1,000 pounds or less that fails its saving throw is also lifted 50 feet off the ground, suspended inside the storm. The area of the spell is heavily obscured and ordinary projectiles fired into or through the storm are deflected upward and automatically miss.

A creature caught in the cyclone can move through flight or by pushing or pulling against a fixed object within reach, such as a tree, wall, or ceiling. Because of the force of the storm, though, the creature must make a successful Strength (Athletics) check against your spell save DC in order to move at all. If it fails the check, it can’t move. A creature that moves out of the area falls to the ground.

Nothing can physically pass through the barrier and it is immune to all damage. A creature that touches the wall or hits it with a melee attack takes 15d10 force damage and is pushed 10 feet directly away from it.

The wall also extends into the Ethereal Plane, blocking ethereal travel through it. You are made aware when the wall is attacked or dispelled while you are on the same plane of existence as it.

Cerebral Mimicry

If the creature is using a spell-like ability, such as a Behir’s lightning breath, you can use an action to copy the effect exactly before finishing your next short or long rest. The ability uses the save DC, attack bonus, and ability modifier of the creature that cast it. This spell can’t copy legendary or lair actions.

Gloom Pyre

9th-level evocation

If the illusion is purposefully harmful to the target, it takes 30 points of psychic damage at the start of each of its turns. Each time the target takes this damage, it can repeat the saving throw, ending the spell on a successful save.

If this spell is cast targeting the construct, it gains temporary hit points equal to five times your spellcasting ability modifier.

You can’t have more than one construct created by this spell at a time. Future castings of this spell can manifest the same construct or a new one. As an action, you can cause a manufactured construct to disappear.
