One of the most difficult and time-consuming chores facing potential HERO System GMs, particularly those running Fantasy Hero games, is the need to create spells for the campaign. Unless the GM is willing to let the players create their characters' spells, he has to go to considerable effort to design the spells characters can choose.

To help the GM with this task, The HERO System Grimoire presents thousands of pre-generated spells in a wide variety of categories — alchemy, necromancy, divine magic, and more. If you can't find the spell you want in this book, you can easily use its contents as guidelines for designing your own spells.

Spell Categories

For ease of reference, The HERO System Grimoire divides spells into 28 categories, or "arcana," based on special effect, common use among gamers and in fiction, and so forth:

Alchemy, the Art of creating potions, elixirs, and the like by mixing and activating various substances and, in the process, unlocking the magical essences within them.

Arcanomancy, spells pertaining to magic, fundamental magical forces, and spellcasting.

Areomancy, also known as Battle Magic, spells for use in warfare.

Black Magic, spells that invoke evil energies or which spellcasters use for particularly evil ends.

Chaos Magic, the wizardry of the powerful but unpredictable force called Chaos.

Conjuration, the Art of summoning beings from this and other planes of existence, and of controlling and banishing them.

Cybermancy, magic dealing with machines, technology, and related phenomena.

Divination, the Art of finding and foretelling.

Divine Magic, the sacred and holy spells cast by priests, paladins, and other characters associated with the gods.

Druidry, spells relating to, using, or affecting animals, plants, and nature in general.

Elemental Magic, spells related to the four classical Elements — Air, Earth, Fire, and Water — as well as "lesser" substances or phenomena sometimes regarded as "Elements" in gaming settings (such as Ice and Light).

Enchantment, the Art of casting spells through enchanted items.

Monster Magic, spells learned and cast by various types of monsters.

Naming Magic, spells that derive their power from the caster's knowledge of the target's True Name.

Necromancy, magic pertaining to life, death, undeath, and related subjects, usually considered a black and evil Art.

Oriental Sorcery, magics derived from Asian occultism, folklore, myth, and philosophy.

Professional Magic, spells that adventurers and everyday folk in High Fantasy campaigns use to make their jobs easier and safer.

Rune Magic, the magic of carved and painted runes of power.

Shamanism, magic involving spirits and the Spirit World.

Song Magic, spells cast by or involving singing, poetry, jests, and the like.

Sorcery, magics of the mind, thought, illusion, and deception, regarded by many with suspicion and fear.

Superheroic Thaumaturgy, the body of common spells known to mystics in the Champions Universe setting.

Thaumaturgy, the Art of transforming, altering, and redirecting energies and matter, including shapeshifting and related spells.

Theurgy, magics pertaining to Divine and Infernal powers, and to the celestial bodies of the night sky.

Voodoo, fictional magics based on the mystic/religious practices of Voodoo.

Warrior-Magery, spells that enhance characters' ability to fight in melee combat.

Witchcraft, an Art combining various lesser aspects of other arts, such as Alchemy, Conjuration, Druidry, Elemental Magic, and Necromancy, as well as hedge magics and other "low spells," but no less powerful than the other arcana for all that.

Wizardry, a catch-all term for magic and spellcasting in general, but also used to refer to any spells or bodies of mystic lore not a part of any other arcana, such as spells of general utility (e.g., spells that detect or dispel magic), naming-magic, spells of sheer mystic power, and the like.

Spell Design

Spells are most commonly (though not exclusively) used in Fantasy Hero campaigns, and in the vast majority of those campaigns tend to have certain aspects or elements in common. In keeping with this approach, most spells in The HERO System Grimoire are designed with the following Limitations:

- OAF (often an Expendable Focus of some kind)
- Gestures
- Incantations
- Requires A Magic Roll (all spells use “Magic Gestures, and Incantations are the most common.

The options (described below) typically provide information about removing or changing these Limitations to make it easy for you to “customize” the spells to suit your campaign's magic system.

THE SPELL TEMPLATE

This book describes each spell with a standard template. The information provided applies only to the standard spell; the options may have different areas of effect, ranges, END costs, and so forth.

Name indicates the name of the spell. You can, of course, rename it to suit your character or campaign if you prefer.

Effect lists the basic game effect of the spell in simple terms: Blast 8d6, Armor Piercing; Desolildification; Telekinesis (30 STR). This tells you quickly what a spell can do so you don't have to delve into the full game write-up when making your selections.

Target describes who or what the spell affects. An attack spell usually indicates "one character" or the area covered due to the Area Of Effect Advantage. "Self" indicates the spell only works on the character using it (though it may still "affect" other characters; for example, other characters can perceive the effects of Shape Shift, even though it's a "Self" spell.)

Casting Time indicates how long it takes to cast a spell. Most are Half Phase and/or Attack Actions.

Casting Procedures lists the procedures a character has to go through to cast a spell. Focus, Gestures, and Incantations are the most common.

Duration lists the spell's duration, typically Instant, Constant, or Persistent (see 6E1 127-28). Some spells use the Time Limit rules (see 6E1 346-48) or even do Damage Over Time (see 6E1 328-31)

Range lists the range for the spell. Ranged spells usually have a range in meters (Base Points x 10m in most cases), but may have “LOS” (Line Of Sight) or "RBS" (Range Based On STR) range.

"No Range" indicates the spell has No Range; "Self" that the spell only affects the character using it; “Touch” that the spell involves having to touch another character (which usually requires an Attack Roll).

Magic Roll Penalty indicates the penalty to the character’s Magic roll. Typically this equals the spell’s Active Points divided by 10.

END Cost lists the spell’s Endurance cost (in the case of potions and enchanted items, this may be Charges instead).

Description provides a (usually brief) textual description of the spell. This section notes any special rules or rules applications relevant to the spell.

Game Information is a full write-up of the spell in game terms, including Active Point and Real Point costs. (If only one point total is listed, that means the Active and Real Point costs are the same.) Depending on the nature of the campaign’s magic system, the Real Point cost may be what a character has to pay to learn the spell, or the cost may be different (for example, in some systems all spells have a flat cost of 1-3 points).

OPTIONS

Most spells have Options listed below the game information. These describe various standard ways to alter the spell to create a slightly different ability. The standard options for most spells include:

Strong: A version built with more Active Points than the standard version.

Weak: A version built with fewer Active Points than the standard version.

Free: A version with the Focus Limitation (typically either -1 or -1¼) removed. (If the spell doesn't ordinarily have a Focus, this may change to Focused, an option applying that Limitation to the spell.)

Remove A +¾ Advantage: A version with +¾ less value of Advantages than the standard version (if it has any Advantages). Most commonly this is used to:

- remove Reduced Endurance (½ END; +¼), or reduce Reduced Endurance (0 END; +½) to Reduced Endurance (½ END; +¼), so that the spell costs full/partial END

Remove A +½ Advantage: A version with +½ less value of Advantages than the standard version (if it has any Advantages). Most commonly this is used to:

- remove Reduced Endurance (0 END; +½) so that the spell costs END

Remove A -¾ Limitation: A version with -¾ less value of Limitations than the standard version. Most commonly this is used to:

- remove Gestures (-¼) (a "Stilled" spell)
- remove Incantations (-¼) (a "Silenced" spell)
- reduce the Requires A Magic Roll penalty to -1 per 20 Active Points (rather than the usual -1 per 10 Active Points) (an “Easy” spell)
- convert an Expendable OAF (if valued at -1¼) to an ordinary OAF (-1)
**Remove A -½ Limitation:** A version with -½ less value of Limitations than the standard version. Most commonly this is used to:
- remove Gestures (-¾) and Incantations (-¾) (a "Silent" spell)
- remove Requires A Magic Roll (-½) (a "Master’s" spell)
- convert an Expendable OAF (if valued at -½) to an ordinary OAF (-1)

**Add A +¼ Advantage:** A version with an additional +¼ Advantage, or which has an existing Advantage increased by +¼ value. Most commonly this is used to:
- make a spell cost Reduced Endurance (½ END; +¼), or make one that already has Reduced Endurance (½ END; +¼) cost Reduced Endurance (0 END; +½)
- add Armor Piercing (+½)
- add Delayed Effect (+¼)
- add Usable By Other (+¼) so a character can cast the spell on another person instead of just on himself

**Add A +½ Advantage:** A version with an additional +½ Advantage, or which has an existing Advantage increased by +½ value. Most commonly this is used to:
- make a spell cost Reduced Endurance (0 END; +½)
- add Area Of Effect (1m Radius Accurate; +½)
- add Constant (+½)
- add Delayed Effect (x2 spells usable at once; +½)
- add Line Of Sight (+½) or No Range Modifier (+½)
- add Penetrating (+½)

**Add A -¼ Limitation:** A version with an additional -¼ Limitation, or which has an existing Limitation increased by -¼ value. Most commonly this is used to:
- make a spell take Concentration (½ DCV; -¼) to cast (an "Attentive" spell)
- add Side Effects (-¼) (an "Apprentice’s" or "Dangerous" spell)

**Add A -½ Limitation:** A version with an additional -½ Limitation, or which has an existing Limitation increased by -½ value. Most commonly this is used to:
- make a spell take Extra Time (Full Phase; -½) to cast (a "Lengthy" spell)
- make a spell have Increased Endurance Cost (x2 END; -½) to cast (a "Tiring" spell)
- require the caster to touch the target (i.e., add No Range (-½)) to affect him
- increase the Requires A Magic Roll penalty to -1 per 5 Active Points (rather than the usual -1 per 10 Active Points) (a "Difficult" spell)
- add Side Effects (-½) (an "Apprentice’s" or "Dangerous" spell)

**VARYING EFFECTS**

Some of the spells in this book have aspects or effects that improve if the spellcaster makes his Magic roll by a significant amount. Typically this applies to the Duration of Time Limit spells. For example, a spell might have a Time Limit duration of "5 Minutes, +1 Minute per point by which the caster succeeds with his Magic roll." In this situation, the GM may wish to impose some restriction on the absolute effect, such as double the base parameter, to keep wizards with high Magic rolls from unbalancing the game.

**How To Use This Book**

The HERO System Grimoire is a game aid for both players and GMs. It allows GMs to start campaigns with nothing but a few limitations or a few spells, and lets players select spells for their characters without having to spend time calculating costs. It's particularly helpful for campaigns where spellcasters can buy spells in Multipowers or Variable Power Pools.

**WHAT THIS BOOK IS NOT**

Having noted what this book is, it's also important to note what it is not.

First, it's not a book of magical items, except insofar as the "spells" of the Alchemy and Enchantment categories require the book to include such items. The topic of enchanted items is vast enough to merit a book of its own. However, you can easily convert most of the spells in this book to enchanted items by applying the appropriate Power Modifiers, such as Focus and Charges.

Second, it's not comprehensive. No one book could describe every possible spell any one gamer — or even entire teams of gamers — could create using the HERO System. Instead, The HERO System Grimoire provides reasonable coverage of the major types of magic found in most campaigns. It should not only help you when designing characters, but hopefully inspire you to create other spells using your imagination and the rules.

Third, it's not a blank permission slip to use any of these spells in your game. Some of these spells are powerful, with high Active Point costs, and may not be appropriate for every campaign. The GM should approve the use of any spells from the Grimoire.

Fourth, and most importantly, this book is not a straitjacket. You can often build a particular spell two or more ways using the HERO System rules, so don't let the fact that this book chooses a particular method deter you from doing something else if you prefer. Rarely, if ever, is there an "official" way to build any given spell using the HERO System. The options provided for each spell often describe alternate ways of creating it to help spur your imagination.

**OTHER RESOURCES**

Hero Games publishes many other books gamers may find useful when selecting or designing spells. These include:

- The HERO System Bestiary, a collection of hundreds of monsters and animals that will provide any GM with plenty of adversaries for the PCs.
- HERO System Martial Arts, which contain dozens of martial arts abilities you could convert into spells.
- Champions Powers, which lists thousands of superpowers you can easily convert into spells by applying appropriate Limitations (OAF, Gestures, Incantations, Requires A Skill Roll, and the like).
- Fantasy Hero, which has an entire chapter devoted to creating magic systems, spells, and enchanted items in HERO System terms.
Alchemy is the art of creating potions, elixirs, salves, unguents, and the like by mixing and activating various substances and, in the process, unlocking the magical essences within them. Alchemists can also create some magical constructs, such as golems. They spend long hours in their laboratories and workrooms, brewing potions based on time-tested formulae and trying to devise newer, more powerful potions of their own. Since most alchemists sell potions to adventurers, one who creates a useful new potion can become quite wealthy.

The potions and other items below are created using the rules on pages 322-24 of Fantasy Hero. Because they’re built with Delayed Effect, you need to establish a way to calculate how many potions an alchemist can normally have at once. These writeups assume that an alchemist can have, for the base +¼ value of Delayed Effect, no more than INT/2 of his own potions available for use at any time (“available for use” includes giving them to another person friendly to him, but not selling them to a stranger). Any character may have ready for use as many found or purchased potions as he likes (subject of course to the GM’s approval). “Potions” in this sense means anything created by Alchemy other than a construct, including salves, dusts, and the like.

In the potion write-ups, Concentration, Extra Time, and Requires A Magic Roll are Storing Limitations; they apply only to the creation of the potion, not its use.

**Target:** Special  
**Casting Time:** 1 Month  
**Casting Procedures:** Focus, Gestures, Incantations  
**Duration:** Instant  
**Range:** No Range  
**Magic Roll Penalty:** -18  
**END Cost:** 18  

**Description:** With this alchemical process, an alchemist can take a supply of metal (typically iron or steel), form and shape it into the semblance of a man (or the like), and then bring it to life with the help of certain formulae-inscribed amulets and invocations. The alchemist can only have one of these loyal, indefatigable servants in existence at a time.

Creating a metal golem requires a month of labor in forge, laboratory, and workroom, with breaks only to eat and sleep. Any significant interruption requires the caster to buy new amulets and begin the work all over again.

**Game Information:** Summon one metal golem built on 451 Total Points (see HSB 143), Slavishly Devoted (+1) (180 Active Points); OAF Expendable (metals necessary to form golem, including formulae-inscribed amulets, Very Difficult to obtain; -½), Concentration (0 DCV throughout casting; -1), Extra Time (1 Month; -5), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-½). **CONSTRUCTS**

Constructs are man-made objects animated by magic — golems and the like, though they can come in many different shapes than humanoid. The HERO System Bestiary has some example golems on pages 141-45, but clever alchemists could build many other types, or give the standard types additional powers. (Other types of spellcasters can often create golems as well; for example, in many settings priests can construct golems of clay.)

Arcanomancy

The mysterious spells of Arcanomancy deal with pure magical power itself. It allows a mage to manipulate, alter, or otherwise affect fundamental arcane energies, often to the detriment of other spellcasters. Most spellcasters consider Arcanomancy simply a branch of Wizardry, but many who have studied it in detail insist that it's an arcana of its own — albeit a small (but important) one.

Arcanomancy spells are relatively rare; one has to study this difficult arcana intensely to have any chance to learn them. (In some campaigns a separate form of Power: Magic Skill may be required, even if characters ordinarily only need one Skill to cast spells from any category.) Some are more potent versions of basic spells of Wizardry — improved because of the profound understanding arcanomancers have of magical forces.

**MAGOMORPHOSIS**

**Effect:** Major Transform 6d6 (one spell into another spell), Partial Transform

**Target:** One spell

**Casting Time:** Full Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 100m

**Magic Roll Penalty:** -10

**END Cost:** 10

**Description:** This special spell requires the GM’s permission, since it makes unusual use of the Transform Power and may be unbalancingly effective in some campaigns. It allows a spellcaster to transform one spell into another spell. He can do anything from simply changing the color or appearance of a spell to “reweaving” an entire spell so that it has a completely different effect from the spell cast. For example, he could change a Lightning Bolt spell into a Healing Spell!

For purposes of Magomorphosis, a spell’s “BODY” equals its Active Points (the GM can change the “BODY” if he feels a spell should be unusually susceptible or resistant to being transformed). The normal rules for Partial Transform apply; the caster can stop after achieving a Cosmetic or Minor Transform if he wants to.

A Cosmetic Transform result can change the appearance of a spell — its color, whether it gives off sparks of arcane energy, and so forth — but not its special effect or anything else. A Minor Transform can alter the special effects of a spell — making a Fire Spell into an Ice Spell, or a Necromancy Spell into a Druidry Spell — but can’t change the basic nature of the spell or alter the Powers involved. A Major Transform can completely change a spell — turn a damaging spell into a healing one, convert a movement spell into a defense spell — but the result must have Active Points less than or equal to the original spell.

A Major Transform result can improve a spell — add Advantages, remove Limitations, or add dice of effect or the like. To do this, you must recalculate the Active Points in the spell. The difference is treated as if the character were “adding or removing abilities” to/from the spell using the rules on 6E1 306-07, but the GM may impose a minimum increase in the “BODY” of the spell if desired. A Major Transform can make a spell worse (remove Advantages, add Limitations, reduce the dice of effect) just by succeeding; no change to the BODY required to transform the spell is required.

At the GM’s option, a Minor or Major Transform effect can simply increase (or decrease) a spell’s power, using the guidelines on 6E1 304.

Magemorphosis can only be used on a spell that’s in existence (because it’s a Constant, Persistent, or Time Limit effect); it cannot alter the existing effects of an Instant spell (the damage caused by a Blast, the effect of an Entangle, or the like). However, at the GM’s option, a spellcaster can Hold his Action and use Magomorphosis to “intercept” and change a spell as it’s being cast using the rule for Dispelling an incoming spell (6E1 193).

**Options:**

1. **Strong Spell:** Increase to Major Transform 8d6. 140 Active Points; total cost 28 points.
2. **Weak Spell:** Decrease to Major Transform 4d6. 70 Active Points; total cost 14 points.

**SPELL ABSORPTION**

**Effect:** Absorption 50 BODY (magical), Variable Effect (adds to any one Magic spell or power at a time)

**Target:** Self

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -7

**END Cost:** 7 to cast

**Description:** This spell allows a caster to create around himself a field of mystic energy that affects any magic used against him. It takes part of the power of the attack spell and uses it to enhance one of the caster’s own spells. This doesn’t protect the caster from the attack spell’s effects, but does augment his power.

For purposes of this spell, the character doesn’t define the Absorption as working versus physical or energy damage. Instead, he defines it as working against any sort of magical attack, be it energy or physical, but not against mundane attacks such as punches, sword-blows, or burning oil. At the GM’s option, the Absorption even applies against things like Drains, Dispels, Flashes, NND attacks, and the like (count the “Normal Damage BODY” to determine how much energy is available to Absorb), but not to Mental Powers.
**Game Information:** Absorption 50 BODY (magical), Variable Effect (adds to any one Magic spell or power at a time; +½) (75 Active Points); OAF Expendable (miniature net woven with cloth of silver threads, Difficult to obtain; -1¼), Costs Endurance (to cast; -¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 21 points.

12) **Expanded Spell II:** Increase to Expanded Effect + Variable Effect (any four Magic spells or powers at once; +2). 150 Active Points; total cost 43 points.

Points fade at the rate of 5 per 20 Minutes (+1½): 150 Active Points; total cost 43 points.
15) **Uncontrollable Spell:** The character casts the spell when he wants to, but has no control over what spell or magical power it feeds arcane energy to; the GM must determine that randomly. Add No Conscious Control (character cannot control what Absorption adds to; -1). Total cost: 17 points.

SPELL NEGATION

Effect: Magic Negation

Variable Power Pool

Target: Varies

Casting Time: Half Phase (Attack Action)

Casting Procedures: Focus, Gestures, Incantations

Duration: Varies (typically Instant)

Range: Varies

Magic Roll Penalty: Varies

END Cost: Varies

Description: This spell “unweaves” a magical effect at its most fundamental level, or perhaps somehow “reverses” the spell and thus removes its effect.

In game terms, the Spell Of Negation is intended to allow a spellcaster to cancel magical effects that can’t be removed with Drain, Dispel, or the like — in other words, the effects of Instant spells that last for a period of time after the casting of the spell itself. Examples would include removing an Entangle that's already in place or cancelling a Flash. The game mechanic used depends on the Power being negated, but the special effect is “using Arcanomancy to undo the magic.” For example, negating an Entangle might require Teleportation 1m, Usable As Attack, used against the victim; negating a Flash would require Flash Healing or granting the victim an appropriate Enhanced Sense.
Game Information: Magic Negation Pool: Variable Power Pool, 30 Pool + 30 Control Cost, Powers Can Be Changed As A Half Phase Action (+½); OAF (dulled silver dagger; -1), Gestures (-¾), Incantations (-¼), Only To Cancel Existing Magical Effects (-½), Requires A Magic Roll (-½). Total cost: 36 points.

Options:
3) Free Spell: Total cost: 36 points.

Areomancy, sometimes referred to as Polemancy, is the formal term for what most people call “Battle Magic” — spells intended for use in war that have battlefield-level effects, augment or harm large numbers of soldiers, and the like. Most offensive spells in this book work on the small group “tactical” level common to most HERO System campaigns; these spells affect much larger areas or a greater number of targets.

Many Areomancy spells involve conferring magical powers on large groups of soldiers. These spells often use the Differing Modifiers rules on 6E1 359, since the restrictions on how wizards cast them aren’t the same as the restrictions governing the use of the powers by the recipients.

**ARROWS APLENTY**

Effect: Major Transform 3d6 (create missile weapons out of thin air)
Target: See text
Casting Time: 1 Turn (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -4
END Cost: 4

Description: This spell creates arrows (or other missiles, such as sling bullets or javelins) out of thin air. Each casting creates one arrow for every 2 points rolled on the Transform.

Buying and using this spell requires the GM’s permission because it applies Transform in an unusual way. Ordinarily, characters should not use Transform to create weapons out of thin air; the proper way to do that is to buy an Attack Power with some form of the Usable On Others Advantage. However, in the case of creating “ammunition” like arrows or sling bullets, the Usable On Others approach raises some difficult issues, such as how long the arrows remain in existence and who can use them. The Transform method avoids those difficulties.
Game Information: Major Transform 3d6 (create missile weapons out of thin air, heals back by any attack that destroys the missiles), Improved Results Group (any type of missile; +¼) (37 Active Points); OAF Expendable (an unused arrow-shaft without fletchings or head, carved with mystic runes, Difficult to obtain; -1¼), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -¼), Gestures (throughout casting; -½), Incantations (throughout casting; -¾), Requires A Magic Roll (-½), Total cost: 5 points.

**LEGION OF ARROWS**

Effect: Area Of Effect (64m Radius; +1½) for up to a 45 Active Point missile weapon
Target: One character
Casting Time: 1 Turn (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -13
END Cost: 13

Description: This spell, when cast on an archer, causes the arrow he fires to multiply in flight and become so numerous that they strike every target in a 64m radius area. The archer has to Hold his Action until the wizard casts the spell, then let fly with the Advantage applied to his arrow. After striking their targets, the “extra” arrows vanish like morning mist in sunlight; the spell doesn’t create more ammunition for archers (enemy or otherwise) to use again.

This spell is built as a naked Area Of Effect Advantage sufficiently large to apply to a Very Heavy Longbow arrow, the most expensive weapon listed on page 195 of Fantasy Hero. The Usable As Attack Advantage allows the character to apply it to the archer with his own action and pay the END cost for it so the archer can fire unimpeded. Characters can apply it to other arrows, crossbow bolts, sling stones, thrown daggers, and other such missile weapons as well, provided they fit within the Active Point limit.

Game Information: Area Of Effect (64m Radius; +1½) for up to a 45 Active Point missile weapon, Usable As Attack (see text; +1½) (126 Active Points); OAF Expendable (three arrowheads, each used to kill someone, engraved with mystic runes, Difficult to obtain; -1¼), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-½), Spell (-½). Target: Area

Casting Time: Full Phase

Casting Procedures: Focus, Gestures, Incantations

Duration: Constant

Range: No Range

Magic Roll Penalty: -0

Description: This spell creates a barrier of mystic force that protects a castle or other structure (and thus, the people in it), provided the structure fits within a dome with a circumference of 800m. Target: 32m Radius
Casting Time: Half Phase (Attack Action)

Bl*ack Magic means spells used by evil spellcasters — or at least spellcasters who are willing to risk their souls trafficking with the dark powers. In many magic systems Black Magic is related to (or even a part of) Necromancy, Voodoo, or Witchcraft, but it doesn’t have to be. Keeping it as a separate form of magic gives you more ways to make villainous mages and evil priests distinctive!

SELLING YOUR SOUL

In literature, one common explanation for how a character gets Black Magic spells and powers is this: he sells his soul to the Devil (or, in many gaming settings, a devil). In exchange for the caster’s soul, the Devil grants him great power... but when the caster dies, the Devil drags him screaming down to Hell for an eternity of torment. (In a Fantasy gaming setting, “eternity of torment” may become “eternity of service as a warrior/slave of Hell”).

In game terms, you can represent a character’s selling of his soul by taking one or more Complications, then using them to buy various abilities as well as Black Magic spells and the like. The abilities represent the benefits (such as they are) of not having a soul. Primarily this means immunity to powers that attack the soul, such as the Soulrip spell (page 188), Transforms of the Spirit, and the like:

<table>
<thead>
<tr>
<th>Cost</th>
<th>Power</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>Has No Soul: Resistant Protection (24 ED) (36 Active Points); Only Works Against Limited Type Of Attack (Soulrip [page 188] and other spells and powers that inflict injury by attacking the soul; -4)</td>
</tr>
<tr>
<td>6</td>
<td>Has No Soul: Power Defense (30 points) (30 Active Points); Only Works Against Limited Type Of Attack (spells and powers that work by attacking the soul; -4)</td>
</tr>
</tbody>
</table>

These are the only two abilities that a character must buy to represent not having a soul. However, a character can justify buying numerous other abilities with the special effect of “I sold my soul for power.” In addition to Black Magic (or other) spells, some of the most common include:

<table>
<thead>
<tr>
<th>Cost</th>
<th>Power</th>
</tr>
</thead>
<tbody>
<tr>
<td>30</td>
<td>The Devil's Own Luck: Luck 6d6</td>
</tr>
<tr>
<td>15</td>
<td>The Devil Made Me Rich: Money: Filthy Rich</td>
</tr>
<tr>
<td>9</td>
<td>Devilishly Beautiful: Striking Appearance +3/+3d6</td>
</tr>
</tbody>
</table>

In some stories, the Devil doesn’t take the character’s soul at first. Instead, he promises him power, wealth, or whatever else he wants for a period of time (typically seven years), then claims both his soul and his life at the end of that time. In that case, the character might not have the Has No Soul abilities (since he does, in fact, still have his soul), but could easily have some of the Complications described below (particularly Watched by the Devil).

As to the appropriate Complications, here are some suggestions. First, a character could take a Distinctive Feature. Perhaps “sensitives” (such as other spellcasters, mediums, priests, and the like) can perceive that he has no soul. Another possibility is that selling his soul means he no longer casts a shadow, which everyone can see. In either case, the Feature tends to make other people recoil in horror, or at least refuse to have anything more to do with the character than they possibly have to.

<table>
<thead>
<tr>
<th>Value Complication</th>
</tr>
</thead>
<tbody>
<tr>
<td>15 Distinctive Features: has no soul (Not Concealable; Causes Extreme Reaction; Detectable Only By Unusual Senses)</td>
</tr>
<tr>
<td>25 Distinctive Features: casts no shadow (Not Concealable, Causes Extreme Reaction)</td>
</tr>
</tbody>
</table>

Second, the character could take an Enraged/Berserk, representing the fact that without a soul, he has much less self-control than normal.
WHITE MAGIC

In most Fantasy settings, the opposite of Black Magic is Divine Magic (the holy magics and sacred spells cast by priests and their ilk). However, you could, if you wanted, establish an antipathetic type of arcane magic called White Magic. Many White Magic spells would be very similar to Black Magic spells, with but with reversed special effects and Power Modifiers. For example, there might be a Bright Mantle spell instead of Dark Mantle, which provides extra defense against Evil attacks. Other White Magic spells might mimic some divine magics, though they probably wouldn’t be quite as powerful.

Third, the character could take a Hunted — typically by the Devil, who wants to keep tabs on his “investment.” This is probably a Watched, though the Devil may actively try to kill the character to get his soul more quickly (a wise character negotiates a provision in the sales contract forbidding this, of course). However, in a setting with multiple soul-buying devils, a “competitor” devil might try to harass the character for his own purposes.

**Value Complication**

10 Hunted: by the Devil (Infrequently, Mo Pow, NCI, Watching)

20 Hunted: by the Devil (Infrequently, Mo Pow, NCI, Kill)

Fourth, the character might have various Psychological Complications caused by or deriving from his lack of a soul. Some examples include:

**Value Complication**

25 Psychological Complication: Utterly Evil (Very Common, Total)

20 Psychological Complication: Desperate To Regain His Soul And Rescind The Bargain With The Devil (Common, Total)

15 Psychological Complication: Greedy (Common, Strong)

Fifth, the character might suffer from a Social Complication. The lack of a soul somehow makes him seem “wrong” to other people — they feel uncomfortable in his presence and have difficulty getting along with him. He suffers a minimum -2 penalty to all attempts to use Interaction Skills in a friendly or helpful way (but may receive a corresponding bonus to Interrogation), and a -2d6 or greater penalty on “friendly” Presence Attacks.

**Value Complication**

20 Social Complication: Has No Soul (Very Frequently, Major)

Lastly, not having a soul may make the character Susceptible to the same sorts of things that demons and undead are: holy water or symbols; sacred places; and the like.

CASTING BLACK MAGIC SPELLS

To emphasize the foul and corrupting nature of Black Magic (even in comparison to Necromancy and Witchcraft), the GM may want to make these spells dangerous to use. In short, learning or casting Black Magic spells corrupts and imperils the spellcaster’s soul (if he still has one).

If the GM institutes this rule, then the use of Black Magic spells works a subtle Major Transform on a spellcaster. Every spell learned incurs a few points of Transform damage; every spell cast incurs a point or less (no defense applies against this). The exact rate is up to the GM; it all depends on how quickly he wants characters to suffer the effects. For example, a rate of 2 points of damage per spell learned and 1 point per spell cast will corrupt characters quickly.

On the other hand, a rate of .5 points per spell learned and .1 points per spell cast leaves the caster’s soul intact for a much longer period of time. This Transform works against the character’s EGO instead of his BODY, and the only way to heal the damage is special divine magic spells (or perhaps some other powerful magics, such as Grant Wish).

When the Transform is complete, the character gains some of the Complications described above. The GM chooses which ones, but the Utterly Evil Psychological Complication and Has No Soul Social Complication (renamed Corrupted Soul) are probably the most common. Even after the character’s soul becomes corrupt, keep track of the Transform damage he continues to accumulate; this affects how difficult it is to “heal” his soul (should anyone ever try).

At the GM’s option, characters can add this effect as a Side Effect for a spell (minor effect, always occurs; -½).

Target: Self

Casting Time: 5 Minutes

Casting Procedures: Focus, Gestures, Incantations

Duration: Instant

Range: Self

Magic Roll Penalty: -8

END Cost: 8

Description: This terrible spell uses the power of blood to boost the power of the mage's spells. By sacrificing a medium-sized animal, such as a goat or a dog (usually a black one) in a special night-time ceremony, he can augment one of his spells for several hours.

At the GM's option, if a character sacrifices a human (or other sentient being), the effect of the spell is doubled — either increase it to Aid Magic 8d6, or increase to Delayed Return Rate to 5 points per Day (or even Week). If the sacrifice is a child or maiden, that may enhance the spell's effect even more.

Game Information: Aid Magic 4d6, Variable Effect (any one Magic spell at a time; +½), Delayed Return Rate (points fade at the rate of 5 per Hour; +1½) (78 Active Points); OAF Expendable (sacrifice itself, plus ritual knife and other tools, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes; -½), Gestures (throughout; -½), Incantations (throughout; -½), Only At Night Or In Darkness (-½), Requires A Magic Roll (-½), Only Aid Self (-½). **BLOOD VENGEANCE**

Effect: Drain CON 3d6, Delayed Return Rate (points return at the rate of 5 per Century), costs character 2 BODY permanently

Target: One character

Casting Time: Full Phase (Attack Action)

Casting Procedures: Gestures, Incantations

Duration: Instant

Range: 50m

Magic Roll Penalty: -7

END Cost: 15

Description: The aptly-named spell of Blood Vengeance permanently weakens and injures a foe... but at the cost of draining some of the caster's life essence. While few wizards willingly cast a Blood Vengeance spell because the price is so high, this fearsome enchantment remains a part of the magical arsenal, giving pause to all those who would harm a spellcaster.

At the GM's option, characters can redefine this spell to Drain some other Characteristic when they buy it, or change the Side Effect to permanently remove 2 Character Points' worth of some other Characteristic.

Game Information: Drain CON 3d6, Delayed Return Rate (points return at the rate of 5 per Century; +4) (150 Active Points); Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Limited Range (50m; -½), Requires A Magic Roll (-1 per 20 Active Points; -½), Side Effect (costs character 2 points of BODY permanently to cast; -2), Spell (-½). **END Cost:** 16

**Description:** To cast this spell, the black magician must visit a graveyard at midnight and dig up a coffin — any coffin will do, provided it was nailed shut before interment. After retrieving the coffin, he removes the nails (he needs at least four; otherwise, limit him to RKA 1d6 per nail used). After speaking a magic charm over the nails to seal the death-energy of the coffin into them, the caster must then find one of his victim’s footprints. As he drives the nails into the footprint, he speaks the remaining words of the charm... and the victim falls dead!

**Game Information:** RKA 4d6, NND (defense is Life-Shielding or an active Wizard’s Shield; +1), Does BODY (+1), Area Of Effect (1m Radius Accurate; +½), MegaArea (1m area covers the entire world; +2), Reduced Endurance (½ END; +¼) (345 Active Points); OAF Expendable (four coffin nails, Difficult to obtain; -1¼), Concentration (0 DCV throughout; -1), Extra Time (1 Minute; -1½), Gestures (throughout; -½), Incantations (throughout; -½), Must Have Access To Victim’s Footprint (-½), No Range (-½), Requires A Magic Roll (no Active Point penalty; -0), Spell (-½). **THE EVIL EYE**
Effect: Drain 1d6, Expanded Effect + Variable Effect (any two Characteristics at once), Damage Over Time
Target: One character
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: 10m
Magic Roll Penalty: -4
END Cost: 4

Description: This special curse-like spell allows a black magician to inflict grievous harm upon another person merely by looking at him. He must make eye contact with the victim, which means he has to be fairly close to him (this is also why many people refuse to look directly at anyone they suspect of practicing Black Magic). He then utters a malediction of some sort, and the harm described soon starts to affect the victim until, slowly but surely, he's crippled by it. The black magician can instantly dispel the effects of the Evil Eye if he so chooses; this counts as a Limitation because it's a well-known fact and often leads people to hunt down a black magician whom they believe has cursed one of their relatives or friends.
**Game Information:** Drain 1d6, Expanded Effect + Variable Effect (any two Characteristics at once; +1), Delayed Return Rate (points return at the rate of 5 per month; +2½) (47 Active Points); Caster Can Instantly Alleviate Effects (-½), Damage Over Time (6 increments, one per hour for 6 Hours, defense only applies once, cannot be used again on same victim until all increments accrue; -1), Eye Contact Required (-½), Extra Time (onset time of 5 Minutes; -2), Gestures (-¼), Incantations (-¼), Limited Range (10m; -¼), Requires A Magic Roll (-½), Spell (-½). PESTILENCE

Effect: Drain BODY 1d6, Damage Over Time
Target: 8 km Radius
Casting Time: 5 Minutes (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -5
END Cost: 5

Description: With this spell, a black magician can start a virulent epidemic. Beginning an hour after he casts the spell, everyone who was within 7 kilometers of him when he casts it begins to feel ill — feverish, nauseous, possibly more. The victims suffer 1d6 of Drain BODY that day, and another 1d6 the next day. This should kill most children and elderly folk, and more than a few healthy adults as well.

In the interest of properly representing the special effect, the GM may rule that the loss of BODY once the Drain reduces a character into the negatives takes place once per 6 Hours or once per Day, rather than once per Turn.

Game Information: Drain BODY 1d6, Area Of Effect (8m Radius; +½), Delayed Return Rate (ipoints return at the rate of 5 per Month; +2¾), MegaScale (1m = 1 km wide, broad, and deep; +1), Personal Immunity (+¼) (55 Active Points); OAF Expendable (black rooster sacrifice plus sacrificial tools and substances, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout casting; -1), Damage Over Time (2 increments, one per day for 2 Days, defense only applies once, cannot be used again on same victim until all increments accue; -4½), Extra Time (5 Minutes to cast; -2), Extra Time (1 Hour onset time; -3), Gestures (throughout casting; -½), Incantations (throughout casting; -¾), No Range (-½), Requires A Magic Roll (-½), Spell (-½). PUPPETEER

Effect: Telekinesis (30 STR), Only To Puppeteer
Target: One character
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: 40m
Magic Roll Penalty: -4
END Cost: 4

Description: This spell allows the black magician to use vile arcane forces to take hold of a victim's body and move it against the victim's will. The caster cannot pick the target up and move him through the air, "punch" or "squeeze" the victim, or the like — all he can do is move the victim's limbs and body to force the victim to walk and perform other physical actions. The victim can, of course, fight back with his own STR, which may make puppeteering him a taxing endeavor; he can also cry for help (unless the caster holds his jaws shut with this spell) or the like. The spell only has a range of 40m, so the caster must remain within that distance of the victim or the spell ends instantly.

See APG 122 for more on "puppeteering."

Game Information: Telekinesis (30 STR) (45 Active Points); OAF Expendable (mandrake root harvested in a special ceremony, Difficult to obtain; -1¼), Affects Whole Object (-¼), Gestures (-¼), Incantations (-¼), Limited Range (40m; -¼), Only To Puppeteer (see text; -½), Requires A Magic Roll (-½), Spell (-½). **Description:** With this spell a black magician can spoil a quantity of prepared food and drink, making it totally inedible. Bread becomes moldy, wine turns into undrinkably bitter vinegar, meat rots, and so forth. For purposes of this spell, the GM should assume that each pound of food or gallon of drink has 1 BODY, then use the total on the dice to determine how much the spell ruins.

**HAND OF GLORY**

**Effect:** Invisibility to Hearing Group plus Sight Group Images (create light)

**Target:** Self/8m Radius

**Lighting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus

**Duration:** Constant

**Range:** Self/No Range

**Magic Roll Penalty:** -6

**Charges:** 1 Continuing Fuel Charge lasting for 1 Hour

**Description:** Black magicians use this spell to commit robberies without being heard or seen. It creates a talisman that not only renders the caster's footsteps silent, it gives off a light that only the caster himself can see.

To create a Hand Of Glory, a black magician must cut off the right hand of a murderer hanged upon a gibbet. He wraps the hand in a winding-sheet and squeezes out all the blood and fat (which he saves), then pickles the hand for a fortnight in salt, pepper, saltpetre, and less pleasant substances. Meanwhile, he uses the fat and blood to make a candle, often forming a wick from the dead man's hair. When the hand has finished pickling, it's shaped to hold the candle. The total amount of time necessary to craft the candle and hand (as opposed to prepare them for the creation) is six hours.

When the caster is ready to use the hand, he lights the candle. While it remains lit, his movements are absolutely silent. Furthermore, only he can see the candle's light, so he can carry it into darkened rooms and buildings without waking sleeping inhabitants or alerting guards.

In game terms, the candle is built as an enchanted item, similar to an alchemical potion or the like.

Chaos Magic

In some Fantasy settings, the fundamental forces of Chaos and Order (or Law) underlie all of reality. Chaos Magic is a category of spells that allow a spellcaster to manipulate raw Chaos (or, as some style it, “Chaos energy”) for various purposes. Chaos spells tend to be powerful — they typically work by exposing the target to Chaos in some way, thus changing, warping, or “unmaking” (reducing to its component parts) it to achieve a specific effect. However, many of them are also dangerous, their effects at least partly unpredictable and their energies difficult to control; significant Chaos Magic roll penalties and Side Effects are common.

Some practitioners claim Chaos lies at the root of all magic, since magic of necessity involves imposing a willful (and often unpredictable) change on the orderly world. These spellcasters often study Arcanomancy (page 22) as well, seeing it as just another expression or manifestation of Chaos.

At the GM's option, the use of Chaos Magic may have negative side effects just like Black Magic does (see page 47). Instead of corrupting the soul, exposure to the stuff of Chaos warps the caster's body and mind, making him physically repugnant (and perhaps less physically capable, depending on the exact changes the body experiences) and mad.

**CONJURATION**

Conjuration is the art of summoning beings from this and other planes of existence, and of controlling and banishing them. In some campaign settings, the concept of "conjuration" extends even further, to allow the conjuror to "summon" or "create" just about any physical substance or object — such as weather phenomena (fog, wind, and the like) or buildings — and even forms of energy such as lightning or fire. *To My Hand,* below, is an example of an object-summoning spell; you could easily expand upon it, or adapt spells from other categories, if you want to broaden the conjuror's art.

### BASIC SPELLS

Conjuration's most fundamental spells are all built with the Power *Summon.* By longstanding tradition, the hierarchy of summoning power is as follows: animals; monsters; elementals; demons ("demon" in this case meaning almost any extra-planar entity). Even though an animal-summoning spell might conjure a creature more powerful than an imp, in the minds of most conjurers an imp-summoning spell is "better" because it's harder and more dangerous to cast.

**BEAST SUMMONING**

**Effect:** Summon one animal built on up to 100 Total Points.

**Target:** Special

**Casting Time:** Full Phase

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -3

**END Cost:** 3

**Description:** With this spell, a conjuror can Summon any normal animal built on up to 100 Character Points. This would include any small animal or bird, a small bear, a chimpanzee, a pony, a wolf, or some serpents. The animal appears instantly when the caster completes the spell.

**Game Information:** Summon one animal built on up to 100 Total Points, Expanded Class (animals; +½) (30 Active Points); OAF Expendable (food the animal would like, Difficult to obtain; -1¾), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 8 points.

**Options:**

1) **Beast Summoning II:** Increase to one animal built on up to 200 Total Points. 60 Active Points; total cost 16 points.

2) **Beast Summoning III:** Increase to one animal built on up to 300 Total Points. 90 Active Points; total cost 24 points.

3) **Many Beasts:** Increase to up to four animals:

15) **Slavishly Devoted Animal:** Add Slavishly Devoted (+1). 50 Active Points; total cost 14 points.

16) **Local Animals:** The conjuror's spell doesn't instantly transport the animal to the conjuror; it must live in the area and come under its own power. Add Arrives Under Own Power (-½) and Summoned Being Must Inhabit Locale (-½). Total cost: 6 points.

---

**EXPANDING THE SCOPE**

You can vastly expand Conjuration by devising spells with the special effect “summoned being performs a particular task for the spellcaster.” *Conjuror's Ease,* below, represents a simple form of this — a spell that allows a conjuror to quickly and easily clean house and perform other chores with the aid of summoned demons and like beings. If you wanted to (and the GM allowed), you could use this special effect to supply conjurors with all sorts of attack and defense spells.

OFFENSIVE SPELLS

BANISHMENT

**Effect:** Dispel Summon 20d6

**Target:** One Summoned creature

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 600m

**Magic Roll Penalty:** -6

**END Cost:** 6

**Description:** Also known more poetically as Severing The Bindings, this spell is one of the most important in the conjuror's repertoire. What a summoner calls up, he must be able to put down — or maybe he just needs a way to put down rival conjurers' creatures. This spell breaks the magical "ties" that connect a Summoned being to its current location and plane, thus sending it back to wherever it was when first Summoned. (See page 155 of Fantasy Hero for more information about banishing.) The spell only works on spells that "conjure" or "call" a Summoned being, not on spells that use the Summon Power to "create" beings (such as the various "create undead" spells described in the Necromancy section of this book).

Since some spells of Conjunction involve calling up enormously powerful beings, some versions of this spell must be equally powerful to banish them. One version creates a small force of banishment, then builds it up slowly until it's strong enough to sever the bindings; of course, this works best when the conjured being cannot flee or attack the caster.

**Game Information:** Dispel Summon 20d6 (60 Active Points); OAF Expendable (special incense, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Only Works On Conjuring Summons (see text; -0), Requires A Magic Roll (-½), Spell (-½). Total cost: 16 points.

1) Greater Banishment: Increase to Dispel

2) Lesser Banishment: Decrease to Dispel

    Summon 8d6 and add Constant (+½) and Cumulative (384 points; +1¼). 66 Active Points; total cost 18 points.

CONTROL SUMMONED BEING

Effect: Mind Control 12d6
Target: One character
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: LOS
Magic Roll Penalty: -6
END Cost: 6

Description: Rather than negotiate, bargain, or bribe Summoned beings, some conjurors prefer to compel their obedience with magic. While Control Summoned Being may not be powerful enough force a Summoned being to do anything the caster wants (particularly if the being is already inimical toward the caster), in the hands of a clever conjuror it can influence the being’s behavior enough for the conjuror to accomplish his aims... or at least keep himself safe from the creature’s vengeance.

This spell uses a slight variation of the “classes of minds” rules from 6E1 149. It defines “all summoned beings” as a “class of minds” so that the spell works in the most common-sense, dramatic-sense fashion. Gamemasters who prefer to stick to the classes of minds rules more closely can have characters rebuild the spell with the “Human” and “Alien” classes of minds (the latter covers demons and other extra-planar entities).
**DEFENSIVE SPELLS**

**SUMMONING CIRCLE**

**Effect:** Change Environment (create area summoned beings cannot leave or enter)

**Target:** 2m Radius

**Casting Time:** 30 Minutes

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** No Range

**Magic Roll Penalty:** -1

**END Cost:** 1

**Description:** Long ago, conjurors seeking a way to protect themselves from the dangers posed by summoned beings devised the Summoning Circle. It's a mystic ward that a summoned entity, by the laws of magic, cannot exit or enter, and through which its attacks and inimical powers cannot extend. (Note that the Demon character sheets on HSB 71-97 all have the Physical Complication Restricted By Pentagrams to reflect this; in general, the GM should extend this to most if not all Summoned beings so that this spell functions properly.)

The Circle itself is drawn, or sometimes carved, into the ground or a floor by the caster in a half-hour long ritual. If the Circle is improperly created, it has no effect; if anything breaks, mars, obscures, or covers it, it instantly ceases to have any effect (though it can be repaired by the Mage).

Despite the name, Summoning Circles take many forms, not just circular. Certain standards must be maintained — for example, a Circle intended to confine certain beings must take a certain shape (like pentagrams for demons), and all Circles of a particular style must have certain specific guardian sigils as part of their design. However, within those restrictions the caster can draw the Circle however he wants.

**Game Information:** Change Environment (create area summoned beings cannot leave or enter), Area Of Effect (2m Radius; +¼) (12 Active Points); OAF Expendable (small statuette of a tower, Very Difficult to obtain; -1½), Only For EGO Roll Contests With Summoned Beings (-1), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Only Aid Self (-1). 9) **Add A -½ Limitation:** Total cost 4 points.

### ★ CONJUROR'S EASE

**Target:** 8m Radius

**Casting Time:** Half Phase

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** No Range

**Magic Roll Penalty:** -4

**END Cost:** 0

**Description:** This spell summons several implings to clean and perform related chores. People who try to walk through the area find the implings flitting about and constantly getting in the way (a -1 to DEX Rolls effect, but this only lasts until the implings are done cleaning, not for the duration of the power). The Long-Lasting Adder signifies that the changes are permanent — at least until someone makes another mess.

**Game Information:** Change Environment (clean the area), Long-Lasting, Area Of Effect (8m Radius; +½), Reduced Endurance (0 END; +½) (38 Active Points); OAF Expendable (inscribed scroll; -¼), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn to cast; -⅔), Gestures (throughout casting; -½), Incantations (throughout casting; -½), No Range (⅔), Requires A Magic Roll (½). Total cost: 6 points.

**Options:**

### ✡ TO MY HAND

**Effect:** Teleportation 10m, Usable As Attack

**Target:** One pre-designated object

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 10,000 km (see text)

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** With this spell, a conjuror need only speak a mystic word and make a mystic gesture, and an object — one prepared in advance — appears instantly in his hand. The object must be small and light enough that the character could hold it in one hand without difficulty; examples include a weapon, a pouch of coins, or a book.

You must have the GM’s permission to buy this spell, since it uses the rules for Fixed Locations in an unusual way. In this case, the “Location” is actually the object, which the caster designates in advance (but can switch during the game by speaking the spell’s incantation repeatedly over another object; this takes 1 Turn).

**Game Information:** Teleportation 10m, MegaScale (1m = 100 km; +⅔), Usable As Attack (+⅔) (37 Active Points); OAF Expendable (tiny silver horn, Difficult to obtain; -⅔), Gestures (-⅔), Incantations (-⅔), Only Works On Hand-Held Objects (-⅔), Requires A Magic Roll (½), Spell (-½) (total cost: 9 points) plus one Floating Fixed “Location” (see text) (total cost: 5 points). Total cost: 14 points.

**Options:**

1) *Strong Spell:* Increase to Teleportation 15m. 56 Active Points; total cost 13 points; total cost of spell 18 points.

2) *Weak Spell:* Decrease to Teleportation 5m. 19 Active Points; total cost 4 points; total cost of spell 9 points.

3) *Free Spell:* Total cost 12 points; total cost of spell 17 points.

4) *Remove A +¼ Advantage:* 35 Active Points; total cost 8 points; total cost of spell 13 points.

7) *Remove A -½ Limitation:* Total cost 10 points; total cost of spell 15 points.

8) *Add A +¼ Advantage:* 40 Active Points; total cost 9 points; total cost of spell 14 points.

9) *Add A +½ Advantage:* 42 Active Points; total cost 10 points; total cost of spell 15 points.

10) *Add A -¼ Limitation:* Total cost 8 points; total cost of spell 13 points.

11) *Add A -½ Limitation:* Total cost 8 points; total cost of spell 13 points.
Cybermancy is a type of magic found only in campaigns that feature advanced technology (such as Urban Fantasy Hero games, Science Fiction games, and some Post-Apocalyptic campaigns). It features spells that allow characters to manipulate and evoke technology and technology-related phenomena (such as electric power or smog).

As a category of spells, Cybermancy is in some ways limited — for example, it has no defensive spells. This reflects the way that magic and machines tend to interact in most fiction. However, you could certainly expand this category to include more spells and a wider sphere of possible abilities; see the Cyberkinesis Powers section of Champions Powers for some similar powers that you could easily adapt into spells.

### Offensive Spells

#### Alter Electronic Data

**Effect:** Severe Transform 2d6 (add, alter, or remove computer software)

**Target:** One machine

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Touch

**End Cost:** 5

**Description:** This spell grants a caster the power to add, alter, or remove software and files to or from a computer (or similar device).

See APG 73 for more information and guidelines about Mentally Transforming software and the like. In most cases, adding, removing, or altering a sentient machine's Psychological Complications requires a Severe Transform. So does adding, removing, or altering a piece of software. Adding, altering, or removing a computer file may only require a Cosmetic, Minor, or Major Transform effect, based on the GM's judgment regarding the complexity and importance of the information; the Partial Transform Advantage allows the caster to achieve such lesser effects easily.

**Game Information:** Severe Transform 2d6 (add, alter, or remove computer Psychological Complications, programs, or records; heal back through application of the same power, reprogramming, and/or re-entering the data), ACV (uses OMCV versus DMCV; +¼), AVAD (Mental Defense; +0), Partial Transform (+½) (52 Active Points); OAF Expendable (a disk containing software for a program no longer produced or supported; -1¼), Gestures (-¼), Incantations (-¼), No Range (-½), Limited Target (computer software and files; -½), Requires A Magic Roll (-½), Spell (-½). Note that a character with Machine Manipulation (see below) may be able to fire weapons telekinetically instead of using this power, and may be more likely to affect sturdy mechanical (as opposed to electronic or computer-controlled) weapons.

**ENHANCE POWER**

**Effect:** Aid END 3d6, Only Works On Electrical Devices

**Target:** One machine

**Casting Time:** Full Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** Most most devices require some sort of power, whether it comes from a wall socket, a battery, chemical fuel, tapping into an antimatter power converter, or receiving it from a broadcast power station. This spell aids the device, allowing it to function for a short time even if it’s not hooked up to a power source (or extending its operating time if it has a finite source of power).

**Game Information:** Aid END 3d6, Delayed Return Rate (points fade at the rate of 5 per Minute; +1) (36 Active Points); OAF Expendable (any type of fresh battery or power-pack, Difficult to obtain; -½), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Only Works On Electrical Devices (-1), Requires A Magic Roll (-½), Spell (-½). **Target:** One device

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 100m

**Magic Roll Penalty:** -9

**END Cost:** 9

**Description:** Most most devices require some sort of power, whether it comes from a wall socket, a battery, chemical fuel, tapping into an antimatter power converter, or receiving it from a broadcast power station. This spell saps that power, making it harder (or impossible) for a device to function.

In **HERO System** terms, the power supply for a device is usually provided by an Endurance Reserve. This spell Dispel the Reserve's END. Ordinarily it's against the rules to use Dispel against a Characteristic, but it's permitted in this case because the END in this situation is a Power and Dispel best represents how the spell should work.

**Game Information:**
- **Dispel END 30d6 (90 Active Points); OAF Expendable (a used battery or power-pack, Difficult to obtain; -½), Gestures (-¼), Incantations (-¼), Limited Range (100m; -¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 22 points.

**Casting Procedures**: Focus, Gestures, Incantations
**Duration**: Instant
**Range**: 40m
**Magic Roll Penalty**: -6
**END Cost**: 6

MACHINE PHANTASMS I

**Effect**: Mental Illusions 8d6
**Target**: One machine
**Casting Time**: Half Phase (Attack Action)
**Casting Procedures**: Focus, Gestures, Incantations
**Duration**: Instant
**Range**: LOS
**Magic Roll Penalty**: -4
**END Cost**: 4

**Description**: This spell allows a caster to control what a machine “sees” or displays. For example, he could make security cameras show himself and his comrades as uniformed security guards rather than civilians (or as not being there at all), or cause a computer screen to display the specific images he wants it to. The character cannot cause the machine to take STUN or BODY damage due to the effect of the illusion.

**Game Information**: Mental Illusions 8d6 (Machine class of minds) (40 Active Points); OAF Expendable (piece of a broken camera lens painted with mystic runes, Difficult to obtain; -¼), Cannot Cause Harm (-¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 10 points.

**Options**:

1) **Strong Spell**: Increase to Mental Illusions 10d6. 50 Active Points; total cost 12 points.
2) **Weak Spell**: Decrease to Mental Illusions 6d6. 30 Active Points; total cost 7 points.
3) **Free Spell**: Total cost: 14 points.
4) **Remove A -¼ Limitation**: Total cost 11 points.
5) **Remove A -½ Limitation**: Total cost 11 points.
6) **Add A +¼ Advantage**: 50 Active Points; total cost 12 points.
7) **Add A +½ Advantage**: 60 Active Points; total cost 15 points.
8) **Add A -¼ Limitation**: Total cost 9 points.
9) **Add A -½ Limitation**: Total cost 9 points.
10) **See What I Want You To See**: The standard spell affects all senses, since a caster might need to attack a sentient robot or the like with it. However, some casters can only affect machines’ sight and radio senses, since so few have any other senses. Add Limited Senses (cannot affect Hearing, Smell/Taste, and Touch Groups; -¾). Total cost: 8 points.

MACHINE PHANTASMS II

**Effect**: Sight and Radio Group Images
**Target**: 16m radius
**Casting Time**: Half Phase (Attack Action)
**Casting Procedures**: Focus, Gestures, Incantations
**Duration**: Constant
**Range**: 150m
**Magic Roll Penalty**: -3
**END Cost**: 3

**Description**: A caster can use this spell to fool machines in situations when Machine Phantasms I (see above) isn’t quite appropriate. It allows him to control what the machine sees or displays (and thus what anyone monitoring the machine sees). For example, he could make a security camera see...
the undisturbed bank vault it normally expects to see, even when a team of burglars is busy looting the place. Anyone monitoring that camera remotely would see the Image, but anyone viewing the scene with the naked eye wouldn't be affected at all. The Image has an 16m radius, which should suffice to cover the area scanned by most cameras. If necessary, the caster can place the illusion directly in front of the camera so it cannot avoid it.

**Game Information:** Sight and Radio Group Images, Area Of Effect (16m Radius; +¼) (26 Active Points); OAF Expendable (piece of a broken camera lens painted with mystic runes, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Only Versus Machines (-1), Requires A Magic Roll (-½), Spell (-½). **SENSORY SPELLS**

### MACHINE SCANNING

**Effect:** Mind Scan 8d6 (Machine class of minds)

**Target:** One device

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** LOS

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** With this spell a caster can mystically scan an area for the presence of “thinking” machines, ranging from ordinary computers to sentient androids and the like.

The GM should determine the Mind Scan modifier based on the number of *machine minds* in the designated area, not people. Given the prevalence of computers and similar devices (fax machines, PDAs, multi-function cellular phones, and so on) in modern cities (not to mention a place like Millennium City), the difference in numbers may not be great, but it probably exists. Powerful supercomputers and sentient machines may qualify as "unique, strange, or powerful," thus granting the character a bonus to find them.

**Game Information:** Mind Scan 8d6 (Machine class of minds) (40 Active Points); OAF Expendable (bit of fabric or similar component from a stereo speaker, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 11 points.

**Options:**

1) **Strong Spell:** Increase to Mind Scan 10d6. 50 Active Points; total cost 13 points.
2) **Weak Spell:** Decrease to Mind Scan 6d6. 30 Active Points; total cost 8 points.
3) **Free Spell:** Total cost: 16 points.
4) **Remove A -¼ Limitation:** Total cost 11 points.
5) **Remove A -½ Limitation:** Total cost 12 points.
6) **Add A +¼ Advantage:** 50 Active Points; total cost 13 points.
7) **Add A +½ Advantage:** 60 Active Points; total cost 16 points.
8) **Add A -¼ Limitation:** Total cost 10 points.
9) **Add A -½ Limitation:** Total cost 9 points.
**MACHINE SPEECH**

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** LOS

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** Cybermancers known that computers and many similar devices can “talk” — in other words, that a wizard can communicate with them to learn what they know and perhaps persuade them to take a particular course of action. This is the spell used for such communication.

**Game Information:** Telepathy 8d6 (Machine class of minds) (40 Active Points); OAF Expendable (bit of fabric or similar component from a stereo speaker, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 11 points.

**Options:**
1) **Strong Spell:** Increase to Telepathy 10d6. 50 Active Points; total cost 13 points.

### MISCELLANEOUS SPELLS

#### ASSEMBLE ROBOT
- **Effect:** Summon one robot built on up to 600 Total Points
- **Target:** Special
- **Casting Time:** 1 Minute
- **Casting Procedures:** Focus, Gestures, Incantations
- **Duration:** Instant
- **Range:** No Range
- **Magic Roll Penalty:** -9
- **END Cost:** 7

**Description:** With this spell, a wizard can take bits and pieces of technology and form them into a working robot. Robots built this way can be quite powerful... if the wizard has the right parts. The GM has the final say on what a robot created with this spell can do. One built out of ordinary parts might simply be able to move and carry things; one that incorporates military technology or an industrial laser might have an attack or three to use on its creator's enemies.

At the GM's option, contrary to the standard rule for Summon, a caster using this spell can have Summoned at any one time as many robots as he wants — he just has to create them one at a time. See The HERO System Bestiary and other Hero Games products for example robots you could use with this spell.

Depending on the setting, you may want to define this spell as Summon Junk Golem. A junk golem is a robot-like being a caster creates out of whatever spare parts he can scrape together (often from junked cars, appliances, and industrial equipment).

**Game Information:** Summon one robot built on up to 600 Total Points, Expanded Class (any robot; +¼), Reduced Endurance (½ END; +¼) (180 Active Points); OAF (robotics tool etched with mystic runes; -1), Concentration (½ DCV throughout casting; -½), Extra Time (1 Minute; -1½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-1 per 20 Active Points; -¼), Requires Appropriate Spare Parts (see text; -1). Total cost: 29 points.

**Options:**
1. **Strong Spell:** Increase to Summon one robot built on up to 800 Total Points. 240 Active Points; total cost 38 points.

**SUMMON CITY ELEMENTAL**

*Effect:* Summon one city elemental built on up to 550 Total Points

*Duration:* Instant

*Range:* No Range

*Magic Roll Penalty:* -14

- Electricity elementals summoned from wall sockets and transformers (use the Fire Elemental character sheet, HSB 132, but change the special effects from Fire to Electricity)
- Sludge elementals conjured from toxic waste, spilled oil, and other such pleasant substances (use the Water Elemental character sheet, HSB 133, or possibly the Swamp Elemental sheet on HSB 130)
- Smog elementals formed of pollution and cigarette smoke (use the Air Elemental character sheet with “Blinding Fog” option, HSB 129)
- Street elementals made of asphalt, lamp posts, telephone poles, electrical wires, brick walls, and the like (use the Earth Elemental character sheet, HSB 130)

*Game Information:* Summon one city elemental built on up to 550 Total Points, Expanded Class (city elementals; +¼) (137 Active Points); OAF Expendable (city elemental amulet plus at least a handful of the element associated with the type of elemental to be summoned, Difficult to obtain; -1¼), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Divination is the art of finding and foretelling. Its practitioners, known as oracles, diviners, seers, soothsayers, or prophets, possess powers that draw on senses denied to ordinary men. Not only can they foresee the future (sometimes with great accuracy, sometimes not), but they can view the past as well, and perceive things hidden from the senses of normal folk.

Many Divination spells have an OAF defined as “caster’s Focus of choice.” Different diviners prefer different methods of discerning things. Some read cards, some gaze into mirrors or pools of water, some use crystal balls, and so forth. Use the Remove A -½ Limitation option to change this to an OIF, if appropriate (such as “any mirror of opportunity” rather than a specific mirror the character keeps with him). See HSS 357-39 for an extensive list of methods of divination.

To many spellcasters, Divination is an arcana of little depth. But while it’s true that Divination possesses few spells compared to other arcana, those it does contain are often of great utility. Many a general has won a battle because a soothsayer showed him the size and strength of the enemy, and many a king has chosen the right road to greatness based on the words of an oracle.

In addition to the spells listed here, Divination includes “Detect” spells listed elsewhere, such as Detect Magic (page 347) or Sense The Unholy (page 96).

8) **Add A -¼ Limitation:** Total cost 2 points.
9) **Add A -½ Limitation:** Total cost 2 points.
10) **Precise Detection:** Not only can the diviner perceive secret or concealed doors, he can perceive how they work and how to open them (assuming this information is available to visual inspection — the spell won't reveal magical command words or the like, nor does it confer Lockpicking abilities). Add Discriminatory and Analyze. 18 Active Points; total cost 4 points.

11) **Ranged Detection:** In many cases, a diviner doesn't have the luxury of closely examining a wall for secret doors as he casts this spell. This version allows him to perceive such things at a distance. Add Range. 13 Active Points; total cost 3 points.

**VIEW THE FUTURE**

**Target:** Area

**Casting Time:** 1 Turn

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** No Range

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** Oracles are renowned for their power to see into the future using various means (such as catoptromancy, cartomancy, crystalomancy, geomancy, haruspicy, oneiromancy, or dozens more; see HSS 357-59). While a diviner’s visions are usually vague and subject to multiple possible interpretations, a supplicant who can discern the true meaning of a soothsayer’s words benefits greatly from them. Unfortunately, the further into the future the diviner looks, the harder it becomes to see accurately.

See APG 83-85 for expanded rules for Precognition.

Divine Magic isn’t exactly a category of spells. Instead, it’s the body of gods-granted mystic powers and lore possessed by priests, paladins, and other characters associated with a deity or deities. They often hew more toward healing, defending, preserving, and enhancing than attacking, but a powerful priest can inflict grievous harm upon unbelievers and wicked beings.

As written, these spells assume priests are “good” and use their spells to oppose that which is tangibly “evil” (primarily the undead, demons, and the like). To rework these spells for priests of evil gods, simply reverse that assumption (and the relevant Limitations). Thus, instead of Smite Evil or Sacred Fire, an evil priest has Smite Good and Unholy Fire.

In addition to the spells listed here, priests often have access to other spells related to the god or gods they primarily worship. The priest of a war-god might have combat magic and battle magic spells; the priest of a fire god has fire spells; and so on. You can adapt spells from the Theurgy category (page 289) for these purposes. For example, the priests of many religions can create light; they should just buy the *Create Light* spell (page 151) with appropriate changes.

In many campaigns the form of Power Skill used to cast Divine Magic spells is called Faith; it’s often necessary even in campaigns where all other types of magic are cast using the same Power Magic Skill.

CURE ILLNESS

Effect: Major Transform 4d6 (sick person into well person)

Target: One character

Casting Time: 5 Minutes (Attack Action)

Casting Procedures: Focus, Gestures, Incantations

Duration: Instant

Range: Touch

Magic Roll Penalty: -4

End Cost: 4

Description: The character can cure diseases, plagues, fevers, and other illnesses by laying his hands on a sick person and praying to his god. The more intense the effects of the disease, the longer it may take to cure.

In game terms, this is a Major Transform, "sick person to well person," that stops the course of a disease — once the character applies the spell, the disease inflicts no further damage (loss of CON, for example) on the victim. However, the spell doesn't automatically heal any STUN, BODY, CON, or other Characteristics lost to the disease prior to the spell's use. To accomplish that, the priest must add up the cost of the lost abilities he wants to restore and treat them as "powers" being granted to the target by the Transform (see 6E1 306-07).

Game Information: Major Transform 4d6 (sick person into well person, heals back through any normal means that would cause character to contract another disease) (40 Active Points); OAF (holy symbol or the like; -1), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes; -2), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Limited Target (sentient beings; -¼), No Range (-½), Only When Serving The God's Purposes (-½), Requires A Magic Roll (-½). Total cost: 5 points.

Options:
1) Strong Spell: Increase to Major Transform 6d6. 60 Active Points; total cost 8 points.
2) Weak Spell: Decrease to Major Transform 2d6. 20 Active Points; total cost 2 points.
3) Free Spell: Total cost: 6 points.
4) Remove A -¼ Limitation: Total cost 5 points.
5) Remove A -½ Limitation: Total cost 5 points.
6) Add A +¼ Advantage: 50 Active Points; total cost 6 points.
7) Add A +½ Advantage: 60 Active Points; total cost 8 points.
8) Add A -¼ Limitation: Total cost 5 points.
9) Add A -½ Limitation: Total cost 5 points.
10) Cure Illness Variant: This form of Cure Illness works by Healing the Characteristics lost to the disease. However, if the disease remains present and active within the character's body, he may continue to lose Characteristics after a character casts this spell upon him. Change to Healing 6d6, Expanded Effect + Variable Effect (any four Characteristics at once; +2) (180 Active Points); OAF (holy symbol or the like; -1), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes; -2), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Only To Heal Characteristics Lost To Disease (-1), Only When Serving The God's Purposes (-½), Requires A Magic Roll (-½). Total cost: 22 points.
CURE POISON

**Effect:** Major Transform 4d6 (poisoned person into non-poisoned person)

**Target:** One character

**Casting Time:** Full Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** This spell removes poison from a character's body.

In game terms, this is a Major Transform, “poisoned person into non-poisoned person,” that stops poison from affecting a character — once the caster applies the spell, the poison inflicts no further damage on the victim. However, the spell doesn’t automatically heal any STUN, BODY, or other Characteristics lost to the poison prior to the spell’s use. To accomplish that, the priest must add up the cost of the lost abilities he wants to restore and treat them as “powers” being granted to the target by the Transform (see 6E1 306-07).

**Game Information:** Major Transform 4d6 (poisoned person into non-poisoned person, heals back through being poisoned again) (40 Active Points); OAF (holy symbol or the like; -1), Concentration (0 DCV throughout casting; -1), Extra Time (Full Phase; -½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Limited Target (sentient beings; -¼), No Range (-½), Only When Serving The God’s Purposes (-½), Requires A Magic Roll (-½). the character’s body, he may continue to lose BODY and STUN after a character casts this spell upon him. Change to Healing 6d6, Expanded Effect (BODY and STUN simultaneously; +½) (90 Active Points); OAF (holy symbol or the like; -1), Concentration (0 DCV throughout casting; -1), Extra Time (Full Phase; -½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Only To Heal Characteristics Lost To Poison (-1), Only When Serving The God’s Purposes (-½), Requires A Magic Roll (-½). Total cost: 14 points.

It doesn't prevent them from entering the area, but as long as they're in the area they'll suffer pain that weakens them and makes it harder for them to function properly.

At the GM's option, any Power Defense an "evil being" has doesn't protect him against this spell, since it's specifically designed to harm his kind.

**Range:** Touch

**Magic Roll Penalty:** -1

**END Cost:** 0

**Description:** When a priest casts this spell and touches a weapon, he infuses that weapon with holy energy. This allows it to exploit the susceptibility to holy objects that most infernal beings and many forms of undead possess.

9) **Add A -½ Limitation:** Total cost 4 points.
Druidry includes spells relating to, using, or affecting animals, plants, and nature in general. It's a form of magic practiced not only by wizards, but in some campaign settings by a special type of priest known as a druid.

In addition to the spells listed here, Divination “detect” spells focused on natural phenomena (such as Detect Animals, Detect Plants, or the like) are also considered part of Druidry; see page 85. At the GM's option, characters who can cast Druidry spells can also treat Elemental Magic spells invoking specific natural phenomena (such as Hailstorm, page 149) and Thaumaturgy spells involving changing shape into animal forms (particularly Animal Shapes, page 281) as part of Druidry. Some Witchcraft spells (page 337) might also be appropriate for characters who know Druidry, and vice-versa.

This spell is not intended to let a character acquire a menagerie of pet animals quickly and easily. If that's what a character wants, he should buy the animals as Followers (perhaps with the special effect that the effects of this spell are permanent).

**ANIMAL COMPANION**

**Effect:** Severe Transform 3d6 (wild animal into animal friend), ACV, AVAD

**Target:** One animal

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 80m

**Magic Roll Penalty:** -7

**END Cost:** 7

**Description:** This spell turns a ferocious wild beast into a companion and helper of the spellcaster. The fiercer the animal, the longer it takes for this spell to affect it (i.e., the more times the character has to cast it to achieve the Transform effect). The animal gradually returns to its normal state (though the character can cast the spell again to maintain the state of friendliness).
**ANIMAL DIMINUTION**

**Effect:** Major Transform 6d6 (make animal smaller)

**Target:** One animal

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -9

**END Cost:** 0

**Description:** This spell reduces an animal in size, thus reducing the danger they pose to people and/or making it easier to hide them. The targeted animal is reduced to one-sixteenth its normal size and 1/4000th its normal mass, its attacks and other abilities are reduced to approximately one-sixteenth of their full power (but it has +8 DCV), others suffer a -8 to PER Rolls to perceive it, and it takes +24m KB (only for distance, not damage). (Note: in the case of animals that are larger than human size, the DCV and PER Roll modifiers will partly or fully counteract the penalties imposed by the animal’s size Physical Complication; see 6E1442-45.)

**Game Information:** Major Transform 6d6 (make animal smaller, see text; heals back normally or through another application of this spell) (60 Active Points); OAF Expendable (two statuettes of an animal, one small, one larger, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Limited Target (animals; -¼), Requires A Magic roll; -1¼), Reduced Endurance (0 END; +½) (200 point by which the caster succeeds with his Magic roll; +1¼), Reduced Endurance (0 END; +½) (200 Active Points); OAF Expendable (two statuettes of an animal, one small, one larger, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Only Works On Animals (-1), Requires A Magic Roll (-1 per 20 Active Points; -¼), Spell (-½). Total cost: 15 points.

**Options:**

2) **Weak Spell:** Decrease to Major Transform 4d6, 40 Active Points; total cost 10 points.

4) **Remove A -¼ Limitation:** Total cost 16 points.
5) **Remove A -½ Limitation:** Total cost 17 points.
6) **Add A +½ Advantage:** 75 Active Points; total cost 19 points.
7) **Add A +½ Advantage:** 90 Active Points; total cost 22 points.
8) **Add A -¼ Limitation:** Total cost 14 points.
9) **Add A -½ Limitation:** Total cost 13 points.
10) **Plant Diminution:** This variant of the spell only works on plants rather than animals, allowing the caster to Transform a mighty oak into a puny sapling. Change Limited Target (animals; -¼) to Limited Target (plants; -½). Total cost: 14 points.

**ANIMAL GROWTH**

**Effect:** Growth, Usable As Attack, Only Works On Animals

**Target:** One animal

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Time Limit (1 hour plus 10 minutes per point by which the caster succeeds with his Magic roll)

**Range:** Touch

**Magic Roll Penalty:** -10

**END Cost:** 0

**Description:** With this spell, a caster can make an animal four times as tall and wide as normal (which also means the animal becomes stronger and tougher). The caster must spend END to cast the spell, but thereafter it remains in effect for at least an hour (and sometimes longer) without further expenditure of END. (Note: in the case of animals that are smaller than human size, the DCV and PER Roll modifiers will partly or fully counteract the modifiers imposed by the animal’s size Physical Complication; see 6E1442-45.)

**Game Information:** Growth (+30 STR, +10 CON, +10 PRE, +6 PD, +6 ED, +6 BODY, +12 STUN, +3 Reach, +24 Running, -12m KB, +4 to others’ OCV to hit character, +4 to others’ PER Rolls to perceive character, x4 as tall and wide as normal, x64 mass), Usable As Attack (+1¼), Time Limit (duration of 1 hour plus 10 minutes per point by which the caster succeeds with his Magic roll; +1¼), Reduced Endurance (0 END; +½) (200 Active Points); OAF Expendable (two statuettes of an animal, one small, one larger, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Only Works On Animals (-1), Requires A Magic Roll (-1 per 20 Active Points; -¼), Spell (-½). 8) **Add A -¼ Limitation:** Total cost 42 points.
9) **Add A -½ Limitation:** Total cost 40 points.
10) **Plant Growth:** This variant of the spell only works on plants rather than animals, allowing the caster to Transform a puny sapling into a mighty oak. (See also Enhance Plant Growth, below.) Change Only Works On Animals (-1) to Only Works On Plants (-1½). Total cost: 14 points.
**BEAST’S WEAPONS**

**Casting Time:** Half Phase (Attack Action)

**Game Information:** HKA 1d6 (plus STR), Time Limit (1 Minute; +¾), Usable By Other (+¼) (30 Active Points); OAF Expendable (claw from a carnivorous animal, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 8 points.

**Target:** Special

**Casting Time:** Full Phase

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -7

**END Cost:** 7

**Description:** This spell allows the caster to call forth up to four animals. He must be in their native habitat (or otherwise near them), and they come to him under their own power. Once they arrive, the caster must compel or persuade them to obedience; they are not inherently disposed to like him.

The animals Summoned by this spell are built on up to 250 Total Points, which covers the vast majority of animals listed in Chapter Six of The HERO System Bestiary. The GM can extend it to cover more expensive animals (such as great white sharks) via the Absolute Effect Rule if desired.

**Game Information:** Summon up to four animals built on up to 250 Total Points each, Expanded Class (animals; +½) (90 Active Points); OAF Expendable (food the animal would like, Difficult to obtain; -1¼), Extra Time (1 Turn; -1¼), Gestures (throughout; -½), Incantations (throughout; -½), Requires A Magic Roll (-½), Arrives Under Own Power (-½), Summoned Being Must Inhabit Locale (-½). CALM ANIMAL

Effect: Mind Control 12d6, Set Effect (calm animal)
Target: One animal
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: 60m
Magic Roll Penalty: -6
END Cost: 6

Description: This spell calms angry, ferocious, frightened, or vicious beasts, making it easy for the character to cope with them. It doesn’t make the animal friendly toward the caster, or willing to obey his commands without question, but it’s likely to keep the creature from attacking or threatening anyone. In many cases, animals affected by Calm Animal simply wander away (or flee as quickly as they can) and leave the caster and his companions alone.

If a spellcaster uses Calm Animal on an animal who’s Enraged or Berserk, the target number for the Effect Roll is EGO +30 (in other cases it’s EGO +20 at most, and often less). If the Effect Roll succeeds, the animal automatically gets to make a roll to recover with a bonus of +1, with an additional +1 for every 5 points by which the Effect Roll exceeded the target number. Even if the Effect Roll fails, the animal still gets a normal roll to recover.

Game Information: Mind Control 12d6 (Animal class of minds) (60 Active Points); OAF Expendable (miniature bronze flute, Difficult to obtain; -1¾), Gestures (-¼), Incantations (-¼), Limited Normal Range (60m and subject to Range Modifier; -½), Requires A Magic Roll (-½), Set Effect (calmness; -1), Spell (-½). Total cost: 11 points.

Options:
1) Strong Spell: Increase to Mind Control 14d6. 70 Active Points; total cost 13 points.
2) Weak Spell: Decrease to Mind Control 10d6. 50 Active Points; total cost 9 points.
3) Free Spell: Total cost: 14 points.
4) Remove A -¼ Limitation: Total cost 12 points.
5) Remove A -½ Limitation: Total cost 13 points.
6) Add A +¼ Advantage: 75 Active Points; total cost 14 points.
7) Add A +½ Advantage: 90 Active Points; total cost 17 points.
8) Add A -¼ Limitation: Total cost 11 points.
9) Add A -½ Limitation: Total cost 10 points.
14) Terrify Animal: This spell is the opposite of Calm Animal — it scares beasts. Usually this causes them to flee, but in the case of some types of beasts (including ferocious predators) may make them more likely to attack or become Enraged/Berserk. Change Set Effect to (create fear; -1); any version of the spell has the same cost as the corresponding version of Calm Animal.
CONTROL ANIMAL

Effect: Mind Control 8d6
Target: One animal
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: LOS
Magic Roll Penalty: -5
END Cost: 5

Description: More commonly used by wizards than by druids (the latter prefer Animal Companion or the use of the Animal Handler Skill), this spell allows the caster to take control of the mind of a single animal. It's often cast to stop animals from attacking or the like.

Game Information: Mind Control 8d6 (Animal class of minds) (40 Active Points); OAF Expendable (a small piece of a leash or halter, Easy to obtain; -1), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 11 points.

Options:
1) Strong Spell: Increase to Mind Control 10d6. 50 Active Points; total cost 14 points.
2) Weak Spell: Decrease to Mind Control 6d6. 30 Active Points; total cost 8 points.
3) Free Spell: Total cost: 16 points.
4) Remove A -¼ Limitation: Total cost 12 points.
5) Remove A -½ Limitation: Total cost 13 points.
6) Add A +¼ Advantage: 50 Active Points; total cost 14 points.
7) Add A +½ Advantage: 60 Active Points; total cost 17 points.
8) Add A -¼ Limitation: Total cost 11 points.
9) Add A -½ Limitation: Total cost 10 points.
10) Plant Control: This spell allows the caster to take control of the mind of a single plant. Since plants rarely have "minds" of sufficient strength to be subject to Mental Powers, the spell really only works on monstrous plants and plant-creatures. Substitute "Plant class of minds" for Animal minds in any version of Control Animal.

CREATE CARNIVOROUS PLANT

Effect: Summon one Giant Carnivorous Plant built on up to 250 Total Points
Target: Special
Casting Time: Full Phase
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -5
END Cost: 5

Description: This spell "quickens" and transforms any sufficiently large plant (a medium-sized bush or larger) into a fearsome carnivorous version of itself! These plants often possess other strange abilities, such as dangerous spores or the ability to shoot thorns.

Game Information: Summon one Giant Carnivorous Plant built on up to 250 Total Points (see HSB 189) (50 Active Points); OAF Expendable (ball of human blood and monster manure, Difficult to obtain; -1¼), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Summoned Being Must Inhabit Locale (-½). 9) Slavishly Devoted Plant: Add Slavishly Devoted (+1). 100 Active Points; total cost 23 points.
10) Add A -¼ Limitation: Total cost 11 points.
11) Add A -½ Limitation: Total cost 10 points.

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 450m

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** Druidry spells can harm things of nature as well as heal or use them. This spell, for example, destroys wooden objects, causing them to rot and fall apart in the space of a second. A clever spellcaster can use it to ruin a wooden-hafted weapon, destroy a door without much noise or difficulty, or kill a tree.

**Game Information:** RKA 3d6 (45 Active Points); OAF Expendable (tiny silver axe, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Only Versus Wood (-1), Requires A Magic Roll (-½), Spell (-½). Total cost: 9 points.

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -6

**END Cost:** 18

**Description:** This spell turns an ordinary large tree into a treeman (HSB 192). The treeman isn't necessarily kindly disposed toward the caster, who must negotiate with it or coerce it to obtain services from it.
**ENTANGLING VINES**

- **Effect:** Entangle 5d6, 5 PD/5 ED
- **Target:** One character
- **Casting Time:** Half Phase (Attack Action)
- **Casting Procedures:** Focus, Gestures, Incantations
- **Duration:** Instant
- **Range:** 500m
- **Magic Roll Penalty:** -5
- **END Cost:** 5

**Description:** This spell causes the plants and trees around the target to suddenly move, twist, and grow so as to grab and hold him. It only works if the target is near a sufficient amount of plant matter — at least one medium-sized bush. Depending on the type of plant matter involved, the GM may decrease the Entangle’s PD/ED, or even the dice rolled to determine the Entangle's BODY.

**Game Information:** Entangle 5d6, 5 PD/5 ED (50 Active Points); OAF Expendable (a bit of vine twisted into a complicated knot, Easy to obtain; -1), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Requires Sufficient Plants (see text; -½), Spell (-½), Vulnerable (bladed weapons; -1), Vulnerable (fire; -1). **IMPASSABLE TERRAIN**

- **Effect:** Change Environment, -10m of Running/Ground Movement
- **Target:** 500m radius
- **Casting Time:** 1 Hour
- **Casting Procedures:** Focus, Gestures, Incantations
- **Duration:** Time Limit (duration of 1 week plus 1 day per point by which the caster succeeds with his Magic roll)
- **Range:** No Range
- **Magic Roll Penalty:** -6
- **END Cost:** 0

**Description:** This spell alters the terrain in a 500m radius area (enough to protect a castle, cut off a mountain pass, or the like). Within the area affected by the spell, overland travel becomes much harder. To everyone but the caster (and at the GM's option, his allies), thickets are denser and harder to push through, mud is deeper and grips more strongly, the stones become larger and sharper, and so forth. Impassable Terrain turns what could be a simple, pleasant journey into a slow and aggravating effort. However, it has no effect in cities, or on non-natural surfaces such as paved roads.

**Game Information:** Change Environment (create impassable terrain), -10m Running/Ground Movement, Area Of Effect (500m Radius; +2), Personal Immunity (+¼), Reduced Endurance (0 END; +½), Time Limit (duration of 1 week plus 1 day per point by which the caster succeeds with his Magic roll; +2) (57 Active Points); OAF Expendable (a twist of plant matter tied around a pebble in a complex knot, Easy to obtain; -1), Concentration (0 DCV throughout; -1), Extra Time (1 Hour; -3), Gestures (two hands throughout; -1), Incantations (throughout; -½), No Range (-½), Only Works In Natural Environments (see text; -1), Requires A Magic Roll (-½), Spell (-½). Total cost: 6 points.

2) **Weak Spell:** Decrease to Area Of Effect (125m Radius; +1½). 52 Active Points; total cost 5 points.
3) **Free Spell:** Total cost: 5 points.
4) **Remove A +¼ Advantage:** 55 Active Points; total cost 5 points.

10) **Add A -¼ Limitation:** Total cost 5 points.
11) **Add A -½ Limitation:** Total cost 5 points.
12) **Impassable Region:** Add MegaScale (each 1m radius is 1 km wide, broad, and deep; +1). 67 Active Points; total cost 7 points.
**LIGHTNING STRIKE**

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 450m

**Magic Roll Penalty:** -6

**END Cost:** 6

**Description:** This spell calls down from the sky a tremendous bolt of lightning to strike the caster’s foes. If the target is inside, the bolt must first blast through the roof or other obstacles, diminishing its effect considerably.

**Game Information:** RKA 3d6, Indirect (Source Point is always in the sky above the target; sky; +¾) (56 Active Points); OAF Expendable (chip of wood from a lightning-struck tree, Difficult to obtain; -1¼), Gestures (-¾), Incantations (-¾), Requires A Magic Roll (-½), Spell (-½). **STINGING SWARM**

**Effect:** RKA 1 point, NND, Does BODY

**Target:** One character

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** 80m

**Magic Roll Penalty:** -2

**END Cost:** 6

**Description:** This spell calls up a large swarm of stinging, biting insects and sets them on a hapless victim. Even the strongest plate mail offers no protection against these deadly pests; only a form of defense that completely shields the body (such as some mystic protection spells, including Shield Of Faith and Wizard’s Shield) can keep the insects away.

**Description:** This spell paralyzes an animal, making it impossible for him to move unless he’s strong enough to break the bonds of magical force. Many adventurers and hunters rely on it to render their prey helpless before they deliver the killing blow, but others think it a cowardly and dishonorable way to slay a noble foe deserving of respect.

Target: One wooden object

Casting Time: Half Phase (Attack Action)

Casting Procedures: Focus, Gestures, Incantations

Duration: Instant

Range: 400m

Magic Roll Penalty: -4

END Cost: 4

Description: This spell, regarded by some spell-casters as a lesser version of Destroy Wood, warps and deforms wood. With it a caster can deform a door to make it easy to open (or change its shape so that it’s firmly wedged shut), bend a bow or spear so that it’s useless, or cause a tree to grow in an unusual or pleasing shape.

At the GM’s option, if a character uses this spell against a being made of wood, such as a wood golem or treeman, you can treat it as an RKA Minor Transform 4d6, NND (defense is Power Defense), Does BODY.

Game Information: Minor Transform 4d6 (wooden object into useless wooden object; heals back through the application of this or a similar spell) (20 Active Points); OAF Expendable (small piece of warped wood, Easy to obtain; -1), Gestures (-¼), Incantations (-¼), Limited Target (wooden objects; -½), Requires A Magic Roll (-½), Spell (-½). **WEBS**

Effect: Barrier 6 PD/6 ED, 8 BODY plus Entangle 3d6, 3 PD/3 ED, Damage Shield

Target: Area

Casting Time: Half Phase (Attack Action)

Casting Procedures: Focus, Gestures, Incantations

Duration: Time Limit (duration of 10 minutes, +1 minute by which the caster succeeds with his Magic roll)

Range: 60m

Magic Roll Penalty: -8

END Cost: 0

Description: This spell creates large, thick, sticky strands of spider web that catch and entangle anyone who touches them.

Because the webs don't form a solid Barrier, characters can sometimes safely make attacks through them. Making a Ranged attack against someone on the other side of the Barrier without hitting it entails a -2 OCV penalty; if the Attack Roll fails the attack hits the Barrier (and thus may still get through it, and even have a chance to hit the target, if it's powerful enough). A character can only make a HTH attack if he's standing next to the web and his target is standing next to it on the other side. He suffers a -2 OCV penalty... and if his Attack Roll fails he's touched the web and is now Entangled.

Game Information: Barrier 6 PD/6 ED, 8 BODY (up to 8m long, 8m high, ½m thick), Reduced Endurance (0 END; +½) (64 Active Points); OAF Expendable (dead spider wrapped in a bit of webbing, Easy to obtain; -1), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Limited Effect (characters can sometimes attack through web, see text; -¼), Limited Range (60m; -¼), Requires A Magic Roll (-1 per 20 Active Points; -¼), Spell (-½), Time Limit (duration of 10 minutes, +1 minute by which the caster succeeds with his Magic roll; -1) (total cost: 15 points) plus Entangle 3d6, 3 PD/3 ED, Constant (+½), Area Of Effect (Surface large enough to cover Barrier, Damage Shield; +1), Personal Immunity (+¼), Reduced Endurance (0 END; +½) (97 Active Points); OAF Expendable (dead spider wrapped in a bit of webbing, Easy to obtain; -1), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Limited Range (60m; -¼), Linked (-¼), Requires A Magic Roll (-1 per 20 Active Points; -¼), Spell (-½), Time Limit (duration of 10 minutes, +1 minute by which the caster succeeds with his Magic roll; -1) (total cost: 23 points). Total cost: 38 points.

Options:

2) **Remove A +¼ Advantage:** 54 + 90 = 144 Active Points; total cost 34 points.

**EASY PASSAGE**

**Effect:** Tunneling 12m through PD 6 material, Fill In, Only Versus Thickets

**Target:** Self

**Casting Time:** Half Phase

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -3

**END Cost:** 3

**Description:** When this spell is cast, thickets, undergrowth, brambles, and the like part in front of the spellcaster, allowing him (and his companions, if any) to pass through effortlessly. After passage is complete, the plants return to their normal shape.

In game terms, this spell uses Tunneling to create “safe passage” through undergrowth (including things like a Thorn Wall). Most natural undergrowth has PD 1-3 for purposes of this spell. After the character passes through, the Fill In effect occurs automatically; the character cannot leave an open “tunnel” through the wilderness behind him without GM’s permission. Spellcasters cannot use this spell to “pass through” or cause damage to plant-based monsters.

As built, this spell assumes the caster has the standard Running 12m most characters have. If he has more or fewer meters of Running, rebuild it accordingly.

**Game Information:** Tunneling 12m through PD 6 material, Fill In (34 Active Points); OAF Expendable (tiny steel scythe-blade, Difficult to obtain; -1¼), Fill In Occurs Automatically (-0), Gestures (-¼), Incantations (-¼), Limited Medium (thickets, undergrowth, and the like; -1), Requires A Magic Roll (-½). **Game Information:** Flight 12m, Costs Endurance Only To Activate (+¼); Time Limit (duration of 1 hour, +1 hour per point by which the caster succeeds with his Magic roll; +1¼) (30 Active Points); OAF Expendable (a feather, Easy to obtain; -1), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Only In Contact With A Horizontal Surface (-¼), Requires A Magic Roll (-½). **Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -5

**END Cost:** 0

**Description:** This spell grants the character the power to change his shape of any tree. (Technically he's limited to 16 tree forms, but the GM should apply the Absolute Effect Rule to let him assume other tree shapes in the event 16 forms isn't enough.)

For game purposes, a tree's character sheet mostly consists of a lot of Size-related abilities coupled with some significant Physical Complications (such as the inability to move in any way). On the upside, trees are very durable and can survive for centuries. In many natural environments assuming tree form is a superb way to hide.

**Game Information:** Multiform (16 tree forms built on up to 150 Total Points each) (50 Active Points); OAF Expendable (a bundle of twigs and leaves wrapped together with scarlet thread, Easy to obtain; -1), Concentration (0 DCV throughout casting; -1), Costs Endurance (to cast; -½), Extra Time (20 Minutes to cast; -¾), Gestures (throughout casting; -¼), Incantations (throughout casting; -½), Requires A Magic Roll (-½). Elemental Magic: Air

Air Magic spells relate to or use winds, clouds, mists, and related phenomena (such as lightning). Air wizards can learn some similar spells from Druidry (such as Cordarion's Spell Of Weatherworking) as part of their arcana, and often learn some Ice Magic (page 148) as well.

In addition to the spells listed here, some of the spells of Druidry (page 101) could qualify as Air Magic, and vice-versa. The “air elemental only” option for Elemental Summoning (page 68) should also be considered an Air Magic spell.

Elemental Magic

The term Elemental Magic refers to spells related to the four classic Elements — Air, Earth, Fire, and Water — as well as “lesser” element-like phenomena (such as Ice/Cold and Light/Shadow). For ease of reference and learning, practitioners of magic divide Elemental Magic into multiple categories. Thus, a caster could be a Fire Mage, Air Wizard, or Shadow Mage. Other wizards prefer to be general elementalists, mixing and matching spells from the different Elemental Magic categories to achieve the best results.

Compared to many other categories, Elemental Magic tends to be spectacular, even “flashy.” Powerful, impressive effects are common, and spells sometimes take the Limitation Noisy because they attract so much mystical attention. Many combat-oriented spellcasters focus on Elemental Magic because it has so many attack spells.

**MAGE’S WIND**

**Effect:** Telekinesis (20 STR), Affects Whole Object

**Target:** One character

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** 300m

**Magic Roll Penalty:** -3

**END Cost:** 3

**Description:** This spell creates a strong gust of wind that the caster can use for various effects. If cast at lower levels of power (1-5 STR), it can ruffle curtains or clothes, snuff out candles and torches, blow papers off desks, and so forth. At higher levels of power, it can even pick up and “throw” objects up to four times the weight of a man. Clever casters can find many other uses for it, such as blowing sand in attackers’ eyes or extinguishing campfires.

**Game Information:** Telekinesis (20 STR) (30 Active Points); OAF Expendable (tiny leather bag stitched with scarlet thread and tied with golden thread, Difficult to obtain; -1¼), Affects Whole Object (-¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Spell (-½). **MISTSHAPING**

**Effect:** Images to Sight Group, +2 to PER Rolls

**Target:** 16m Radius

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** 100m

**Magic Roll Penalty:** -3

**END Cost:** 3

**Description:** This spell allows a character to shape mists, fogs, or clouds. For example, he could form images of people out of the mist, make it spell words, or change its overall shape. He can shape the mist within an 16m radius area, which may leave some parts of a larger field of fog untouched.

The shapes formed with the mist are obviously made of mist (hence the PER Roll modifier for the spell is a bonus rather than a penalty; ordinarily it can’t fool anyone). For example, if a wizard used Mistshaping to form a cloud of fog into the shapes of ten gnomish warriors, the warriors would clearly be made of mist and would not fool anyone who saw them directly into thinking they were real warriors. However, a clever spellcaster may be able to use Mistshaping to trick his enemies in situations where there’s already a lot of fog or mist preventing people from seeing clearly.
**SLUMBOUS CLOUD**

**Effect:** Blast 4d6, NND  
**Target:** 8m Radius  
**Casting Time:** Half Phase (Attack Action)  
**Casting Procedures:** Focus, Gestures, Incantations  
**Duration:** Constant  
**Range:** 60m  
**Magic Roll Penalty:** -6  
**END Cost:** 6  

**Description:** Desiring the effectiveness of the Deadly Cloud, but not its lethal power, the wizard Stelrane created this cloud-spell, which only puts the victims to sleep. He later enhanced the spell's power in various ways, but all versions of it have been use among mages.  

**Game Information:** Blast 4d6, Area Of Effect (8m Radius; +½), Constant (½), NND (defense is Life Support [Immunity to any poison or Self-Contained Breathing]; +1) (60 Active Points); OAF Expendable (a ball of silk made from a pillow someone slept on, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¾), Limited Range (160m; -¼), Requires A Magic Roll (-½), Requires Mist/Fog (-½). Total cost: 7 points.

**STENCH**

**Effect:** Change Environment, +4 to CON Rolls  
**Target:** 16m Radius  
**Casting Time:** Half Phase (Attack Action)  
**Casting Procedures:** Focus, Gestures, Incantations  
**Duration:** Constant  
**Range:** 60m  
**Magic Roll Penalty:** -3  
**END Cost:** 3  

**Description:** This spell fills the air in an 16m radius with horrific odors. Anyone in (or who enters) the area of malodorous air must make a CON Roll at -4. Characters who fail lose one Phase retching, but can make further CON Rolls in later Phases. If the character fails the roll in later Phases, reduce his OCV by 1. As soon as the character makes one of his CON Rolls, this penalty ceases to apply.  

Another spellcaster can cancel the effect of this spell by applying the spell Freshen Air to the affected area. On the other hand, casting Stinking Air into a Freshened area negates that spell.  

**Game Information:** Change Environment (create horrible stench), -4 to CON Rolls, Area Of Effect (16m Radius; +½) (21 Active Points); OAF Expendable (a ball of sulphur and dung, Difficult to obtain; -1¼), Gestures (-¾), Incantations (-¾), Limited Range (60m; -¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 5 points.

10) **Add A -¼ Limitation:** Total cost 5 points.  
11) **Add A -½ Limitation:** Total cost 5 points.

Spellcasters who venture underwater or into areas filled with dust, poisonous gases, or the like often use this spell. It creates a sphere of fresh air in a 8m radius around the caster that moves with him as he moves. Thanks to its size, it allows the caster's comrades to breathe normally, too — provided they stay within 8m of him.

The Sphere Of Air remains in existence as long as the caster continues to pay END. This could cause problems if an attacker Knocks him Out underwater....

Earth Magic spells relate to, use, or affect, earth, rock, stone, and the like (including spells pertaining to crystals, glass, sand, and metal). It's a favorite category of many dwarven and gnomish spellcasters, as well as many battle mages, but they're by no means the only practitioners of it.

In addition to the spells listed here, some of the spells of Druidry (page 101) could qualify as Earth Magic, and vice-versa. The “earth elemental only” option for Elemental Summoning (page 68) should also be considered an Earth Magic spell.

**OFFENSIVE SPELLS**

**EARTHQUAKE**

**Effect:** Telekinesis (40 STR) to cause/restrain earthquakes

**Target:** 10 km Radius/7 km Radius

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -12/-13

**END Cost:** 12/13

**Description:** This spell allows a caster to cause — or calm — an earthquake.

Causing an earthquake involves damaging structures and beings on the ground over a vast area. Secondary effects may occur, such as buildings collapsing, power and fuel lines rupturing, rifts opening in the earth, or bodies of water changing location or course. Earthquakes count as Telekinesis that damages objects on the ground over a wide area; typically, an earthquake has 5 points of STR per 1.0 rating on the Richter scale. Thus, a 5.0 Richter quake has Telekinesis (25 STR).

To cancel or negate a quake, the character has to be on the ground where the quake occurs. He matches the Calming The Quake aspect of this spell against the quake's STR in a Strength Versus Strength Contest. If the character wins, he stops the quake from occurring in the area affected by his power (if the quake is larger than that, the effect continues, unabated, in area the character cannot cover). If the quake wins, it occurs as normal, though the GM may, in his discretion, reduce its effect thanks to the character's efforts (the character's STR may reduce the quake's STR on a 1-for-1 point basis, or maybe every BODY the character got on his STR Roll reduces the quake's STR by some amount).

**Description:** This powerful spell converts stone into mud. The caster controls the consistency of the mud; it can be fairly firm, very wet and soupy, or something in between. At its most basic level, all this spell does is lower the PD/ED of the substance from 5/10 (stone) to 0/4 (earth), but the secondary effects may be more significant. If the caster Transforms part of a stone pillar or wall into mud, he could cause the structure it supports to fall down, killing everyone inside. Similarly, a proper application of this spell can create an opening in a stone wall.

Per 6E2 170-173, a boulder has 13 BODY, 5 PD, and 10 ED, while dirt has 10 BODY, 0 PD, and 4 ED. Therefore, using the Standard Effect Rule, and assuming a “boulder” is roughly 1 cubic meter of stone, this spell Transforms up to three cubic meters of stone to mud per casting.

**Game Information:** Minor Transform 12d6 (stone into mud; heals back through another application of this spell or the passing of aeons) (standard effect: 42 BODY) (60 Active Points); OAF Expendable (ball of mud, Easy to obtain; -1), Gestures (-¼), Incantations (-¼), Limited Range (100m; -¼), Limited Target (stone; -½), Requires A Magic Roll (-½), Spell (-½). WALL OF IRON

Effect: Barrier 12 PD/12 ED, 15 BODY (up to 12m long, 4m tall, and 1m thick), Opaque (Sight Group)

Target: Area

Casting Time: Half Phase (Attack Action)

Casting Procedures: Focus, Gestures, Incantations

Duration: Instant

Range: 20m

Magic Roll Penalty: -8

END Cost: 8

Description: This spell resembles Wall Of Stone (page 128), but allows the caster to create a wall of solid iron. He can control the appearance/texture of the wall, making it as smooth as a blade or as rough as iron ore. However, at least one edge of the wall must maintain firm contact with the ground; a spellcaster cannot make the wall so that it falls and crushes people.

When successfully created, a Wall Of Iron can be up to 8m long and 3m tall. For every 1 point by which the caster succeeds with his Magic roll, he can increase the length or height by +1m to a maximum of 12m long and 4m tall.
Fire Magic is perhaps the most popular form of Elemental Magic; many wizards who care little for Air, Earth, or Water know more than a few Fire spells. Most Fire spells are attack spells, since Fire is a potent weapon.

In addition to the spells listed here, some of the spells of Druidry (page 101) could qualify as Fire Magic, and vice-versa. The “fire elemental only” option for Elemental Summoning (page 68) should also be considered a Fire Magic spell.

**BASIC SPELLS**

**IGNITE**

Effect: RKA 1 point, Penetrating

Target: 16m Radius, Selective

Casting Time: Half Phase (Attack Action)

Casting Procedures: Gestures, Incantations

Duration: Time Limit (until runs out of fuel or is extinguished)

Range: 60m

Magic Roll Penalty: -2

END Cost: 0

Description: One of the first spells learned by any fire mage, Ignite allows a wizard to set flammable objects on fire. He can light every flammable object within an 16m radius (including things like other peoples’ clothes, hair, and fur), or only specified objects. The spell also has the Area Of Effect (1m Radius Accurate) Advantage, so every Attack Roll made with it to selectively attack targets is made against DGV 3.

Any flammable object that touches an object lit on fire with the Flammifer also catches fire (the Sticky effect). The flames keep burning until they run out of fuel or air, or someone puts them out. Dousing one burning person or object doesn’t affect any of the others; each person or object must be extinguished individually.

At the GM’s option, characters may buy this spell Linked with other Fire Magic spells, to represent the fact that fire attacks tend to set objects on fire. It may even be possible for a fire mage to “Link” them by succeeding with a Magic roll at -2.

**Game Information:** RKA 1 point, Area Of Effect (16m Radius Selective, +1), Area Of Effect (1m Radius Accurate; +½), Constant (+½), Penetrating (+½), Reduced Endurance (0 END; +½), Sticky (only affects flammables; +½), Time Limit (spell ends when it runs out of fuel or oxygen, or someone extinguishes the flames; +½) (24 Active Points); Gestures (-½), Incantations (-½), Limited Range (60m; -½), Requires A Magic Roll (-½), Spell (-½). Total cost: 9 points.

**Options:**

**BOIL LIQUID**

Effect: Change Environment, +14 Temperature Levels

Target: One container of liquid

Casting Time: Half Phase (Attack Action)

Casting Procedures: Focus, Gestures, Incantations

Duration: Constant

Range: No Range

Magic Roll Penalty: -5

END Cost: 5

Description: This spell, a favorite of wizards who travel the wilds, allows the caster to instantly bring up to one cubic meter of water to boil. It’s typically used to heat water in a kettle for cooking, but it can also melt ice and the like.
In game terms, the spell adds 14 Temperature Levels, or up to 280 degrees Fahrenheit, to the affected water. This suffices to boil water in most situations (since the normal boiling point of water is 212 degrees Fahrenheit).

A spellcaster cannot use this spell to harm living beings. However, in the case of beings made of Water (such as water elementals), the GM might consider it to cause RKA 1d6, NND, Does BODY damage (the defense being Power Defense or an appropriate protective spell).

**Game Information:** Change Environment (boil liquid), +14 Temperature Levels, Area Of Effect (1m Radius; +¼) (52 Active Points); OAF Expendable (cooled ember and a bit of flame, Easy to obtain; -1), Gestures (-¾), Incantations (-¾), No Range (-½), Only Works On Liquids (-½), Requires A Magic Roll (-½), Spell (-½). Fire Shaping:
Effect: Telekinesis (30 “STR”), Only Works On Fire
Target: Special
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: 450m
Magic Roll Penalty: -4
END Cost: 4

Description: This spell allows the caster to “pick up” masses of flame, move them, and even create crude shapes with them (such as a fiery eagle or a tower of flame). The spell can pick up a mass of fire doing up to 6 Damage Classes’ worth of damage (1 DC for every “5 STR” worth of Telekinesis; see APG 122). The caster can move the flame at the normal rate for Telekinesis.

If the caster touches a person with the flame, that person takes the flame’s damage; this extinguishes the flame (otherwise it does not “burn out” as long as the caster holds on to it). If the caster touches the flame to something flammable, such as a curtain, he loses control of it and it keeps burning until it uses up all the available fuel.

Game Information:
Telekinesis (30 “STR”) (45 Active Points); OAF Expendable (small ivory hand engraved with fire-runes, Very Difficult to obtain; -1½), Gestures (-¾), Incantations (-¾), Only Works On Fire (-1), Requires A Magic Roll (-½), Spell (-½). Total cost: 9 points.

**LEAPING FLAME**

**Effect:** RKA 2d6, Indirect, Varying Damage

**Target:** One character

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Gestures, Incantations

**Duration:** Instant

**Range:** 60m

**Magic Roll Penalty:** -6

**END Cost:** 6

**Description:** This spell allows a caster to use local sources of flame — candles, lanterns, torches, hearth-fires, campfires, and so forth — to attack his foes. With a word of power and a gesture, he causes the flame to blaze up, leap through the air, and strike the target. Both the fire and the target must be within 60m of the caster, and the angle of the attack depends on the relative locations of the fire and the target. After the spell takes effect, the source of flame returns to its normal intensity.

The damage this spell causes depends on the size and intensity of the flame used. See 6E2 150 and page 415 of Fantasy Hero for suggested guidelines.

**Game Information:** RKA 2d6 (see text), Indirect (Source Point and Path can vary from use to use; +1) (60 Active Points); Gestures (-¼), Incantations (-¼), Limited Range (60m; -¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 18 points.

**QUENCH FLAME**

**Effect:** Dispel Fire 12d6

**Target:** One fire

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 100m

**Magic Roll Penalty:** -5

**END Cost:** 5

**Description:** What a fire mage creates, he can destroy. This spell extinguishes fires both mundane and magical, snuffing them out instantly.

For fire powers possessed by characters, use the Active Points in the power to determine whether the Dispel works. At the GM’s option, separate fires caused by a character’s power may also use this rule, instead of the one for natural fires.

For natural fires, if a fire fills a 1m radius area or less, use its Active Points (typically for an RKA, Constant) to determine whether the Dispel works (see 6E2 150 and and page 415 of Fantasy Hero for suggested damage ranges for fires). If it fills a larger area, the character can either extinguish it in 1m radius area sections, or in larger “pieces.” To determine the Active Points for a large fire, apply an appropriate Advantage (Area Of Effect, typically) to the Powers used to create the fire.

Extinguishing a fire doesn’t get rid of the smoke it generated, or reverse any effects it may already have caused (like heating an area or weakening the structure of a building).

**Game Information:** Dispel Fire 12d6, Variable Effect (any one Fire spell or power at a time; +½) (54 Active Points); OAF Expendable (a few drops of water, Easy to obtain; -1), Gestures (-¼), Incantations (-¼), Limited Range (100m; -¼), Noisy (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 13 points.

**Description:** This spell creates a wall of flame that's at least man-high and three man-heights long. Any physical person or object can pass through the wall, but it takes 1½d6 Killing Damage from the fire when it does so.

When successfully created, a Wall Of Fire can be up to 12m long, 2m high, and 2m wide. For every 1 point by which the caster succeeds with his Magic roll, he can increase the length or height by +1m to a maximum of 25m long and 4m tall (he cannot increase its width).

Most elemental mages consider Water Magic the weakest of the spells related to the four classic Elements, but this category remains popular with mages who frequently travel by sea or live near bodies of water.

In addition to the spells listed here, some of the spells of Druidry (page 101) could qualify as Water Magic, and vice-versa. The “water elemental only” option for Elemental Summoning (page 68) should also be considered a Water Magic spell, so should Air Sphere (page 121); Quench Flame (page 129), and Parting The Waters (page 99).

**OFFENSIVE SPELLS**

*T CONTROL THE WATERS

**Effect:** Change Environment, -24m Running

**Target:** 4 km Radius

**Casting Time:** 1 Hour

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** 240m

**Magic Roll Penalty:** -10

**END Cost:** 0

**Description:** With this spell, a wizard can cause, or stop, flooding over a four kilometer radius area. In game terms, the flooding effect is represented by a reduction in Running — creatures that don’t have at least Running 25m (typically due to long legs or large size) can’t move on the ground (they have to swim or fly to move from place to place). Stemming a flood has no particular combat effect, though the muddy ground may impose a -2m Running or -1 to some DEX-Based Rolls. Other effects, such as damage to buildings and objects, may also occur.

After the character stops concentrating on the spell, natural conditions return fairly quickly (the GM decides how quickly).

In addition to the four classic Elements, many other substances and phenomena are sometimes regarded as “Elements” in gaming campaigns. Two are described here: Ice/Cold and Light/Shadow.

**ICE/COLD SPELLS**

Wizards often debate the true nature of Ice. Some believe Ice-spells properly belong to the Water Magic category, others favor Air. But spellcasters well-versed in Ice-magery claim it is an Element unto itself, one of glittering power for those who take the risks to master its secrets.

**FREEZE LIQUIDS**

**Effect:** Change Environment (freeze liquids), -11 Temperature Levels

**Target:** 500m Radius Selective

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 420m

**Magic Roll Penalty:** -10

**END Cost:** 10

**Description:** With this spell, the caster can instantly freeze one or more bodies of liquid within a 500m radius. He can choose to freeze some (such as all the mugs of beer in a tavern) but not others (such as the water in the rainbarrels outside the tavern), but must be able to establish Line Of Sight to all the targets he wants to affect unless he wants to affect all of them within 500m. The ice lasts as long as it normally would given prevailing environmental conditions.

In game terms, the spell removes 11 Temperature Levels, or up to 220 degrees Fahrenheit, to the affected water. This suffices to freeze even boiling water (since the normal boiling point of water is 212 degrees Fahrenheit).

A spellcaster cannot use this spell to harm living beings. However, in the case of beings made of Water (such as water elementals), the GM might consider it to cause RKA 1d6, NND, Does BODY damage (the defense being Power Defense or an appropriate protective spell).
At the GM's option, a character who uses this spell on a single large body of water (such as a lake) can freeze the surface of the entire body of water thick enough for humans (and perhaps larger creatures) to walk on it safely, even if the body of water is larger than the spell's defined radius.

**Game Information:** Change Environment (freeze liquids), -11 Temperature Levels, Area Of Effect (500m Radius Selective; +2¼) (107 Active Points); OAF Expendable (clear crystal cube with ice-runes etched on each face, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Instant (-½), Requires A Magic Roll (-½), Spell (-½). ### SPELLS OF LIGHT AND SHADOW

Just as mages debate the nature of Ice Magic, so do they argue the place of magics of Light and Shadow. Some claim they are but two sides of the same coin, while others consider them as separate forms of magic. Some would assign Light spells to Fire Magic and leave Shadow as its own category. Still others regard them more as manifestations of divine power than arcane.

The spells below assume that Light and Shadow are just two aspects of one Element. If you prefer some other characterization, simply adjust the spell listings accordingly.

Enchantment is the art of crafting and using enchanted items. Rather than casting spells “directly,” the way wizards who specialize in other categories do, enchanters place mystic power in an item of some sort — a weapon, an article of clothing or jewelry, a talisman or amulet, the list is practically endless — and then use that item. (In HERO System terms, enchanters pay for these items with Character Points, just like other spellcasters buy their spells.)

Enchantment offers several advantages over “typical” spellcasting. First, placing a spell in an item often allows it to be more powerful. Second, using enchanted items allows an enchanter to wield powers from many categories of spells, sometimes with greater flexibility than a traditional spellcaster. Third, it’s often quicker and easier to use an item than to cast a spell. In HERO System terms, using an enchanted item is often a regular Zero Phase Action, instead of the Half Phase Action that’s standard for casting any sort of spell in most Fantasy Hero campaigns, and no Gestures or Skill Roll are required. (Incantations in the form of a “command word” may still be required, and some potent items do require the user to succeed with a Magic roll to “activate” them properly.) Fourth, while most enchanted items are Personal Foci of the casters who create them, some are Universal Foci that anyone can use (though they may need to know a “command word” or the like).

On the other hand, Enchantment has its drawbacks, too — primarily the fact that the items can be taken away from the caster. An ordinary caster can’t have his spells taken away, and even if he loses any (Expendable) Focus necessary to use a spell may still be able to cast it by paying extra END, making his Magic roll at a penalty, or the like (see Fantasy Hero for more discussion of this sort of thing). An enchanter who loses an item cannot use its powers at all until he gets it back.

The items described below are just a sampling of the nigh-infinite number of items that enchanters create. They focus on items casters tend to use themselves, rather than ones they craft for others to use (though making enchanted items for other people is also part of Enchantment; see Fantasy Hero for more information on making enchanted items). Thus, there aren’t any shields or suits of plate armor (items wizards rarely use), but there are some enchanted swords.

Assume that all enchanted items described below have the standard PD and ED for Foci (i.e., Active Points divided by 5) unless common or dramatic sense dictate they should be Unbreakable Foci.
ARMOR

DRAGONSKIN ARMOR

Effect: Resistant Protection (6 PD/6 ED) plus Resistant Protection (+12 ED), Only Versus Fire
Target: Self
Casting Time: N/A
Casting Procedures: N/A
Duration: Persistent
Range: Self
Magic Roll Penalty: N/A
END Cost: 0

Description: As is well-known, the skins of dragons are wondrously tough, yet also soft enough to work if the skin is removed after the dragon is slain. Enchanters long ago discovered a process whereby they could make from dragon-skin a suit of leather armor as tough as chainmail with the additional benefit of offering special protection against fire damage.

Most suits of Dragonskin Armor are cut, shaped, or molded to have a draconic motif, or to have scenes of dragons worked into the leather. Regardless of the armor's form or appearance, any dragon can instantly sense when a suit of armor is Dragonskin Armor... and even the kindest dragons rarely react well to it. Many attack a person wearing Dragonskin Armor on sight.

Game Information: Resistant Protection (6 PD/6 ED) (18 Active Points); OIF (-½), Mass (Half Mass; -½), Side Effects (attracts the ire of dragons; -¼) (total cost: 8 points) plus Resistant Protection (+12 ED) (18 Active Points); OIF (-½), Only Works Against Fire/Heat (-½), Side Effects (attracts the ire of dragons; -¼) (total cost: 8 points). Total cost: 16 points.

Description: This suit of studded cuir-bouilli has studs shaped light tiny golden starbursts. At a mental command from the wearer, one of the studs can emit a blinding flash of light to disorient a foe, leaving him unable to defend himself properly.

Game Information: Resistant Protection (3 PD/3 ED) (9 Active Points); OIF (-½), Mass (Half Mass; -½), Side Effects (attracts the ire of dragons; -¼) (total cost: 8 points) plus Resistant Protection (+12 ED) (18 Active Points); OIF (-½), Only Works Against Fire/Heat (-½), Side Effects (attracts the ire of dragons; -¼) (total cost: 8 points). Range: Self
Magic Roll Penalty: N/A
END Cost: 0

Description: Ideally suited for warrior-mages and other spellcasters who tend to get involved in HTH Combat, Wizard's Mail is as strong as the strongest plate armor but weighs no more than ordinary clothing. It provides protection against many forms of magical attack as well as mundane weapons and blows.

Game Information: Resistant Protection (9 PD/9 ED) (27 Active Points); OIF (-½) (total cost: 18 points) plus Mental Defense (10 points); OIF (-½) (total cost: 7 points) plus Power Defense (15 points); OIF (-½) (total cost: 10 points). Total cost: 35 points.

CLOTHING

Enchanters frequently use items of well-made clothing to hold enchantments since they're both comfortable and easy to wear into situations where more obvious enchanted items might attract unwanted attention.

**Target:** Special

**Casting Time:** N/A

**END Cost:** 0

**Description:** A Miniature Magnificent Mansion ordinarily resembles a model of a castle, house, or cottage small enough to fit in one’s pocket. But when it’s placed on the ground and the owner speaks its command word, it grows to full size. The interior is lavishly furnished, including a larder fully stocked with delicious food. After spending the night in safety and comfort, the owner can then leave the Magnificent Mansion, speak the command word again, and shrink it back down to pocket size (this automatically fails if any living thing remains inside; the Magnificent Mansion is not a weapon). When he next uses it, the larder is once again fully stocked.

**Game Information:** Summon one Base built on 200 Total Points, Slavishly Devoted (+1) (80 Active Points); OAF (-1), Incantations (command word; -¼), 1 Recoverable Charge (-1¼). Total cost: 23 points.

Humans and other humanoid races commonly used to create Player Characters in Fantasy Hero and other types of HERO System games aren’t necessarily the only races that know and practice magic. In some settings, just about any sentient being could learn how to cast spells. This includes some creatures commonly considered “monsters,” whether they’re humanoid themselves (giants, trolls) or completely non-human (dragons). Some may not even technically be living; in a Science Fantasy campaign maybe robots have their own spells!

This section includes some special spells for use only by particular races of monsters. Assuming the PCs ever learn about them, the GM has to decide whether members of other races can learn and cast them — but to maintain their mystique, it may be better if they can’t.

DRAGON MAGIC

Dragons are by definition magical creatures, and it’s not at all uncommon for them to learn magic. In addition to ordinary spells such as those cast by Men, over the centuries they’ve created their own Dragon Magic — spells only dragons can learn and cast. Since many dragons lack manipulatory digits, Dragon Magic spells do not take the Gestures Limitation; for similar reasons they rarely involve Foci. It’s also not unusual for dragons to remove the Requires A Magic Roll (⁻¹/₂) Limitation from a spell, since their innately magical nature makes it easy for them to cast spells. Few (if any) Dragon Magic spells have Side Effects because dragons understand magic well enough not to suffer any ill effects from a mis-casting.

See HSB 103-26 for character sheets and abilities for dragons.

ASSUME HUMAN FORM

**Effect:**
Shape Shift (Sight, Hearing, and Touch Groups, any humanoid form) plus Shrinking (to human size)

**Target:** Self

**Casting Time:** 1 Turn

**Casting Procedures:** Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -3

**END Cost:** 3 to change shape

**Description:** Dragons who lack the innate ability to change into human form can use this spell to do so. The Shrinking aspect of this spell is enough to halve the dragon’s size four times, reducing a Gigantic dragon to Human size.

**Game Information:** Shape Shift (Sight, Hearing, and Touch Groups, any humanoid form), Costs Endurance Only To Change Shape (+¹/₄) (29 Active Points); Extra Time (1 Turn to cast; -¾), Incantations (throughout casting; -½), Requires A Magic Roll (⁻¹/₂) (total cost: 10 points) plus Shrinking (24 points’ worth; see text), Reduced Endurance (0 END; +⅓) (36 Active Points); Extra Time (1 Turn to cast; -¾), Incantations (throughout casting; -½), Linked (⁻¹/₄), Requires A Magic Roll (⁻¹/₂) (total cost: 12 points). Total cost: 22 points.

**Options:**

1) **Strong Spell:** Add Imitation to Shape Shift. 41 + 36 = 77 Active Points; total cost 15 + 12 = 27 points.

2) **Remove A +¹/₄ Advantage:** 23 + 30 = 53 Active Points; total cost 8 + 10 = 18 points.

3) **Remove A -¹/₄ Limitation:** Total cost 12 + 13 = 25 points.

4) **Remove A -½ Limitation:** Total cost 13 + 14 = 27 points.

5) **Add A +¹/₄ Advantage:** 34 + 42 = 76 Active Points; total cost 12 + 14 = 26 points.

6) **Add A +½ Advantage:** 40 + 48 = 88 Active Points; total cost 14 + 16 = 30 points.

7) **Add A -½ Limitation:** Total cost 10 + 11 = 21 points.

8) **Add A -⅓ Limitation:** Total cost 9 + 10 = 19 points.

GIANT MAGIC

In many Fantasy settings, giants are, in their own way, as magical as dragons. It’s not uncommon for adventurers to discover that they have magical powers and/or can cast spells. Many of them know ordinary spells related to their nature or favored environment: fire giants can cast Fire Magic spells; stone giants prefer Earth Magic; and so forth. However, giants also create spells specific to their kind, which ordinary PC races like Men, Elves, and Dwarves do not (or cannot) learn. See HSB 233-41 for character sheets for typical giants.

ENLARGE OBJECT

Effect: Minor Transform 4d6
(human-sized object into giant-sized object)

Target: One object
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -2
END Cost: 2

Description: Giants often find (or take from their victims) human-sized objects that they would like to keep, but whose small size makes it difficult or impossible for them to use. This spell enlarges such objects so they fit comfortably in giantish hands.

For weapons, refer to 6E2 203 to determine the effects of enlarging them (and pages 190-91 and 195 for weapon BODY ratings). If a giant wants to increase the size of something valuable, like a gold goblet, use the rules on 6E1 306 apply to determine the effects of this increase in wealth.

While the GM could allow one successful use of the Minor Transform to change the object to any size desired, it may be more dramatically satisfying (or “realistic”) to require one successful use for each size category of increase. All the giants in The HERO System Bestiary “Large” or “Enormous” in size, so increasing an object to the proper size won’t take too much effort in most instances.

Game Information: Minor Transform 4d6 (object sized for humans into object sized for giants; heals back through another application of this or a similar spell) (20 Active Points); OAF Expendable (a piece of string tied to a piece of rope, Easy to obtain: -1), Gestures (-¾), Incantations (-¾), Limited Target (inanimate objects sized for humans and their ilk; -¾), No Range (-½), Requires A Magic Roll (-½), Spell (-½). Total cost: 5 points.

Options:
1) Strong Spell: Increase to Minor Transform 6d6. 30 Active Points; total cost 7 points.
2) Weak Spell: Decrease to Minor Transform 2d6. 10 Active Points; total cost 2 points.
3) Free Spell: Total cost: 6 points.
4) Remove A -¼ Limitation: Total cost 5 points.
5) Remove A -½ Limitation: Total cost 5 points.
6) Add A +¼ Advantage: 25 Active Points; total cost 6 points.
7) Add A +½ Advantage: 30 Active Points; total cost 7 points.
8) Add A -¼ Limitation: Total cost 4 points.
9) Add A -½ Limitation: Total cost 4 points.
10) Shrink Object: Some giants have human allies, and occasionally need to give them a giant-sized object. This spell, the opposite of Enlarge Object, shrinks a giantish object to a size where humans can easily use and carry it. The spell’s cost is the same.

GIANT’S HURL

Effect: +30 STR, Only To Increase Throwing Distance

Target: Self
Casting Time: Half Phase
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: Self
Magic Roll Penalty: -3

Description: Many giants use their prodigious strength to hurl boulders at their enemies. This spell allows the caster to hurl boulders even further.

Game Information: +30 STR (30 Active Points); OAF Expendable (chip of stone from a throwing boulder, Easy to obtain: -1), Gestures (-¾), Incantations (-¾), Nonpersistent (-¾), Only To Increase Throwing Distance (-1), Requires A Magic Roll (-½). Total cost: 7 points.

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** 180m

**Magic Roll Penalty:** -4

**HURLED HAIL**

**Effect:** Blast 9d6, Indirect
(Source Point is always from above target)

**Target:** 8m Radius

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** RBS

**Magic Roll Penalty:** -9

**END Cost:** 9

**Description:** Like Jotunish Blizzard (see below), this spell was first created by the frost giants, but they long ago passed on its secrets to other giants who live in northerly climes. It allows a giant to pick up a large chunk of ice (one weighing at least 1,000 kg) and hurl it as he would a boulder — but as it travels the magic breaks it apart into a mass of hailstones that affect an entire area.

**Game Information:** Blast 9d6 (physical), Area Of Effect (8m Radius; +½), Indirect (Source Point is always from above target; +¼) (79 Active Points); OIF (ice “boulders” of opportunity; -½), Gestures (-¾), Incantations (-¼), Range Based On STR (-¼), Requires A Magic Roll (-½), Spell (-½). WALK AMONG MEN

Effect: Shrinking (two levels; see text)
Target: Self
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: Self
Magic Roll Penalty: -1
End Cost: 1

Description: This spell reduces a giant’s size so that he’s the same height as a human and can mingle with Menfolk easily. Since giants are “Large” or “Enormous” in size, two levels of Shrinking is enough to halve any giant’s size once or twice and thus reduce him to human size (in the process temporarily eliminating the DCV penalties and PER Roll bonuses to perceive him that come from his size).

Game Information: Shrinking (see text) (12 Active Points); OAF Expendable (miniature figurine of the caster carved of soapstone, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 4 points.

Options:
1) Free Spell: Total cost: 6 points.
2) Remove A -¼ Limitation: Total cost 4 points.
3) Remove A -½ Limitation: Total cost 4 points.
4) Add A +¼ Advantage: 15 Active Points; total cost 5 points.
5) Add A +½ Advantage: 18 Active Points; total cost 5 points.
6) Add A -¼ Limitation: Total cost 3 points.
7) Add A -½ Limitation: Total cost 3 points.

TROLL MAGIC

Like giants, trolls often have their own special magics (and, being closely related to giants, may be able to use Giant Magic as well). Many human spellcasters regard Troll Magic as a strange and eerie thing and want nothing to do with it.

See HSB 278-80 for character sheets for trolls.

SUNWALKING

Effect: Multiform (into troll without Susceptibility to sunlight)
Target: Self
Casting Time: 1 Turn
Casting Procedures: Focus, Gestures, Incantations
Duration: Time Limit (duration of 3 Hours, +1 hour per point by which the caster succeeds with his Magic roll)
Range: Touch
Magic Roll Penalty: -7
End Cost: 0

Description: As discussed on HSB 278-79, some trolls turn to stone if exposed to sunlight. Those trolls can use this spell to render themselves immune to the petrifying effects of the sun for a few hours.

In game terms, this spell works by using Multiform to create an “alternate form” defined as the same troll without the Susceptibility (to sunlight) Complication. It assumes the troll is built on no more than 250 Character Points; adjust the cost up or down as appropriate for specific trolls, if desired.

Game Information: Multiform (into version of self built on no more than 250 Character Points but without Susceptibility to sunlight; see text) (50 Active Points); OAF Expendable (piece of sunstone carved with troll-runes, Difficult to obtain; -1¼), Concentration (½ DCV throughout casting; -½), Extra Time (1 Turn to cast; -¾), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-½), Time Limit (duration of 3 Hours, +1 hour per point by which the caster succeeds with his Magic roll; -½). Total cost: 9 points.

Options:
1) Strong Spell: Increase to built on no more than 300 Character Points. 60 Active Points; total cost 11 points.
2) Weak Spell: Decrease to built on no more than 200 Character Points. 40 Active Points; total cost 7 points.
3) Free Spell: Total cost: 12 points.
4) Remove A -¼ Limitation: Total cost 9 points.
5) Remove A -½ Limitation: Total cost 10 points.
6) Add A +¼ Advantage: 62 Active Points; total cost 11 points.
7) Add A +½ Advantage: 75 Active Points; total cost 14 points.
8) Add A -¼ Limitation: Total cost 9 points.
9) Add A -½ Limitation: Total cost 8 points.

TROLL KNOT

Effect: Telekinesis (60 STR), Only To Hold Knot Closed
Target: One knot
Casting Time: 1 Minute (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Time Limit (see text)
Range: Touch
Magic Roll Penalty: -0
End Cost: 0

Description: Some trolls know a secret, magical way to tie knots in ropes, the necks of carrying sacks, and the like. Until the troll unties the knot (or someone else who knows the spell does, or someone cuts through it), no one can untie it.

This spell uses the Time Limit Power Modifier to define the spell’s duration, but the value is significantly reduced because there are ways to avoid the effects of the spell — including simply cutting through the knot.
**TROLL SPLINTERS**

*Effect:* Major Transform 8d6 (sentient humanoid into sentient humanoid with Physical Complication Troll Splinters, as described in the text; heal back through another application of this spell) (80 Active Points); OAF Expendable (splinter of wood from a tree in a troll forest, Easy to obtain; -1), All Or Nothing (-½), Gestures (-¼), Incantations (-¼), Limited Range (40m; -¼), Requires A Magic Roll (no Active Point penalty; -0), Spell (-½). Total cost: 18 points.

*Options:*

1) **Strong Spell:** Increase to Major Transform 10d6. 100 Active Points; total cost 22 points.
2) **Weak Spell:** Decrease to Major Transform 6d6. 60 Active Points; total cost 13 points.
3) **Free Spell:** Total cost: 23 points.
4) **Remove A -¼ Limitation:** Total cost 19 points.
5) **Remove A -½ Limitation:** Total cost 20 points.
6) **Add A +¼ Advantage:** 100 Active Points; total cost 22 points.
7) **Add A +½ Advantage:** 120 Active Points; total cost 27 points.
8) **Add A -¼ Limitation:** Total cost 17 points.
9) **Add A -½ Limitation:** Total cost 16 points.

**TROLL TOUCH**

*Effect:* Severe Transform 8d6 (living being to stone)

*Target:* One character

*Casting Time:* Full Phase (Attack Action)

*Casting Procedures:* Focus, Gestures, Incantations

*Duration:* Instant

*Range:* Touch

*Magic Roll Penalty:* -12

*END Cost:* 12

*Description:* This spell turns a troll's weakness — the fact that the sunlight turns him to stone — into a weapon. It allows a troll to touch another living being and turn him to stone!

**NAMING MAGIC**

**Naming Magic**, sometimes more formally known as Onomancy, relies on the use of “true names” for its power. In a world where Naming Magic exists, every sentient being has a true name — his innermost personal name, typically known only to himself and perhaps a few other trusted loved ones. Nonsentient beings and objects have “generic” true names based on what they are. For example, bricks, thunder, and trees don’t have their own True Names, so instead the caster uses the generic true names of “brick,” “thunder,” or “tree” in whatever mystic tongue’s used to create true names.

Knowing a being’s or object’s true name grants a namer (a spellcaster who uses Naming Magic) power over him or it (i.e., the ability to cast spells which affect him or it). With objects and nonsentient beings the effects of a Naming spell are about the same as those of other categories of magic. But knowing a sentient being’s true name allows a namer to strongly affect him with magic (as indicated by the True Name spell described below). In a world where Naming Magic exists, a namer who knows a person’s true name should be more dangerous to that person than any other type of spellcaster.

Because a namer must speak aloud the name of the being or thing he wishes to control or manipulate, all Naming spells must have Incantations, and cannot remove that Limitation. They may have other common trappings of magic (a Focus, Gestures, and the like), but it’s possible to cast some just by speaking the proper name.

Because a sentient being has a true Name unique to him, some Naming spells have the Limitation Must Know True Name (-2). This means the caster must know the true name of the being he uses the spell against; it’s the power of the true name that allows him to accomplish the spell’s effect. Learning a being’s true name is difficult. Most people guard theirs (and any others they know) diligently; it would take an EGO +30 Mind Control roll or similarly strong methods of persuasion to force a true name out of someone. Legends claim some demons, dragons, and gods know true names, but bargaining with such beings is very dangerous.

The GM may, at his option, include other spells from other categories in this book as part of Naming, with appropriate changes. For example, Locking And Opening (page 357) could represent a namer speaking the true name of “door” or “lock.”

Necromancy

The category of Necromancy includes spells relating to, manipulating, or invoking the forces of life, death, undeath, and related phenomena. In most settings people consider it a black and evil art, and with good reason; the forces Necromancy uses tend to attract students of wicked, malicious, or disturbed mind. Still, some necromancers use their Art in more benign ways, such as to heal the injured.

In addition to the spells listed here, the GM may want to make some of the Black Magic spells (pages 47-61) and/or Shadow spells (pages 151-53) part of Necromancy.

Undead Creation and Summoning Spells

At the heart of Necromancy lie spells used to create undead creatures to serve necromancers as soldiers and slaves. In the case of corporeal undead (such as skeletons, zombies, or wights), the necromancer must have a sufficient number of bodies to bring back to “life”; with incorporeal undead, the creation bears more resemblance to traditional conjuring magics.

The costs for the undead listed in these spells are derived from the character sheets on pages 281-97 of The HERO System Bestiary. You can easily adjust the spells’ costs to allow for more (or less) powerful undead, undead with special abilities, and so forth. The Variable Summon (+¼) Advantage discussed on page 155 of Fantasy Hero is a good choice for the Add A +¼ Advantage option for most of these spells.

Call Ghoul

Effect: Summon up to four ghouls built on up to 157 Total Points
Target: Special
Casting Time: 20 Minutes
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -4
END Cost: 4

Description: This spell summons ghouls, with whom the necromancer must negotiate for service; the options below include spells for other types of undead. The spell only works if there are ghouls nearby (the GM determines what constitutes “nearby”), and the ghouls must come to the necromancer under their own power.

Game Information: Summon up to four ghouls built on up to 157 Total Points (41 Active Points); OAF Expendable (hunk of rancid meat, Easy to obtain; -1), Summoned Being Must Inhabit Locale (-½), Arrives Under Own Power (-½), Concentration (0 DCV throughout; -1), Extra Time (20 Minutes; -2½), Gestures (throughout; -½), Incantations (throughout; -½), Requires A Magic Roll (-½). Total cost: 5 points.

Options:
1) Many Ghouls: Increase to eight ghouls built on up to 157 Total Points. 46 Active Points; total cost 6 points.
2) Many, Many Ghouls: Increase to 16 ghouls built on up to 157 Total Points. 51 Active Points; total cost 6 points.
3) Free Spell: Total cost: 6 points.
4) Remove A -¼ Limitation: Total cost 5 points.
5) Remove A -½ Limitation: Total cost 5 points.
6) Add A +¼ Advantage: 51 Active Points; total cost 6 points.
7) Add A +½ Advantage: 61 Active Points; total cost 8 points.
8) Devoted Ghouls: Add Devoted (+¾). 71 Active Points; total cost 9 points.
9) Slavishly Devoted Ghouls: Add Slavishly Devoted (+1). 82 Active Points; total cost 10 points.
10) Add A -¼ Limitation: Total cost 5 points.
11) Add A -½ Limitation: Total cost 5 points.
12) **Other Necromantic Summoning Spells:** Using Call Ghoul as a model, you can easily create other spells that literally summon nearby undead, rather than using the *Summon* Power to represent creating them. For example:

**Summon Ghost:** Summon one ghost built on 463 Total Points (Focus: small piece of a burial shroud): 93 Active Points; total cost 12 points.

**Summon Mummy:** Summon one mummy built on 402 Total Points (Focus: small piece of a mummy’s wrappings): 80 Active Points; total cost 10 points.

**Summon Skeletons:** Summon four skeletons built on 185 Total Points (Focus: small piece of human bone): 47 Active Points; total cost 6 points.

**Summon Specter:** Summon one specter built on 758 Total Points (Focus: small piece of an elegant burial shroud): 152 Active Points; total cost 19 points.

**Summon Vampire (Lesser):** Summon one Lesser Vampire built on 435 Total Points (Focus: splinter of wood from a coffin): 87 Active Points; total cost 11 points.

**Summon Vampire (Greater):** Summon one Greater Vampire built on 693 Total Points (Focus: splinter of wood from a coffin): 139 Active Points; total cost 17 points.

**Summon Wights:** Summon two wights built on 340 Total Points (Focus: bit of earth from a grave-mound or barrow): 73 Active Points; total cost 9 points.

**Summon Watchers:** Summon two watchers built on 548 Total Points (Focus: small piece of black cloth): 115 Active Points; total cost 14 points.

**Summon Zombies:** Summon four zombies built on 176 Total Points (Focus: small piece of decaying flesh): 45 Active Points; total cost 6 points.

13) **Undead Summoning:** This spell summons one of any type of powerful undead, or a greater number of lesser-powered undead. Change to Summon one undead being built on up to 758 points, Expanded Class (undead; +½), Variable Summon (+¼). 266 Active Points; total cost 33 points.

---

**UNIVERSAL CREATE UNDEAD SPELL**

With the GM’s approval, necromancers can simply combine all the undead creation spell into one spell of general application:

- **Summon one undead being built on 758 Character Points or less,** Expanded Class (any undead; +½), Variable Summon (+¼), Slavishly Devoted (+1) (418 Active Points); OAF Expendable (appropriate material components and other necromantic supplies, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout; -1), Extra Time (1 Hour; -3), Gestures (throughout; -½), Incantations (throughout; -½), Requires A Magic Roll (-½). Total cost: 49 points.

- This lacks the flavor of having the individual creation spells and their variations, but saves the necromancer Character Points in the long run.

**CREATE GHOST**

**Effect:** Summon one ghost built on 463 Total Points, Slavishly Devoted

**Target:** Special

**Casting Time:** 1 Hour

**Casting Procedures:** Focus, Gestures, Incantations

When the spell is complete, the ghost appears, consumes the blood, and enters into the necromancer’s service.

At the GM’s option, the necromancer receives a +1 bonus to his Necromancy roll to cast this spell if he casts it at a cemetery, former battlefield, or other place where lots of bodies are buried.

**Game Information:** Summon one ghost built on 463 Total Points, Slavishly Devoted (+1) (186 Active Points); OAF Expendable (vial of fresh human blood and other necromantic supplies, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout; -1), Extra Time (1 Hour; -3), Gestures (throughout; -½), Incantations (throughout; -½), Requires A Magic Roll (-½). 13) **Add A -½ Limitation:** Total cost 21 points.
**CREATE MUMMY**

**Effect:** Summon one mummy built on 402 Total Points, Slavishly Devoted

**Target:** Special

**Casting Time:** 1 Day

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -16

**END Cost:** 16

**Description:** This spell turns a normal human corpse into a mummy who serves the necromancer. To cast it, the necromancer must have a corpse to work with, and that corpse must be largely intact (it might have suffered a wound or two, but it cannot be missing any limbs or the like). Casting the spell is a day-long process in which the necromancer treats the body with various substances (such as salts of natron), removes the body’s internal organs and replaces them with magical amulets and talismans, and then binds the body with strips of specially-prepared linen cloth. Any significant interruption ruins the whole process.

At the GM’s option, Embalming is a Complementary Skill for the Necromancy roll for this spell.

**Game Information:** Summon one mummy built on 402 Total Points, Slavishly Devoted (+1) (160 Active Points); OAF Expendable (death scarab amulet carved of jet and anointed with human blood, plus mummification supplies, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout; -1), Extra Time (1 Day; -4), Gestures (throughout; -½), Incantations (throughout; -½), Must Have Proper Body And Mummification Facilities (-1), Requires A Magic Roll (-½). Total cost: 15 points.

**Options:**

1) **More Mummies:** Increase to four mummies. 180 Active Points; total cost 17 points.
2) **Many More Mummies:** Increase to 16 mummies. 200 Active Points; total cost 19 points.
3) **Create Powerful Mummy:** This spell creates a mummy with all of the optional powers listed on HSB 286. Increase to Summon one mummy built on up to 549 Total Points. 220 Active Points; total cost 21 points.
4) **Create Specific Mummy:** This version of the spell creates a mummy from a specific person, thus returning that person to “life” to serve the necromancer. Add Specific Being (+1). 240 Active Points; total cost 23 points.
5) **Free Spell:** Total cost: 19 points.

**Range:** No Range

**Magic Roll Penalty:** -7

**END Cost:** 7

**Description:** With this spell, a caster can turn a jumble of ordinary human bones, or a mostly excarnated body, into a necromantically-animated skeleton. Skeletons make superb servants and warriors in many respects; they do not tire, feel pain, or question orders. However, they do tend to interpret commands literally, and cannot think on their own.

**Game Information:** Summon one skeleton built on 185 Total Points, Slavishly Devoted (+1) (74 Active Points); OAF Expendable (amulet of bone carved with necromantic runes, some human blood, and necromantic supplies, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout; -1), Extra Time (5 Minutes; -2), Gestures (throughout; -½), Incantations (throughout; -½), Must Have Body Or Bones (-1), Requires A Magic Roll (-½). ### CREATE SPECTER

**Effect:** Summon one specter built on 758 Total Points, Slavishly Devoted

**Target:** Special

**Casting Time:** 1 Hour

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -15

**END Cost:** 30

**Description:** This spell conjures a specter to serve the necromancer. The spell's procedures are similar in many respects to those of Call Ghost, but instead of a bowl of human blood the caster must have a live sacrifice of some sort — typically a human, but some necromancers substitute various animals instead.

At the GM’s option, the necromancer receives a +1 bonus to his Necromancy roll to cast this spell if he casts it at a cemetery, battlefield, or other place where lots of bodies are buried.

**Game Information:** Summon one specter built on 758 Total Points, Slavishly Devoted (+1) (304 Active Points); OAF Expendable (human [or other] sacrifice and other necromantic supplies, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout; -1), Extra Time (1 Hour; -3), Gestures (throughout; -½), Incantations (throughout; -½), Requires A Magic Roll (-1 per 20 Active Points; -½). **Description:** Instead of letting the corpse of a powerful or noteworthy man rest easy in death, a necromancer can use this spell to bring the dead person back to life as a fearsome wight. The corpse must be largely intact (it might have suffered a wound or two, but it cannot be missing any limbs or the like). The necromancer dresses the body in appropriate funerary garb anointed in human blood, performs various preliminary rituals and incantations, and after a day’s effort utter the final blasphemous words that bring the wight back to the land of the living.

**ETERNAL DEATH**

**Effect:** Suppress Healing 10d6, Only Versus Resurrection Healing

**Target:** One character

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Uncontrolled (see text)

**Range:** Touch

**Magic Roll Penalty:** -10

**END Cost:** 0

**Description:** This spell, regarded as an abomination by many priests and adventurers, prevents the use of resurrection spells for decades, even centuries. (For game purposes, assume it has a duration of 10 years, plus an additional 10 years per point the caster succeeds with his Magic roll.)

In game terms, the necromancer casts this spell on a dead body, and the GM makes a note of the total on the Suppress dice. For the duration of the spell, any time a Healing Resurrection power is used to bring the body back to life, it fails to work unless its Active Points exceed the Suppress total.

**Game Information:** Suppress Healing 10d6, Reduced Endurance (0 END, effect can be negated with a successful Dispel Magic spell; +½), Uncontrolled (+½) (200 Active Points); OAF Expendable (tiny golden lock, Very Difficult to obtain; -1½), Concentration (0 DCV throughout casting; -1), Extra Time (1 Minute; -1½), Gestures (throughout casting: -½), Incantations (throughout casting: -½), No Range (-½), Only Versus Resurrection Healing (-1), Requires A Magic Roll (-½ per 20 Active Points; -¼), Spell (-½). **FEAR OF DEATH**

**Effect:** Drain PRE 5d6, NND

**Target:** One character

**Casting Time:** Full Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 60m

**Magic Roll Penalty:** -5

**END Cost:** 5

**Description:** This spell afflicts living beings with the terror of their own mortality — the knowledge that they will one day die, that death will not be pleasant, and that the afterlife holds no comforts. It has no effect on long-lived or immortal beings, such as dwarves, elves, the undead, or gods. This spell only affects beings that have been wounded or injured in the past, and only to the extent they’ve suffered injury. Someone who’s never suffered a serious injury is immune to the spell. Someone who’s only suffered a few injuries can only suffer from the effects of this spell to that limited extent. In general, the GM can assume that most people have suffered enough cuts, nicks, and minor injuries to take at least one BODY per Phase from this spell, but he may restrict the total damage History Of Blood can do to some people. For example, if he knows that a character has only suffered three serious injuries in his life (for 2 BODY, 3 BODY, and 5 BODY damage, respectively), then the most damage that character can take from History Of Blood is 10 BODY.

**Game Information:** Drain PRE 5d6, NND (defense is Life Support [Longevity]; +0) (50 Active Points); OAF Expendable (chip of stone from a grave marker or tomb, Difficult to obtain; -1¼), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Limited Range (60m; -½), Requires A Magic Roll (-½), Spell (-½). Total cost: 11 points.

**Options:**

2) **Weak Spell:** Decrease to Drain PRE 4d6. 40 Active Points; total cost 9 points.

**Target:** One character

**Casting Time:** Full Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** 40m

**Magic Roll Penalty:** -1

**END Cost:** 5

**Description:** This unusual spell has the terrifying effect of causing the target’s old wounds to re-open, one at a time, until he bleeds to death. Each Phase another old wound opens, or one that’s already opened becomes bigger. For example, if he knows that a character has only suffered three serious injuries in his life (for 2 BODY, 3 BODY, and 5 BODY damage, respectively), then the most damage that character can take from History Of Blood is 10 BODY.

**Game Information:** RKA 2d6, Constant (+½), NND (defense is having never been injured, or Life-Shielding; +1), Does BODY (+1), Reduced Endurance (½ END; +¼) (112 Active Points); OAF Expendable (miniature silver dagger, its blade coated with fresh human blood, Very Difficult to obtain; -1½), Extra Time (Full Phase to cast; -¼), Gestures (-¾), Incantations (-¾), Limited Range (40m; -¾), Requires A Magic Roll (-½), Spell (-½). **HIDDEN HEART**

**Effect:** Regeneration (3 BODY per Turn), Resurrection

**Target:** Self

**Casting Time:** N/A

**Casting Procedures:** N/A

**Duration:** Persistent

**Range:** Self

**Magic Roll Penalty:** N/A

**END Cost:** 0

**Description:** This unusual but powerful spell allows a necromancer to render his body indestructible by most forms of harm. During a long, strange ritual, the necromancer removes his internal organs and places them, still living, in mystic tanks (which he typically then hides and protects with the strongest magical wards and defenses available to him). As long as his organs remain safely outside his body, he rapidly heals any damage he takes (though he cannot regrow severed limbs), and can even return from the dead!

(Alternately, some forms of this spell involve the caster literally putting his “life-force” or his “death” into an object, or even into a familiar animal such as a cat. The end result in *HERO System* terms is the same.)

Although Hidden Heart involves a spell-like ritual, it grants the caster a mystic power that requires no spell preparations or procedures. Therefore a necromancer who wants it simply has to buy it as listed below, without reducing the cost through any Limitations or divisors. He may reverse the process and sell off the ability completely by replacing the organs in his body via the same ritual, but if he does so, he may never buy the ability again.

**Game Information:** Regeneration (3 BODY per Turn), Resurrection (others can stop Resurrection by completely destroying the wizard’s body or by killing his removed organs). Total cost: 68 points.

**Range:** Self

**Magic Roll Penalty:** -2

**Description:** Early necromancers created this spell to protect themselves from the attacks of undead creatures such as wraiths and liches. It also shields the recipient from various Necromancy spells.

**Game Information:** Power Defense (20 points), Usable By Other (+¼) (25 Active Points); OAF Expendable (tiny wax effigy of a person wrapped in a bit of cloth taken from a priest’s vestments, Very Difficult to obtain; -½), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Only Versus Necromancy And Undead Powers (-1), Requires A Magic Roll (-½), Time Limit (duration of 10 minutes, +5 minutes per point by which the caster succeeds with his Magic roll; -1). **Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Special

**Range:** Self

**Magic Roll Penalty:** -1

**END Cost:** 0

**Description:** This spell allows the caster (or one person whom he designates) to feign death. The recipient designates under what circumstances he awakens (typically the passage of a certain amount of time).

**Range:** Self

**Magic Roll Penalty:** -6

**END Cost:** 0

**Description:** This spell temporarily imbues the caster's body with the injury-resisting properties possessed by many corporeal undead. However, this protection comes with one drawback: the undead attributes taken on are so strong that the necromancer becomes susceptible to certain spells that otherwise could not affect him, such as Control Undead, Destroy Undead, and Necromantic Power.

**Game Information:** Physical and Energy Damage Reduction, Resistant, 50% (60 Active Points); OAF Expendable (tiny shield made of bone from a slain skeleton or other corporeal undead, Very Difficult to obtain; -1½), Extra Time (Full Phase; -¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Side Effect (character becomes susceptible to certain Necromancy spells [see text], automatically occurs; -½), Time Limit (duration of 1 Minute, +1 Minute per point by which the caster succeeds with his Magic roll; -1½). **Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** This spell creates a wall of bones woven together to form a solid, durable mass.

When successfully created, a Wall Of Bones can be up to 8m long and 3m tall. For every 1 point by which the caster succeeds with his Magic roll, he can increase the length or height by +1m to a maximum of 12m long and 4m tall. At the GM's option, a caster may be able to make the Wall reach its full extent more easily if he's in a location where there are already a lot of bones (such as a graveyard or battlefield).

**Game Information:** Barrier 4 PD/4 ED, 5 BODY (up to 12m long, 4m tall, and 1m thick), Opaque (45 Active Points); OAF Expendable (small cube of bone with a rune etched in each side, Easy to obtain; -1), Gestures (-¼), Incantations (-¼), Limited Range (20m; -¼), Requires A Magic Roll (-½). 9) **Controlled Wall:** The caster can make the Wall disappear at will. Add Dismissable. 50 Active Points; total cost 16 points.
10) **Wall Of Existing Bones:** This form of the Wall Of Bones spell only works when the caster has a large quantity of real bones to work with (at least 10 kg per 1m x 1m x 1m section of wall). Typically this restricts the use of the spell to cemeteries, battlefields, and the like. Add Requires Existing Bones (-1½). Total cost: 10 points.

**Description:** With this spell, the caster can detect the presence of life nearby. The necromancer knows how intense the life is (roughly speaking, how healthy and innately powerful the being is) as well as its location (but not well enough to target attacks). However, he cannot discern the fact that someone using Slumber Of The Tomb is not really dead; that spell trumps this one.

**Target:** Self

**Casting Time:** 1 Minute

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Self

**Magic Roll Penalty:** -2

**END Cost:** 20

**Description:** The most powerful and daring necromancers sometimes visit the Land of the Dead to converse with the departed, or mayhap with Death himself. This rare spell allows them to do so. It can only be cast at night, or in a completely lightless place such as an underground chamber. It causes a vast grey door to appear, through which only the necromancer may pass. Once he has done so, he finds himself at the foot of the Bridge of Last Repose, the crossing of which gains him access to the rest of Death’s Realm. Whispered tales hint at the horrors that dwell within the chasm the Bridge crosses, but the wise necromancer puts them out of his head as he steps onto it....

TRUE NECROMANCY

Effect: Precognition
Target: Self
Casting Time: 5 Minutes
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: 400m
Magic Roll Penalty: -4
END Cost: 4

Description: “Necromancy” literally means “foretelling the future via the dead,” and this spell represents that most basic function of this category of spells. With it, a necromancer can compel a shade or corpse to speak of what will come to pass — though he cannot guarantee that he can properly interpret the oft-vague words of the dead.

To cast the spell, the necromancer needs access to a dead body, be it a corpse in his laboratory or a body buried in a graveyard.

EMBALMING-SPELL

Effect: Change Environment (preserve corpse)

Casting Time: Extra Phase
Casting Procedures: Focus, Gestures, Incantations
Duration: Time Limit (duration of 1 Year, +1 Year per point by which the caster succeeds with his Magic roll)
Range: No Range
Magic Roll Penalty: -1
END Cost: 0

Description: Sometimes a necromancer needs to preserve a body for a time, perhaps so he can get it back to his laboratory to experiment with it, perhaps so he has time to resurrect it before it decays. In those cases, he can use this spell, which perfectly preserves a corpse in the state the necromancer found it for a period of one year (or longer). The corpse can still suffer damage from being dropped, attacked, eaten by insects, or the like, but the passage of time will not affect it.

Game Information: Change Environment (preserve corpse), Reduced Endurance (0 END; +½), Time Limit (duration of 1 Year, +1 Year per point by which the caster succeeds with his Magic roll; +½) (10 Active Points); OAF Expendable (small gold sphere, Difficult to obtain; -¾), Extra Time (Extra Phase; -¼), Gestures (throughout; -½), Incantations (throughout; -½), No Range (-½), Requires A Magic Roll (-½). SECOND SELF

Effect: Duplication (create one 350-point Duplicate)

Target: Self

Casting Time: 1 Turn

Casting Procedures: Focus, Gestures, Incantations

Duration: Persistent

Range: Self

Magic Roll Penalty: -7

END Cost: 0

Description: This powerful necromantic spell allows the caster to grow a second version of himself from just a few drops of his own blood. The growing process takes months, and requires a lab full of vats and other delicate necro-alchemical equipment, but in the end the caster has a second self as a companion. This simulacrum possesses all the knowledge and abilities (including spells) that the caster had when he began the process, and is free-willed — he's not automatically the caster's slave, and in fact may not even like the caster.

The write-up below assumes the character is built on 350 Character Points when he begins the creation process, and that he builds his second self on exactly that many points. If necessary, rebuild the spell to fit other point totals.

Game Information: Duplication (creates 350-point Duplicate) (70 Active Points); OAF Expendable Immobile (drops of the caster's blood, various rare and expensive supplies, plus laboratory full of vats and like equipment; -3), Extra Time (1 Season; -5 ½), Cannot Recombine (-0), Requires A Magic Roll (-½). Total cost: 7 points.

SOUL FEEDING

Effect: Aid END and STUN 2d6, Delayed Return Rate (5 points per Hour), Trigger

Target: Self

Casting Time: 1 Minute

Casting Procedures: Focus, Gestures, Incantations

Duration: Time Limit (duration of 1 Hour, +1 Hour per point by which the caster succeeds with his Magic roll)

Range: Self

Magic Roll Penalty: -7

END Cost: 7

Description: This spell allows a necromancer to draw into himself the soul of a dying intelligent being to temporarily boost his stamina and vitality. Because doing this destroys the soul and prevents any chance of resurrection or reincarnation, most cultures and religions consider Soul Feeding an abomination and a clear sign that the caster using it is evil.

To use Soul Feeding, the necromancer casts the spell, which remains in effect for one hour or more. During that period, any time an intelligent being dies within 6m of the caster, the Aid activates and increases his END and STUN (up to the defined maximum of the power). The GM may, at his option, increase or decrease the Aid dice to reflect the relative life-force of various beings; a demi-god, powerful wizard, or kindly priest might have a much "richer" soul for the necromancer to feed on, for example.

Game Information: Aid END and STUN 2d6, Expanded Effect (two Characteristics simultaneously; +½), Delayed Return Rate (points fade at the rate of 5 per Hour; +1¼), Trigger (when intelligent being dies within 6m of caster, activating Trigger takes no time, Trigger immediately automatically resets; +1), Time Limit (duration of 1 Hour, +1 Hour per point by which the caster succeeds with his Magic roll; +1½) (69 Active Points); OAF Expendable (tiny piece of flawless obsidian, carved to resemble a net and anointed in human blood, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout casting; -1), Extra Time (1 Minute; -1½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Only Aid Self (-1), Requires A Magic Roll (-½). Total cost: 9 points.

Options:

1) Strong Spell: Increase to Aid 3d6. 103 Active Points; total cost 13 points.
2) Weak Spell: Decrease to Aid 1d6. 34 Active Points; total cost 4 points.

n some High Fantasy settings, virtually everyone can use magic. Even normal people like merchants and farmers — not to mention non-spellcasting adventurers such as rogues and warriors — can learn a spell or three to make life easier. Most of these spells are fairly low-powered, but they still make performing vital tasks simpler or provide other benefits. The spells described in this section are just a few examples of this sort of “Professional Magic.”

These spells are grouped into several categories based on who tends to learn and use them. However, that’s just for organizational purposes; it’s not a rules restriction. Absent in-setting social reasons (such as a guild that controls access to and use of certain spells), a character can learn any of these spells regardless of what he does for a living.

**CRAFTSMAN AND MERCHANT SPELLS**

These spells are learned and used by blacksmiths, potters, tradesmen, shopkeepers, and other folk who work at similar jobs for a living.

**SKILL-BASED SPELLS**

Many of the spells in this category, and spells in other categories such as Tracker’s Eye (page 115), provide a character with Skills or Skill-like abilities (often at a high roll), or enhance the Skills he already has. This may cause problems in some campaigns. While such spells often work well for games in which none of the characters have the Skill, they may allow the spellcaster to overshadow a character who pays Character Points to buy the Skill himself. If this is a problem in your game, the GM should restrict the use of Skill-based spells, either by adding Limitations (Extra Time, Increased Endurance Cost, and so on) or by applying the Charges Limitation so characters cannot cast them frequently.

**Description:** Merchants (and some thieves!) use this spell to determine the exact value of an object based on its composition, form, quality, and other factors. It tells the caster the value in whatever currency he wants, or even multiple currencies. In the GM’s discretion, Trading may be Complementary to this roll, even though it’s a Sense rather than a Skill.

**Game Information:** Detect Monetary Value Of Object (INT Roll) (no Sense Group), Discriminatory, Analyze (15 Active Points); OAF Expendable (tiny chip of gold from a gold coin, Difficult to obtain; -1¼), Costs Endurance (-½), Gestures (-¼), Incantations (-¼), Instant (-½), Requires A Magic Roll (-½). Magic Roll Penalty: -1
END Cost: 1

Description: This spell (or, more precisely, category of spells) takes its name from the fact that in many locations, craft guilds control who can learn and use it — they’re guild secrets, passed on only to qualified guild members and kept secret from rivals and non-members. It provides a bonus for up to three related Professional Skills (though many craftsmen really only need it for one). The character must choose which three PSs the spell applies to when he buys it, and cannot change them thereafter. (The GM may choose to allow a character to substitute some other appropriate Skill for one or more PSs.)

The exact name of this spell may vary depending upon the PSs it applies to and the type of craftsman who learns it. For example, a blacksmith might learn it for PS: Blacksmithing, PS: Shoe Horses, and (with the GM’s permission) Weaponsmith, and call it Metalweaving.

Game Information: +4 with three related Professional Skills (see text) (12 Active Points); OAF (a miniature silver version of a tool or other object used in the performance of the craft; -1), Costs Endurance (-½), Gestures (-¾), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 3 points.

ICE FOR SALE

Effect: Change Environment, -5 Temperature Levels, Only To Freeze Liquids
Target: 1m Radius (see text)
Casting Time: 5 Minutes (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant (see text)
Range: No Range
Magic Roll Penalty: -1
END Cost: 1

Description: In many Fantasy cities, during most (if not all) of the year, the only way for someone to obtain ice is to purchase it from a merchant who knows this spell. Ice For Sale freezes solid up to one barrel of water (or other liquid); clever merchants may even create icetray-like wooden lattices so the ice is in cube form. The ice melts at the normal rate for the prevailing environmental conditions after the spell is cast; people can often preserve it for a long time by packing it in sawdust in an icehouse.

Game Information: Change Environment (freeze liquids), -5 Temperature Levels, Only To Freeze Liquids (15 Active Points); OAF (a cube of ivory; -1), Concentration (½ DCV throughout casting; -½), Extra Time (5 Minutes to cast; -1), Gestures (throughout casting; -½), Incantations (throughout casting; -½), No Range (-½), Only Affects Specified Amount Of Liquids (see text; -½), Requires A Magic Roll (-½). **LIGHT FOR SALE**

**Effect:** Sight Group Images, Usable As Attack, Only To Create Light

**Target:** 4m Radius

**Casting Time:** 5 Minutes (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Time Limit (1 Month)

**Range:** No Range

**Magic Roll Penalty:** -5

**END Cost:** 0

**Description:** Another product Fantasy denizens can have when merchants use magic is light. The merchant casts this spell on one side of a specially-prepared object — typically a small wooden or metal disk he provides to the customer. (He cannot cast the light on a living being or the like.) The customer places the disk wherever he wants the light. When he wants to turn the light off, he simply turns the disk so it's face-down on a flat surface, thus blocking the light it gives off. The spell only lasts for one month, forcing the customer to return to the merchant and pay for a "recharge."

**Game Information:** Sight Group Images, +2 to PER Rolls, Area Of Effect (4m Radius; +¼), Usable As Attack (to "stick" light to defined object; +1½), Persistent (+¼) (52 Active Points); OAF (a wand of ivory; -1), Concentration (½ DCV throughout casting; -½), Extra Time (5 Minutes to cast; -1), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Only To Attach Light To A Specified Nonliving Object (see text; -½), Only To Create Light (-1), Requires A Magic Roll (-½), Time Limit (duration of 1 Month; -¼). Magic Roll Penalty: -4
END Cost: 4

WARRIOR SPELLS

These spells help soldiers, archers, rangers, and other warrior types perform the many tasks associated with fighting for a living. They cover only the more or less mundane aspects of fighting — they don’t provide combat bonuses or other abilities that help a warrior fight better (for that, see the Warrior-Magic category later in this book).

**Description:** Sentry duty is sometimes boring, sometimes dangerous, but never looked forward to. This spell makes the job a little easier by giving the character superb night-sight and keeping him from becoming sleepy. These effects last for six hours, after which the character’s vision returns to normal and he’s as tired as he’d expect to be based on his recent sleep and activity patterns.

**Game Information:** Nightvision (5 Active Points); OAF (small opal; -1), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (¼), Time Limit (duration of 6 Hours; -½) (total cost: 1 point) plus +2 to Sight Group PER Rolls (4 Active Points); OAF (small opal; -1), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (¼), Time Limit (duration of 6 Hours; -½) (total cost: 1 point) plus +2 to Sight Group PER Rolls (4 Active Points); OAF (small opal; -1), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (¼), Time Limit (duration of 6 Hours; -½) (total cost: 1 point) plus +2 to Sight Group PER Rolls (4 Active Points); OAF (small opal; -1), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (¼), Time Limit (duration of 6 Hours; -½) (total cost: 1 point). Rune Magic involves the use of spoken or painted runes, sigils, glyphs, and like symbols. To create a spell effect, the spellcaster must place the rune on the appropriate object, and perhaps concentrate on it to activate the magic. In some cases, the caster may use a short incantation to activate the rune’s power, but he can mutter it under his breath in a word or two, so it doesn’t qualify for the Incantations Limitation.

In HERO System terms, Rune Magic spells are designed one of two ways. Most are built with Time Limit and thus have to cost no END; they last until someone obliterates, removes, mars, or covers up the rune. This can lead to some extremely long-lasting effects, so GMs may want to restrict the use of such spells. The other type of rune-spell either creates a Constant effect that lasts as long as the user expends personal energy to power it, or uses Time Limit to represent how long the rune remains in effect before fading or becoming powerless. Both types of spells have the Limitations Focus (the materials used to carve or paint the rune) and Requires A Magic Roll. If the rune must be carved, this takes Extra Time (even painting one may require a Full Phase); creating or activating many runes also requires Concentration.

To prevent over-use of some runes, GMs may want to require characters to use the Add A -½ Limitation to make a rune a Blood Rune which requires the caster to use his own blood (and thus take damage) when creating a rune. (In HERO System terms, this is Side Effects (caster loses 1 BODY, always occurs; -½).)

**Description:** When a rune-wizard wishes to destroy some object — be it a cup, a wagon, or a castle wall — he can do so by carving this rune upon the object. The shattering itself does not hurt or affect him in any way, but at the GM’s option the secondary effects (such as a wall falling) might, if he doesn’t find some way to avoid them.

This spell doesn’t work at range — the caster has to touch (carve a rune upon) the object he wants to shatter. The No Range Limitation is a part of the Only Works Against Stationary Targets Limitation and thus is not listed separately.

**Target:** One object or character
**Carving Time:** 2 Turns (Attack Action)
**Casting Procedures:** Focus
**Duration:** Instant
**Range:** No Range (see text)
**Magic Roll Penalty:** -6
**END Cost:** 6

**Description:** If the character wants to damage a structure, or perhaps inflict a gruesome death on a prisoner, he carves this rune on the target and then backs away and concentrates on it. A few seconds later, a bolt of lightning lances down out of the sky and strikes the rune... and whatever it's carved upon. If the target is inside a structure, the lightning first has to blast through the roof before it can damage it/him.

This spell doesn't work at range — the caster has to touch (carve a rune upon) the object or person that will be struck by lightning. The No Range Limitation is a part of the Only Works Against Stationary Targets Limitation and thus is not listed separately.

**Game Information:** RKA 3d6, Indirect (Source Point is always the sky above the target; +¼) (56 Active Points); OAF (rune-carving knife; -1), Concentration (½ DCV throughout casting; -½), Extra Time (2 Turns; -1¼), Requires A Magic Roll (-½), Only Works Against Stationary Targets (-1). **SPILA, THE RUNE OF RUIN**

**Effect:** Drain PD 6d6  
**Target:** One gate, wall, or like object  
**Carving Time:** 1 Turn (Attack Action)  
**Casting Procedures:** Focus  
**Duration:** Instant  
**Range:** Touch  
**Magic Roll Penalty:** -12  
**END Cost:** 0  

**Description:** This spell is designed to enhance the effects of battering rams (and, at the GM's option, like objects or weapons). It adds to the ram's Normal Damage a potent magic that weakens the gate, wall, or other object being attacked with the ram. Use the OCV of the crew manning the battering ram [The Ultimate Base, page 165] to attack with the Drain, treating it as a Multiple Attack together with the ram's Normal Damage.

When the caster carves Spila into a battering ram, he must specify which object the rune's power works against — a specific gate, door, or the like. The battering ram retains the power of Spila and can keep using it until the targeted object is destroyed. If it does not destroy the object, it retains the rune's power for up to a day (or until the caster chooses to end the spell), but cannot use the rune's power against any other target. A caster could, of course, place another Spila rune on the ram for use against a second target, and so on.

**Game Information:** Drain PD 6d6, Usable By Other (any battering ram of up to 800 kg mass; +1) (120 Active Points); OAF (rune-carving knife; -1), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -1¼), No Range (-½), Only Works On Battering Rams Against A Specific Target (see text; -2), Requires A Magic Roll (-½). Total cost: 16 points.

**Options:**
1) **Strong Rune:** Increase to Drain PD 7d6. 140 Active Points; total cost 19 points.

**TAVTHRUDNIR, THE RUNE OF TRUTH**

**Magic Roll Penalty:** -8  
**END Cost:** 8  

**Description:** By painting this rune on the forehead of another person, the caster can force that person to answer questions truthfully. **Casting Procedures:** Focus

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -16

**END Cost:** 0

**Description:** This dreaded rune has the power to rob a man of his wits and his sanity. Carving it on him takes 5 minutes (and inflicts no BODY damage); this of course requires him to be stationary — typically he's tied or chained. Only casting the spell on him again, or applying other magic to restore his mind, can heal the condition.

**Game Information:** Major Transform 8d6 (sane person to person with the Psychological Complication Utterly, Gibberingly Insane [Very Common, Total]; heals back through application of this spell or a like spell), ACV (uses OCV against DMCV; +¼), AVAD (Mental Defense; +0), Works Against EGO, Not BODY (+¼), Reduced Endurance (0 END; +½) (160 Active Points); OAF (rune-carving knife; -1), All Or Nothing (-½), Concentration (0 DCV throughout; -1), Extra Time (5 Minutes; -2), Limited Target (sentient humanoid; -½), Only Works Against Stationary Targets (-1), Requires A Magic Roll (-½), Spell (-½). **VELDR, THE RUNE OF WEAPON ENHANCEMENT**

**Effect:** Aid HKA 5d6

**Target:** One weapon

**Painting Time:** 1 Turn (Attack Action)

**Casting Procedures:** Focus

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -8

**END Cost:** 8 to cast

**Description:** Also known as the Rune of Murder, Veldr enhances the power of bladed weapons. When painted on one, it makes that weapon sharper and harder-hitting for a time, increasing the damage it does. The rune's effects last for one hour, or until something mars, covers, or destroys the rune (if the rune is poorly-placed upon the weapon, this often happens when blood runs over it).

**Game Information:** Aid HKA 5d6 (standard effect: HKA +1d6), Delayed Return Rate (points fade at the rate of 5 per 1 Hour; +1¼) (82 Active Points); OAF Expendable (rune-paints, Easy to obtain; -1), Extra Time (1 Turn; -1¼), Power Stops Working If Rune Is Marred, Destroyed, Or Covered Up (-½, Requires A Magic Roll (-½)). **DEFENSIVE RUNES**

**BRELGA, THE RUNE OF PROTECTION FROM FIRE**

**Effect:** Resistant Protection (16 ED), Only To Protect Buildings From Fire

**Target:** One building

**Carving Time:** 20 Minutes

**Casting Procedures:** Focus

**Duration:** Persistent (lasts until rune is marred, destroyed, or covered up)

**Range:** No Range

**Magic Roll Penalty:** -15

**END Cost:** 0

**Description:** When carved on a building (a Base, in other words), this rune makes it very difficult to set any part of the building — even a thatched roof — on fire. The contents of the building can still burn normally, and the protection ends if anything ever defaces or covers the rune.

A spellcaster can only protect one building at a time with this rune; if he wants to protect more, he should use the options to increase Usable By Other to Usable Simultaneously.

**Game Information:** Resistant Protection (16 ED), Usable By Other (one building of up to 100 ktons weight; +½) (150 Active Points); OAF (rune-carving knife; -1), Concentration (0 DCV throughout casting; -1), Extra Time (20 Minutes; -2½), Only Works Against Fire Damage (-½), Only Works On Buildings (Bases) (-1), Requires A Magic Roll (-½). Total cost: 20 points.

**Options:**

1. Remove A +¼ Advantage: 144 Active Points; total cost 19 points.
2. Remove A +½ Advantage: 138 Active Points; total cost 18 points.
3. Remove A -¼ Limitation: Total cost 21 points.
4. Remove A -½ Limitation: Total cost 21 points.
5. Add A +¼ Advantage: 156 Active Points; total cost 21 points.
6. Add A +½ Advantage: 162 Active Points; total cost 22 points.
7. Add A -¼ Limitation: Total cost 19 points.
8. Add A -½ Limitation: Total cost 19 points.
9. **Eldrskjaldi, the Rune of Protection Against Fire:** This rune protects people, not buildings, from fire. Change to Resistant Protection (12 ED), Usable By Other (+½) (22 Active Points); OAF Expendable (rune-paints, Easy to obtain; -1), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -1¼), Only Works Against Fire/Heat (-½), Power Stops Working If Rune Is Marred, Destroyed, Or Covered Up (-½), Requires A Magic Roll (-½). Total cost: 4 points.

11. **Other Runes Of Protection:** By changing the Limitation that specifies what the spell protects against, and perhaps changing the Resistant Protection to regular PD, you can create many different protective runes. Examples include:

- **Halaverja, the Rune of Protection from Lightning**
- **Vatnar, the Rune of Protection from Water** (floods, rain damage, and the like)
- **Verjaki, the Rune of Protection from Hail**
### KALTHIR, THE RUNE OF PROTECTION

**Effect:** Resistant Protection (10 PD/10 ED), Usable By Other

**Target:** One character

**Painting Time:** Full Phase

**Casting Procedures:** Focus

**Duration:** Constant

**Range:** Touch

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** A spellcaster paints this rune on himself or another person. As long as the recipient keeps the rune powered (i.e., pays END for it), it protects him from harm. If he ever stops paying END, the power of the rune fades, and the recipient becomes unprotected by the spell unless the spellcaster casts it again.

**Game Information:** Resistant Protection (10 PD/10 ED), Usable By Other (+¼) (37 Active Points); OAF Expendable (rune-paints, Easy to obtain; -1), Costs Endurance (-½), Extra Time (Full Phase; -½), Power Stops Working If Rune Is Marred, Destroyed, Covered Up, Or Unpowered (-½), Requires A Magic Roll (-½). Total cost: 9 points.

**Options:**

1. **Strong Rune:** Increase to Resistant Protection (12 PD/12 ED). 45 Active Points; total cost 11 points.
2. **Weak Rune:** Decrease to Resistant Protection (8 PD/8 ED). 30 Active Points; total cost 7 points.
3. **Remove A +¼ Advantage:** 30 Active Points; total cost 7 points.
4. **Remove A -¼ Limitation:** Total cost 10 points.
5. **Remove A -½ Limitation:** Total cost 10 points.

8. **Add A -¼ Limitation:** Total cost 9 points.
9. **Add A -½ Limitation:** Total cost 8 points.

### MOVEMENT RUNES

### VATHRENNR, THE RUNE OF SWIFT RUNNING

**Effect:** Running +12m, Usable By Other

**Duration:** Time Limit (lasts until rune is marred, destroyed, or covered up, or for 1 Hour from the time of casting, whichever occurs first)

**Range:** Touch

**Magic Roll Penalty:** -3

**END Cost:** 0

**Description:** When painted on the caster or another person, this rune allows the recipient to run at much greater speeds — typically twice as fast as normal! — for up to an hour. However, if the rune is marred, destroyed, or covered up before the duration ends, the spell expires immediately.

SJUKVOR, THE RUNE OF FEVER-BREAKING

Effect: Major Transform 3d6 (sick person into well person)
Target: One character
Painting Time: 5 Minutes (Attack Action)
Casting Procedures: Focus
Duration: Instant
Range: Touch
Magic Roll Penalty: -3
END Cost: 3

Description: The character can cure diseases, plagues, fevers, and other illnesses by crushing a fire-berry and using the juice to paint the rune Sjukvor on the forehead of the sick person (at the GM’s option, other berries work, too, but at half effect). The more intense the effects of the disease, the longer it may take to cure.

In game terms, this is a Major Transform, "sick person to well person," that stops the course of a disease — once the character applies the spell, the disease inflicts no further damage (loss of CON, for example) on the victim. However, the spell doesn't automatically heal any STUN, BODY, CON, or other Characteristics lost to the disease prior to the spell's use. To accomplish that, the priest must add up the cost of the lost abilities he wants to restore and treat them as “powers” being granted to the target by the Transform (see 6E1 306-07).

Game Information: Major Transform 3d6 (sick person into well person, heals back through any normal means that would cause character to contract the same disease) (30 Active Points); OAF Expendable (rune-paints, Easy to obtain; -1), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes; -2), Limited Target (sentient beings; -¼), No Range (-½), Requires A Magic Roll (-½). Total cost: 5 points.

Options:
1) Strong Rune: Increase to Major Transform 4d6. 40 Active Points; total cost 6 points.
2) Weak Rune: Decrease to Major Transform 2d6. 20 Active Points; total cost 3 points.
3) Remove A -¼ Limitation: Total cost 5 points.
4) Remove A -½ Limitation: Total cost 5 points.
5) Add A +¼ Advantage: 53 Active Points; total cost 6 points.
6) Add A +½ Advantage: 45 Active Points; total cost 7 points.
7) Add A -¾ Limitation: Total cost 5 points.
8) Add A -½ Limitation: Total cost 4 points.
9) Sjukvor Variant: This form of the rune works by Healing the Characteristics lost to the disease. However, if the disease remains present and active within the character’s body, he may continue to lose Characteristics after a character casts this spell upon him. Change to Healing 6d6, Expanded Effect + Variable Effect (any four Characteristics at once; +2) (180 Active Points); OAF Expendable (rune-paints, Easy to obtain; -1), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes; -2), Only To Heal Characteristics Lost To Disease (-1), Requires A Magic Roll (-½). Total cost: 28 points.
**VUNDILFARI, THE RUNE OF STEALTH**

**Effect:** Invisibility to Sight Group

**Target:** One character

**Painting Time:** Full Phase

**Casting Procedures:** Focus

**Duration:** Constant

**Range:** Touch

**Magic Roll Penalty:** -2

**END Cost:** 2

**Description:** A spellcaster paints this rune on himself or another person in the center of the forehead. As long as the recipient keeps the rune powered (i.e., pays END for it), it shields him from the sight of men — though someone who gets close enough may see the faintly-glowing rune floating in the air. If he ever stops paying END, the power of the rune fades, and the recipient becomes unprotected by the spell unless the spellcaster casts it again.

**Game Information:** Invisibility to Sight Group, Usable By Other (+¼) (25 Active Points); OAF Expendable (rune-paints, Easy to obtain; -1), Extra Time (Full Phase; -½), Power Stops Working If Rune Is Marred, Destroyed, Covered Up, Or Unpowered (-½), Requires A Magic Roll (-½). Total cost: 7 points.

**Options:**
1) **Strong Rune:** The rune does not flow faintly. Add No Fringe. 37 Active Points; total cost 11 points.
2) **Weak Rune:** The recipient only remains unseen if he stands still. Add Chameleon (-½). Total cost: 6 points.
3) **Remove A +¼ Advantage:** 20 Active Points; total cost 6 points.
4) **Remove A -½ Limitation:** Total cost 8 points.
5) **Remove A -½ Limitation:** Total cost 8 points.
6) **Add A +¼ Advantage:** 30 Active Points; total cost 9 points.
7) **Add A +½ Advantage:** 35 Active Points; total cost 10 points.
8) **Add A -¼ Limitation:** Total cost 7 points.
9) **Add A -½ Limitation:** Total cost 6 points.
The category of Shamanism features spells that summon, contact, control, or otherwise make use of spirits (or allow the caster to interact with them). Primarily it focuses on nature spirits, spirit creatures, and the Spirit World in which they live, but in some cases it goes beyond that to involve human spirits.

Because shamans (practitioners of Shamanism) interact with and depend upon spirits for their power, they often try to maintain a close relationship with them. As such Shamanism has some similarities to Divine Magic, particularly when the shaman summons a spirit and then beseeches its aid... but in the end it falls on the side of the arcane rather than the divine.

Shamanism also has some fairly close connections with other categories. Chief among these are Druidry and Witchcraft; many spells in either of those categories are often appropriate purchases for shamans. Similarly, some Elemental Magic spells work well as Shamanism spells. To the extent Shamanism deals with human spirits, it also has at least tenuous ties to Necromancy.

SPIRIT-SUMMONING SPELLS

Among the most common of the spells of Shamanism are spells to call spirits forth. These spells do not turn the spirit into the shaman’s slave, but rather make the spirit manifest that the summoner might beseech it for aid. More powerful shamans, or those with a greater than normal natural gift for Shamanism, may be able to call upon spirits that are already favorably inclined toward them (i.e., may have one or more of these spells with a version of the Amicable Advantage).

See HSB 214-16 for character sheets for the spirits referred to in these spells.

**SPIRIT ANIMALS**

The Summon Spirit Animal spell allows the caster to summon spirit animals. To create a spirit animal, use the animal’s normal character sheet from The HERO System Bestiary, then add the following abilities:

<table>
<thead>
<tr>
<th>Cost</th>
<th>Spirit Animal Powers</th>
</tr>
</thead>
<tbody>
<tr>
<td>60</td>
<td>Spirit’s Form: Physical and Energy Damage Reduction, Resistant, 50%</td>
</tr>
<tr>
<td>35</td>
<td>Spirit’s Form: Life Support (Total)</td>
</tr>
<tr>
<td>9</td>
<td>Spirit’s Senses: +3 PER with all Sense Groups</td>
</tr>
<tr>
<td>5</td>
<td>Spirit’s Eyes: Infrared Perception (Sight Group)</td>
</tr>
<tr>
<td>5</td>
<td>Spirit’s Eyes: Ultraviolet Perception (Sight Group)</td>
</tr>
<tr>
<td>12</td>
<td>Spirit’s Eyes: +8 versus Range Modifier for Sight Group</td>
</tr>
</tbody>
</table>

Total cost: +126 points.

You can, of course, add any other abilities that seem appropriate for a specific type of spirit animal. Often you can adapt spells from this book for that purpose.

Spirit animals are sentient and can speak, either with their voices or mind-speech (Mind Link or Telepathy).

SPEAKING TO THE SWORD-SPIRIT

Effect: +4 HTH with one weapon, Usable By Other
Target: One character
Casting Time: Half Phase (Attack Action)
Casting Procedures: Gestures, Incantations
Duration: Time Limit (duration of 1 hour, +10 minutes per point by which the caster succeeds with his Magic roll)
Range: Touch
Magic Roll Penalty: -4
END Cost: 4 to cast

Description: Not all spirits live in field and forest. In some cultures, the people know that swords, spears, and other weapons have spirits, too. A skilled shaman can speak to these spirits before a battle, awakening them and appealing to their skill, bravery, valor, or vanity (as the case may be) to help the weapon's wielder fight better.

To cast this spell, the shaman must handle the weapon whose spirit he wishes to arouse. He speaks to the spirit, exhorting it to fight well in the coming battle. He then returns the weapon to its owner (if it's not one of his own). For the duration of the spell, the owner has a 4 Combat Skill Levels with HTH Combat that only apply to that weapon. He can add them to OCV, DCV, or damage in the standard manner. If someone else tries to wield the weapon, the levels won't apply, and the recipient cannot apply them when using any other weapon.

Game Information: +4 HTH, Usable By Other (+¼) (40 Active Points); Costs Endurance (to cast; -¼), Extra Time (1 Turn to cast; -¾), Gestures (throughout casting; -¼), Incantations (throughout casting; -¾), Only Apply To One Designated Weapon (-½), Requires A Magic Roll (-½), Time Limit (duration of 1 hour, +10 minutes per point by which the caster succeeds with his Magic roll; -¾). Total cost: 8 points.

2) **Weak Spell:** Decrease to +2 HTH. 20 Active Points; total cost 4 points.

10) **Add A +½ Advantage:** 90 Active Points; total cost 20 points.

MOVEMENT SPELLS

★ JOURNEY TO THE SPIRIT REALM

Effect: Extra-Dimensional Movement (to Spirit Realm)
Target: Self
Casting Time: 1 Minute
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: Self
Magic Roll Penalty: -2
END Cost: 2

Description: This spell allows the shaman to enter the Spirit Realm. This is the land where spirits dwell, where he can interact with them directly instead of having to beseech their aid with spells, where even symbols live and have meaning (and peril), where thoughts sometimes cause new beings to spring to life unbidden... the wellspring from whence, ultimately, come all his powers. While not inherently dangerous, it's not a place that welcomes fleshly beings (even if many spirits appear to clothe themselves in flesh or leaf), so only the wisest and most powerful shamans tread there. Some find that their spells do not work in the Spirit Realm, or that they work better, or that they work differently — or all three at once!

Game Information: Extra-Dimensional Movement (to any point in the Spirit Realm corresponding to the caster's current location in the real world) (22 Active Points); OAF Expendable (specially-prepared fetish bag, Difficult to obtain; -1¾), Concentration (0 DCV throughout casting; -1), Extra Time (1 Minute; -1½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-½). Total cost: 3 points.

Options:
1) Strong Spell: Add x8 Increased Weight. 37 Active Points; total cost 6 points.
2) Free Spell: Total cost: 4 points.
3) Remove A -½ Limitation: Total cost 4 points.
4) Remove A -½ Limitation: Total cost 4 points.
5) Add A +½ Advantage: 27 Active Points; total cost 4 points.
6) Add A +½ Advantage: 33 Active Points; total cost 5 points.
7) Add A -½ Limitation: Total cost 4 points.
8) Add A -½ Limitation: Total cost 4 points.
**SPIRIT-WALKING**

**Casting Time:** Half Phase  
**Casting Procedures:** Focus, Gestures, Incantations  
**Duration:** Instant  
**Range:** Self  
**Magic Roll Penalty:** -4  
**END Cost:** 4  

**Description:** With this spell a shaman can walk as the spirits so often do — he steps, for the merest second, into the Spirit Realm, traversing it almost instantaneously before emerging into the real world at his intended destination.

A shaman cannot buy this spell unless he has also bought the *Journey To The Spirit Realm* spell. However, with the GM’s permission he might be able to combine both effects into one Multipower and buy that as a spell.

**Game Information:** Teleportation 40m (40 Active Points); OAF Expendable (piece of string tied in a complex mystic knot, Easy to obtain; -1), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 13 points.

**Casting Procedures:** Focus, Gestures, Incantations  
**Duration:** Instant  
**Range:** Self  
**Magic Roll Penalty:** -1  
**END Cost:** 1  

**Description:** If he wishes, a shaman may use his ability to perceive spirits to determine exactly when a dying man's spirit will leave his body (i.e., when he will die). This only works if the subject is actually dying; if he's healthy or for some reason is not soon to die, the spell has no effect (other than to let the shaman know the subject's death is yet far off).

**Game Information:** Detect Time Of Dying (INT Roll) (no Sense Group) (3 Active Points); Costs Endurance (-½), Extra Time (1 Turn; -½), Instant (-½), Requires A Magic Roll (-½). Total cost: 1 point.

**SPEAK WITH THE DEAD**

**Effect:** Summon one ghost built on 463 Total Points

**Target:** Special

**Casting Time:** 1 Turn

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -10

**END Cost:** 21

**Description:** This spell allows the shaman to call forth the spirit of a dead person so he may speak with it. He cannot compel service from the ghost, and in fact may not even get it to answer — though usually the spirits of the dead are willing to speak with the living, at least for a time.

This spell requires the GM’s permission because it uses Summon in an unusual way. Ordinarily the Specific Being Advantage means just that: the Summon can only conjure a single, specific, individual. However, this Summon also has the Expanded Class Advantage so the shaman can Summon the ghost of any dead person he chooses. Ordinarily this might pose game balance problems, but the relatively restricted nature of this spell should alleviate that difficulty.

**Game Information:** Summon one ghost built on 463 Total Points, Expanded Class (any ghost; +¼), Specific Being (see text; +1) (209 Active Points); OAF Expendable (fetish bag; Difficult to obtain; -1), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), No Tasks (ghost will, at most, talk with the shaman; -½), Requires A Magic Roll (-1 per 20 Active Points; -¼). Total cost: 33 points.

**Options:**
1) **Free Spell:** Total cost: 42 points.
2) **Remove A -¼ Limitation:** Total cost 35 points.
3) **Remove A -½ Limitation:** Total cost 36 points.
4) **Add A +¼ Advantage:** 232 Active Points; total cost 37 points.
5) **Add A +½ Advantage:** 256 Active Points; total cost 41 points.
6) **Add A -¼ Limitation:** Total cost 32 points.
7) **Add A -½ Limitation:** Total cost 31 points.

**SPEAKING WITH THE SPIRITS**

**Effect:** Retrocognition (Sight and Hearing Groups)

**Target:** See text

**Casting Time:** 1 Turn

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** No Range

**Magic Roll Penalty:** -5

**END Cost:** 5

**Description:** This spell awakens the local nature spirits that they might talk with the shaman and tell him what has occurred near them in the past. This works best with stationary nature spirits, such as stone spirits, water spirits tied to a particular pool, or dryads; if the spirit can roam, he may not have been nearby to witness the events the shaman wishes to know about. (To simulate this, the GM can, if necessary, impose an Activation Roll on the spell.)

As beings not entirely of this world, spirits often pay little attention to the dealings of men and other physical beings. They may have trouble remembering things accurately the further back in time the shaman asks them to remember, and sometimes have difficulty with human concepts (such as large numbers). Nevertheless, they usually provide valuable information.

**Game Information:** Clairsentience (Sight and Hearing Groups), Retrocognition (50 Active Points); OAF (fetish bag; -1), Concentration (0 DCV throughout; -1), Extra Time (1 Turn; -1¼), Gestures (throughout; -½), Incantations (throughout; -½), No Range (-½), Requires A Magic Roll (-½), Retrocognition Only (-1), Time Modifiers (-½). Total cost: 6 points.

**Options:**
1) **Free Spell:** Total cost: 7 points.
2) **Remove A -¼ Limitation:** Total cost 7 points.
3) **Remove A -½ Limitation:** Total cost 7 points.
4) **Add A +¼ Advantage:** 62 Active Points; total cost 8 points.
5) **Add A +½ Advantage:** 75 Active Points; total cost 10 points.
6) **Add A -¼ Limitation:** Total cost 6 points.
7) **Add A -½ Limitation:** Total cost 6 points.
**BANISH DISEASE SPIRIT**

**Effect:** Major Transform 3d6 (cure sick person)

**Target:** One character

**Casting Time:** 1 Hour (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** It's well-known to shamans that illnesses are caused by disease spirits who maliciously attack humans. This spell, an hour-long ritual involving the burning of special substances, the drawing of sacred patterns with mystic powders, and other procedures, drives out the disease spirit and heals the sick person. The more intense the effects of the disease, the longer it may take to cure (i.e., if necessary, the shaman may have to cast the spell two or more times to effect a full Transformation).

In game terms, this is a Major Transform, “sick person to well person,” that stops the course of a disease — once the character applies the spell, the disease inflicts no further damage (loss of CON, for example) on the victim. However, the spell doesn't automatically heal any STUN, BODY, CON, or other Characteristics lost to the disease prior to the spell’s use. To accomplish that, the priest must add up the cost of the lost abilities he wants to restore and treat them as “powers” being granted to the target by the Transform (see 6E1 306-07).

**Game Information:** Major Transform 3d6 (sick person into well person, heals back through any normal means that would cause character to contract the same disease) (30 Active Points); OAF Expendable (special herbs, mystic powders, and the like, Difficult to obtain; -1¼), Concentration (0 DCV throughout casting; -1), Extra Time (1 Hour; -3), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Limited Target (sentient beings; -¼), No Range (-½), Requires A Magic Roll (-½). Total cost: 3 points.

**Options:**
1) **Strong Spell:** Increase to Major Transform 4d6. 40 Active Points; total cost 5 points.
2) **Weak Spell:** Decrease to Major Transform 2d6. 20 Active Points; total cost 2 points.
3) **Free Spell:** Total cost: 6 points.
4) **Remove A -¼ Limitation:** Total cost 5 points.
5) **Remove A -½ Limitation:** Total cost 6 points.
6) **Add A +¼ Advantage:** 37 Active Points; total cost 4 points.
7) **Add A +¼ Advantage:** 45 Active Points; total cost 5 points.
8) **Add A -¼ Limitation:** Total cost 3 points.
9) **Add A -½ Limitation:** Total cost 3 points.
10) **Slow Banishing:** Change to Major Transform 1d6 and add Damage Over Time (3 increments, one per day for three days, defenses only apply once, cannot reuse power on same victim until all damage increments accrue; -4). 15 Active Points; total cost 1 point.

**INVIGORATING DREAM**

**Effect:** +30 END, Usable By Other

**Target:** One character

**Casting Time:** 6 Hours

**Casting Procedures:** Focus

**Duration:** Constant

**Range:** Touch

**Magic Roll Penalty:** -1

**END Cost:** 0

**Description:** A shaman uses this spell to banish evil spirits from the dreams of himself or another person, thus ensuring a particularly restful sleep (and thus more energy to perform tasks upon awakening). The recipient of the Invigorating Dreams must sleep, so the shaman casts the spell upon himself by going to sleep (that's why it lacks Gestures and Incantations, which the caster obviously cannot perform if he's sleeping).

For game purposes, the “reasonably common way to turn the power off” is to use the END. As a character uses the 30 END, it goes away for good; he cannot Recover it. If he has not used it all within 6 Hours of awakening, any unused END fades away at that time.

**Game Information:** +30 END, Usable By Other (+¼) (7 Active Points); OAF Expendable (dream-herbs, Difficult to obtain; -1¼), Concentration (0 DCV throughout casting; -1), Extra Time (6 Hours; -3½), Recipient Must Sleep During Casting Time (-1), Requires A Magic Roll (-½), 1 Continuing Charge lasting 6 Hours (removed by expenditure of the END; -0). Total cost: 1 point.

**Options:**
1) **Strong Spell:** Increase to +60 END. 15 Active Points; total cost 2 points.
2) **Weak Spell:** Decrease to +20 END. 5 Active Points; total cost 1 point.
3) **Free Spell:** Total cost: 1 point.
4) **Remove A -¼ Limitation:** Total cost 1 point.
5) **Remove A -½ Limitation:** Total cost 1 point.
6) **Add A +¼ Advantage:** 9 Active Points; total cost 1 point.
7) **Add A +½ Advantage:** 10 Active Points; total cost 1 point.
8) **Add A -¼ Limitation:** Total cost 1 point.
9) **Add A -½ Limitation:** Total cost 1 point.

**Description:** This spell allows a shaman to call back the spirit of a dead person, thus bringing him back to life. Of course, for him to do this, he must have access to the body, which must be sufficiently intact to support life. TOTEM SPELLS

Many shamans have a totem — a sort of guiding philosophy of life represented by a archetypical spirit animal or being, such as Raven, Bear, or Wolf. Some shamans have more than one totem, since adopting the guidance/worship of one doesn't necessarily prevent the shaman from adopting others (though some may be considered mutually exclusive in some shamanic traditions). If he adopts a totem, the shaman can, if he wishes, learn a spell that lets him more purely and mystically embody one (or more) of the qualities of that totem.

The totem spells listed here are just a few of the many possibilities inherent in the concept of having and embodying a totem. The GM should examine them to make sure that they're not only appropriate for the campaign, but for the shaman as well. A shaman with a totem should have other abilities, and often Complications, that reflect that totem. A player shouldn't just pick totem spells because they're powerful, but because they fit his shaman character (and help to define him better). For example, a shaman with the Psychological Complication Love Of Combat probably shouldn't choose Mouse, Raven, or Serpent as a totem; they're not combative or aggressive in that way. But Wolf, Bear, or Shark might fit his temperament just fine. Most shamans take just one totem, but with the GM's permission a character might have multiple totems (as long as they don't conflict with each other “personality-wise”).

Although all the totems described here are ordinary, real-world animals, in a Fantasy setting it's possible that a shaman could choose a monster totem instead. The power of Dragon, the might of Griffin, or the bloodlust of Manticore could make for some very interesting totem spells indeed.

Song Magic is a form of spellcasting involving the singing of magical songs to create various arcane effects. (Some spells involve jests, poetry, or the like, but the basic effect is the same.) It’s a favorite of bards in High Fantasy campaigns, but it doesn’t have to be limited to them.

Song Magic spells require singing, and thus have the Incantations Limitation (which you can’t remove using the Options). The mystic songs are distinctive; characters can’t disguise them as ordinary songs or the like (however, a character could use the Add A +¼ Advantage option to make a spell Invisible To Hearing Group, defined as “disguising the song-spell as an ordinary song”). Some even have complex Incantations, using the optional rules for that on page 285 of Fantasy Hero, or “voice range” Incantations described on APG 136. They typically do not have the Focus or Gestures Limitation, but may if the character also has to play an instrument while singing (the instrument counts as the Focus, and the need to hold and play it qualifies as Gestures, since the hand-motions and music are clearly a spell instead of an ordinary song). You can use the Options to cover these possibilities.

Song Magic is in many ways a limited arcana. While a song-mage can accomplish many effects, most of them are offensive in nature — generally speaking he cannot use his songs to defend himself, move, or sense things.

SATIRE

Effect: Drain PRE 6d6
Target: 1m Radius Accurate covering the world
Singing Time: 5 Minutes (Attack Action)
Casting Procedures: Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -0
END Cost: 36

Description: This spell allows the character to make someone — typically a king, general, or other important leader — look ridiculous and foolish in the eyes of the people, rendering him less able to command. The character composes a song or poem criticizing the target for faults real, imagined, or concocted (the GM may grant the caster a +1 to +3 bonus to his Song Magic roll and/or OCV if the complaints against the target are both real and significant in the eyes of the people). He must then perform the song or poem in public, before a large crowd (the GM decides what constitutes “in public” and “large” — sometimes a smaller group of more important or influential persons suffices). This, of course, is likely to earn the victim’s wrath and make the caster a target of the victim’s soldiers, guards, assassins, and friends. A character may only Satire a specific victim once per season (three months), and the effect on the victim’s PRE only applies against his own people, followers, subjects, and the like (though the GM may, in his discretion, extend the effect to others who hear about the Satire).

Game Information: Drain PRE 6d6, Area Of Effect (1m Radius Accurate; +½), MegaScale (area is big enough to cover the world; +2), Delayed Return Rate (points return at the rate of 5 per Week; +2½) (360 Active Points); Concentration (½ DCV throughout casting; -½), Extra Time (5 Minutes; -2), Incantations (complex, throughout casting; -1), Must Be Cast In Public Before A Large Crowd (-1), Only Works Once Per Season Per Target (-1), No Range (-½), Presence Reduction Only Applies Versus The Subject’s People/Followers (-1), Requires A Magic Roll (no Active Point penalty; -0), Spell (-½). Sorcery is the category that covers magics of the mind, thought, illusion, and deception, as well as some related subjects such as sleep and dreams. Because their spells are strange, frightening, and invasive, many people fear and loathe the sorcerers, dealing with them only when they must.

At the GM’s option, characters may base their Magic rolls when casting Sorcery spells on EGO instead of INT.

OFFENSIVE SPELLS

For ease of reference, the offensive Sorcery spells are organized into four groups: Mind-Spells (spells which directly attack or affect the mind); Spells Of Illusion; Wizard’s Hand Spells (telekinetic spells); and Oneiromantic Spells (spells of sleep and dreams).

Mind-Spells

CONFUSION-SPELL

Effect: Change Environment, -4 to INT and EGO Rolls, Usable As Attack
Target: One character
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: 180m
Magic Roll Penalty: -5
END Cost: 5
Description: This spell afflicts the target’s mind with confusion and befuddlement. Unable to think clearly, the victim often has trouble doing anything. Whenever the victim tries to take an Action, he must make an EGO or INT Roll (whichever the GM considers more appropriate); if he fails, he can do nothing (or can only attempt the action with significant penalties to any rolls).

EMOTION CONTROL

Effect: Mind Control 12d6, Only To Alter/Inflict Emotional States
Target: One character
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: LOS
Magic Roll Penalty: -6
END Cost: 6
Description: Rather than directly dominating a victim’s mind, this spell changes his emotions. It can make a happy person sad, an uncaring person fall in love, or a greedy person lose his desire for gold. The accompanying tables indicate the general level of effect required for various emotional states.
**ANGER**

Annoyed/Frustrated: Greater than EGO: Attack people/objects the character would attack anyway; automatically trigger appropriate Enrageds/Berserks; if attempting to calm an Enraged/Berserk character, target gets a roll to break free from his Enraged/Berserk when character achieves this level of control.

Angry: EGO +10: Attack people/objects the character dislikes; automatically calm down Enraged/Berserk characters.

Furious: EGO +20: Attack people/objects the character likes.

Insanely Angry: EGO +30: Attack people/objects the character loves.

**Fear**

Apprehensive/Uneasy: Greater than EGO: Ego Roll at +5 to maintain composure; if failed, character avoids the situation or phenomenon causing the fear. Danger Sense automatically triggered.

Fearful: EGO +10: As Greater than EGO, but the EGO Roll is unmodified.

Terrified: EGO +20: As Greater than EGO, but the EGO Roll is at -5.

Blind Panic: EGO +30: Character moves away from feared object or phenomenon as fast as possible.

**Love**

Sympathetic: Greater than EGO: Character is attracted to people he likes already; he will be inclined to do what they ask of him and will generally try to please them.

Loving: EGO +10: Character is attracted to people he feels neutral about.

Passionate: EGO +20: Character is attracted to people he does not like.

Crazed/Head Over Heels: EGO +30: Character is attracted to people he hates, or who repulse him.

**Sadness**

Pensive: Greater than EGO: Ego Roll at +5 to maintain composure; if failed, character becomes listless and apathetic, and has difficulty taking any action.

Sad: EGO +10: As EGO +0, but the EGO Roll is unmodified.

Despairing: EGO +20: As EGO +0, but the EGO Roll is at -5.

Depressed: EGO +30: Character becomes totally listless and apathetic; he seriously considers suicide or other extreme "solutions".

**Ants**

An sorcerer uses control of anger to make a target so angry at something or someone that he attacks it (or to remove anger the character presently feels). At lower levels of anger, the target only attacks to hurt or damage; at higher levels, he attacks to kill or destroy. The sorcerer may direct the character’s anger at something general (“Aren’t tapestries annoying?”) or something specific (“Your girlfriend has been cheating on you with Duke Dorakus! Doesn’t that make you really angry at him?”). With some modification in terms and effects, you can also use this chart for Hatred.

**Love**

If the character is already favorably inclined toward someone, using Alter/Inflict Emotions can make him love that person — a minor crush becomes full-blown, heartfelt love. If he’s not favorably inclined, higher levels of effect are required to inspire feelings of attraction and desire.

With some modification in terms and effects, you can also use this chart for Greed or Lust.
To create a spell that can only manipulate a single emotion, use the Add A -½ Limitation option to change Only To Alter/Inflict Emotional States (-½) to Only To Alter/Inflict [A Single Emotional State] (-1).

**Target:** One character

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** LOS

**Magic Roll Penalty:** -6

**END Cost:** 6

**Description:** This powerful spell alters the victim's mind so that he forgets crucial facts. Depending on the strength of the victim's mind and the vividness and importance of the memory, the sorcerer may have to apply the spell more than once to inflicts full forgetfulness (in the interest of dramatic sense, the GM may choose to apply the absolute effects rule to allow any single casting to work automatically).
The victim, having forgotten a particular memory, is not aware he forgot anything. He may later have trouble explaining gaps in his memory, but only another casting of this spell can restore what was taken away.

This spell can only remove memories. Implanting false memories requires the Spell Of The Untrustworthy Mind (see below).

Spells Of Illusion

DOUBLE DECEPTION
Effect: Images to Detect Illusion, -4 to PER Rolls
Target: 500m radius
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: 170m
Magic Roll Penalty: -4
END Cost: 4

Description: The bane of many sorcerers is the Detect Illusion spell (page 262), which quickly and easily reveals their deceptive magics for what they are. But this spell, when cast in conjunction with another illusion-spell, fools Detect Illusion into reading the illusion as being “real.”

Although the Spell Limitation ordinarily forbids casting spells as Multiple Attacks, the GM should waive that restriction in the case of this spell, which is meant to be cast together with other illusion-spells. Treat this spell as being Linked with any other illusion-spell it’s cast with, and combine the Sorcery roll penalties and END costs. This spell covers an area equal to that of the base illusion-spell, to a maximum of a 500m radius.

Game Information: Images to Detect Illusion, -4 to PER Rolls, Area Of Effect (4m Radius; +¼) (22 Active Points); OAF Expendable (small twisted and warped prism, Very Difficult to obtain; -1½), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 5 points.

**DEFENSIVE SPELLS**

**MANY SELVES**

- **Effect:** Sight and Hearing Group Images, -5 to PER Rolls, Set Effect (5 copies of self)
- **Target:** 8m Radius
- **Casting Time:** Half Phase (Attack Action)
- **Casting Procedures:** Focus, Gestures, Incantations
- **Duration:** Constant
- **Range:** No Range
- **Magic Roll Penalty:** -4
- **END Cost:** 4

**Description:** This spell creates an illusion of five duplicates of the character. The image also makes it look as if all six “people” are moving around within the 8m radius of the power, and makes all five duplicates mimic whatever the character does. The illusion even mirrors wounds or other effects received by the character or on any one of them. However, if an attack would “kill” one of the images, it simply disappears, leaving the remaining images behind and unchanged.

If an attacker has no way to figure out which of the six is the real person (such as making a Smell-based PER Roll to sniff him out), and no area-affecting attack big enough to cover the 8m radius, the GM should roll 1d6 for each attack. On a 1, the real character gets hit; otherwise, an image takes the blow, leaving the character unharmed.

**Game Information:** Sight and Hearing Group Images, -5 to PER Rolls, Area Of Effect (8m Radius; +½) (45 Active Points); OAF Expendable (five tiny humanoid figurines, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), No Range (-½), Requires A Magic Roll (-½), Set Effect (see text; -1). Mystics in the Champions Universe refer to the stripped-down, flashy, combat-oriented style of magic used by super-mages as *thaumaturgy*. (Don’t confuse this with the separate spell category of *Thaumaturgy*, described beginning on page 281.) To cast a spell, a super-mage just waves his hands. He might pronounce the name of the spell, such as, “I call on the Scintillant Suns of Saravane!” or “Let the Baleful Bonds of Balthus ensnare you!” Balls and beams of light appear from the mystic’s hands to strike at his foes, deflect attacks, and do whatever else he wants. The oft-alliterative names typically refer to the powerful mystics or dimension lords who invented the spells.

Hog-tying and gagging a super-mage may prevent him from casting spells, but nothing less will do. Despite appearances, super-mages don’t actually use Gestures and Incantations: a super-mage can fire off spells while being slammed with attacks that would ruin any Gestures, and he doesn’t have to call out the spell’s name. Restraining, at -1/4, may be appropriate to represent how an enemy could prevent a captured super-mage from casting spells, but even it’s not worth taking in most cases. The greatest masters, including dimension lords, perform magic with no Limitations at all.

Superheroic Thaumaturgy spells tend to come in many variations. A super-mage might cast a mystic bolt to strike one target, or an area; one time, the spell might blast apart brick walls, yet leave not a mark on another occasion. Shared special effects, or a common origin, link other spells. Therefore, many spells are represented as Multipowers instead of single Powers, or have a wide variety of options.

A character doesn’t need to buy every variation of a Superheroic Thaumaturgy spell, or place every spell within its own Multipower. A Multipower or Variable Power Pool with many seemingly “unrelated” spells is perfectly appropriate in most campaigns. For example, a mystic might buy a Multipower with two slots of *Koriol’s Crimson Crystals*, three *Sorcerer’s Stars*, and a *Hypnotic Helix*. A second Multipower could hold spells for defense, movement, or other purposes — or you could simply give the character a Multipower reserve large enough for him to use two slots at once.

**SUPERHEROIC AND HEROIC MYSTICS**

Heroic-level and Superheroic-level mystics differ in more than the Active Points of their spells. Most spells in this book and other *HERO System* products are designed primarily with Heroic-level characters in mind. As such they tend to have lots of Limitations, such as Concentration, Extra Time, Focus, Gestures, Incantations, or Requires A Magic Roll. Different types or styles of magic (called “categories” in this book) may favor particular Advantages and Limitations. For example, an alchemist’s magic always carries the Focus Limitation, in the form of various potions (and similar items).

Super-mages, on the other hand, apply few, if any, Limitations to their spells. In terms of game mechanics, at least, very little separates a super-shaman from a super-kabbalist — or a mutant, for that matter. The differences between mystic traditions become mere details of special effects or visual style. For instance, perhaps an image of the Thunderbird flashes around the shaman when he casts a lightning bolt, while the sigil of an angel briefly glows before the kabbalist. Mechanically, though, their lightning bolts differ not a whit from that of any other superhero. Similarly, even though they may gesture and incant when they cast spells, that’s just for effect — it’s not necessary, so it entails no Limitation.

The distinction between Heroic-level and Superheroic-level magic isn’t absolute. Novice super-mages, in particular, may apply significant Limitations to their spells. (You can use the Options for each spell to do this, if desired.) But even in such cases, magic remains as quick and easy to use as any other superpower. A super-mage defines his Focus as a wand, while a Heroic-level mystic might need a wand, a magic circle, and a brazier of incense.

To create Superheroic-level versions of spells described in the other sections of this book, just strip away Limitations and adjust the Active Points to the level of the campaign. You can also place spells in Power Frameworks — super-sorcerers routinely know lots of different spells. Multipowers with many slots and Variable Power Pools are particularly common for such characters.
ATTACK SPELLS

Sorcerer heroes often fight mystical villains. They possess a wide range of spells with which to attack each other. Superheroic Thaumaturgy may employ unusual combinations of Powers and Modifiers, but even a simple Blast or Entangle becomes wondrous if you give it a suitably mystical special effect.

THE BALEFUL BONDS OF BALTHUS

**Effect:** Entangle 4d6, 4 PD/4 ED, Stops A Given Sense (Sight and Hearing Groups)

**Target:** One character

**Duration:** Instant

**Range:** 600m

**END Cost:** 6

**Description:** This spell materializes a horde of black, sticky, sluglike creatures, each about a foot long. These viscous creatures wrap around the target's limbs, eyes, and ears so that he cannot see, hear, or move. Although the slugs seem quite tough, they dissolve into stinking, black vapor if they take any damage. Any Light Of Luathon instantly destroys the Bonds, so experienced sorcerers prefer to use other spells of restraint.

**Game Information:** Entangle 4d6, 4 PD/4 ED, Stops A Given Sense (Sight and Hearing Groups) (60 Active Points); Entangle Has 1 BODY (-½), Susceptible (to any of the Lights Of Luathon: -¼). Total cost: 34 points.

**Options:**
1) **Strong Bonds I:** Increase to Entangle 6d6, 6 PD/6 ED. 80 Active Points; total cost 46 points.
2) **Weak Spell:** Decrease to Entangle 3d6, 3 PD/3 ED. 50 Active Points; total cost 28 points.
3) **Remove A -¼ Limitation:** Total cost 40 points.
4) **Remove A -½ Limitation:** Total cost 48 points.
5) **Add A +¼ Advantage:** 75 Active Points; total cost 43 points.
6) **Add A +½ Advantage:** 90 Active Points; total cost 51 points.
7) **Add A -¼ Limitation:** Total cost 30 points.
8) **Add A -½ Limitation:** Total cost 27 points.

THE BINDINGS OF ARATRON

**Effect:** Entangle 5d6, 5 PD/5 ED

**Target:** One character

**Duration:** Instant

**Range:** 500m

**END Cost:** 5

**Description:** The mysterious Aratron, described in various sources as an angel, a demon, a supermage from an alternate Earth, and an alien sorcerer, has left the mystics of Champions Earth just one thing to prove his existence: this spell, which wraps the target in thin blue bands to prevent him from moving.

**Game Information:** Entangle 5d6, 5 PD/5 ED. Total cost: 50 points.

**Options:**
1) **Aratron's Tenable Bonds:** Aratron also created a version of this spell that leeches energy from the target and uses it to “heal” the caster. Add: Drain STUN 2d6, Constant (+½) (30 Active Points); Stops Working When Target Is Freed From Entangle (-¼), Linked (to Entangle; -½), Unified Power (-¼) (total cost: 15 points) plus Aid STUN and END 2d6 (standard effect: same result as Drain roll), Expanded Effect (two Characteristics at once; +½), Constant (+½) (24 Active Points); Stops Working When Target Is Freed From Entangle (-¼), Linked (to Drain STUN; -½), Unified Power (-¼) (total cost: 12 points). Total cost 27 points; total cost of overall spell 50 + 27 = 77 points.

THE BINDINGS OF BROMION

**Effect:** Mind Control 12d6/10d6; Entangle 3d6, 3 PD/3 ED, Mental Paralysis; Telekinesis (30 STR), ACV

**Target:** One character

**Duration:** Instant/Instant/Instant/Constant

**Range:** LOS

**END Cost:** 6

**Description:** The dimension lord Bromion, one of the Ordainers of Urizen the Lawgiver, began the use of these potent spells. Bromion hates free will in other beings; he calls it “rebellion.” He shared his Bindings with sorcerers on other planes who also served Urizen, to help them quash “rebellion.” From them the knowledge spread, not always with their blessing. Centuries later, sorcerers of whom Bromion would never approve use the Bindings, too. (See Champions Villains, Volume 3 for more information about Bromion.)

**Game Information:**

- **Cost:** 67
- **Power:** The Bindings Of Bromion: Multipower, 67-point reserve

  1f) **1st Binding:** Mind Control 12d6

  2f) **2nd Binding:** Mind Control 10d6, Telepathic (+¼)

  3f) **3rd Binding:** Entangle 3d6, 3 PD/3 ED, ACV (uses OMCV against DCV; +¼), Takes No Damage From Physical Attacks (see 6E1 217; +¾), Work Against EGO, Not STR (+¼); Mental Defense Adds To EGO (-½)

  4f) **4th Binding:** Telekinesis (30 STR), ACV (uses OMCV against DCV; +0), Line Of Sight (+½)

**Total cost:** 89 points.

Target: One character/1m
Duration: Instant
Range: LOS
END Cost: 2/6

Description: These psychic bolts are a very common mystic attack. Even minor sorcerers often know lower-powered versions of the Cerulean Spells. These attacks appear to the victim, and anyone with Mental Awareness, as sparkling beams of blue light.

Game Information:

Options:
1) Strong Spells: Increase reserve to 75 points and both slots to Mental Blast 6d6. Total cost: 89 points.

3) Weak Spells II: Decrease reserve to 25 points and both slots to Mental Blast 2d6. Total cost: 29 points.
4) Expanded Spell: Some mystics also use a Cerulean Spell that's not a bolt of psychic force, but a sort of field that envelopes the victim and lasts as long as the mystic maintains it (i.e., pays END for it). Add a third slot, Mental Blast 4d6, Constant (+½). Total cost: 80 points.

ELDRITCH BOLT

Effect: Blast 8d6
Target: One character
Duration: Instant
Range: 400m
END Cost: 4

Description: A common (and relatively easily-learned) attack spell, the Eldritch Bolt creates a beam of mystic energy to strike a target. It's typically a blue or purple color, but some supermages choose other colors that match their costume, “theme,” other powers, or the like.

Game Information: Blast 8d6. Total cost: 40 points.

Options:
1) Strong Spell: Increase to Blast 10d6. Total cost: 50 points.
2) Weak Spell: Decrease to Blast 6d6. Total cost: 30 points.
3) Enervating Eldritch Bolt: This form of the Eldritch Bolt slows down, and even paralyzes, its target. Add Drain SPD 4d6 (40 Active Points); Linked (-½) (total cost: 27 points). 40 + 40 = 80 Active Points; total cost 40 + 27 = 67 points.

THE FUZONIC FLAMES

Effect: RKA 2½d6-4d6, with various Advantages
Target: One character (or 1m Radius)
Duration: Instant/Instant/Constant
Range: 600m/400m/400m/300m
END Cost: 6/6/5/6

Description: These spells evoke the awesome, fiery energy of the dimension called the Burning Sky. That dimension’s ruler, Fuzon, apparently never objects to anyone tapping the energies of his realm.

Game Information:
Cost: The Fuzonic Flames: Multipower, 60-point reserve

Options:
1) Strong Spells: Increase reserve to 90 points and the slots to RKA 6d6, 4d6, 4d6, and 3d6, respectively. Total cost: 127 points.
2) Weak Spells: Decrease reserve to 40 points and the slots to RKA 2½d6, 1½d6, 1½d6, and 1d6+1, respectively. Total cost: 57 points.
3) Fuzonic Manipulations: Some sorcerers learn other ways to invoke the Fuzonic Flames, which they buy as additional slots for the Multipower. Here are several examples, each costing 6 points:
   1) Field Of Flames I: RKA 2½d6, Area Of Effect (18m Radius Explosion; +½)
   2) Field Of Flames II: RKA 2d6, Area Of Effect (20m Radius; +1)
   3) Agonizing Flames I: Blast 8d6, NND (defense is Power Defense or Life Support [Safe Environment: Intense Heat]; +½)
   4) Agonizing Flames II: RKA 2½d6, +2 Increased STUN Multiplier (+½)
   5) Unavoidable Flames I: RKA 2½d6, Indirect (Source Point is always the caster, but Path can alter to strike target from any direction; +½)
   6) Unavoidable Flames II: RKA 2½d6, Line Of Sight (+½)
4) Hellfire: Some mystics learn a similar set of spells that involve working with Hellfire, a type of mystic flame that originates in the Netherworld. Hellfire is intended to cause pain as much as lethal injuries. To create a Hellfire spell, substitute the equivalent DCs in Blast for the RKAs listed for the Fuzonic Flames.
**HEX OF SUFFERING**

**Effect:** RKA 1 point  
**Target:** One character  
**Duration:** Instant  
**Range:** 20m  
**END Cost:** 3  

**Description:** This spell of dark magic causes the target to suffer great pain and injury that slowly but surely gets worse.  

**Game Information:** RKA 1 point, Damage Over Time (20 increments, one every 3 Segments for 1 Minute, defense only applies once, cannot be used again on same victim until all increments accrue; +7) (30 Active Points); Extra Time (Full Phase; -½), Limited Range (20m; -¼). Total cost: 17 points.

**HYPNOTIC HELIX**

**Effect:** Mind Control 12d6/8d6  
**Target:** One character/16m Cone  
**Duration:** Instant  
**Range:** 8m  
**END Cost:** 6/6  

**Description:** The glowing spiral of multicolored light created by this spell makes people extremely suggestible. Sorcerers throughout the Multiverse have used the Hypnotic Helix, or spells just like it, for thousands of years. Many variations exist; the slots given here are just the two most common versions of the spell.  

Unscrupulous sorcerers often use a Hypnotic Helix to force people to serve them. Champions of Good prefer to use the Helix to make bystanders forget traumatic supernatural events. For most people, forgetting they had a supernatural scare is an action they want to do anyway, so a mystic doesn't need much Mind Control.

**Game Information:**

**Description:** The mage Iskari, sometimes known as Iskari the Prismatic or Iskari the Artist, was fascinated by the artistry of thaumaturgy — the interplay of colors, shapes, and effects created by the release of mystical energy. **Description:** Larethian (or "the Loyal Larethian," as he's most often described) was the apprentice and assistant of two different Archmages from the alternate Earth dimension of Kalvrezon. He's often held up to other apprentice mystics as a model of loyalty, diligence, and respectfulness. But Larethian was a skilled wizard in his own right, for all that he spent most of his long life helping even more powerful mages. He created several spells, but one suite of his magics — a group of attack spells based on mystically-created lightning bolt-like blasts — has become popular with supernormals in many dimensions, including Earth's. The caster can control the color and general appearance of the lightning bolts if he wishes; most casters make them a single color, such as red or black.

**THE LIGHTS OF LUATHON**

Effect: Various Attack Powers and other abilities

Target: Varies

Duration: Varies

Range: Varies

END Cost: Varies

Description: Mystics throughout the Multiverse use this set of eleven spells, which provide both attacks and a variety of useful effects for knowledge, concealment, and deception. The Lights range from a laser-like beam to dramatic lighting that makes the user appear powerful and impressive. These spells create globes of light around the caster’s hands that radiate beams or glows to accomplish a particular effect. Each caster manifests a unique pattern of colors, so the Lights are as good as a fingerprint to identify a particular mystic.

According to legend, Earth’s first Archmage, Thanoro Azoic, learned these spells directly from Luathon. In other words, the Eleven Lights are so old no one can say what name Luathon now uses, or if this entity still exists.

**PLANAR FRACTURE**

Effect: Blast 10d6 plus Drain Characteristics 4d6

Target: 16m Radius

Duration: Instant

Range: No Range

END Cost: 18

Description: This rare and powerful spell, created by some unknown (and possibly insane) supermage in the distant past, creates a tear in time and space. This rift links Earth’s dimension with another in such a way that chaotic energy pours forth, causing injury and havoc. The strange energies affect different targets different ways; one might be burned as if by Fire, while another suffers the acidic chill of Darkness. In addition to suffering injury, the victim also experiences some other random effect, such as being set on fire, poisoned, or paralyzed.

Using Planar Fracture tends to permanently weaken the dimensional barriers at the location where it’s cast, which may lead to the “leakage” of creatures or people, dimensional invasions, or the like. Repeatedly casting Planar Fracture in the same spot can create a permanent “gateway” between two dimensions, but its unstable and can easily spread to engulf and “merge” (and thus effectively destroy) both planes.

**Game Information:** Blast 10d6, Area Of Effect (16m Radius; +½), Variable Special Effect (the GM randomly determines the special effect of the damage each affected person takes; +½) (100 Active Points); Extra Time (Full Phase; -½), No Range (-½) (total cost: 50 points) plus one random effect of up to 60 Active Points (see below); Extra Time (Full Phase; -½), Linked (-½), No Range (-½) (total cost: 24 points). Total cost: 74 points.

**Random Effects:**

- **Bleeding:** RKA 1 point, Penetrating (x2; +1), Damage Over Time (10 increments, one every 3 Segments for 30 seconds, defense only applies once, cannot be used again on same victim until all increments accrue; +6) (40 Active Points)

- **Clinging Flames:** RKA 1 point, Constant (+½), Penetrating (+½), Reduced Endurance (0 END; +½), Sticky (only affects flammables; +¼), Time Limit (fire stops burning character when it runs out of fuel or oxygen, or someone extinguishes the flames; +½) (16 Active Points)

- **Fear:** Drain PRE 4d6 (40 Active Points)

- **Poison:** RKA ½d6, NND (defense is Life Support [appropriate Immunity]; +1), Does BODY (+1), Damage Over Time (five increments, one per Minute for 5 Minutes, defense only applies once, cannot be used again on same victim until all increments accrue; +2) (50 Active Points)

- **Paralysis:** Entangle 3d6, 3 PD/3 ED, Takes No Damage From Attacks (+1) (60 Active Points)
**THE SAFFRON SPHERES**

**Effect:** Sight Group Flash 4d6; Blast 2d6, AVAD; Sight Group Images

**Target:** 1m Radius/1m Radius/1m Radius

**Duration:** Instant/Instant/Constant

**Range:** 300m

**END Cost:** 2/3/0

**Description:** Beginning thaumaturges often learn this spell, though versions that are more powerful exist. A glowing yellow ball darts out and explodes in a blinding yellow flash, or a strobing, disorienting burst. Another form simply radiates bright yellow light; it's sometimes known as “Witchlight.”

**Effect:** Sight Group Flash 7d6, AVAD, ACV

**Target:** One character or 16m Cone

**Duration:** Instant

**Range:** LOS/No Range

**END Cost:** 6/6

**Description:** The starlike bodies in the dimension of Saravane radiate a “psychic light.” By calling upon the light of Saravane, a sorcerer can blind a foe no matter how carefully shielded the foe's eyes might be (but psionic defenses provide protection). **END Cost:** 12

**Description:** Forged by Urthona, the Prime Avatar of Art, this spell is one he grants to his most favored servants throughout the Multiverse. ZYTO’S SOLID SEEMINGS

Effect: Images in various configurations
Target: 1m/8m/1m Radius
Duration: Constant
Range: Varies
END Cost: 0

Description: No one could be sure what was real around Zyto of Bohemia. The notorious wizard enjoyed stunts such as making a goose seem to pull a heavy wooden beam, or making his own leg fall off. Zyto made illusions people could touch and heft. He even evoked simple, solid-seeming illusions that could continue for a short period of time without him maintaining them at all. A mystic who fakes out his opponent with Zyto’s illusions — for instance, sending an illusory double of himself to fight while studying his enemy’s spells — can gain a crucial advantage.

Game Information:
Cost: 62
Power: Zyro’s Solid Seemings: Multipower, 62-point reserve

DEFENSE SPELLS

Unlike mutants, gods, victims of lab accidents, and most other sorts of superbeings, super-mages remain as fragile as ordinary people. Battling mystics need potent spells to shield themselves from damage — or prevent themselves from getting hit in the first place.

DEFLECTING DISK

Effect: Deflection
Target: Self
Duration: Constant
Range: Self
END Cost: 2

Description: One of the most common defensive spells creates a disk of light that darts in front of attacks and actually pulls Ranged attacks (particularly mystical ones) into itself. Super-mages most often use it to protect their comrades or innocent bystanders from suffering injury.

Game Information: Deflection. Total cost: 20 points.

ELDRITCH SHIELD

Effect: +8 OCV with Block
Target: Self
Duration: Constant
Range: Self
END Cost: 2

Description: Considered by most casters a variation on the Mantle Of Mastery (see below), an Eldritch Shield enhances the caster’s ability to block attacks (either HTH or Ranged, though it does not apply to a Deflecting Disk). Over the centuries several supermages have devised variations that have additional powers. A standard Shield usually looks like a simple disk of colored energy; the variations usually have their own, distinctive, appearances.

Game Information: +8 OCV with Block (16 Active Points); Costs Endurance (-½), Does Not Work With Deflection (-0). Total cost: 11 points.

Options:
1) Fearful Shield: This form of the Shield often looks like a demon’s face and can cause the caster’s attackers to feel fear. Caster also buys: Drain PRE 4d6, Area Of Effect (8m Cone; +½) (50 Active Points); No Range (-½) (total cost: 33 points). Total cost of spell: 44 points.

2) Healing Shield: Some types of the Shield can heal the caster if he’s injured. Caster also buys: Healing BODY 4d6 (40 Active Points); Extra Time (Full Phase; -½), Self Only (-½) (total cost: 20 points). Total cost of spell: 31 points.

3) Lightning Shield: This form of the Shield is also a weapon — it can project the Lucent Lightnings of Larethian. Caster also buys: RKA 3d6, Armor Piercing (+¼) (total cost: 56 points). Total cost: 67 points.

4) Absorbing Shield: One of the most potent versions of the Shield can Absorb energies directed at it and channel them to the caster to enhance his own power. Caster also buys: Absorption 20 BODY (to Magic spells and powers), Variable Effect (any one Magic spell or power at a time; +½) (30 Active Points); Linked (to +8 OCV with Block; -½) (total cost: 24 points). Total cost of spell: 35 points.

MANTLE OF MASTERY

Effect: Resistant Protection (10 PD/10 ED/10 Mental Defense/10 Power Defense)
Target: Self
Duration: Constant
Range: Self
END Cost: 7

Description: Often also known as Shields Of Sorcery, this powerful arcane defense manifests as a sheath of prismatic light around the caster. For the good of heart, the Mantle Of Mastery sparkles brightly; for the evil, it shines in dark and murky hues. A magus can sustain the Mantle as long as he remains conscious, and it protects against most forms of mystical and mundane attack.
**Game Information:** Resistant Protection (10 PD/10 ED/10 Mental Defense/10 Power Defense), Allocatable (+¼) (75 Active Points); Costs Endurance (-½), Side Effects (coloration of Mantle reveals caster’s generally Good or Evil nature, always occurs; -½). Total cost: 37 points.

**Options:**

1) **Strong Spell:** Increase to Resistant Protection (15 PD/15 ED/15 Mental Defense/15 Power Defense). 112 Active Points; total cost 56 points.

2) **Weak Spell:** Decrease to Resistant Protection (6 PD/6 ED/6 Mental Defense/6 Power Defense). 45 Active Points; total cost 22 points.

3) **Variant Spell:** Change to Resistant Protection (10 PD/10 ED) plus Mental Defense (10 points) plus Power Defense (10 points). 30 + 10 + 10 = 50 Active Points; total cost 15 + 5 + 5 = 25 points.

**THE SHADOWS OF SHALDUS**

**Effect:** Darkness to Sight Group, Personal Immunity

**Target:** 1m Radius

**Duration:** Constant

**Range:** No Range

**END Cost:** 0

**Description:** This spell wraps a mantle of impenetrable darkness around the caster, making him harder to hit without hindering his own sight at all.

**Game Information:** Darkness to Sight Group 2m radius, Personal Immunity (+¼), Reduced Endurance (0 END; +½) (17 Active Points); No Range (-½). Total cost: 11 points.
WIZARD WALLS

Effect: Barrier 10 PD/10 ED, 10 BODY (up to 12m long, 4m high, and ½m thick), Non-Anchored, Dismissible

Target: Area
Duration: Constant
Range: 100m
END Cost: 7

Description: Sorcerers use these spells to defend an area, or for all-out defense with their other defensive powers. These barriers of force look like vertical disks of pastel light hanging in the air, connected by arcs of light; attacks are drawn to strike the disks. Mystics have invented many other sorts of Wizard Walls besides the versions listed here.

Game Information: Barrier 10 PD/10 ED, 10 BODY (up to 12m long, 4m high, and ½m thick), Non-Anchored, Dismissible (72 Active Points); Costs Endurance (to maintain; -½), Limited Range (100m; -¼). Total cost: 41 points.

Sensory, Movement, and Miscellaneous

AKASHIC EYE

Effect: Telepathy 12d6
Target: One character
Duration: Constant
Range: 8m
END Cost: 0

Description: Eastern mysticism holds that humans can develop a “third eye” for psychic perception. This spell creates an eye of glowing light on the mystic’s forehead that enables him to probe a person’s thoughts and memories. The Akashic Eye works only on nearby targets, though.

Game Information: Telepathy 12d6 (60 Active Points); Limited Normal Range (8m and Range Modifier applies; -½). Total cost: 40 points.

Options:
1) Strong Spell: Remove Limited Normal Range (-½). Total cost: 60 points.

ASTRAL FORM

Effect: Desolidification (Projection), Must Return To Physical Body

Target: Self
Duration: Constant
Range: Self
END Cost: 0

Description: The character can create an “astral form,” a second self composed of pure mystic energy that leaves his body and can act on its own. While the astral form exists, the character’s physical body remains helpless, incapacitated, and unable to act, with 0 DCV (comatose, essentially). However, because the two are both just aspects of the same being, any damage inflicted upon one is inflicted on the other as well (thus, killing either form kills both). Additionally, the two can only remain separate for up to 24 hours; if they do not recombine within that time, they both die.

The astral form possesses all the character’s powers and abilities, but cannot affect the physical world with them while in astral form. Characters often buy other powers that only work when in astral form, such as incredibly fast flight.

See APG 92 for rules about Projection.

Game Information: Desolidification, Projection (+0), Reduced Endurance (0 END; +½) (60 Active Points); Feedback (-1), Physical Body Left Behind (-½), Must Return To Physical Body (24 Hours; -½). Total cost: 20 points.

FADA’S FAR SEEKINGS

Effect: Mind Scan and Clairsentience in various configurations

Target: Varies
Duration: Constant
Range: Varies
END Cost: Varies

Description: These classic spells enable a mystic to locate people far away, or even on other planes. Once a mage knows a target’s general location through the Mind Scan, and travels to that region, he can use the Clairsentience to pinpoint the target’s location. Typically the Transdimensional Mind Scan slot only reveals which dimension the target occupies (at best). The Clairsentience with the Dimensional Sense Modifier views a swath of that dimension so the caster knows what environment he can expect when he goes there. The standard version used on Earth scans the Quaternion. Other versions scan groups of Outer Planes.

The spell creates a spinning disk of iridescent light. Threads of light radiate out to infinity from the disk; only the caster and mentally aware people can see these threads as they sweep through the world or beyond, seeking their target. When the caster uses the Clairsentience options, the center of the disk opens into a view of the desired region. Fada’s Far Seekings demand most of the user’s attention, so mystics prefer to use the spell only when they know they’re safe.
The Complication is that the participants are now subject to the following attack: RKA 4d6, NND (defense is not attacking anyone else involved in the pledge; +1), Does BODY (+1), Difficult To Dispel (x4 Active Points; +½), Trigger (participant attacks another participant using magic, attempts to Dispel the Pax either by myself or with the assistance of another, or otherwise breaks the pledge; +¼). Treat the effect as Damage Over Time (1d6 per 3 Segments for one Turn).

The as-yet un-Triggered effect can be Dispelled, but every Pax includes “attempting to Dispel the Pax, either by myself or with the assistance of another” as one of the conditions for breaking the pledge. Therefore the only way to take advantage of this would be for a participant to accidentally be caught in a Dispel or Adjustment Power that affects all Magic spells and powers (a powerful one, given the spell’s effective Active Points for such purposes).

This spell requires the GM’s permission to buy or use, since it defines an unusual condition as the defense for the NND involved. However, given the spell’s high cost, usually only NPC super-mages know it, thus allowing the GM to control its use anyway.

**Game Information:** Major Transform 6d6 (imposes Pax’s Physical Complication [see text], lasts until specified amount of time has passed or other defined conditions occur), Area Of Effect (1m Radius; +¼) (75 Active Points); No Range (-½). Total cost: 50 points.

### TENG WEI’S TRANLOCATION

**Effect:** Teleportation 40-50m in various configurations

**Target:** Self

**Duration:** Instant

**Range:** Self

**END Cost:** 6/6/6

**Description:** The ancient Chinese magus Teng Wei developed several spells of teleportation, which he taught to a few other sorcerers in his travels around and off the Earth. In the 2,800 years since Teng Wei’s apparent death in a teleportation accident, other sorcerers created more variations on his spells; the ones listed here are just the most common.

**Game Information:**

### Cost Power

62 Teng Wei’s Translocation: Multipower, 62-point reserve

6f 1) First Translocation: Teleportation 50m, Reduced Endurance (½ END; +¼)

6f 2) Second translocation: Teleportation 40m, x4 Increased Mass, x8 Noncombat

6f 3) Third Translocation: Teleportation 25m, MegaScale (1m = 10 km; +¼)

Total cost: 80 points.
TONGUE OF ENITHARMON

Effect: Universal Translator, Usable Simultaneously
Target: Up to 8 characters
Duration: Constant
Range: Touch
END Cost: 0

Description: Mystics often call this “a simple spell of comprehension,” which is bragging in the guise of modesty: gaining the magical ability to speak other languages is easy, but passing the gift to a large group of people is impressive magic. The spell invokes Enitharmon, one aspect of the Prime Avatar of Artifice, to transform the recipients so they can speak any language they encounter. The spell lasts until a recipient hears and speaks his native tongue again. When a mystic casts the spell, a shimmering net wraps around each recipient while he hears myriad voices whispering at once.

Game Information: Universal Translator (INT Roll), Usable Simultaneously (up to eight characters at once; +1) (40 Active Points); Only Applies To Speech, Not Writing (-1), Recipient Loses Power If He Speaks/Hears Own Tongue (-½). Total cost: 16 points.

TYRANNON’S FAMILIAR

Effect: Summon one Signifer built on 168 Total Points; Aid Magic 4d6
Target: Special/Self
Duration: Instant
Range: No Range/Self
END Cost: 5 + 5

Description: This spell, taught to supermages whom Tyrannon regards as his special servants (or whom he’s temporarily duping into thinking they’re his “allies”), allows the caster to summon one of his Signifers (see Champions Villains, Vol. 1, pages 255-57). While it remains in existence, the Signifer channels magical energy to the caster, increasing the power of his spells. Since few (if any) of Earth’s mystics are even aware of Tyrannon’s existence, this spell is virtually unknown to humanity.

Game Information:
- Summon Signifer: Summon one Signifer built on 168 Total Points, Loyal (Signifer generally serves the caster unquestioningly, but is ultimately loyal only to Tyrannon; +½) (51 Active Points); Concentration (½ DCV throughout casting; -½), Extra Time (1 Turn; -½)
- Channel Magic Energy: Aid Magic 4d6, Trigger (whenever mage wants and Signifer agrees but no more than once per Phase, activating Trigger takes no time, Trigger immediately automatically resets; +1) (48 Active Points); Only Works As Long As Signifer Is In Existence Within 20m Of Caster And Remains Loyal To Him (-1), Only Aid Self (-1)

Total cost: 34 points.

THE UNSPEAKABLE ENCHANTMENTS OF ULTOR

Effect: Shape Shift (any shape), Severe Transform 2d6 (anything to anything)
Target: Self/One character
Duration: Constant/Instant
Range: Self/300m
END Cost: 5 to change shape/7

Description: The extradimensional Archmage Ultor created these spells to alter the form and substance of objects, oneself, or other people — or he stole them; reports differ. Whatever their origin, the Unspeakable Enchantments surpass many previous spells of transformation. The spell creates a swirling fog around the target; when the fog clears, the target has changed.

The spell has an unusual, but severe, restriction: the caster must cast them in absolute silence... while resisting a powerful urge to speak. Succumbing to that urge (by failing an EGO Roll) induces temporary idiocy. Ultor built this flaw into the Enchantments; the lost brainpower flows to him, and he stores it for when he feels the need for extra cunning. Ultor himself does not suffer this flaw when he uses the Enchantments.

Game Information:
- The Unspeakable Enchantments Of Ultor: Multipower, 75-point reserve; all Requires An EGO Roll (-½), Side Effects (Drain INT 4d6; -½)
- 1) Change Self: Shape Shift (Sight, Hearing, Smell/Taste and Touch Groups, any shape), Imitation, Costs Endurance Only To Change Shape (+½); Requires An EGO Roll (-½), Side Effects (Drain INT 4d6; -½)
- 2) Great Change: Severe Transform 2d6 (any physical change, heals by the casting of this or any similar spell with the intent of reversing the change), Improved Results Group (anything; +1), Partial Transform (+½); Requires An EGO Roll (-½), Side Effects (Drain INT 4d6; -½)

Total cost: 43 points.

VALA’S BREATH

Effect: Healing STUN and BODY 3d6
Target: 16m Radius Selective
Duration: Instant
Range: No Range
END Cost: 7

Description: Named for the extradimensional sorcerer who created it, this spell evokes a burst of green, blue, and purple light that heals anyone near the caster whom he wants to heal.

Game Information: Healing STUN and BODY 3d6, Expanded Effect (two Characteristics simultaneously; +½), Area Of Effect (16m Radius Selective; +1) (75 Active Points); Extra Time (Full Phase; -½). Total cost: 50 points.
**THE VAPORS OF THE VATA**

*Effect:* Extra-Dimensional Movement in various configurations

*Target:* Self

*Duration:* Instant

*Range:* Self

*END Cost:* 7/7/5

*Description:* Mystics use the Vapors Of The Vata to travel between dimensions. One version transports the caster and one other normal-sized person to any dimension; another lets the caster return another person to that person’s home dimension (the caster doesn’t have to know what or where the home dimension is; the subject merely has to think of home while the spell’s being cast). The third version creates a magical trap: the eerie, violet Vapors erupt around a person who touches a trigger object and send the victim to a particular dimension, which a caster must select when he learns this spell.

“Vata” isn’t a person, place, or thing — it’s a title held by the mages who rule a group of small dimensions called the Storlian Realms. The Vata use this spell to travel between their demesnes and the Realms’ capital in the dimension of Corravanta.

**WINGS OF THE ZEPHIRIM**

*Effect:* Flight 20-30m in various configurations

*Target:* Self or up to eight characters simultaneously

*Duration:* Constant

*Range:* Self/Touch

*END Cost:* 4/4/4

*Description:* This spell of transportation calls on the spirits who dwell in a dimension of clouds, winds, and storms. Swirls of light lift the magician, and perhaps other people, and carry them through the air or around the world. Many mystics only learn the Tireless Wind form of this spell (perhaps buying it in a Power Framework with other spells).

THE QUATERNION BANISHMENT

The gods cannot defend against dimensional conquerors, but mortal mystics can if they know this spell. The Quaternion Banishment hurls the life-force of all humanity against an Outer Planes intruder. A flaming symbol, the Quaternion Seal, appears around the target. The target suffers a Transform that only affects beings from the Outer Planes; conversely, those beings cannot defend against it. When the Transform completes itself, Earth and its whole panoply of Imaginal Realms become deadly poison to the invader. Henceforth, the target suffers a Susceptibility (3d6 STUN per Phase) from being in any dimension of the Quaternion. A mystic can cast the spell only once per day. The spell's effects cease at the end of the Phase if the caster is Stunned, Knocked Out, or flees the Inner Planes; they end immediately if the target voluntarily leaves the Inner Planes before the Transform completes itself. (However, the Transform “damage” remains in effect until healed as specified; if the invader returns before being healed, it’s easier for the caster to complete the Transformation.)

The Quaternion Banishment has reversal conditions. First, the curse lifts if a spirit from any of the Inner Planes of its own free will invites the target to return. The target can also evade the curse by possessing the body of a human, elf, or other creature from a Quaternion plane. Finally, the caster’s death ends the banishment.

Before a mystic can learn the Quaternion Banishment, he must be the Archmage, which means he must receive power from spirits of all four Parterres. For instance, the caster might at some point be healed by an angel, extort a magic power from a devil, have a curse removed by the Emperor of Babylon, and wield the magic weapon of a pagan god. Only someone who meets this condition may invoke the power of the entire human race. For centuries, the Banishment was handed down from Archmage to Archmage. Unfortunately, since the death of the last Archmage (see CU 64-65 and 142), no one in the Champions Universe knows how to cast the spell or has fulfilled its preconditions... leaving Earth and its related planes very, very vulnerable.

The Quaternion Banishment also carries a terrible cost. All the Imaginal Realms draw their power from humanity... so the curse’s power ultimately comes from human life. As the Banishment burns into an invading entity, the spell’s caster feels people die. He sees them. He knows them. The sick and old die first, but within two Turns, the spell draws upon the fragile lives of infants too. Each person knows why he dies, and accepts it. Some mystics calls this spell the Masada Curse, for in casting it a magus declares humanity’s intent to die rather than submit to an invader’s rule.

THE QUATERNION BANISHMENT: Major Transform 3d6 (Outer Planes native to Outer Planes native with Susceptibility: to being in the Inner Planes [takes 3d6 damage per Phase], heals as described in text), NND (defense is being a Quaternion native; +1), Constant (+½), Reduced Endurance (½ END; +¼) (82 Active Points); Limited Target (Outer Planes beings; -½). Only Works In The Inner Planes (-¼). Total cost: 47 points.

THE LESSER BANISHMENT

Although only the Archmage can learn the full Quaternion Banishment, there is a weaker version of the spell, known simply as the Lesser Banishment, which any supermage can learn. It causes temporary injury and weakness to relatively low-powered spirits and beings from any of the Outer Planes (for these purposes, “relatively low-powered” means “built on no more than 600 Total Points”). It has no effect on spirits or other mystical beings native to Earth’s dimension (such as most nature spirits and undead creatures).

The Lesser Banishment: Drain CON and STUN 6d6, Expanded Effect (two Characteristics simultaneously; +½) (90 Active Points); Only Works On Lower-Powered Outer Planes Spirits/Beings Who Are In Earth’s Dimension (see text; -2). Total cost: 30 points.

THE LOOM OF SPACE

This spell creates a new dimension from scratch. The caster projects raw power into Limbo, creating not just the matter of his new plane, but space and time for it to occupy. A mystic can design the new cosmos any way he wants, to the limits of his imagination. A new universe always holds a few surprises, though, and a mystic wields no intrinsic control over its destiny.

In game terms, the Loom Of Space is the special effect for a character’s being able to buy an entire new dimension of his own design as a Base, using the standard rules for purchasing the Base Perk. Of course, most such Bases are going to be incredibly expensive, given their size and contents; the character may also have to buy lots of Followers or other Perks to properly fill his dimension. (Of course, the character could restrict himself to creating a small “pocket dimension,” one that costs far fewer Character Points.)

As always, special effects are important. The GM should not allow a mystic to buy a dimensional Base and justify it by saying, “I know the Loom Of Space.” The Loom is an extremely rare spell, one that few mages can learn. Casting it is a long and arduous task, involving whatever difficulties or prerequisites the GM sees fit to impose (“To cast the Loom, first you must make a three foot tall jade incense burner by hand from a block of raw jade...”). At the very least, casting the Loom should be incredibly tiring, and perhaps even pose a risk of permanent physical injury. Furthermore, the dimension-creation process is not absolutely predictable; the mystic expresses what he wants as part of the casting, but may not get exactly what he has in mind. Differences both subtle and gross may make their way into the weaving of a dimension, with results even the most powerful mystic cannot plan for.

Most importantly, creating a dimension with magic doesn’t lead to exactly the same result as allowing one to evolve naturally. Many mages believe that Loom-created planes are “fragile” — it’s easy for them to break apart (or be broken by an attacker), or even for them to have Achilles’s heels that make them easy to disorporate back into the stuff of Limbo.

ESPECIALLY POWERFUL SPELLS

Mystics may encounter spells with significantly higher Active Points than usual for the campaign, and effects that stagger the mind. These aren’t just spells with extra dice of damage — the greatest spells trespass on the powers of gods. A GM could build an entire story arc around one world-shaking spell, and make learning it a high point of the campaign.

Characters cannot buy or use any of these spells unless they have the GM’s permission. Not only are they expensive and unbalancing, they have the potential to completely disrupt the campaign. Additionally, some of them use NND defenses or the like which require the GM’s approval.

The Quaternion Banishment

The gods cannot defend against dimensional conquerors, but mortal mystics can if they know this spell. The Quaternion Banishment hurls the life-force of all humanity against an Outer Planes intruder. A flaming symbol, the Quaternion Seal, appears around the target. The target suffers a Transform that only affects beings from the Outer Planes; conversely, those beings cannot defend against it. Thaumaturgy is the Art of transforming, altering, and redirecting energies and matter. It includes shapeshifting magics and related spells. It’s a complex and unusual category of spells, one that’s difficult to master... but which rewards dedicated study.

Generally speaking, Thaumaturgy spells fall into four categories: spells involving the changing or augmentation of the self; spells involving the changing or augmentation of others (some of which the thaumaturge can also apply to himself); spells involving the creation of objects from existing materials; and spells involving the redirection or harnessing of energies both mystical and natural. The GM may want to consider similar spells in other categories (such as Sharpen Blade [page 131] or Arcane Theft [page 22]) as also being Thaumaturgy spells.

### Self-changing Spells

#### Animal Shapes

**Effect:** Multiform (16 animals built on up to 250 Total Points each)

**Target:** Self

**Casting Time:** 1 Turn

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -6

**END Cost:** 18

**Description:** This spell grants the thaumaturge the power to assume the form of various animals. However, he must not spend too long in any one form, lest he take on the animal's personality and instincts and remain trapped in that shape forever.

Typically a character chooses which 16 animal forms he can assume when he buys the spell, and later spends points to increase the number of forms if he wants more. However, the GM may allow him to leave some or all of the forms undefined at the start of the game, and then define them as the need arises.

This spell counts as Constant because it costs END to change forms. Since it costs no END to maintain the change, and the Power has the **Personality Loss** Limitation, the character does not revert to his true form if Knocked Out while in animal shape; he retains the animal form.

The animal shapes for this spell are built on up to 250 Total Points, which covers the vast majority of animals listed in Chapter Six of The HERO System Bestiary. The GM can extend it to cover more expensive animals (such as great white sharks) via the Absolute Effect Rule if desired (or use the options).

**Game Information:** Multiform (16 animals built on up to 250 Total Points each) (70 Active Points); OAF Expendable (tiny animal figurine made of semi-precious stone, Difficult to obtain; -1¼), Costs Endurance (to change only; -½), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Increased Endurance Cost (x3 END; -1), Personality Loss (1 Hour; -1), Requires A Magic Roll (-½). Total cost: 9 points.

**Options:**

1) **Strong Spell:** Increase to 16 animals built on up to 300 Total Points each. 80 Active Points; total cost 11 points.
2) **Stronger Spell:** Increase to 16 animals built on up to 350 Total Points each. 90 Active Points; total cost 12 points.
3) **Weak Spell:** Decrease to 16 animals built on up to 150 Total Points each. 50 Active Points; total cost 7 points.
4) **More Forms:** Increase to 32 animals. 75 Active Points; total cost 10 points.
5) **Many More Forms:** Increase to 64 animals. 80 Active Points; total cost 11 points.
6) **Fewer Forms:** Decrease to 4 animals. 60 Active Points; total cost 8 points.
7) **Free Spell:** Total cost: 8 points.
8) **Remove A -¼ Limitation:** Total cost 10 points.
9) **Remove A -½ Limitation:** Total cost 10 points.
10) **Add A +¼ Advantage:** 87 Active Points; total cost 12 points.
11) **Add A +½ Advantage:** 105 Active Points; total cost 14 points.
12) **Add A -¼ Limitation:** Total cost 9 points.
13) **Add A -½ Limitation:** Total cost 9 points.
**MONSTER SHAPES**

**Effect:** Multiform (16 monsters built on up to 300 Total Points)

**Target:** Self

**Casting Time:** Full Phase

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -½

**END Cost:** 16

**Description:** This spell allows the character to assume the form and abilities of various “lesser” monsters — ones built on up to 300 Character Points. This includes many of the creatures in The HERO System Bestiary, but the character cannot assume the form of any infernal or divine being (such as demons, angels, and the like). The GM may add other forms to the "restricted" list (such as djinni or ifrits), and is the final judge of what constitutes a “monster” (as opposed to a person or normal animal). In any event, the thaumaturge dare not remain in monster form too long, lest he take on the monster's instincts and personality and stay in that shape forever.

Typically a character chooses which 16 monster forms he can assume when he buys the spell, and later spends points to increase the number of forms if he wants more. However, the GM may allow him to leave some or all of the forms undefined at the start of the game, and then define them as the need arises.

This spell counts as Constant because it costs END to change forms. Since it costs no END to maintain the change, and the Power has the Personality Loss Limitation, the character does not revert to his true form if Knocked Out while in monster shape; he retains the monstrous form.

**Game Information:** Multiform (16 monsters built on up to 300 Total Points) (80 Active Points); OAF Expendable (lump of alchemically-treated clay, Difficult to obtain; -1¼), Costs Endurance (to change only; -½), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Increased Endurance Cost (x2 END; -½), Personality Loss (1 Hour; -1), Requires A Magic Roll (-½). Total cost: 14 points.

**Options:**

1) **Strong Spell:** Increase to 16 monsters built on up to 600 Total Points. 140 Active Points; total cost 24 points.

2) **Stronger Spell:** Increase to 16 monsters built on up to 900 Total Points. 200 Active Points; total cost 35 points.

3) **Strongest Spell:** Increase to 16 monsters built on up to 1,200 Total Points. 260 Active Points; total cost 45 points.

4) **Weak Spell:** Decrease to 16 monsters built on up to 200 Total Points. 60 Active Points; total cost 10 points.

5) **More Forms:** Increase to 32 monsters. 85 Active Points; total cost 15 points.

6) **Many More Forms:** Increase to 64 monsters. 90 Active Points; total cost 16 points.

7) **Fewer Forms:** Decrease to 4 monsters. 70 Active Points; total cost 12 points.

8) **Free Spell:** Total cost: 18 points.

9) **Remove A -½ Limitation:** Total cost 14 points.

10) **Remove A -½ Limitation:** Total cost 15 points.

11) **Add A +¼ Advantage:** 100 Active Points; total cost 17 points.

12) **Add A +½ Advantage:** 120 Active Points; total cost 21 points.

13) **Add A -½ Limitation:** Total cost 13 points.

14) **Add A -½ Limitation:** Total cost 13 points.

15) **Limited Duration Spell:** Remove Costs Endurance (-½) and Increased Endurance Cost (-½) and add Time Limit (1 hour, +1 hour per point by which the caster succeeds with his Magic roll) Total cost: 15 points.

**PROTECTED SHAPE**

**Effect:** Power Defense (20 points), Only Versus Transforms And Thaumaturgic Attacks

**Target:** Self

Add Shrinking (.032 m tall, .0004 kg mass, -12 to PER Rolls to perceive character, +12 DCV, takes +36m KB) with the same Limitations plus Linked (¼). 18 + 36 = 54 Active Points; total cost 6 + 11 = 17 points.

**OTHER-CHANGING SPELLS**

These spells all reflect how Thaumaturgy can shape things other than the spellcaster himself. Thaumaturgic Transforms generally only affect the Body; they cannot alter the Spirit, and thaumaturges leave alterations of the Mind to Sorcery.

**ANIMAL’S SENSES**

**Effect:** +5 PER with all Sense Groups, Usable By Other

**Game Information:** +5 PER with all Sense Groups, Usable By Other (+¼) (19 Active Points); OAF Expendable (hawk’s eye, Difficult to obtain; -1¼), Gestures (¼), Incantations (¼), Requires A Magic Roll (½), Time Limit (1 Hour, +30 minutes per point by which the caster succeeds with his Magic roll; -½). Duration: Constant
Range: No Range
Magic Roll Penalty: -3

Description: This spell allows a thaumaturge to transmute the body of another person to grant powers based upon changing the physical form. Examples include Flight (from wings), HKA (from claws), Enhanced Senses (from larger eyes and the like), and Swimming (from webbed hands and feet). The standard rules for adding abilities via Transform apply, and of course the GM should carefully oversee use of this spell to make sure it doesn't unbalance the campaign. (One possible way to do this is to change the "heals back" condition to something like passage of a short period of time.)

Game Information: Major Transform 1d6 (grant physical form-based powers, heals back through another application of this spell or a like spell), Constant (+½), Improved Results Group (any physical form-based power; +¼) (17 Active Points); OAF Expendable (claw from a bear and a feather from an eagle bound by a crimson thread, Difficult to obtain; -1¼), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Limited Target (humanoid beings; -½), No Range (-½), Requires A Magic Roll (-½), Spell (-½). **TRANSFORM PERSON TO ANIMAL**

**Effect:** Severe Transform 7d6
(humanoid beings into animals)

**Target:** One character

**Casting Time:** Full Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 100m

**Magic Roll Penalty:** -13

**END Cost:** 13

**Description:** This spell transforms any humanoid being into any animal of the caster's choosing. However, the GM should be wary of allowing characters to use this as an “instant death” spell by transforming people into fish (or other creatures that can't survive in the local environment) or insects (which the character then crushes).

**Game Information:** Severe Transform 7d6 (humanoid beings into animals, heals back through another application of this spell or a like spell), Increased Results Group (any animal; +¼) (131 Active Points); OAF Expendable (knot made of string woven from the fur of five different types of animals, Difficult to obtain; -1¼), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Limited Range (100m; -¼), Limited Target (humanoid beings; -½), Requires A Magic Roll (-½), Spell (-½). CREATION SPELLS

Thaumaturgy also encompasses the power to create objects out of raw materials. It cannot create living beings, nor create things out of thin air — a thaumaturge must have material to work with to use his creation spells.

CREATE FEAST

Effect: Minor Transform 4d6 (raw/uncooked foodstuffs into sumptuous feast)
Target: Special
Casting Time: 1 Turn (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -2
END Cost: 2

Description: This spell transmutes raw, uncooked, or unprepared foodstuffs into gourmet food and drink. For example, the caster could turn just-harvested wheat into delicious bread, a bunch of grapes into fine wine, or a slaughtered boar into pork chops. Since the “BODY” of foodstuffs tends to be slight, the spell can usually Transform a great deal of food at once, but the final decision on what it can do is up to the GM.

Game Information: Minor Transform 4d6 (raw/uncooked foodstuffs into sumptuous feast, heals back over time as it spoils/rots), Improved Results Group (any type of appropriate food; +¼) (25 Active Points); OAF Expendable (miniature silver ladle, Difficult to obtain; -1¼), Concentration (½ DCV throughout casting; -½), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), No Range (-½), Requires A Magic Roll (-½), Spell (-½). **REDIRECTION SPELLS**

**ARCHER’S BANE**

**Effect:** Deflection, Trigger, Only Works Against Physical Projectiles
**Target:** Self
**Casting Time:** Half Phase (see text)
**Casting Procedures:** Focus, Gestures, Incantations
**Duration:** Instant
**Range:** Self
**Magic Roll Penalty:** -4
**END Cost:** 4

**Description:** This spell harnesses the forces that propel a physical projectile, like an arrow or a bullet, and alters them so that the missile misses its intended target. It does not work against Ranged attack spells, including spells that create “mundane” missiles out of thin air (that requires the Wizard's Bane spell, below).

**Game Information:** Deflection, Trigger (speaking the Incantations, activating Trigger takes no Time, Trigger immediately automatically resets; +1) (40 Active Points); OAF (miniature silver bent arrow; -1), Gestures (-¼), Incantations (-¼), Only Works Against Mundane Physical Projectiles (see text; -¼), Requires A Magic Roll (-½). Total cost: 12 points.

**Options:**

Change Deflection to Reflection (60 Active Points’ worth), Any Target (+½). 120 Active Points; total cost 31 points.
**HARNESS NATURAL POWER**

**Effect:** Aid Magic 4d6, any Magic power one at a time

**Target:** Self

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Self

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** Many natural phenomena, such as wind, moving water, and earthquakes, contain vast amounts of energy. Using this spell, a thaumaturge can harness that energy to enhance his other spells. The thaumaturge must be close to the phenomenon (within about 6m, though this may vary based on the nature and intensity of the phenomenon) to use this spell.

The GM determines what phenomena a thaumaturge can "tap" using this spell. He may, in his discretion, make the power of the spell proportional to that of the phenomena (for example, a slight breeze might only allow for an Aid ½d6, but a hurricane might grant Aid 6d6 or more). To "tap" magical power, a thaumaturge can use the Arcane Theft spell (page 22).

**Game Information:** Aid Magic 4d6, Variable Effect (any one Magic spell or power at a time; +½) (36 Active Points); OAF (tiny silver wheel; -1), Gestures (-¼), Incantations (-¼), Only Aid Self (-1), Requires A Magic Roll (-½), Requires Appropriate Natural Phenomena (see text; -½). 7) **Add A +½ Advantage:** 42 Active Points; total cost 9 points.
8) **Add A +½ Advantage:** 48 Active Points; total cost 11 points.
9) **Add A -½ Limitation:** Total cost 7 points.
10) **Add A -½ Limitation:** Total cost 7 points.

**Description:** This spell protects the thaumaturge from Ranged attack spells (including physical objects created or hurled by magic) the same way Archer’s Bane protects him against mundane missiles. No matter how powerful, most spells just seem to veer away from him.

**Game Information:** Deflection (20 Active Points); OAF (mirror talisman; -1), Gestures (-¼), Incantations (-¼), Only Works Against Magical Ranged Attacks (see text; -½), Requires A Magic Roll (-½). Total cost: 6 points.

Also known to some wizards as High Magic or Celestial Magic, Theurgy is an unusual category which encompasses several related forms of magic.

DIVINE- AND INFERNAL-POWERED SPELLS

The first are spells that call on or draw upon the divine and infernal powers, or similar beings, to grant a power or quality associated with that being to the caster. Depending upon the magic system, the type of spell, and the personality of the caster, this type of spell may take the form of beseeching the being for aid (similar to Divine Magic in many ways, but without priestly trappings), of demanding that the being acknowledge the mage's power and do as he bids, or "stealthy" efforts to "steal" some of the being's power without his noticing. The latter two types of spell can be perilous for the caster, who risks drawing the attention of the gods. (In game terms, if a theurgist fails his Magic Roll, the being perceives what he's doing and may punish him for his insolence. If you want theurgists to be exposed to this danger, use the options to add an appropriate Side Effect to the spell.)

Related to this type of magic are spells that summon divine or infernal beings (such as demons, angels, or even actual gods) to confer with the theurgist, or even do his bidding.

STAR AND PLANET SPELLS

In many campaign settings/magic systems, the planets and stars known to spellcasters have mystic properties of their own (whether general or specific). Theurgists craft spells that draw upon these properties for arcane power.

CUSTOMIZING THEURGY FOR YOUR CAMPAIGN

Theurgy works best if you "customize" it for your campaign setting by devising your own distinct pantheon of divine and infernal beings, and your own planets, constellations, and stars. The divine- and infernal-powered spells described below are written up "generically" — with references only to a type of god, such as a fire-god or god of storms — so you can easily adapt them to your campaign by changing their names (and perhaps special effects). The star and planets spells are written using Earth astrology as codified by the Renaissance mystic Henry Cornelius Agrippa; adapting them to a different setting may mean redoing them for an entirely different set of planets, or simply renaming them.

The sample spells described below only begin to scratch the surface of what a theurgist might do. You could also adopt some of the Divine Magic spells (page 87) as Theurgy spells with just a few changes, or alter spells from other parts of this book to fit the "special effect" of Theurgy. Additionally, theurgists often have the power to invoke demons, angels, and other such beings; you can use various Conjuration spells for this.

Voodoo spells are based on a somewhat fictionalized version/amalgam of various Afro-Caribbean systems of religion, mysticism, and folklore. With its eerie rituals, strange charms, animal (and sometimes human) sacrifices, exotic and seductive qualities, and pulsing drum-beats, Voodoo holds an intriguing fascination for many gamers and is perfect for many types of HERO System campaigns.

In general, Voodoo magic involves calling on the loa (gods/spirits) for aid. A houngan, or Voodoo priest, uses his knowledge of and identification with a given loa and that loa’s symbols to “cast spells” or create magical effects. Rather than “learning spells” the way a Fantasy wizard does, the houngan trades offerings to the loa in exchange for a bit of their power. Evil spellcasters, known as bokor, also know black magic spells designed to curse and harm.

Beyond that simple explanation, this section of The HERO System Grimoire doesn’t attempt to delve into what Voodoo is, explain its religious implications, or discuss its complex symbolism and practices. Pages 116-20 of The Ultimate Mystic discuss Voodoo in general (and include several spells which are not reprinted here), and there are many books on the subject for readers who’d like to learn more.

**BARON SAMEDI’S CHANGE**

**Effect:** Multiform (16 animals built on up to 200 Total Points each)

**Target:** Self

**Casting Time:** 1 Turn

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -6

**END Cost:** 18

**Description:** By calling on the power of the loa Baron Samedi, a houngan can gain the power to assume the form of various animals. He can remain in any given animal form as long as he wishes without difficulty.

Typically a character chooses the 16 animal forms native to Haiti (or referred to in Haitian folklore) that he can assume when he buys the spell, and later spends points to increase the number of forms if he wants more. However, the GM may allow him to leave some or all of the forms undefined at the start of the game, and then define them as the need arises.

This spell counts as Constant because it costs END to change forms. But since it costs no END to maintain the change and the spell doesn’t have the *Reversion* Limitation, the character does not revert to his true form if Knocked Out while in animal shape; he retains the animal form.

**Game Information:** Multiform (16 animals built on up to 200 Total Points each) (60 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Costs Endurance (to change only; -½), Extra Time (1 Turn; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Increased Endurance Cost (x3 END; -1), Requires A Magic Roll (-½). Total cost: 9 points.

**Options:**
1) **Strong Spell:** Increase to 32 animals. 65 Active Points; total cost 10 points.

**Game Information:** Aid STR 3d6 (18 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 5 points.

**Game Information:** +30 PRE (30 Active Points); OAF (specially prepared Ghede fetish; -1), Costs Endurance (-½), Gestures (-¼), Incantations (-¼), Only To Make Presence Attacks Against The Undead (-2), Requires A Magic Roll (-½), Spell (-½). Total cost: 5 points.
**LOA POSSESSION**

**Effect:** Boost two Characteristics 3d6. Side Effects (character takes on loa's personality)

**Target:** Self

**Casting Time:** 1 Minute

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** Through the use of spell ritual practices and meditative states, a houngan can let a *loa* take possession of him (“ride” him, in Voodoo parlance). This has the benefit (and drawback) of making him more like that loa — certain Characteristics increase or improve, based on the loa in question. But he also takes on aspects of the loa’s personality. For example, if ridden by Erzuli he becomes seductive and lustful; if ridden by a death-loa he might become macabre (or, in the case of evil loa, murderous); if ridden by a loa associated with black magic he becomes wicked and cruel.

See the accompanying text box for a list of common Voodoo *loa* and the Characteristics each one affects by riding someone.

**Game Information:** Boost Characteristics 3d6, Variable Effect + Expanded Effect (any two Characteristics simultaneously, see accompanying table; +1) (36 Active Points); OAF (specially-prepared fetish or symbol of *loa* who will ride the houngan; -1), Concentration (½ DCV throughout casting; -½), Costs Endurance (to maintain; -½), Extra Time (1 Minute to cast; -½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Only Aid Self (-1), Requires A Magic Roll (-½), Side Effects (character takes on loa’s personality, always occurs; -½). Total cost: 5 points.

**Options:**
1) **Strong Spell:** Increase to Boost Characteristics 4d6. 48 Active Points; total cost 7 points.
2) **Weak Spell:** Decrease to Boost Characteristics 2d6. 24 Active Points; total cost 3 points.

OGOU'S HAND OF FIRE

Effect: Telekinesis (30 “STR”), Only Works On Fire
Target: Special
Casting Time: Full Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: 450m
Magic Roll Penalty: -4
END Cost: 4

Description: The houngan allows the loa Ogou to take possession of him, granting him the power to "pick up" masses of flame, move them, and even create crude shapes with them (such as a fiery eagle or a tower of flame). The spell can pick up a mass of fire doing up to 6 Damage Classes' worth of damage (1 DC for every "5 STR" worth of Telekinesis; see APG 122). The caster can move the flame at the normal rate for Telekinesis.

If the caster touches a person with the flame, that person takes the flame's damage; this extinguishes the flame (otherwise it does not "burn out" as long as the caster holds on to it). If the caster touches the flame to something flammable, such as a curtain, he loses control of it and it keeps burning until it uses up all the available fuel.

**Description:** A houngan who possesses a pierre tonneres ("thunder stone"; actually an Arawak axehead) can use it to call on one of the loa who control rain and storms — Simbi, Agau, Sogbo, or Bade — to conjure a storm, or to send away a storm that’s already occurring. The storms he makes can have powerful enough winds and rain to make it hard to see (and possibly even strong enough to harm crops or damage houses and trees), or they can simply cause gentle, life-giving rain. **Magic Roll Penalty:** -6

**Description:** Simbi, who’s a loa of lightning as well as magic, can extend his powers to help a houngan interfere with modern electrical devices — he literally “sucks the juice” away from them, making it harder (or even impossible) for them to work as long as the houngan maintains his concentration (i.e., keeps paying END).

CHARM AGAINST RISING

Effect: Minor Transform 7d6 (human corpse into corpse that cannot be made to rise as a zombi)

Target: One corpse

Casting Time: 1 Hour

Casting Procedures: Focus, Gestures, Incantations

Duration: Instant

Range: No Range

Magic Roll Penalty: -3

END Cost: 3

Description: When a follower of Voodoo dies, if his family can afford it they hire a houngan to come in and cast this spell upon the body. It's a universal preventative against the dead coming back to "life" as a zombi cadavre (an animated corpse; see HSB 296) and plaguing his family. To cast it, the houngan first uses flour to draw a cross on the corpse's forehead, then stuffs the corpse's nose and ears with cotton (so it cannot hear sounds made by the living, particularly the bokor's call to return). Second, the priest ties a cloth under the chin and around the head so the corpse can't open its mouth to respond to the bokor's call even if it does hear it. Third, the houngan ties the corpse's knees and toes together so it can't walk. Fourth, the houngan turns out the corpse's pockets (so it doesn't take to the grave anything it could use to harm the living), removes its shoes (so it can't frighten the living even if it does somehow walk), and puts a few of the deceased's personal items in the coffin (so he won't come looking for them). Fifth, he trims tufts of hair and the nails on the left hand and foot (which a bokor could use to gain power over the corpse); these are put in a white pot together with several chicken feathers the houngan has passed over the corpse's head (the pot and its contents are later burned). Lastly, a specially-trained corpse-washer laves the corpse in a proper ritual matter. A body so prepared cannot become a zombi.

This ritual also ensures that the deceased's soul makes it safely away from his body and cannot be captured by a bokor for use as a zombi astral (a sort of ghost).

Game Information: Minor Transform 7d6 (human corpse into corpse that cannot be made to rise as a zombi cadavre, nor whose soul can become a zombi astral; heals back through another application of this or a similar spell cast by the same houngan) (35 Active Points) OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain: -1¼), Extra Time (1 Hour; -3), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Limited Target (human corpses capable of being made into zombis; -1), No Range (-½), Requires A Magic Roll (-½). Target: One character
Casting Time: 20 Minutes
Casting Procedures: Focus, Gestures, Incantations
Duration: Time Limit (7 days)
Range: Touch
Magic Roll Penalty: -3
END Cost: 0

Description: One of a houngan's most beneficial abilities is to prevent illness from taking hold in a person — whether it's an ordinary illness or one created by Petro Voodoo. By calling on the loas, he can protect a person from disease for a week. The specifics of the spell — the incantations, gestures, symbols, and substances used — vary depending on the types of disease the houngan is most concerned with preventing, though the spell has general application against all illnesses (but see Option #12, below).

In game terms, most diseases are defined as a Drain of some sort. Therefore this spell is defined as Power Defense that Only Protects Against Diseases (whether natural or magical). If necessary, the GM should use the Absolute Effect Rule to extend its protection to diseases not built as Drains.

He begins calling the names of the suspects in a sing-song, all the while crossing the switches and moving them against each other. When he calls out the name of the thief, the switches become entangled. The spell may have to be cast several times to get a positive result (i.e., until the houngan makes his PER Roll), but in time the thief will be revealed.

**Description:** If a bokor attacks a person with voye lamò (see below), only a powerful houngan can drive the plaguing spirits of the dead away and save the victim's life (or sanity). If the Voye Lamò spell has not yet taken full effect (i.e., in game terms, the victim is not yet dead or totally Transformed into a madman), this spell stops the progress of Voye Lamò — the victim takes no further damage or Transform effect. If the victim was subjected to Deadly Voye Lamò, he may then start to heal the damage he took normally; if he was subjected to Voye Lamò Of Madness, he immediately becomes clearheaded and sane.

**Game Information:** Major Transform 6d6 (person afflicted with Voye Lamò to person not so afflicted), ACV (uses OMVC against DMCV; +¼), AVAD (Mental Defense; +0), Works Against EGO, Not BODY (+¼) (90 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Concentration (0 DCV throughout casting; -1), Extra Time (1 Hour; -3) Gestures (throughout casting; -½), Incantations (throughout casting; -½), Limited target (humans afflicted with the Voye Lamò spell; -½), No Range (-½), Requires A Magic Roll (-½). **Description:** Many Voodoo black magic spells inflict some sort of a curse on a person. A houngan can use this ritual to lift the curse. If the curse involved planting a ouanga (charm bag) or other physical object on or near the victim, it must be found before this spell can take effect; as part of the ritual the houngan burns the object.

**MAMAN BRIJIT’S CURE**

**Effect:** Major Transform 4d6 (person afflicted by illness- or death-causing black magic into healthy person)

**Target:** One character

**Casting Time:** 5 Minutes

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** Maman Brijit is a Petro (evil) loa whom houngans avoid calling on most of the time. But if properly approached and propitiated, she can cure the effects of Voodoo black magic that cause illnesses or death (assuming the recipient of the spell hasn’t already died, of course). In a short ceremony the houngan calls on Maman Brijit for her aid, and if he does everything correctly (i.e., succeeds with his Magic roll), she grants it.

In game terms, this is a Major Transform, “(person affected by illness- or death-causing black magic into healthy person,” that (a) stops certain Voodoo black magic spells from working, and (b) completely reverses their effects, restoring the victim to the full health and vigor he had before coming under the sorcery. Per the usual Transform rules, the houngan must add up the cost of the lost abilities he wants to restore and treat them as “powers” being granted to the target by the Transform.

**Game Information:** Major Transform 4d6 (person affected by illness- or death-causing black magic into healthy person, heals back through any normal means that would cause character to contract the same disease) (40 Active Points); OAF (specially-prepared fetish or symbol of Maman Brijit; -1), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes; -2), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Limited Target (humans afflicted by certain types of Voodoo black magic; -½), No Range (-½), Requires A Magic Roll (-½). Total cost: 5 points.

**Options:**
1) **Strong Spell:** Increase to Major Transform 5d6. 50 Active Points; total cost 7 points.
2) **Weak Spell:** Decrease to Major Transform 3d6. 30 Active Points; total cost 4 points.

9) **Add A -½ Limitation:** Total cost 5 points.

**MEDSIN FÈY**

**Effect:** Healing 1d6, any one Characteristic at a time

**Target:** One character

**Casting Time:** 1 Minute

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -3

**END Cost:** 1

**Description:** Medsin Fèy is the Voodoo term for the herbal healing lore of the houngan, who uses it to treat and cure illnesses and minor injuries. (In game terms medsin fèy refers to KS: Haitian Herbalism, and the Paramedics Skill, and this spell; the spell describes the more miraculous effects a powerful houngan can achieve.) Hougans use medsin fèy to treat any sort of injury they feel they can help with, but only treat illnesses caused by magical or supernatural means — people with ordinary colds and diseases they refer to ordinary doctors.

Typically a medsin fèy treatment involves such practices as: applying a poultice of appropriate herbs to the injured area, or the forehead; making herbal drinks; sacrificing an animal and using its blood to draw curing-signs on the afflicted area; and the like. Different herbs and leaves are used for different maladies, so a houngan may not always have the right supplies on hand to treat a particular condition.
Game Information: Healing Characteristics 1d6, Variable Effect (any one Characteristic at a time; +½) (15 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Extra Time (1 Minute; -1½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-1 per 5 Active Points; -1). Total cost: 3 points.

VOODOO BLACK MAGIC

While many people associate Voodoo as a whole with black magic (i.e., magic used for selfish, evil, or cruel purposes), that’s not really the case. Voodoo as it’s practiced as part of a religion is generally beneficent. However, bokors (Voodoo sorcerers, as opposed to houngans, or Voodoo priests) often learn related forms of black magic with which to curse and harm their enemies... or anyone they’re hired to work magic against. (Houngans sometimes learn these spells, but only so they can better understand and prevent/cure their effects.) Voodoo black magic can be quite powerful, but suffers from many restrictions as well. Among other things, the spells usually take a long time to cast (or to prepare to cast), and most of them can only be cast at night (leaving the bokor weakened in daylight).

Voodoo black magic is also known as Petro Voodoo, red Voodoo, and left-hand Voodoo. A bokor is said to “give to the loas with both hands,” since he practices both right-hand (white or helpful) and left-hand (black or evil) magic.
**ACCURACY GREASE**

**Effect:** Aid Killing Attack 6d6

**Target:** One weapon

**Casting Time:** 1 Hour

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** Touch

**Magic Roll Penalty:** -6

**END Cost/Charges:** 13 to cast/1 Charge

**Description:** Bokors know how to brew a magical grease that makes any weapon more intelligent, and thus more likely to strike accurately and deal a deadly blow. To prepare it, they must dig up a body from a graveyard and take the corpse's brain. (They can also use the brain of an enemy killed in battle.) From the brain they manufacture the grease in a special ceremony. The grease must then be rubbed on the weapon to be enhanced — either on the edge of a bladed weapon or the sights of a gun.

According to some Voodoo lore, the brain of a white man is particularly efficacious for this spell. If the bokor can obtain one, the GM might consider adding a point or three to the Aid's effect roll.

**Game Information:** Aid Killing Attack 6d6, Variable Effect (any form of Killing Attack (HKA or RKA) at a time; +½), Delayed Return Rate (points fade at the rate of 5 per Day; +2¼) (135 Active Points); OAF Expendable (special grease made from the brains of dug-up corpses, Extremely Difficult to obtain; -2), Can Only Be Cast At Night (-¼), Concentration (0 DCV throughout casting; -1), Extra Time (1 Hour; -3), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-1 per 20 Active Points; -¼), 1 Charge (-2).

Total cost: 12 points.

**Options:**
1) **Strong Spell:** Increase to Aid Killing Attack 8d6. 180 Active Points; total cost 16 points.
2) **Weak Spell:** Decrease to Aid Killing Attack 4d6. 90 Active Points; total cost 8 points.

**Target:** 10 km Radius

**Casting Time:** 1 Turn

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -15

**END Cost:** 15

**Description:** By calling on the loa Agau, a bokor can cause an earthquake! This causes damage to structures and beings on the ground over a vast area. Secondary effects may occur, such as towers collapsing, rifts opening in the earth, or bodies of water changing location or course. Earthquakes count as Telekinesis that damages objects on the ground over a wide area; typically, an earthquake has 5 points of STR per 1.0 rating on the Richter scale. Thus, a 5.0 Richter quake has Telekinesis (25 STR).

**Game Information:** Telekinesis (40 STR), Area Of Effect (8m Radius Explosion [loses 5 STR per 1m radius area]; +¼), MegaArea (1m = 1 km wide, broad, and deep; +1), Personal Immunity (+¼) (150 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Concentration (0 DCV throughout casting; -1), Can Only Be Cast At Night (-¼), Extra Time (1 Minute; -¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-½). **Duration:** Constant

**Range:** No Range

**Magic Roll Penalty:** -7

**END Cost:** 7 per Hour

**Description:** By calling upon the loa Agau, a bokor can create a powerful storm! The temperature falls or rises as appropriate for the prevailing weather conditions, the sky clouds up, and the appropriate precipitation falls. (It takes five minutes from the time the spell is cast for these effects to fully manifest.) The storm covers a four kilometer area. The effects, being artificial, disperse fairly quickly once the caster stops paying END.

**Game Information:** Change Environment (create storm), +/-5 Temperature Levels, Varying Combat Effects, Area Of Effect (4m Radius; +½), MegaArea (1m = 1 km broad, wide, and deep; +1), Delayed Endurance Cost (once per Hour; +½) (69 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Can Only Be Cast At Night (-¼), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes to cast; -1), Extra Time (5 Minutes onset time; -2), Gestures (two hands throughout casting; -1), Incantations (throughout casting; -½), No Range (-½), Requires A Magic Roll (throughout casting; -½), Spell (-½), Total cost: 7 points.

**Effect:** Summon one zombi astral (preferably in the same house, or in the cemetery where the body's buried if that's already occurred).

**Target:** Special

**Casting Time:** 1 Hour

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -9

**END Cost:** 9

**Description:** For 36 hours after a person dies, his soul hovers around his body before moving on to the next world. During that time it can be captured by a bokor, who then uses it as a zombi astral (for game purposes, use the Ghost character sheet on HSB 282 for a zombi astral). Capturing it requires this spell, which must be cast at night while the bokor is relatively close to the body (preferably in the same house, or in the cemetery where the body’s buried if that’s already occurred).

**Game Information:** Summon one zombi astral built on 463 Total Points (93 Active Points); OAF Expendable (appropite Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Can Only Be Cast At Night Within 36 Hours Of Death (-½), Concentration (0 DCV throughout casting; -1), Extra Time (1 Hour; -3), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-½), Summoned Being Must Inhabit Locale (see text; -½), Total cost: 11 points.

CREATE ZOMBI CADAVRE

Effect: Summon up to 16 zombi cadavre built on 176 Total Points each, Slavishly Devoted, Extra Tasks

Target: Special
Casting Time: 1 Hour
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -14
END Cost: 14

Description: One of the most-feared spells of Voodoo black magic is this one, by which a bokor causes a body to rise from the grave and serve him as a mindless zombi cadavre (use the Zombie character sheet on HSB 296 for a zombi cadavre). It requires a long and terrifying ritual performed in the same room or cemetery where the corpse is currently located. The ritual only works on corpses whom the bokor has slain with the Kou Nanm spell (see below) or whose souls he's caught with Capture Soul (see above).

First the bokor appeals to Baron Samedi, who controls the passage between the lands of life and death, to open the way that he (the bokor) may bring the zombi cadavre to life. Then he calls on Ghede-Nibo, caretaker of tombs, whose permission must be asked to use any dead person. Finally, when all preparations have been made and incantations uttered, the bokor calls the dead person's name. If all has gone as planned, the corpse answers the bokor's call and rise as the living dead.

The death of the bokor who created it frees a zombi cadavre to return to death, as does the completion of its total number of tasks.

Game Information: Summon up to 16 zombi cadavre built on 176 Total Points each, Slavishly Devoted (+1), Extra Tasks (bokor's EGO x 4 tasks; +½) (137 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Very Difficult to obtain; -½), Can Only Be Cast At Night Within 36 Hours Of Death (-½), Concentration (0 DCV throughout casting; -1), Extra Time (1 Hour; -3), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Must Have An Appropriate Corpse (see text; -½), Requires A Magic Roll (-½), Summoned Being Must Inhabit Locale (see text; -½). Total cost: 13 points.

Options:
1) Free Spell: Total cost: 15 points.
2) Remove A +½ Advantage: 151 Active Points; total cost 14 points.
3) Remove A +½ Advantage: 165 Active Points; total cost 16 points.

**Target:** One character

**Casting Time:** Full Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 20m

**Magic Roll Penalty:** -9

**END Cost:** 9

**Description:** What a bokor can call up, he can put down. Many Voodoo black magic spells involve invoking or using the spirits of the dead, and this spell drives those spirits away. Among other things, it can render the dirt of a Voye Lamò spell harmless or counteract a Death Curse. (The GM should allow it to have those effects pursuant to the Absolute Effect Rule, even if the total on the Dispel dice isn’t sufficient to overcome those spells’ Active Points.)

**Game Information:** Dispel 20d6, Variable Effect (any one spirits of the dead spell at once, see text; +½) (90 Active Points); OAF Expendable (Voodoo powders and candles, Difficult to obtain; -1¼), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Limited Range (20m; -¼), Requires A Magic Roll (-½), Spell (-½). **ENEMY’S HEART**

**Effect:** Aid PRE or INT 2d6, Must Consume Heart/Liver Of Slain Enemy

**Target:** One character

**Casting Time:** 1 Turn

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** No Range

**Magic Roll Penalty:** -4

**END Cost:** 4

**Description:** The body of a bokor’s enemy contains great magic that he can tap... if he’s willing. By consuming a slain enemy’s heart, the bokor gains great courage; eating his liver brings cleverness.

To cast the spell, the bokor must retrieve the organs from the enemy’s corpse (or have someone else do it), and then eat some of it (or feed it to whoever he Aids) while casting the spell. Typically the organs are cooked first, lengthening the whole process. A given organ can feed 1d6 persons, but the spell must be cast separately for each one.

**Game Information:** Aid PRE or INT 2d6, Variable Effect (one Characteristic at a time; +½), Delayed Return Rate (points fade at the rate of 5 per Day; +2¼) (45 Active Points); OAF Expendable (body parts cannibalised from slain enemies, plus appropriate Voodoo charms, powders, and paraphernalia, Extremely Difficult to obtain; -2), Can Only Be Cast At Night (-¼), Gestures (throughout; -½), Incantations (throughout; -½), Must Consume Heart/Liver Of Slain Enemy (-1), Requires A Magic Roll (-½), Spell (-½). **Description:** One of a bokor’s most feared powers is to make people fall sick, and perhaps even die. The spell works best if the bokor has hair, nails, skin, or even clothes or personal effects taken from the intended victim (+2 to +5 to Voodoo roll), but can affect anyone.

**Game Information:** Drain CON and BODY 1d6, Expanded Effect (two Characteristics simultaneously; +½), Delayed Return Rate (points return at the rate of 5 per Day; +2¼), Area Of Effect (1m Radius Accurate; +½), MegaScale (area covers all of Earth; +2) (62 Active Points); OAF Expendable (appropriate Voodoo charms, powders, and paraphernalia, Difficult to obtain; -1¼), Can Only Be Cast At Night (-¼), Damage Over Time (3 increments, one per day for three days, defense only applies once, cannot be used again on same victim until all increments accrue; -4), Extra Time (1 Hour to cast; -3), Extra Time (1 Hour onset time; -3), Gestures (throughout; -½), Incantations (throughout; -½), No Range (-½), Requires A Magic Roll (-½), Spell (-½). **KALFOU’S MISCHANCE**

**Casting Time:** 1 Hour  
**Casting Procedures:** Focus, Gestures, Incantations  
**Duration:** Instant  
**Range:** No Range  
**Magic Roll Penalty:** -9  
**END Cost:** 9  

**Description:** A kalfou, or crossroads, holds great evil power, and a bokor can use it to cause a victim to suffer an accident. Within a week of when the bokor casts the spell, the victim suffers some sort of injury — a large weight falls on him, a car or horse runs into him, he gets kicked by a mule, or he gets beat up in a barroom brawl. Whatever seems to have happened to him, the real cause is the bokor’s evil spell.

Casting Procedures: Focus, Gestures, Incantations

VOODOO DOLL

Effect: Various attack spells
Target: 1m Radius Accurate (covers the entire world) or one character
Casting Time: Full Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: Varies
Magic Roll Penalty: Varies
END Cost: Varies

Description: This spell gives a bokor the power to harm a specific person by harming a doll made in that person’s likeness. The doll has to resemble the victim (at least superficially) and must contain at least two of the following from him: hair; skin; nail clippings; blood; saliva; urine; feces; a scrap of cloth from an article of clothing worn for at least one day; a tiny personal possession. A doll, once constructed, only works against that specific person; the GM should keep a list of the dolls possessed by a bokor who knows this spell.

To use the spell, the bokor need only harm the doll in some way. Typically this means poking it with a silver pin to inflict intense agony (and various forms of impairment), but the bokor could also hold the doll over a flame, crush it under something, or the like. Other people, including the victim, can harm or destroy the doll without hurting the victim at all.
Most of the attacks a bokor can make with a Voodoo Doll don’t require him to be near the victim; they can affect him regardless of where he is in the world. However, if he’s in the victim’s presence, he can use the doll defensively — he can hold up the doll as a “shield,” and any Ranged attack that strikes it hurts the victim instead! Alternately, instead of harming the doll, the bokor can use it to take control of the victim. He must be within the bokor’s Line Of Sight for this to work.

A control doll is most effective when used from a long way away, targeting the attacks using the doll’s magic link to the victim. In such a case, Voodoo sorcerers can concentrate and take all the time they want to make the attack, and the victim doesn’t see it coming. Up close, victims seldom sit still long enough. The doll can still be used, but if the victim’s nearby there’s a chance he can take the doll away.

In truth, the “Voodoo doll” is quite rare in real Voodoo; it’s more a feature of European witchcraft. However, control dolls are not unknown, and in any event dolls are strongly associated with Voodoo in fiction. Additionally, control dolls can be used to transmit blessings as well as curses — but the curses are more notorious.

**EASY BIRTH**

Effect: Images to Touch Group, +3 to PER Rolls
Target: Self
Casting Time: 1 Turn
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: No Range
Magic Roll Penalty: -2
END Cost: 0

Description: With this spell a houngan can ease the pangs of childbirth, making the entire process much easier on the mother. To cast it he must make a tea of dirt gathered from the four corners of the house, verbena, elmwood, and the ashes of a piece of paper or parchment on which the woman's name was inscribed before the paper was burned. Before the woman drinks the tea, the houngan goes to the back of the house, faces east, and calls her name three times; she must only answer the third time. Then she drinks the tea and her suffering is eased as long as the houngan maintains the spell.

In game terms, childbirth pains don't really have a quantified game effect (though it could be argued that they constitute a loss of STUN and/or END). Therefore, this spell is a simple Touch Group Images that relieves the pain, making the mother-to-be feel as if she's not experiencing any unusual distress.

**FIND TREASURE**

Effect: Detect Treasure
Target: Self
Casting Time: 1 Turn
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: Self
Magic Roll Penalty: -2
END Cost: 2

Description: One of the most popular uses of Voodoo is to find treasure (defined for these purposes as lost or hidden valuables of nearly any sort). The dream of most houngans, or those who hire them to cast this spell, is to find a cache of gold concealed by some old plantation owner. But in that case, as in some others, evil spirits may guard the treasure, so the houngan had best be prepared with protective magics.

**GHEDE-JANMENSOU’S GIFT**

Effect: Aid CON 6d6, Only To Prevent Drunkenness
Target: One character
Casting Time: 1 Turn
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -4
END Cost: 4

Description: By calling on the power of Ghede-Janmensou, a houngan can make himself or another person much more able to resist the effects of drunkenness. The spell only works if cast before the subject actually becomes drunk; once he's had too much to drink, Ghede-Janmensou's Gift cannot make him sober once more (though it could prevent him from suffering further effects of intoxication).

**Description:** By calling on Maman Brijit, the loa of money, the houngan can literally create money out of thin air! He creates $100 per point of BODY rolled on the Transform die. However, as with any other gift from a Petro loa, Maman Brijit’s favor is a double-edged sword — the money reverts back to air in 1d6+1 days, which may get the person who spent it into trouble. Houngans and bokors who use this spell too much develop a reputation for it, and people refuse to deal with them.

**Game Information:** Major Transform 1d6 (air into money, heals back after 1d6+1 days) (10 Active Points); OAF Expansible (appropriate Voodoo charms, powders, and paraphernalia, difficult to obtain; -1½), Extra Time (1 Minute; -1¼), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-½). **VOODOO MAGICAL ABILITIES**

Here are two abilities that characters with connections to Voodoo, or access to a houngan or bokor, might obtain.

**ANGAJAN**

An *angajan*, or “engagement,” is a pact made between a bokor and an evil *loa*. Through the pact that *loa* grants the bokor some of its power; in exchange, the bokor agrees to make expensive sacrifices to the *loa*, perform tasks for the *loa*, and so forth. If the character falls out of the *loa*’s favor or goes against its wishes, the *loa* will take the power away until the character regains the *loa*’s good graces. Listed here are several example *angajans* a character could buy. He doesn’t have to buy them all, and other powers are possible.

**Cost Angajan**

3 | **Gift Of Stamina:** +5 CON; Must Remain In *Loa*’s Favor (-½)
10 | **Gift Of Luck:** Luck 3d6 (15 Active Points); Must Remain In *Loa*’s Favor (-½)
7 | **Gift Of Magic:** +5 to Magic rolls (10 Active Points); Must Remain In *Loa*’s Favor (-½)
2 | **Gift Of Protection I:** Resistant (+½) for 3 PD/3 ED; Must Remain In *Loa*’s Favor (-½)
5 | **Gift Of Protection II:** Power Defense (8 points); Must Remain In *Loa*’s Favor (-½)
3 | **Gift Of Strength:** +5 STR; Must Remain In *Loa*’s Favor (-½)

**GAD**

A *gad*, or “guard,” is a type of protective charm embodied in a tattoo or scar that places the recipient under the protection of a particular *loa*. It must be renewed periodically, usually at least once a year, or lose its power. The houngan or bokor applies the tattoo or scar during a ritual. Creating the scar involves cutting the recipient in the right pattern and then rubbing special herbs into the cut. Usually Voodoo practitioners belonging to a specific *hounfort* (worship circle or “temple”) share the same *gad*, making the mark an identifying symbol as well as a form of magical protection.

Listed here are several example *gads* a character could buy. He doesn’t have to buy them all, and other powers are possible.

**Cost Gad**

5 | **Good Fortune:** Luck 1d6
5 | **Protection From Curses:** Power Defense (5 points)
1-3 | **Protection From Illness:** Life Support (one Immunity to a specific disease)
5 | **Protection From Madness:** Mental Defense (5 points)
1-3 | **Protection From Poison:** Life Support (one Immunity to a specific poison)
Warrior-Magery, or Warrior-Magic, refers to spells that enhance a warrior’s ability to fight, making him a nigh-unmatched master of blade and bow. Compared to most other categories it’s very restricted in scope, and often rare as well — in many campaign settings only one small group, such as a single tribe or fighters’ guild knows the secrets of Warrior-Magery.

Witchcraft is an Art combining various lesser aspects of other arts, such as Alchemy, Black Magic, Conjuration, Druidry, Elemental Magic, Necromancy, and Voodoo, as well as hedge magics and other “low spells,” but no less powerful than the other categories for all that. The GM may allow characters who know Witchcraft to select appropriate spells from those (or other) categories and define them as belonging to Witchcraft as well (and vice-versa).

Witchcraft is primarily associated with women, who often gather in coven (groups of 13) to practice their Art. Many Witchcraft spells were created with women in mind; they work only against men (or better against men), help women with the tasks normally assigned them in medieval-era societies, enhance women’s positive attributes, and so forth. Male witches, known as warlocks, are rare.

POTION-BREWING

Witch's potions usually aren't quite the same as those produced by alchemists. Not only do they tend to require different (and more disgusting) ingredients — eye of newt, bat's wings, serpent's spittle, goats' hearts, and so forth — but they have different uses. Whereas alchemical potions generally improve or enhance the drinker, witch-potions are weapons. They're intended to take control of the victim's mind and make him do something, to transform him, or the like. As such, they're bought differently (often as Mental Powers with the Based On CON Limitation), and the witch typically has to trick the victim into drinking them.

CANDLE OF LIFE

Effect: RKA 6d6, NND, Does BODY
Target: 1m Radius Accurate (covers the entire world)

Duration: Instant
Range: No Range

Magic Roll Penalty: -10
Charges: 1 Charge

Description: Although its name suggests kindness and healing, in fact the Candle Of Life is so called because it holds a man's life within its enchanted wax — and as it burns, that man dies. The candle must include at least one of the items described for a Voodoo Doll (a bit of the target's body, see page 324) in the wax.

Once lit, the Candle Of Life burns for an hour, slowly killing the victim over that time. The witch must keep her concentration focused on the candle during this period. If the candle stops burning, the effect stops at that point. The victim suffers the damage up to that point, but the candle cannot be relit to hurt him further (though the witch could perhaps use what's in it to make another candle...).

Game Information: RKA 1d6, NND (defense is Life Support [Longevity]; +1), Does BODY (+1), Area Of Effect (1m Radius Accurate; +½), Mega-Scale (area covers all of Earth; +2), Damage Over Time (6 increments, one every 10 minutes day for one hour, defense only applies once, cannot be used again on same victim until all increments accrue; +1). CANDLE MAGIC

Some witches use their magic to create enchanted candles that create a certain effect for as long as they burn. Known as candle magic, this branch of Witchcraft is of little use in combat, but often proves quite effective in other situations.

CANDLE OF BEGUILEMENT

Effect: Sight, Hearing, Smell/Taste, and Touch Group Images, -6 to PER Rolls
Target: 16m Radius around candle
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant

Magic Roll Penalty: -10
Charges: 1 Continuing Fuel Charge lasting 1 Hour

Description: This candle creates an illusion of the witch's choice. The witch can change the illusion each time she lights the candle, but can't alter it while the candle remains lit. Wizardry is a catch-all term for magic and spellcasting in general; thus, terms like “mage” and “wizard” can refer to virtually any spellcaster, no matter what arcanae he knows. However, in a more technical sense, Wizardry also refers to any spells or bodies of mystic lore not a part of any other category. These include spells relating to the nature of magic itself (such as Detect Magic and Dispel Magic), general utility spells, spells that manipulate sheer mystic power (like Mystic Dart or Wizard’s Shield), Words Of Power, and the like.

**SPells OF General Utility**

These spells deal with some of the simplest, most fundamental forces and uses of magic. As such, they belong to all categories; any mage can buy them as part of any category.

**ARCanE TrICKERY**

*Effect:* Images to Detect Magic, -6 to PER Rolls
*Target:* 8m Radius
*Casting Time:* 1 Turn (Attack Action)
*Casting Procedures:* Focus, Gestures, Incantations
*Duration:* Time Limit (duration of 1 Day, +1 Day per point by which the caster succeeds with his Magic roll)
*Range:* No Range
*Magic Roll Penalty:* -10
*END Cost:* 0

*Description:* This spell allows a wizard to trick other wizards into thinking that arcane energies do or do not exist in a particular place. He can make it seem as if a mundane object or place is magical, or that a magical person, place, or thing is mundane. He can also apply the spell to himself so that other spellcasters cannot detect that he is a spellcaster (in this case, the spell’s effects move with the caster).

*Game Information:* Images to Detect Magic, -6 to PER Rolls, Area Of Effect (8m Radius; +½), Reduced Endurance (0 END; +½), Time Limit (duration of 1 Day, +1 Day per point by which the caster succeeds with his Magic roll; +½) (105 Active Points); OAF Expendable (crystal of smoky quartz, Difficult to obtain; -½), Concentration (½ DCV throughout casting; -½), Extra Time (1 Turn to cast; -½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), No Range (-½), Requires A Magic Roll (-½), Spell (-½). *Target:* Self/1 document
*Casting Time:* Full Phase
*Casting Procedures:* Focus, Gestures, Incantations
*Duration:* Constant/Instant
*Range:* Self/No Range
*Magic Roll Penalty:* -2
*END Cost:* 2

*Description:* This spell allows a wizard to conceal the meaning of written script. To anyone besides the wizard, the script looks like meaningless gibberish. The wizard may, if he wishes, extend to others the ability to read the script without assistance.

If the wizard writes the script from the beginning, he must use a quill made of a griffin’s feather and write with mystic inks made of many unusual substances. If he wishes to magically conceal the meaning of existing script, he must dust it with powdered dragon’s scales while speaking the words of the spell.
Detect Magic

Effect: Detect Magic (INT Roll) (no Sense Group), Discriminatory
Target: Self
Casting Time: Full Phase
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: Self
Magic Roll Penalty: -1
END Cost: 1

Description: This spell allows the wizard to detect arcane energies, be they the lingering effects of a curse, the enchantment placed upon a sword (or other item), or the fact that another person can cast spells. He must be in the same area as the arcane energies to sense them, however. (See pages 149-50 of Fantasy Hero for more details on Detect Magic.)

Game Information: Detect Magic (INT Roll) (no Sense Group), Discriminatory (10 Active Points); OAF Expendable (tiny amethyst crystal, Difficult to obtain; -1½), Extra Time (Full Phase; -½), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 2 points.

Options:
1) Strong Spell: Increase to Detect 20d6. 90 Active Points; total cost 21 points.
2) Weak Spell: Decrease to Detect 12d6. 54 Active Points; total cost 13 points.

9) Add A -½ Limitation: Total cost 13 points.

Add Increased Endurance Cost (x5 END when used against any spell not from the specified category, Very Common; -¾). Total cost: 13 points.

Dispel Magic

Effect: Dispel Magic 14d6, any one Magic power or spell at a time
Target: One character
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: 420m
Magic Roll Penalty: -6
END Cost: 6

Description: One of the most basic spells in any wizard’s arsenal, Dispel Magic breaks apart and neutralizes mystic energies, causing spells to cease functioning. When casting it, a wizard hits the palm of one hand with a small silver hammer wielded in the other, thus signifying the “smashing” of the targeted magic; the hammer disintegrates into worthless powder as the target magic disperses (or if it fails to disperse).

One drawback to using this spell is that the release of eldritch energies it entails attracts the attention of any nearby spellcaster or magically-sensitive being.

Game Information: Dispel Magic 14d6, Variable Effect (any one Magic power or spell at a time; +½) (63 Active Points); OAF Expendable (intricately-worked silver hammer, Very Difficult to obtain; -1½), Gestures (-¼), Incantations (-¼), Noisy (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 15 points.

Options:
1) Strong Spell: Increase to Dispel 20d6. 90 Active Points; total cost 21 points.
2) Weak Spell: Decrease to Dispel 12d6. 54 Active Points; total cost 13 points.

5) Remove A -½ Limitation: Total cost 17 points.
6) Add A +¼ Advantage: 73 Active Points; total cost 17 points.
7) Add A +½ Advantage: 84 Active Points; total cost 20 points.
8) Add A -¼ Limitation: 84 Active Points; total cost 14 points.
9) Add A -½ Limitation: Total cost 13 points.
10) Ranged Spell: The wizard can perceive arcane energies at a distance. Add Range. 15 Active Points; total cost 3 points.
**READ SCRIPT**

**Effect:** Universal Translator (INT Roll +10), Cryptography 25-

**Target:** Self

**Casting Time:** Full Phase

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -3

**END Cost:** 3

**Description:** This spell, one of the first learned by most wizards, allows a spellcaster to read unfamiliar scripts, whether they’re concealed by magic, written in code, or simply in a language he does not understand.

In game terms, this spell has two modes: Universal Translator and Cryptography. The former is used in most circumstances; unless there’s some dramatic reason to require a roll, the GM should usually let it work automatically. However, it won’t work against two types of scripts: codes and ciphers; and words hidden by Conceal Script. For these types of script, you must use the Cryptography function in a Skill Versus Skill Contest against the spell or the person writing the code. In most cases, this spell should win.

**Game Information:** Minor Transform 3d6 (blank book or scroll to copy of other book or scroll), heals back through another application of this spell (15 Active Points); OAF Expendable (eagle’s feather quill, Difficult to obtain; -½), Concentration (0 DCV throughout casting; -1), Extra Time (1 Turn; -½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Limited Target (blank books or scrolls; -1), No Range (-½), Requires A Magic Roll (-½). **OFFENSIVE SPELLS**

**ARCANE ENERVATION**

**Effect:** Drain END 6d6, Only Works Against Mystic Endurance Reserves

**Target:** One character

**Casting Time:** Half Phase (Attack Action)

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Instant

**Range:** 100m

**Magic Roll Penalty:** -6

**END Cost:** 6

**Description:** Many wizards rely on items infused with arcane energies to provide the mystic power needed to keep their spells functioning. Usually designed as a staff, piece of jewelry, or similar object, these items greatly expand a wizard’s power. This spell diminishes the “fuel” in such items, thus weakening the wizard who possesses them.

In game terms, this spell’s Drain END only works on the END in Endurance Reserves. It has no effect on characters’ normal END.

**Game Information:** Drain END 6d6 (60 Active Points); OAF Expendable (copper amulet graven with runes of weakness, Difficult to obtain; -½), Gestures (-¼), Incantations (-¼), Limited Range (100m; -¼), Only Works Against Mystic Endurance Reserves (-1), Requires A Mystic Roll (-½), Spell (-½). ★ MYSTIC DART

Effect: RKA 2d6, Only Affects Living Beings
Target: 1m Radius Accurate
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: LOS
Magic Roll Penalty: -6
END Cost: 6

Description: This spell creates a “dart” of pure mystic energy that strikes targets with deadly force equal to that of a heavy longbow. It strikes with great accuracy, rarely missing its target, but can only affect living beings.

The caster may choose the appearance he wants his Mystic Darts to have when he buys the spell. For one caster, the Dart might look like an arrowhead-shaped bolt of energy; for another, it looks like a glowing arrow; for a third, it’s a jet-black starburst. With the GM’s permission, he could even change the special effect, making it a Firedart, Icedart, Lightning Dart, or the like.

Game Information: RKA 2d6, Area Of Effect (1m Radius Accurate; +½), Line Of Sight (+½) (60 Active Points); OAF Expendable (tiny gold or crystal dart, Difficult to obtain; -1¼), Gestures (-¼), Incantations (-¼), Only Affects Living Beings (-½), Requires A Magic Roll (-½), Spell (-½). Total cost: 14 points.

Options:

9) Add A +½ Advantage: 75 Active Points; total cost 18 points.
10) Add A -½ Limitation: Total cost 13 points.
11) Add A -¾ Limitation: Total cost 13 points.
12) Variant Mystic Dart I: The Mystic Dart is such a popular attack spell that many wizards have developed variations on it that have since passed into the arcane canon. This version “follows” the target if he tries to dodge it, making it almost impossible for him to Dive For Cover successfully. Change to Area Of Effect (16m Radius Accurate; +1). 75 Active Points; total cost 18 points.
13) Variant Mystic Dart II: Add NND (defense is Wizard’s Shield or Wizard’s Bulwark; +1) and Does BODY (+1). 120 Active Points; total cost 28 points.

★ MYSTIC BOLT

Effect: RKA 3d6, Only Affects Living Beings
Target: 32m Line
Casting Time: Half Phase (Attack Action)
Casting Procedures: Focus, Gestures, Incantations
Duration: Instant
Range: No Range
Magic Roll Penalty: -7
END Cost: 7

Description: This spell harnesses sheer arcane energy to create a powerful bolt of mystic force 1m wide and 32m long.

The caster may choose the appearance he wants his Mystic Bolt to have when he buys the spell. It could be a beam of blue-white energy, a blast of fist-sized prismatic spheres, a bolt of pure darkness, or just about anything else he can think of.

With the GM’s permission, he could even change the special effect, making it a Firebolt, Winterbolt, Acid Bolt, or the like.

Casting Procedures: None

Duration: Constant

Range: Self

Magic Roll Penalty: -3

END Cost: 3

Description: This spell surrounds the caster’s body with a display of arcane power that impresses and cowards those who witness it. He need not gesture or incant to invoke this ability, nor use a Wizard’s Staff or material components; he simply calls upon his innate mystic powers. However, this does tend to attract the attention of any nearby spellcasters.

Game Information: +30 PRE (30 Active Points); Costs Endurance (-½), Only For Impressiveness-/Fear-Based Presence Attacks (-1½), Noisy (-¼), Requires A Magic Roll (-½), Spell (-½). Total cost: 7 points.

**WIZARD’S TRAP**

Effect: RKA 4d6, Trigger

Target: One character

Casting Time: Half Phase (Attack Action)

Casting Procedures: Focus, Gestures, Incantations

Duration: Instant

Range: No Range

Magic Roll Penalty: -9

END Cost: 9

Description: Wizards are a notoriously secretive and cautious lot; some might even be described as paranoid. They often use this spell (and others like it) to protect their possessions. It creates a deadly blast of mystic force whenever someone goes somewhere the wizard doesn’t want him to or opens something the wizard would prefer to keep closed.

Possible types of Wizard Traps include:

— a glyph, sigil, or rune placed on a wall, door, or page that blasts anyone who looks at it without permission
— a mystic blast confined within a chest of treasure that hits anyone who opens the chest
— a mystic blast placed on a lock that hits anyone who tries to open the lock without the proper key

A Wizard Trap affects only the target. It does not damage the object or area it protects.

Game Information: RKA 4d6, Trigger (defined by caster when spell is cast; +½) (90 Active Points); OAF Expendable (coil of copper wire tied in a complex knot, Difficult to obtain; -½), Concentration (0 DCV throughout casting; -1), Extra Time (5 Minutes to cast; -2), Gestures (throughout; -½), Incantations (throughout; -½), No Range (-½), Requires A Magic Roll (-½). Total cost: 12 points.

Options:
1) Strong Spell: Increase to RKA 6d6. 135 Active Points; total cost 19 points.

7) Add A +½ Advantage: 120 Active Points; total cost 16 points.
8) Add A -¼ Limitation: Total cost 12 points.
9) Add A -½ Limitation: Total cost 12 points.
10) Substitute Traps: Some wizards prefer less lethal Traps. They substitute other powers — Blast 12d6, Entangle 6d6, 6 PD/6 ED, or the like — while keeping the rest of the spell the same.

★ WIZARD’S BULWARK

Effect: Barrier 6 PD/6 ED, 6 BODY (1m long, 2m tall, ½m thick), Non-Anchored
Target: Area
Casting Time: Half Phase
Casting Procedures: Focus, Gestures, Incantations
Duration: Constant
Range: No Range
Magic Roll Penalty: -3
END Cost: 3

Description: This spell creates a vertical plane of mystic force directly in front of the wizard. It offers protection from all forms of attack, including even the deadliest forms of spells like Mystic Dart. However, once an attack breaches the Bulwark, it collapses; the wizard has to cast the spell again to re-create it.
The Wizard's Bulwark moves with the caster as he moves. It doesn't interfere with his ability to move, but technically prevents him from casting most types of spells through it. In the interest of dramatic sense, the GM can simply ignore that rule.

**Game Information:** Barrier 6 PD/6 ED, 6 BODY (1m long, 2m tall, ½m thick), Non-Anchored (38 Active Points); OAF Expendable (tiny shield made of fine enamelled metal, Difficult to obtain; -¼), Costs Endurance (to maintain; -½), Gestures (-¼), Incantations (-¼), No Range (-½), Requires A Magic Roll (-½), Restricted Shape (flat plane in front of caster; -½), Self Only (-½). **Description:** Also known as *Wizard's Armor* because it makes the caster look like he's wearing plate armor made of planes of mystic force, this basic defensive spell provides protection against most forms of attack. It does not shield the caster against exotic forms of attack created by some spells.

**Game Information:** Resistant Protection (8 PD/8 ED) (24 Active Points); OAF (Wizard's Staff or other such Focus of the wizard's choice; -1), Costs Endurance (-½), Gestures (-¼), Incantations (-¼), Requires A Magic Roll (-½). Total cost: 7 points.

**ixonmalous Spells**

**ASTRAL FORM**

**Effect:** Desolidification, Projection

**Target:** Self

**Casting Time:** 20 Minutes

**Casting Procedures:** Focus, Gestures, Incantations

**Duration:** Constant

**Range:** Self

**Magic Roll Penalty:** -6

**END Cost:** 0

**Description:** With this spell, a wizard can create an “astral form,” a second self composed of pure mystic energy that leaves his body and can act on its own. While the astral form exists, the wizard's physical body remains helpless, incapacitated, and unable to act, with 0 DCV (comatose, essentially). However, because the two are both just aspects of the same being, any damage inflicted upon one is inflicted on the other as well (thus, killing either form kills both). Additionally, the two can only remain separate for up to 24 hours; if they do not recombine within that time, they both die.

See APG 92 for rules about Projection.

**Game Information:** Desolidification, Projection (+0), Reduced Endurance (0 END; +½) (60 Active Points); OAF Expendable (doll in the shape of the caster made of wax and a drop of his blood, Difficult to obtain; -1¼), Concentration (0 DCV throughout casting; -1), Extra Time (20 Minutes to cast; -1¼), Feedback (-1), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Physical Body Left Behind (-½), Must Return To Physical Body (24 Hours; -½), Requires A Magic Roll (-½). GRANT WISH

Effect: Extra-Dimensional Movement (subject “travels” to the “dimension” where things are as he wishes for them to be)

Target: One character

Casting Time: 1 Minute

Casting Procedures: Focus, Gestures, Incantations

Duration: Persistent

Range: No Range

Magic Roll Penalty: -8

END Cost: 0

Description: Generally considered the most powerful spell ever created, Grant Wish allows a wizard to do just that — give or do to a person anything he can think of (furthermore, the spell responds to intent, not the literal wording of the request). The spell can also automatically duplicate the effects of any other known spell at maximum power.

However, this power comes at a price. First; the spellcaster must permanently sacrifice Character/Experience Points equal to the cost of the spell. Second, the spell automatically ages the caster 3 years, and this aging cannot be overcome with longevity spells. Thus, wizards are extremely reluctant to cast Grant Wish. The GM may impose whatever other restrictions he considers necessary on this spell in the interest of common sense, dramatic sense, and game balance.

Game Information: Extra-Dimensional Movement (subject “travels” to the “dimension” where things are as he wishes for them to be), Usable By Other (+¼), Reduced Endurance (0 END; +½), Persistent (+¼) (40 Active Points); OAF Expendable (large, expensive, and flawless diamond, Extremely Difficult to obtain; -2), Concentration (0 DCV throughout casting; -1), Extra Time (1 Minute; -1½), Gestures (throughout casting; -½), Incantations (throughout casting; -½), Requires A Magic Roll (-1 per 5 Active Points; -1), Side Effect (character must permanently spend 4 Character/Experience Points to power the spell, automatically occurs; -1), Side Effect (age three years, this aging automatically occurs and cannot be overcome with longevity magic; -½). Total cost: 4 points.

Options:
1) Free Spell: Total cost: 6 points.
2) Remove A -¼ Limitation: Total cost 4 points.
3) Remove A -½ Limitation: Total cost 5 points.
4) Add A +¼ Advantage: 45 Active Points; total cost 5 points.
5) Add A +½ Advantage: 50 Active Points; total cost 5 points.
6) Add A -¼ Limitation: Total cost 4 points.
7) Add A -½ Limitation: Total cost 4 points.
8) Variant Spell: Another way to simulate “granting a wish” is for the spell to Transform the world in compliance with the caster’s desires. Change to: Severe Transform 20d6 (in compliance with stated wish, heals back through another application of this spell), Improved Results Group (anything into anything; +1), Reduced Endurance (0 END; +½), add All Or Nothing (-½), and change Requires A Magic Roll to (no Active Point penalty; -0). 750 Active Points; total cost 88 points.

**Target:** Self
**Casting Time:** 1 Hour
**Casting Procedures:** Focus, Gestures, Incantations
**Duration:** Persistent
**Range:** Self
**Magic Roll Penalty:** -1
**END Cost:** 0

**Description:** This spell extends the caster's lifespan for 100 years, during which he retains the general state of health and vigor he had at the time he cast it. He must cast it again at the end of that time to maintain his health and vigor and extend his life for another 100 years. Eventually, though, he'll fail a Magic roll and all the years he has cheated come back to him, almost certainly killing him at once.

In game terms, this spell uses the *Longevity* form of Life Support, but with a slight alteration. Each casting of the spell adds 100 years of life to the caster's lifespan. At the end of that time, the spell expires and the accumulated 100 years (and their effects) instantly beset the caster... unless he casts the spell again. Thus, once a wizard starts casting Extension Of Life on himself, he has to continue until he dies or fails.

**Game Information:**
