With the *Enterprise* undergoing a minor upgrade to its bridge and other systems, I managed to get another chance to look around the ship that I hadn’t seen in years.

Like those that had previously carried the name, the *Enterprise-D* has played a significant part in Starfleet’s continuing mission. Under the command of Captain Jean-Luc Picard, the crew of the *Enterprise* have proved themselves time and time again beginning with their very first assignment to Farpoint Station. They have made first contact with numerous species, foiled several threats to the Federation, and substantially furthered our scientific research and understanding of the universe.

The *Enterprise* was the first ship to encounter the being known as Q, with subsequent meetings resulting in Commander Riker being granted similar powers, another unbelievably transporting the crew into a twisted version of the Robin Hood story and even discovering another Q unknowingly living on board. Because of Q the threat of the Borg were highlighted to the attention of Starfleet Intelligence, revealing the danger they pose not only to the Federation but to every sentient being in the Galaxy. Further encounters with the Borg have proved to be devastating, but it cannot be denied that the crew of the *Enterprise* have played a considerable part in helping to reduce this threat. These incidents led to all senior Starfleet officers briefed on the Q in order to hopefully prepare them for further meetings.

The *Enterprise* was the first ship to make official contact with the Ferengi although records show that they may have been unknowingly encountered before, confirmed at least once by Captain Picard during his time on the *Stargazer*.

They were also the first ship to re-establish contact with the Romulan Star Empire after nearly fifty years of isolation and have been involved in a great many of the recent Romulan activity across the Quadrants.

Arguably more important is Picard’s role as Arbiter of Succession, which led to him selecting Gowron as the new chancellor.

The current situation with the Cardassian Union can hardly be called stable with skirmishes taking place all across the border. Captain Picard himself was even captured and tortured by the Cardassians but hopefully the treaty currently in effect will lead to a more amicable relationship in the future.

Significant scientific discoveries made by the crew have also been carried through by our talented experts; I believe that astonishing reports of a holographic James Moriarty showing self awareness has had considerable influence on Dr. Zimmerman’s EMH program that is currently in production.

Similarly Captain Picard’s continuation of the eminent Professor Galen’s research has to have led to one of the most momentous discoveries in human history, that at least nineteen species are the result of “genetic seeding” from an ancient civilization the existed billions of years ago. This information alone will cause debate and discussion for decades.
THE NEXT GENERATION CHARACTERS

CAPTAIN JEAN-LUC PICARD

“T’ve followed Captain Picard’s career for a long time starting with his days aboard the Stargazer and after his promotion to captain of Starfleet’s flagship. It was almost inevitable that his name would become known across the Federation, unfortunately his involvement in the battle of Wolf 359 has made this for the wrong reasons. Memories are long and the loss of life was devastating, and even I had to question his place within Starfleet. However, where some men would have retreated, Picard has strived forward, continuing Starfleet’s mission of exploration and discovery as well as foiling several significant threats to the Federation, reasserting himself into his past position of trust.”

“Judging from reports and the brief contact I’ve had with him, Commander Riker has always struck me as an old-school officer in the vein of Captain Kirk, quick to take action but holds responsibility and care for the Federation.

“Riker always seems to be up for a challenge, such as distinguishing himself as the first Starfleet officer to serve aboard a Klingon ship, but the several times he has been offered a command of his own have all been turned down. I have a suspicion that he has at least one eye on the Enterprise after Captain Picard steps down.”

“Over a thousand people call the Enterprise-D home, Starfleet officers as well as their families, and each and every one is going to need to talk to someone about their experiences. This is where Counselor Troi does a fantastic job, her empathic abilities allow her to truly see how her clients are feeling and help them deal with their problems. On the bridge Counselor Troi has also been invaluable as her empathic abilities coupled with her negotiation skills have helped the Enterprise in numerous encounters.

"I was only a Lieutenant when I first heard about Lieutenant Commander Data entering Starfleet Academy but even then I was fascinated by the opportunities he could give the Federation, we could learn so much from him as he learnt about us. It wasn’t until the whole Maddox fiasco that I realized just what Data was, a whole new life form and not just a machine we could observe. Since that shift in perspective I’ve followed Mr. Data’s career not as one views a scientific experiment but as one sees the development of a young officer into someone extraordinary."

SOONG-TYPE ANDROID

CHAPTER 01

THE NEXT GENERATION ERA ONLY

Originally designed by Dr. Noonian Soong the Soong-type Android is a exceptionally advanced artificial intelligence life-form. These android are capable of incredible feats of reason due to their positronic brain but are normally emotionless and may find it difficult to relate to organic beings. Certain advanced versions offset this problem by use of an emotion chip that allows them to experience a full gamut of emotions. Unfortunately it is possible for negative emotions like anger and megalomania to become dominant and cause the android to harm others.

EXAMPLE VALUE: Ethical Programming Defines My Thinking

- ATTRIBUTES: +1 Control, +1 Fitness, +1 Reason

- TRAIT: Soong-type Android. The physical and mental capabilities of a Soong-type android are superior to that of most organic or cybernetic life-forms, allowing them to ignore or resist effects like hard vacuum, disease, radiation, oxygen deprivation, telepathy, or biochemical imbalance. However, some environmental conditions, such as highly-ionized atmospheres, and electromagnetic fields, can have a severe effect. Further, Soong-type androids do not naturally have the capacity for emotions, requiring additional hardware to process and experience any feelings. The legal personhood of Soong-type androids is somewhat disputed, though a landmark case involving Lieutenant Commander Data establishes their right to self-determination.

- Talents: The character receives access to the following Talents. These Talents are mandatory, and must be selected during character creation:

POLYALLOY CONSTRUCTION

REQUIREMENTS: Soong-type Android.

While appearing extremely lifelike – even simulating breathing, blinking, and other autonomic processes – a Soong-type android is not organic life. They are highly resistant to environmental conditions, reducing the Difficulty of Tasks to resist extremes of heat and cold by 2, and they are immune to the effects of suffocation, hard vacuum, starvation, and thirst. Further, their sturdy construction grants them Resistance 1. Further, while they can detect damage and dangerous conditions, they do not experience real pain, gaining +3 Resistance against non-lethal attacks, and being entirely immune to any penalties or hindrances caused by pain.

POSITRONIC BRAIN

REQUIREMENTS: Soong-type Android.

A Soong –type android is normally created with a positronic brain that allows it to process information made available to them considerably quicker than a Human. The character gains one automatic success on all Tasks using Reason, in addition to any generated by rolling.
“During his early career, it soon became obvious that Mr. La Forge was an outstanding officer. When his assignment to the Jovian Run brought him into contact with Captain Picard it eventually earned him a position aboard the Enterprise-D as conn officer, but few could have foreseen his promotion to chief engineer a year later. Since then La Forge has shown himself to be essential to the running of the Enterprise, as well as being integral to solving some of the challenges that have faced the crew over the years. Without his expertise the Federation may be a very different place.”

TRAITS: Human, Blind

VALUES:

EQUIPMENT:
Combadge, phaser type-1, engineer’s toolkit, tricorder

OTHER EQUIPMENT:
- VISOR: Geordi’s VISOR allows him to “see” across the electromagnetic spectrum, in infrared, and view radio waves in addition to normal visible light.
"I have to be honest; when I first heard that a Klingon had applied to Starfleet I was surprised. Although relations between us had improved significantly I never thought I’d see the day when a Klingon warrior would even want to join us. Worf’s adoptive parents may have been responsible for this initial choice, but as records show, Worf has had several significant encounters with his Klingon heritage, and his ideals and dedication to Starfleet have persisted. I look forward to seeing where his career will take him and hope that he may be able to facilitate better relations between us and the Klingon Empire."

EQUIPMENT: Combadge, bat’leth, tricorder type-2
"I never did get a chance to meet Lieutenant Yar. Her brief tenure as chief of security was over quickly and tragically before I had a chance to visit the Enterprise. I’m told she was an incredibly capable officer who may well have gone far if her life had not been cut short. Recent reports from Captain Picard of his most recent encounter with Q, and his return to those early days before Farpoint Station, and the possibility that an alternate Yar may be the mother of one of the Romulan’s most devious and dangerous officers in recent history, Sela, is indeed worrying… but both have brought Lieutenant Yar back to my memory."

After Kirk’s Enterprise was destroyed, and the subsequent Enterprise-A was decommissioned, Starfleet continued the legacy of ships named Enterprise. In the 2360s, this legacy was borne by the Enterprise-D, under the command of Jean-Luc Picard. As the Federation’s flagship, she bears Starfleet’s best and brightest, and is one of the most prestigious postings in Starfleet.

The Enterprise-D entered service in a time of relative peace, witnessing the conclusion of the Federation–Cardassian War and the signing of the treaty that created the Demilitarized Zone, but she also faced new challenges and new threats. Her crew had the first known encounters with an entity from the Q Continuum. She was involved in numerous confrontations with the Romulans, the first such encounters with Romulan forces in nearly a century. She made first official contact with the Borg, and was pivotal in their defeat after the disastrous Battle of Wolf 359.

- **Modular Laboratories:** At the start of a mission, choose how the laboratories are configured; this counts as an Advantage which applies to work performed within the laboratories.  
- **Saucer Separation:** The ship is designed so that the saucer section can be separated from the drive section, to operate as two distinct Scale 5 ships. *(Star Trek Adventures core rulebook, p.257)*  
- **Redundant Systems (Structure):** When the ship’s Structure becomes Damaged or Disabled, the crew may activate redundant systems as a Minor Action. If the Structure was Damaged, it is no longer Damaged. If it was Disabled, it becomes Damaged instead. These redundancies can only be activated once per mission.  
- **Secondary Reactors:** The ship has +5 Power (included above)
