This chapter provides statistics and basic information for many common animals. These creatures generally operate on instinct, driven by simple needs such as food and reproduction. Most animals, even predators, do not attack humanoids unless they or their young are threatened or they are suffering from starvation.

Animals are not capable of detailed reasoning, although with the Handle Animal skill a character can tame an animal and teach it to perform certain tricks.

Some herbivorous animals do not normally use their natural weapons to attack. As such, their natural weapons are treated as secondary attacks. The animal’s attack and damage entries note this fact, with an explanatory footnote.

**Animal Traits:** An animal possesses the following traits (unless otherwise noted in a creature’s entry).

- **Intelllect score of 1 or 2** (no creature with an Intellect score of 3 or higher can be an animal).
- **Low-light vision.**
- **Area:** Animals are found in the indicated environment anywhere in Azeroth.
- **Alignment:** Always neutral. Animals are not governed by a human sense of morality.
- **Treasure:** None. Animals never possess treasure.
- **Level Adjustment:** Animals are not suitable for player characters.

The black bear is a forest-dwelling omnivore that usually is not dangerous unless an interloper threatens its cubs or food supply. Black bears can be pure black, blond, or cinnamon in color and are rarely more than 5 feet long.

**Combat**

Black bears rip prey with their claws and teeth. Skills: A black bear has a +4 racial bonus on Swim checks.

### Grizzly Bear

These massive carnivores weigh more than 1,800 pounds and stand nearly 9 feet tall when they rear up on their hind legs. They are bad-tempered and territorial. The grizzly bear’s statistics can be used for almost any big bear, including other brown bears.

**Combat**

A grizzly bear attacks mainly by tearing at opponents with its claws.

Improved Grab (Ex): To use this ability, a grizzly bear must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. Skills: A grizzly bear has a +4 racial bonus on Swim checks.

### Polar Bear

These long, lean carnivores are slightly taller than grizzly bears.

**Combat**

Polar bears fight just as grizzly bears do. Improved Grab (Ex): To use this ability, a polar bear must hit with a claw attack. It can then attempt to start a grapple as a free action without provoking an attack of opportunity. Skills: *A polar bear’s white coat bestows a +12 racial bonus on Stealth checks to hide checks in snowy areas.*

If it wins the grapple check, the crocodile establishes a hold on the opponent with its mouth and drags it into deep water, attempting to pin it to the bottom.

Hold Breath (Ex): A crocodile can hold its breath for a number of rounds equal to $4 \times$ its Stamina score before it risks drowning.

Skills: *A crocodile gains a +4 racial bonus on Stealth checks to hide when in the water. Further, a crocodile can lie in the water with only its eyes and nostrils showing, gaining a +10 cover bonus on Stealth checks to hide.*

The lizard-like creature is massive in length and covered in thick, rough scales that run from the end of its tail to the tip of its maw. Mottled green in color with yellowish fangs, the beast is supported by six squat legs with webbed feet, each of which ends in short, black claws.

**Description**

Crocolisks are powerful amphibious predators common in most regions, attacking unwary adventurers sailing their waterways. They exist naturally in both fresh and saltwater environments, preferring to remain close to land. However, seafarers occasionally report sighting giant crocolisks out in the ocean, miles from dry land.

Crocolisks spend most of their time submerged, but are equally at home on land and often climb onto shore to sun themselves or to roll in warm mud. They are strong swimmers, able to surge forward with bursts of speed that often catch prey by surprise. They prefer to feed on defenseless prey, such as small, aquatic creatures or larger land creatures that flounder across bodies of water. However, crocolisks never hesitate to defend their territory aggressively from trespassers.

**Combat**

A crocolisk usually lies in wait, submerged near the edge of a body of water with only its eyes and nostrils showing. When it spots prey within 60 feet, it charges to the attack. It uses its lacerate ability until the victim bleeds to death, then drags the corpse back to its watery home.

Improved Grab (Ex): To use this ability, a crocolisk must hit with its bite attack. If it wins the grapple check, the crocolisk uses its lacerate ability.

Lacerate (Ex): When a crocolisk succeeds at a grapple check, in addition to dealing bite damage, it lacerates its foe, dealing 1 point of Stamina damage to the target due to blood loss. Creatures immune to critical hits are immune to this effect.

Hold Breath (Ex): A crocolisk can hold its breath for a number of rounds equal to $4 \times$ its Stamina score before it risks drowning.

Skills: *Crocolisks gain a +4 racial bonus on Stealth checks made while they are in the water. Further, a crocolisk can lie in the water with only its eyes and nostrils showing, gaining a +10 circumstance bonus on Stealth checks to hide as long as it remains motionless.*

Frenzies attack any prey with ravenous hunger.

Blindsight (Ex): A frenzy can locate creatures underwater within a 30-foot radius. This ability works only when the frenzy is underwater.

Keen Scent (Ex): A frenzy can notice creatures by scent in a 180-foot radius and detect blood in the water at ranges of up to a mile.
Horses are widely domesticated for riding and as beasts of burden.

The statistics for a heavy warhorse appear in the Alliance Player’s Guide.

**Combat**

A horse not trained for war does not normally use its hooves to attack. Its hoof attack is treated as a secondary attack and adds only half the horse’s Strength bonus to damage. (These secondary attacks are noted with an asterisk in the Attack and Full Attack entries for the heavy horse and the light horse.)

**Light Horse**

The statistics presented here describe smaller breeds of working horses such as quarter horses and Arabians, as well as wild horses. These animals are usually ready for useful work by age two. A light horse cannot fight while carrying a rider.

**Carrying Capacity:** A light load for a light horse is up to 150 pounds; a medium load, 151–300 pounds; and a heavy load, 301–450 pounds. A light horse can drag 2,250 pounds.

The statistics presented here describe large breeds of working horses such as Clydesdales. These animals are usually ready for heavy work by age three. A heavy horse cannot fight while carrying a rider.

**Carrying Capacity:** A light load for a heavy horse is up to 200 pounds; a medium load, 201–400 pounds; and a heavy load, 401–600 pounds. A heavy horse can drag 3,000 pounds.

**Light Warhorse**

These animals are similar to light horses, but are trained and bred for strength and aggression. They usually are not ready for warfare before age three.

A light warhorse can fight while carrying a rider, but the rider cannot also attack unless he or she succeeds on a Ride check.

**Carrying Capacity:** A light load for a light warhorse is up to 230 pounds; a medium load, 231–460 pounds; and a heavy load, 461–690 pounds. A light warhorse can drag 3,450 pounds.

These bottom-dwelling sea creatures are dangerous only to their prey. If disturbed, they usually try to escape.

**Combat**

Improved Grab (Ex): To use this ability, an octopus must hit an opponent of any size with its arms attack. If it wins the grapple check, it establishes a hold and automatically deals bite damage.

Ink Cloud (Ex): An octopus can emit a cloud of jet-black ink 10 feet high by 10 feet wide by 10 feet long once per minute as a free action. The cloud provides total concealment, which the octopus normally uses to escape a losing fight. All vision within the cloud is obscured.

Jet (Ex): An octopus can jet backward once per round as a full-round action, at a speed of 200 feet. It must move in a straight line, but does not provoke attacks of opportunity while jetting.

Skills: An octopus can change colors, giving it a +4 racial bonus on Stealth checks to hide. An octopus also can squeeze and contort its body, giving it a +10 racial bonus on Escape Artist checks.
The statistics presented here for the common owl describe nocturnal birds of prey from 1 to 2 feet long, with wingspans up to 6 feet. They combine both talons into a single attack.

Owls swoop quietly down onto prey, attacking with their powerful talons.

Skills: Owls have a +8 racial bonus on Listen checks and a +14 racial bonus on Stealth checks to move silently. *They have a +8 racial bonus on Spot checks in areas of shadowy illumination.

**Giant Owl**

These large owls are from 4–5 feet long with wingspans up to 12 feet. They are common in Northern Kalimdor. They are aggressive only if disturbed.

Skills: Giant owls have a +8 racial bonus on Listen checks and a +14 racial bonus on Stealth checks to move silently. *They have a +8 racial bonus on Spot checks in areas of shadowy illumination.
The statistics presented here describe a small horse, under 5 feet tall at the shoulder. Ponies are otherwise similar to light horses and cannot fight while carrying a rider.

**Combat**

A pony not trained for war does not normally use its hooves to attack but rather to run. Its hoof attack is treated as a secondary attack and adds only half the pony's Strength bonus to damage. (These secondary attacks are noted with an asterisk in the Attack and Full Attack entries.)

**Carrying Capacity:** A light load for a pony is up to 75 pounds; a medium load, 76–150 pounds; and a heavy load, 151–225 pounds. A pony can drag 1,125 pounds.

These glossy black birds are about 2 feet long and have wingspans of about 4 feet. They combine both claws into a single attack. The statistics presented here can describe most non-predatory birds of similar size.
The rhinoceros is infamous for its bad temper and willingness to charge intruders. The statistics presented here are based on the African black rhino, which is 6 to 14 feet long, 3 to 6 feet high at the shoulder, and weighs up to 6,000 pounds. These statistics can describe any herbivore of similar size and similar natural weapons (antlers, horns, tusks, or the like).

**Combat**

When it is harassed or annoyed, a rhinoceros lowers its head and charges.

**Powerful Charge (Ex):** A rhinoceros deals $4d6+24$ points of damage when it makes a charge.

Sea turtles are aggressive animals with thick, heavily spiked shells and sharp teeth. Some reports say that naga train these creatures and use them in war.

**Combat**

Sea turtles trundle along the ground on elephantine legs and attack smaller creatures — or creatures of the same size, if prey is scarce.

**Spiked Shell (Ex):** Any creature striking a sea turtle with natural or hand-held weapons takes $1d8$ points of piercing and slashing damage from the turtle's barbs. However, weapons with exceptional reach, such as longspears, do not endanger their users in this way.
These carnivorous fish are aggressive and liable to make unprovoked attacks against anything that approaches them. Smaller sharks are from 5 to 8 feet long and not usually dangerous to creatures other than their prey. Large sharks can reach around 15 feet in length and are a serious threat. Huge sharks are true monsters, like great whites, that can exceed 20 feet in length.

**Sharks circle and observe potential prey, then dart in and bite with their powerful jaws.**

**Blindsense (Ex):** A shark can locate creatures underwater within a 30-foot radius. This ability works only when the shark is underwater.

**Keen Scent (Ex):** A shark can notice creatures by scent in a 180-foot radius and detect blood in the water at ranges of up to a mile.

Snakes are usually not aggressive, fleeing when confronted. Skills: Snakes have a +4 racial bonus on Listen and Spot, on Stealth checks to hide, and a +8 racial bonus on Balance checks. Snakes use either their Strength modifier or Agility modifier for Climb checks, whichever is higher.
**Constrictor Snake**

Constrictor snakes hunt for food, but do not attempt to make a meal out of any creature that seems too large to constrict.

**Combat**

Constrictor snakes hunt by grabbing prey with their mouths and then squeezing it with their powerful bodies.

Constrict (Ex): On a successful grapple check, a constrictor snake deals 1d3+4 points of damage.

Improved Grab (Ex): To use this ability, a constrictor snake must hit with its bite attack. If it wins the grapple check, it establishes a hold and can constrict.

**Viper**

These creatures range widely in size. They are not particularly aggressive, but often lash out with a bite attack before attempting to retreat.

**Combat**

Vipers rely on their venomous bite to kill prey and defend themselves.

Poison (Ex): A viper has a poisonous bite that deals initial and secondary damage of 1d6 Sta. The save DC varies by the snake’s size, as shown on the table below. The save DCs are Stamina-based.

**Level Adjustment:** —

This large crab stands 3 feet tall on its six thick, spiderlike legs. It has a brightly colored shell, and its left claw significantly larger than its right.

**Description**

Lurking on seashores across Kalimdor, spider crabs are giant, aggressive predators.

**Combat**

Spider crabs are apt to attack anything that enters their territory, whether or not they can eat it. Spider crabs often seem to cluster together in colonies. The largest spider crabs — sometimes called limbrippers or, for the really big ones, behemoths — lead the way.

Improved Grab (Ex): To use this ability, a spider crab must hit a creature at least one size smaller than itself with its main claw attack.

Rend (Ex): If a spider crab hits with both claw attacks, it latches onto the opponent’s body and tears the flesh. This attack automatically deals additional damage equal to the damage dealt by the creature’s larger claw plus 1-1/2 times its Strength bonus.

**Jet (Ex):** A giant squid can jet backward once per round as a full-round action, at a speed of 320 feet. It must move in a straight line, but does not provoke attacks of opportunity while jetting.

**Tentacles (Ex):** An opponent can attack a giant squid's tentacles with a sunder attempt as if they were weapons. A giant squid's tentacles have 10 hit points each. If a giant squid is currently grappling a target with the tentacle that is being attacked, it usually uses another limb to make its attack of opportunity against the opponent making the sunder attempt. Severing one of a giant squid's tentacles deals 5 points of damage to the creature. A giant squid usually withdraws from combat if it loses five tentacles. The creature regrows severed limbs in 1d10+10 days.

These voracious creatures can have bodies more than 20 feet long and attack almost anything they meet.

Stags are common in forested areas throughout Azeroth. They are targets for humanoid hunters and natural predators like wolves, but their mighty antlers and ferocity make them difficult prey.

The statistics presented here also apply to similar creatures such as elk and moose.

Powerful Charge (Ex): A stag deals 2d8+6 points of damage when it makes a charge.

**Combat**

Stags avoid conflict, but can be aggressive in larger groups or when startled. They are particularly aggressive during mating season in the fall, and only at this time are they commonly found with females.

Storm crows resemble ravens but are far larger, averaging 3 to 4 feet in height, though their frames remain slight. Their habits are much like that of their lesser brethren, but their size and speed earns them special regard. Superstitions say that seeing a solitary storm crow flying across the sky above the horizon means that a great storm is on its way.

Storm crows are most famous for the fact that druids can take their shape.

**Combat**

Like other crows, storm crows feed on carrion, fruit, and the occasional insect; they rarely attack large, live prey. If they do, several storm crows fly around a target, pecking and clawing before wheeling away. They are not brave, so any serious injury to a fellow crow causes them to break off.

Skills: A storm crow has a +8 racial bonus on Spot checks.

Tallstriders are large, flightless birds of prey that look to kill anything they can outrun or overpower. They resemble 6-foot tall ostriches with strong, thick necks and heavy, sharp beaks. Tallstriders are common in Mulgore, the Barrens, and Durotar. Young heroes in these regions hunt these beasts in tests of honor and valor.  

Tales tell of heroes who attempt to tame tallstriders as mounts or beasts of burden, but these tales are typically humorous ones.

**Combat**

Tallstriders are tenacious pack hunters. A tallstrider’s main mode of attack is with its beak and talons. Tallstriders attempt to isolate single members of a pack and run them down. When facing stronger prey, they harry a single victim if possible until, after hours of running, the quarry is most likely exhausted and weak.

These great cats stand more than 3 feet tall at the shoulder and are about 9 feet long. They typically weigh from 400 to 600 pounds.

**Combat**

Attach (Ex): If a weasel hits with a bite attack, it uses its powerful jaws to latch onto the opponent's body and automatically deals bite damage each round it remains attached. An attached weasel loses its Agility bonus to Armor Class (and thus has an AC of 12). An attached weasel can be struck with a weapon or grappled itself. To remove an attached weasel through grappling, the opponent must achieve a pin against the creature.

Skills: Weasels have a +4 racial bonus on Stealth checks to move silently and a +8 racial bonus on Balance checks. They use their Agility modifier for Climb checks.

---

Some varieties of these seagoing mammals are among the largest animals known. Relatively small whales (such as the orca presented here) can be vicious predators, attacking virtually anything they detect.

Blindsight (Ex): Whales can “see” by emitting high-frequency sounds, inaudible to most other creatures, that allow them to locate objects and creatures within 120 feet. A silence spell negates this and forces the whale to rely on its vision, which is approximately as good as a human’s.

Hold Breath (Ex): A whale can hold its breath for a number of rounds equal to 8 x its Stamina score before it risks drowning.

Skills: *A whale has a +4 racial bonus on Spot and Listen checks. It loses these bonuses if its blindsight is negated.

---

**Baleen Whale**

The statistics here describe a plankton-feeding whale between 30 and 60 feet long, such as gray, humpback, and right whales. These massive creatures are surprisingly gentle. If harassed or provoked, they are as likely to flee as they are to retaliate.

**Cachalot Whale**

Also known as sperm whales, these creatures can be up to 60 feet long. They prey on giant squids.

**Orca Whale**

These ferocious creatures, also called killer whales, are about 30 feet long. They eat fish, squid, seals, and other whales.

Wind serpents are, simply put, flying constrictor snakes. These serpents are sometimes found in the Barrens, and they are often revered by local tribes of savage races such as quilboar, who see wind serpents as spirits of the sky.

Wind serpents are simple beasts that reach sizes of 4 to 6 feet in length and can weigh up to 50 pounds. While green is the most common color, their scales can range in any hue from dark brown to a faint orange color. Their plumage often matches their scales, but with red or yellow tips.

Most wind serpents subsist on a diet of rabbits and rodents, but they will eat things as large as small wild pigs or young sheep. While not aggressive, wind serpents are territorial, tending to attack anything that comes near their nests, built high in trees.

Combat
Wind serpents are ambush predators, crawling among tree branches or flying silently out from a dark nook. They attack with lightning speed, swiftly poisoning their prey to death.

Poison (Ex): Bite, Fortitude DC 12; 1d6 Sta/1d6 Sta. The save DC is Stamina-based.

Skills: Wind serpents have a +4 racial bonus on Listen, Spot, and Stealth checks and a +8 racial bonus on Balance checks. They may use either their Strength modifier or their Agility modifier for Climb checks, whichever is higher.

Variant Wind Serpents
Wind serpents vary drastically across species. There are simply more kinds of wind serpents than would be prudent to include in this manual. For instance, some are constrictors rather than vipers: Replace their poison ability with improved grab and constrict (1d4 + 1-1/2 Str), and change both Strength and Agility scores to 17. Constricting wind serpents have the same CR as venomous wind serpents.

Other wind serpents are in truth magical beasts instead of animals, and have an astonishing variety of magical abilities. Magical wind serpents tend to be slightly larger and tougher, often having more Hit Dice and possibly higher ability scores than normal wind serpents.

The cloud serpent (see Chapter 1: The Dangers of Being a Hero) represents one such magical variety of wind serpent, in this case one having the ability to breathe lightning.

These creatures are similar to badgers, but they are bigger, stronger, and even more ferocious.

Combat
Rage (Ex): A wolverine that takes damage in combat flies into a berserk rage on its next turn, clawing and biting madly until either it or its opponent is dead. It gains +4 to Strength, +4 to Stamina, and –2 to Armor Class. The creature cannot end its rage voluntarily.

When raging, a wolverine has the following statistics:
34 hp; AC 12, touch 10, flat-footed 10; Atk 2 claws +6 melee (1d4+4) and bite +1 melee (1d6+2); Fort +9; Str 18, Sta 23.
These creatures operate on instinct, driven by simple needs such as food and reproduction. Except where noted, vermin attack only when hungry or threatened.

**Vermin Traits:** Vermin possess the following traits (unless otherwise noted in a creature’s entry).
- **Mindless:** No Intellect score, and immunity to all mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects).
- **Darkvision:** out to 60 feet.
- **Area:** Vermin are found in the indicated environment anywhere in Azeroth.
- **Alignment:** Always neutral. Vermin are not governed by a human sense of morality.
- **Treasure:** Vermin generally possess no treasure. For those that do, this treasure consists of possessions formerly owned by a creature that the monster has killed.
- **Level Adjustment:** Vermin are not suitable for player characters.

These insects make their homes near rich sources of carrion, thriving especially near graveyards. They feed only on the flesh of the dead.

Carrion beetles bury the body of a slain victim and leave it for several days before returning to feed. Several more days may pass for a fully-grown carrion beetle to consume a corpse completely, and nothing remains when it’s done.

A carrion beetle sometimes lays eggs within a buried corpse. The larvae hatch and eat their way out of the body and then consume whatever remains. They then eat each other until only the strongest carrion beetle remains. The winner burrows its way to the surface and begins its own endless quest for dead flesh.

**Combat**

Carrion beetles attack in a simple, mindless assault, whether alone or in a swarm.

**Skills:** A carrion beetle has a +4 racial bonus on Climb, Listen, and Spot checks.

These enormous beetles carry foul disease. The trolls of Zul’Farrak consider them sacred.

**Combat**

A giant scarab attacks prey mindlessly, releasing a disease cloud as it closes.

**Disease (Ex):** Chokemist—bite, Fortitude DC 21, incubation period immediate, damage 1d3 Agy and 1d3 Sta. The save DC is Stamina-based.
Disease Cloud (Ex): Once every 1d4 rounds as a free action, a giant scarab can release a cloud of disease air that extends outward from the beetle in a 15-foot-radius spread. Creatures within the cloud are subject to chokemist disease, as above.

**Constrict (Ex):** A monstrous scorpion deals automatic claw damage on a successful grapple check.

**Improved Grab (Ex):** To use this ability, a monstrous scorpion must hit with a claw attack. A monstrous scorpion can use either its Strength modifier or Agility modifier for grapple checks, whichever is better.

**Poison (Ex):** A monstrous scorpion has a poisonous sting, with details that vary by the scorpion’s size, as follows.

The save DCs are Stamina-based; the indicated damage is both initial and secondary.

**Skills:** A monstrous scorpion has a +4 racial bonus on Climb and Spot checks and on Stealth checks made to hide.

All monstrous spiders are aggressive predators that use their poisonous bites to subdue or kill prey.

Monstrous spiders come in three general types: hunters, webspinners, and spitters. Hunters and spitters rove about, while webspinners usually remain immobile and attempt to trap prey. (Hunting and spitting spiders can spin webs to use as lairs, but cannot use their webs as weapons the way webspinners can.) Hunting spiders have a base land speed 10 feet faster than the figures given in the statistics blocks above.

**Poison (Ex):** A monstrous spider has a poisonous bite (and poisonous spit, in the case of spitting spiders). The details vary by the spider's size, as shown on the table below. The save DCs are Stamina-based. The indicated damage is both initial and secondary.

**Web (Ex):** All types of monstrous spiders often wait in their webs or in trees, then lower themselves silently on silk strands and leap onto prey passing beneath. A single strand is strong enough to support the spider and one creature of the same size.

Webspinners can also throw a web 8 times per day. This is similar to an attack with a net, but it has a maximum range of 50 feet, with a range increment of 10 feet, and is effective against targets up to one size category larger than the spider. An entangled creature can escape with a successful Escape Artist check or burst it with a Strength check. Both are standard actions whose DCs are given in the table below. The check DCs are Stamina-based, and the Strength check DC includes a +4 racial bonus.

Webspinners often create sheets of sticky webbing from 5 to 60 feet square, depending on the size of the spider. They usually position these sheets to snare flying creatures but can also try to trap prey on the ground. Approaching creatures must succeed on a DC 20 Spot check to notice a web; otherwise they stumble into it and become trapped as though by a successful web
attack. Attempts to escape or burst the webbing gain a +5 bonus if the trapped creature has something to walk on or grab while pulling free. Each 5-foot section has the hit points given on the table, and sheet webs have damage reduction 5/—.

A monstrous spider can move across its own web at its climb speed and can pinpoint the location of any creature touching its web.

Tremorsense (Ex): A monstrous spider can detect and pinpoint any creature or object within 60 feet in contact with the ground, or within any range in contact with the spider’s webs.

**Skills:** Monstrous spiders have a +4 racial bonus on Spot checks and on Stealth checks made to hide. Monstrous spiders use either their Strength or their Agility modifier for Climb checks, whichever is higher. *Hunting spiders have a +10 racial bonus on Jump checks and a +8 racial bonus on Spot checks. Web-spinning spiders have a +8 racial bonus on Stealth checks when using their webs.*
