# PLOT TWISTS

## WELCOME!

As a game master you know the more you play the more you find your adventures falling into predictable patterns. Your style becomes well known and your players can see where the adventure is going almost as if they had helped in writing it. Face it; it is time to shake things up. That is where we come in: welcome to Plot Twists! The material in this supplement will help return the uncertainty and anticipation that made role playing so exciting when your players first started gaming. Introduce to your adventures an element of the unpredictable - plots twists, and even you will never really know where things will end up – and that will make for the best adventures.

## PLOT TWIST TABLES

**Table I** is a list of all 150 plot twists with descriptions and a game master can easily choose appropriate twists right off the list.

For a quick random plot twist, either while designing an adventure or during play, make a roll on Table II. **Table II** is a 1-1000 random table with different categories to roll against based on the current location of the player characters. Roll 3d100, reading each die as a digit in the number to look up on the table: generating results from 0-0-1 to 9-9-9 and read 0-0-0 as 1000.

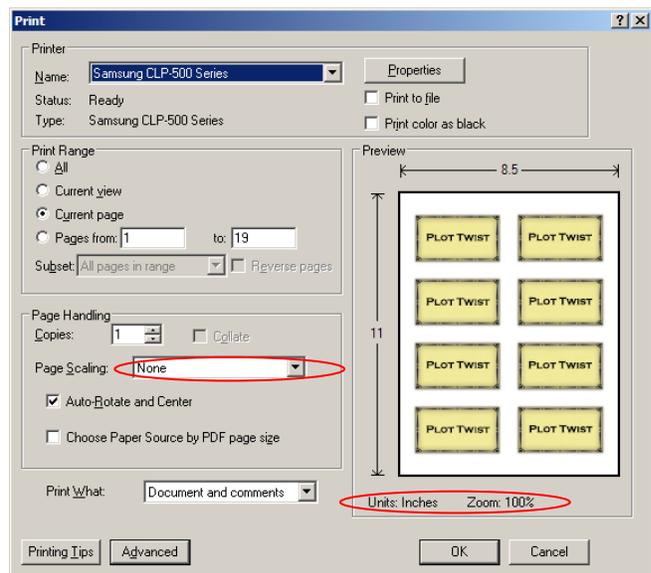

- **Random:** Use this table when the location does not match any of the other categories or if you want a chance for any of the 150 twists.

- **Underground:** For dungeon adventuring or any other underground location.
- **Wilderness:** Outdoor locations away from urban area, but above ground.
- **Large Urban Area:** Cities and fortifications; large population centers of a civilized area.
- **Small Urban Area:** Areas that are less densely populated, usually rural communities or areas closer to the edge of the wilderness.
- **User:** This column allows you to create your own plot twist table. Choose as few or as many as you like and note the die results in the user column.

## PLOT TWIST CARDS

All 150 plot twists are included in card format. The pages are formatted to be printed on blank business card stock that you can get from any office supply store. Look specifically for “Avery 3612” or a generic that is compatible. The cards are 2”x3.5” and print 8 per 8.5” x 11” page. A page is also included for the back of the cards. Once you have printed the pages of cards you can reload the cards into your printer and print the page that has the pattern for the back of the cards – and then you are done – a nice set of plot twist cards.

**Special Note (Printing from Adobe Acrobat):** Please be aware – to get the best results when printing on the card stock you need to make sure adobe acrobat is not scaling the page (shrinking the page to make it fit.) Zoom should be 100%

## Table I: Plot Twists with Description

<i>Twist</i>	<i>Description</i>
<b>Abandoned By Allies</b>	Allies traveling with characters leave suddenly.
<b>Ability Is Fading</b>	A player character's major power/ability is weakening.
