How to Read the Pokedex Entries:

At the heart of Pokemon: Tabletop Adventures are the monsters that the trainers capture and train. Their Tabletop Ordering, detailed at the end of this guide, lists the Pokemon entries.

The entries are listed as such:

Tabletop Number

The Tabletop Number is a Pokedex reordering that places evolution lines that spanned different franchise generations next to each other in a sensible way. Three-stage evolution families are placed in the front of the Tabletop Pokedex, followed by two-stage families and one-stage families last. After these, Fossil Pokemon and Pseudo Legendaries are listed. Pokemon with a Tabletop Number that starts with the letter L are listed in the Legendary Pokedex, located in the Game Master’s Guide.

Species Name

Each Pokemon is part of a Species grouping. Individual stages of a single Pokemon’s evolutionary line are not part of the same Species, but are part of the Species’ family. When talking about a specific evolutionary line, or branched evolutionary tree, it is common to refer to the line or branch by the Species name of the first Stage of the line. For example to talk about the Pichu, Pikachu and Raichu evolutionary line, you can call it the Pichu evolutionary line. Likewise, to refer to the Riolu and Lucario evolutionary line you can call it the Riolu evolutionary line. The refer to the Eevee, Jolteon, Vaporeon, Flareon, Umbreon, Espeon, Glaceon and Leafeon evolutionary branch you can call it the Eevee evolutionary line.

Picture of Pokemon

In every Pokemon entry in the Pokedex, a picture is provided to show what the average Species member looks like. However, various minor differences can be seen between individual members of the Species. Sometimes, a Pokemon can look drastically different from the norm of its Species in color. These oddities are known as Shiny Pokemon and are rare treasures sought out by collectors and coordinators all around the world.

Vital Information

Type

There are seventeen different Elemental Types in the world of Pokemon that are commonly separated into two archtypes; Physical and Special. The Physical Elemental Types are Bug, Fighting, Flying, Ghost, Ground, Normal, Rock and Steel. The Special Elemental Types are Dark, Dragon, Electric, Fire, Grass, Ice, Psychic and Water. Each Pokemon belongs to a specific Elemental Type and some Pokemon belong to two Elemental Types. Types affect how much damage a Pokemon takes when hit by Attacks and are very important factors to keep track of while battling. The Type Chart, on the following page, depicts effectiveness of attackers and defenders. The attacking Type corresponds to the attacker’s Move’s Type and not the attacker’s Type itself. The defender’s Type refers to its Type, disregarding any Types found on it’s Moves.
Abilities

Pokemon Abilities are special natural born gifts that a pokemon can utilize. Pokemon have access to at least one of their abilities from birth but, once matured to level 40, can learn the other one of their abilities if they choose to. The glassary of Abilities are located in the Player’s Handbook.

Evolution

When Pokemon mature and age, their body drastically changes in mass and shape to reach a new Stage of their Evolutionary Line. Some Pokemon do not Evolve while others do and other can Evolve twice in their lifetime. Aside from learning more about the world and physically maturing, Pokemon need a great deal of emotion to urge their Evolution. Sometimes, confidence and happiness is enough for a pokemon to evolve and other times, it is a Pokemon’s frustration and hate that pushes it to change. Not all Pokemon can naturally evolve without foreign aid. Some Pokemon require the radiation found in Evolutionary Stones to mutate themselves into their next form. There are also Pokemon who require the attachment of a keepsake to promote their evolution. Next to these various ways to evolve there are even more ways for a Pokemon to meet their next level of maturity.

Detailed in the Evolution section is the Species Names of the Pokemon that can be attained by the Species in question as well as the requirements to evolve. Remember, just because a Pokemon has met their minimum requirements does not mean they will evolve. Sometimes there are personal reasons for a Pokemon to not want to evolve.

Size Information

Height and Weight

The Height and Weights given for each Pokemon Species are averages determined by Pokemon Researchers around the world. It is not uncommon to see Pokemon who are up to 10% heavier or larger then the average or 10% lighter or smaller then the norm. When capturing Pokemon be sure to note their individual Heights and Weights. Be sure to note their changes if they evolve as well.

Breeding Information

When a female Pokemon is mature enough, it can produce eggs and if a male Pokemon is mature enough, it can fertilize them. When given some time alone, Pokemon of the opposite sex and appropriately matching Egg Groups can produce oval Eggs that are approximately 5.5 pounds or 2.5 kilograms. The Species of the newborn Pokemon is determined by the mother of the Egg and the Abilities, Moves, and Gender Ratio

Not all Species of Pokemon have an equal distribution of male and female children. When finding a pokemon in the wild, knowing the gender of a particular pokemon may make or break your desire to capture the target.

Egg Groups

Pokemon are mysterious since they can cross breed between Evolutionary Stages and even Species, but not any Pokemon can mate with any Pokemon. There are limits and these limits are defined as Egg Groups. Pokemon can only produce Eggs when mating with a Pokemon that shares an Egg Group. The Egg Groups are Bug, Dragon, Fairy, Flying, Ground, Humanshape, Indeterminate, Mineral, Monster, Plant, Water 1, Water 2, Water 3. There is also the Ditto Egg Group, exclusive to the Pokemon Species Ditto, who can breed with any other Pokemon to produce an Egg while acting as either the male or female.

Average Hatch Rate

Depending on what Species the mother of the Egg is, the baby will be the lowest form of that Species’ Evolutionary Line. Each Species takes a different amount of time to hatch so the Average Hatch Rate covers how quickly the Egg should hatch. The Average Hatch Rate however is only an average. Sometimes the Egg may take twice the length of time or only half of it, depending how well the Egg is kept.

Biology

Pokemon look different from one Species to the next. The Biology entries give a short summary of how a particular Species works and what they require to work. The Biology entry lists common trait across all members of a species and explains what kind of food the Pokemon needs to survive. Carnivores primarily feed on other Pokemon, Herbivores will usually need leafy food, vegetables, nuts and fruits to survive, Omnivores can eat plants and other Pokemon, Phototrophs can photosynthesize their own food and energy. Some of the stranger diets some Pokemon have are that of a Terravore; one who feeds on the minerals found in rock and dirt around them, or the Nullivore; which does not need to eat anything to sustain itself for various reasons. Despite any primary feeding behavior any Pokemon can enjoy any edible Item designed for a Pokemon to consume such as Poffins, Apricorn Shakes or PokeBlocks. By keeping track of your Pokemon’s needs, you can influence their living conditions in a positive manner and make their partnership with you as Pokemon and Trainer more cooperative.
Habitat

There are some places that a particular Species of Pokemon will not thrive. For obvious reason, you’ll only find fish-like Pokemon in the water or rocky Pokemon near rocky places. The Habitat entry explains what kind of terrain to look for if you intend to hunt for a particular Species of Pokemon. Keep in mind, just because you may be in the appropriate terrain to find a particular Pokemon, it doesn’t mean you are in the right region of specific location.

Capabilities

Each Species of Pokemon move at different rates in various terrains. They have different capacities for jumping strength and physical strength. Some Pokemon can fly while others can breath underwater. Many Species of Pokemon can be trained for being used as a Mount. Others are too small for that but can be used for infiltration as a result of their size. The Capabilities list all keywords relating to static abilities the Pokemon has. The glossary of Capabilities is located before the Pokedex entries.

Move List

Each Pokemon can learn Moves. Moves define how a Pokemon can be used in combat and are separated into various Elemental Types. A Move can be used to damage a foe or to alter variables in battle to gain an upper hand in battle. There are several ways for a Pokemon to learn a Move but a Pokemon must be compatible with the Move in order to be able to learn it. A Pokemon can learn a Move while gaining levels, from a Technical or Hidden Machine, when born they already know a Move or a tutor can teach the Pokemon a Move. When a Pokemon learns a Move, it is listed in their Natural Move List or their Technical Move List. The glossary of Moves are located in the Player’s Handbook.

Level Up Move List

Written into each Pokemon from birth is a list of every Move their species can learn while becoming more experienced in the world. Moves on the Level Up Move List are learned when the Pokemon reaches the specified level. These Moves are placed in the Pokemon’s Natural Move List.

TM/HM Move List

Technical Machines and Hidden Machines are expensive devices that when injected into a Pokemon, grow an organ within the Pokemon that allows them to perform specific Moves that each TM and HM teaches. The amount of pain involved with the procedure is unbearable for a Pokemon without medical attention so it is a Trainer’s best interest to apply TMs and use HMs at Pokemon Centers. Not every Pokemon is compatible with every TM or HM so this list confirms which TMs and HMs will work successfully with each Species of Pokemon. These Moves are placed in the Pokemon’s Technical Move List. If a Pokemon learned a Move through the use of a TM or HM, but the Move is on their Level Up List, they may place the Move in their Natural Move List.

Egg Move List

When a mature parent Pokemon gains access to a powerful Move, they instill the ability to use the Move in their child. Cross Species breeding can result in young Pokemon knowing bizarre, out-of-natural-typing, over powered Moves. The Egg Move List lists what Moves have been known to exist in the Species on occasion, from birth. These Moves are placed in the Pokemon’s Natural Move List.

Tutor Move List

There are masters in the world who have taken the aspect of a Move and realized how to imprint the technique in various Pokemon. If you can find one of these Tutors, this list explains which Moves the Tutors can teach to your Pokemon, if the Tutor knows how to teach that specific Move. Some Tutors even know how to teach Moves that are not learned naturally anywhere or taught by any TM or HM. These Moves are placed in the Pokemon’s Technical Move List. If a Pokemon learned a Move through the use of a Tutor, but the Move is on their Level Up List, they may place the Move in their Natural Move List.
Capabilities:

Most Capabilities are very simple to understand. Except for the Basic Capabilities, each Capability is listed with a paragraph following, that explains exactly how that Capability affects the pokemon who has it. Other then that, some Capabilities are paired with a Capability Type, which is paired purely for the ranger class, who draws on specific aspects of nature when looking for specific talents for their job.

However, Basic Capabilities are slightly more complicated. That is because each pokemon in the Pokedex has Basic Capabilities. Paired with each Basic Capability in the pokedex entries are values which can be matched to the Capability listing that follows in order to define the level of aptitude a pokemon has in a particular field. In the Basic Capabilities, you will see a Capability Type, Speed, that is defined for various purposes referenced throughout the game such as Moves that modify a pokemon’s Speed Stat or an Ability which modifies a Speed Stat. There are several reasons to keep track of the Basic Capabilities so it is best to make note of the value and meaning of the Basic Capabilities your pokemon has. Use the pokemon character sheet to do so.
Basic Capabilities:

Burrow - Speed Capability
Burrow is a Speed Capability that defines how quickly the Pokemon can move underground. After the word Burrow, in the Capabilities listing, a number from 1 to 5 should be listed. The number paired with the Burrow Keyword corresponds with a value representing how much the Pokemon can Shift during a round of combat underground. It also matches with an average speed to be used outside of battle. The holes dug are only as large as the Pokemon who burrows. If a Pokemon learns the Move Dig and does not have the Burrow Capability, they gain Burrow 1. If they already have the Burrow Capability, the Burrow value is raised 1.

Intelligence
The Intelligence Capability is paired with a number from 1 to 7 that defines the Pokemon’s competence when it comes to simple thought. The Intelligence is an average expectancy of all members of that Pokemon’s species. The smarter the Pokemon is, the easier it is to act on their own accord if you can’t command them. This also means that the Species of Pokemon is more competent in the wild and a greater threat to the average Trainer.

Jump
The Jump Capability is paired with a number from 1 to 10 that states the max height the Pokemon can jump into the air in a single bound. If your Pokemon utilizes their Jump Capability during a round of an encounter, it counts as their Shift for that round. Keep in mind you don’t have to jump straight upwards. If a Pokemon learns the Move Bounce their Jump value is raised 1.

Overland - Speed Capability
Overland is a Speed Capability that defines how quickly the Pokemon moves while on dry land. After the word Overland, in the Capabilities listing, a number from 1 to 10 should be listed. The number paired with the Overland Keyword corresponds with a value representing how much the Pokemon can Shift during a round of combat. It also matches with an average speed to be used outside of battle.

Power
Power represents a Pokemon’s strength. Next to Power in the Pokemon’s Capability listing is a number from 1 to 10 that corresponds to a weight that the Pokemon should be able to lift. The weight given is an average, depending on how well trained your Pokemon is, they may be able to lift more than the average. Based on how much they can lift you should be able to guess at how much they can push, or how much force they can put into their strikes. If a Pokemon learns the Move Strength their Power value is raised 1.

Sky - Speed Capability
Sky is a Speed Capability that defines how quickly the Pokemon moves while flying, floating or levitating. After the word Sky, in the Capabilities listing, a number from 1 to 10 should be listed. The number paired with the Sky Keyword corresponds with a value representing how much the Pokemon can Shift during a round of combat in the air. It also matches with an average speed to be used outside of battle. If a Pokemon has the keyword Sky, it can propel itself of the ground for at least 5 minutes off the ground at a time. If a Pokemon learns the Move Fly and does not have the Sky Capability, they gain Sky 1. If they already have the Sky Capability, the Sky value is raised 1.

Underwater - Speed Capability

Underwater is a Speed Capability that defines how quickly the Pokemon can move underwater. After the word Underwater, in the Capabilities listing, a number from 1 to 10 should be listed. The number paired with the Underwater Keyword corresponds with a value representing how much the Pokemon can Shift during a round of combat. It also matches with an average speed to be used outside of battle. If a Pokemon learns the Move Surf and does not have the Underwater Capability, they gain Underwater 1. If they already have the Underwater Capability, the Underwater value is raised 1. If the Pokemon had the Sinker Capability before learning Surf, they lose their Sinker Capability.

Surface - Speed Capability

Surface is a Speed Capability that defines how quickly the Pokemon moves while on the surface of water to the Pokemon's height below the surface of the water. After the word Surface, in the Capabilities listing, a number from 1 to 10 should be listed. The number paired with the Surface Keyword corresponds with a value representing how much the Pokemon can Shift during a round of combat. It also matches with an average speed to be used outside of battle. If a Pokemon learns the Move Surf and does not have the Surface Capability, they gain Surface 1. Other Capabilities:

Alluring - Plant

Pokemon who are Alluring smell very pleasant. They may attract wild Pokemon easily. Attention is commonly turned toward fragrant, Alluring Pokemon by wilds. If a Pokemon learns the Move Sweet Scent and does not have the Alluring Capability, they gain Alluring.

Amorphous

Amorphous Pokemon have an inconsistent shape. They can flatten and reform themselves like water. They can stretch out their body material and condense themselves as well. By doing this, a Pokemon can access places others couldn’t, or bypass a door or two, only to let their non-Amorphous friends in afterwards.

Aura - Psionic

Pokemon who can use Aura are blessed with a great power. Pokemon who can use Aura can read the minds of other Pokemon and humans, although they cannot transfer their thoughts to others unless they too have the ability to manipulate Aura. Pokemon with the Aura Capability can also read a person’s Aura. Everything has an Aura, but not many can access their Aura. Auras can be any color. The shade of the color varies from very tinted to very darkened. If the color of the Aura is tinted, the target has little negative intentions. If the color of the Aura is very blackened, the target has many malicious intentions. An Aura’s shade can be anywhere in between. If a Pokemon learns the Move Aura Sphere, Dragon Pulse, Dark Pulse, Focus Blast, Force Palm, Detect or Vacuum Wave and does not have the Aura Capability, they gain Aura.

Blender

A Pokemon with Blender is an advanced Stealth user. While Shifting, unless they purposely want to, Blender Pokemon do not make any noise. Unless a Pokemon with Blender has used a Ranged Move during the current round or the round previous, Ranged Moves may not target them if the line of sight drawn goes through Rough Terrain or if the Pokemon is on Rough Terrain. Whenever a Blender is targeted by a Move, one must roll +2 during Accuracy Check to hit.

Bloom - Plant

When a Pokemon with Bloom, Cherrim, is in Sunny weather it transforms; changing its appearance from the closed bud, purple-petal form into the pink open flower form.

Chilled - Ice

A Pokemon with the Chilled Capability is always cold.

Firestarter - Fire

A Pokemon who has the Firestarter Capability can produce flames. They can control how lightly or powerfully they produce the fire, creates puffs of fire the size of a lighter or a large burst of fire capable on engulfing a tree. If a Pokemon learns the Move Ember, Fire Blast, Fire Spin, Flame Wheel or Flamethrower and does not have the Firestarter Capability, they gain Firestarter.

Fountain - Water

A Pokemon who has the Fountain Capability can produce freshwater. They can control how lightly or powerfully they produce the water, sprinkling water or forcefully shooting water with the strength of a fire hose. If a Pokemon learns the Move Water Gun, Water Pulse, Hydro Pump or Water Sport and does not have the Fountain Capability, they gain Fountain.
Freezer - Ice
When a Pokemon has the Freezer Capability, they can target an area on the ground and turn it into Icy Terrain in place of their Move during their turn, EOT. A d20 roll determines the amount of ground turned into Icy Terrain. On a check below 5, only 1 square meter, or 1 space, is changed into Icy Terrain; on 6, up to 5 meters, 5 adjacent spaces; on 9, up to 7 square meters, 7 adjacent spaces; on 12, up to 10 square meters, 10 adjacent spaces; on 15, up to 15 square meters, 15 adjacent spaces; on 18, up to 20 square meters, 20 adjacent spaces; on 20, up to 30 square meters, 30 adjacent spaces. If a Pokemon learns the Move Aurora Beam, Blizzard, Ice Beam or Sheer Cold, and does not have the Freezer Capability, they gain Freezer.

Gilled - Water
A Gilled Pokemon can breathe underwater. It never needs to come up for air and can remain underwater for as long as it wants to.

Glow
A Pokemon with the Glow Capability can emit light from a part of its body. Depending on the variety of wild Pokemon nearby, it might attract Pokemon or ward them away. If a Pokemon learns the Move Flash and does not have the Glow Capability, they gain Glow.

Groundshaper - Earth
A Pokemon with the Groundshaper Capability can transform the terrain around them to create Rough Terrain or flatten out Rough Terrain to create Basic Terrain. In place of the Pokemon’s Move during their turn they can change a 1 meter radius around them, or all adjacent spaces, from Basic Earth Terrain into Rough Terrain or change Rough Terrain into Basic Earth Terrain, EOT. If a Pokemon learns the Move Earthquake or Magnitude and does not have the Groundshaper Capability, they gain Groundshaper.

Guster - Wind
The Guster can create bursts of wind. The power can vary from a light breeze to a powerful burst of air capable of lifting light objects into the air or providing lift for a chute. If a Pokemon learns the Move Gust or Tailwind and does not have the Guster Capability, they gain Guster.

Heater - Fire
A Pokemon with the Heater Capability is always warm.

Icestep - Ice
A Pokemon with the Icestep Capability treat Icy or Snowy terrain as Basic Terrain.

Inflatable
A Pokemon with the capability Inflatable can expand its size up to 125% of its normal size. While Inflated, a Pokemon does not change its weight. To hit an Inflated Pokemon, you must roll -3 during Accuracy Check. While Inflated, a Pokemon become Blocking Terrain, you may not target through an Inflated Pokemon. If a Pokemon learns the Move Growth or Stockpile and does not have the Inflatable Capability, they gain Inflatable.

Invisibility - Psionic
A Pokemon who have the Invisibility Capability can turn invisible. Pokemon may not perform Moves while invisible. While invisible, you must roll +4 during Accuracy Checks to hit the Pokemon. When a Pokemon turns invisible they can only remain invisible for 1d4 minutes. After becoming visible, they cannot turn invisible again for 1d6 minutes.

Magnetic - Electric
Magnetic Pokemon can lightly manipulate magnetic fields. With this, they can repel iron and/or steel or attract iron and/or steel, holding it too their body or pushing it away. Through this magnetic manipulation, they can also feel magnetic fields and discern north. If a Pokemon learns the Move Magnet Rise or Magnet Bomb and does not have the Magnetic Capability, they gain Magnetic.

Materializer -
The Materializer can form rock, normal sedimentary rock, from nothing. It can be anywhere from the size of a pebble to the size of a human sized boulder. For every 2.5 grams, or 5 pounds, of rock formed the Pokemon loses 2 HP. The Rock is formed adjacent to the Pokemon and a Pokemon can only add up to 25 grams, or 50 pounds, of rock over 1 round in place of a Move during their turn in an encounter. If a Pokemon learns the Move Rock Wrecker and does not have the Materializer Capability, they gain Materializer.

Mind Lock - Psionic
Pokemon who have the Capability Mind Lock cannot have their minds read.

Phasing
A Pokemon with Phasing may Shift through Hindering Terrain without their Speed Capabilities being affected. They can turn intangible and move through solid walls or other Pokemon. A Pokemon can remain intangible with Phasing for up to 30 seconds. If a Pokemon remains intangible, they may not perform Moves during their turn.

Shrinkable
A Pokemon with the capability Shrinkable can shrink its size up to 25% of its normal size. While Shrunk, a Pokemon may not perform any Moves. While Shrunked, a Pokemon does not change its weight. To hit a Shrunked Pokemon, you must roll +5 during Accuracy Check. If a Pokemon learns the Move Minimize and does not have the Shrinkable Capability, they gain Shrinkable.

Sinker
Sinker means the Pokemon cannot swim, or move in water. For every round of an encounter the Pokemon is in water that is deep enough for them to stand submerged in, or is submerged in they lose 25% of their max HP. If the Pokemon is lowered to -100% HP, make a Deaths savings roll as usual. If a Pokemon gains a Surface or Underwater capability, they lose their Sinker Capability.

Sprouter - Plant
A Pokemon with the Sprouter capability can rapidly influence the growth of plants and flora around them. Over 5 seconds, a Sprouter can grow a plant 1 meter taller or wider than it currently was. Through the use of Sprouter, the Pokemon can also make plants grow up to 125% of the normal size they would become naturally. For a Pokemon to use their Sprouter ability for 10 seconds, they must sacrifice 1 HP, in place of a Move. If a Pokemon learns the Move Ingrain, Natural Gift, Nature Power, Secret Power or Synthesis and does not have the Sprouter Capability, they gain Sprouter.

Stealth
A Pokemon with the Stealth Capability are excellent at approaching the enemy for an up close assault. While Shifting, unless they purposely want to, Stealth Pokemon do not make any noise. Unless a Pokemon with Stealth has used a Ranged Move during the current round or the round previous, Ranged Moves may not target them if the line of sight drawn goes through Rough Terrain or if the Pokemon is on Rough Terrain.
**Telekinetic - Psionic**

Telekinetic Pokemon can move objects with their mind. They can lift things that are lighter than their level multiplied by 5 pounds or 2.5 grams. They can target objects up to X meters away, where X is the Pokémon’s level. If a Pokémon learns the Move Psychic and does not have the Telekinetic Capability, they gain Telekinetic.

**Telepath - Psionic**

A Telepathic Pokémon can read the minds of people and other Pokémon. If a person is Telepathic as well, the Telepathic Pokémon can project their thoughts to said Telepath. The Pokémon can only read surface thoughts. The Pokémon cannot read the minds of another Pokémon whose Intelligence is two ranks below or two ranks higher than their own.

**Threaded**

If a Pokémon has the Threaded Capability they may replace their turn’s Shift with a Threaded Shift. A Threaded Shift is when a Pokémon targets an object and shoots a strong, thin line of silk, or extends a vine from themselves, and then quickly retracts that silk, or vine, pulling itself towards the object if the Pokémon is lighter than the object or pulling the object towards the Pokémon if it is lighter then it is. The line of silk, or vine, may be up to 10 meters long. If you target another Pokémon or person with a Threaded Shift, the Accuracy Check is 6. You may still use a Move on the same turn you perform a Threaded Shift. If a Pokémon learns the Move String Shot, Vine Whip or Power Whip and does not have the Threaded Capability, they gain Threaded.

**Tracker**

Pokémon with the Capability Tracker have a strong sense of smell that they can use to follow other Pokémon or people. If the Pokémon has smelt whom they want to track in the past day, or one of their personal belongings, they can pursue that prey with a check of 11 or better on d20. To pick up a random scent from nothing, a check of 16 or better on d20 will allow the Pokémon to follow that scent. To pick up a specific scent from nothing, a check of 20 on d20 will allow the Pokémon to follow that scent. A Pokémon may only make these checks once per hour. If a Pokémon learns the Move Odor Sleuth and does not have the Tracker Capability, they gain Tracker.

**Weathershape**

Castform’s appearance changes with the weather around it. It changes to its orange form in Sunny weather, its blue and grey form in Raining weather and its light blue form when it’s Hailing.

**Wired - Electric**

Wired Pokémon have a special relation to electronic devices. They can enter machines and travel through connected electronics through any cords that connect them instantly. While inside machines, they can read data on the machine on a check of 11, Daily. While inside machines, they can take control of the machine on a check of 17, Daily.

**Zapper - Electric**

Pokémon with the Zapper Capability can produce controlled electricity or send electrical currents through various conductive materials. If an electrical device is capable of being recharged, a Pokémon with Zapper can recharge it to full power on a check of 13 or better on 1d20 Daily. If a Pokémon learns the Move Charge, Discharge, Thunderbolt or Thundershock and does not have the Zapper Capability, they gain Zapper.

**Biology:** Wartortle are bipedal, indigo-blue reptiles with brown shells and long, furry tails and ears. To maintain balance while swimming at high speeds, Wartortle move their furry ears and their tails. This tail, covered in rich, thick fur, is so long that it sticks out when Wartortle withdraw into their shell. They use the fur to store air for extended underwater diving. Omnivore.

Pokedex Information
- Height: 7' 7" 2.3m
- Weight: 559.5 lbs. 253.8kg
- Egg Group: Humanshape

Breeding Information
- Gender Ratio: 75% Male 25% Female

Biology:
- Hariyama are very large, mostly grayish Pokémon that resemble sumo wrestlers. They have extremely large orange hands with three fingers. Its head has a pointed, triangular crest and a long blue ponytail in the back. They have a circular pattern of orange coloration on their front. Hariyama has yellow skirt extensions on its waist and large, thick blue legs with orange, two-toed feet. Omnivore.

Nosepass:
- Average Hatch Rate: 10 Days
- Gender Ratio: 50% Male 50% Female

Biology:
- Nosepass are Pokémon composed of hard, angular, bluish rock. Their main body is in the shape of a human head. They have bright red, triangular noses. They also have arms and legs, but don't appear to have any joints and have small, circular holes on the underside. Nosepass has similar circular holes on its sides, and its eyes, covered by dark, somewhat mask-like markings, seem perpetually closed. Terravore.

Pokemon is owned by Nintendo.
Not anyone related to making Pokemon: Tabletop Adventures.
Pokemon is Nintendo’s thing. Give us a break, we’re just playing some tabletop.

This game was made for free distribution.
If you paid anything for this, well, you’re a sucker.
